THE

LABOUR GAZETTE

JULY, 1910.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF JUNE, 1910.

I.—GENERAL SUMMARY.

THE general tone of trade and industry was strongly influenced throughout the month of June by the reports received from the agricultural sections, especially from the North-west Provinces. At the end of the month the consensus of these was favourable. In Western Canada, a period of rapid growth during the opening weeks was succeeded by one of heat and dryness, but rainfalls in the closing weeks prevented permanent or widespread damage. The early date at which seeding was completed and the succeeding cool weather has enabled a good root system to be formed, and cutting is expected to be early. In the other agricultural provinces, and especially in the Maritime Provinces, the general outlook is very favourable, the dairying branch in particular reporting good yields. As a result, the activity which has characterized trade and industry during the past three months was maintained. Manufacturing establishments of all kinds were for the most part working to full capacity and with full staffs. Builders will have a very active season. The lumbering and mining industries were both on a sound basis, with activity more general and more pronounced than for some time past. Railway construction camps throughout Canada were busy, there being a demand for additional men, especially in British Columbia. The immigration movement continued very heavy, the supply being rapidly absorbed. Wages were upward to a more marked degree than at any time during the past three years.

Changes in Wages and Hours of Labour.

The following is a statement by industries and groups of trades of the more important changes in wages and hours of labour, information concerning which was received at the Department of Labour during June, 1910.

Building Trades.—Carpenters at Halifax, N.S., (125) had their wages increased from 27 to 30 cents per hour. Plumbers in the same city (thirty-eight) were advanced from 25 to 30 cents per hour. Bricklayers and masons at St. John, N.B., obtained a scale of 45 cents per hour. Bricklayers and masons at Niagara Falls, Ont., received an advance from 50 to 55 cents per hour. Masons and bricklayers (500) at Montreal, obtained an increase from 40 cents to 45 cents per hour.

Printing.—The eight-hour day went into effect at Chatham, Ont. Printers at Woodstock, Ont., had their hours reduced from fifty-three to forty-eight per week.

Metal trades.—Sheet metal workers (100) at Hamilton, Ont., had their wages advanced from 25 to 32½ cents per hour. Electric workers in the same city also obtained an advance. Moulders at Peterborough, Ont., were advanced to $2.75 per day. Sheet metal workers at Ottawa

The LABOUR GAZETTE, in its accounts of proceedings, abstracts of reports, legal decisions, quotations or other records of matters of concern to labour, is not to be regarded as necessarily endorsing any of the views or opinions which may be expressed therein.—Ed.

(sixty-three) obtained an advance in minimum rates from 27 to 30 cents per hour. Stove plate mounters in the same city (thirty) were advanced 25 cents per day.

Clothing trades.—Custom tailors at Hamilton, Ont., received a 12½ per cent. increase.

Food and tobacco preparation.—Cigar makers (254) at London, Ont., were granted an increase of $1.00 per 1,000.

Railway employés.—Conductors, brakemen, yardmen and baggagemen on the Père Marquette Railway system have received a substantial increase in wages.[1]

Public employés.—Corporation labourers at Ottawa, Ont., (800) were advanced from $1.75 to $1.80 per day of nine hours.

Unskilled labour.—Labourers employed by the Nova Scotia Coal Company, to the number of 300, obtained an increase on June 1, from $1.45 to $1.52 per day.

Interruptions to Industries.

Among industrial establishments, etc., destroyed by fire or through other causes during June, 1910, as reported in the press of the Dominion, the following may be mentioned:—

Nova Scotia.—Railway station and cars at Halifax; tannery, outbuildings, general store and residence at Lyon's Brook, loss, $400,000, 150 men out of employment; hotel at Maccan, loss, $3,000; sawmill at South Maitland loss, $90,000

New Brunswick.—Business block at Parrsboro, loss, $4,000; church at Hillsboro, loss, $21,000; business block at Shediac.

Quebec.—Tenement houses at Bromptonville, loss, $9,000; newspaper office at Coaticook; business block at Cowansville; sawmill at Joliette, loss, $60,000; sawmill at Ferme Neuve, loss, $5,000; bakery at Hull, loss, $2,000; church at Kingscroft, loss, $3,000. At Montreal, trunk factory, loss, $35,000; Herald building, loss, $200,000; tenement houses, loss, $9,000. Factory at Quebec, loss, $9,000; sawmill at St. Cyrille de Wendover, loss, $10,000; hospital at St. Joseph de Lévis loss, $50,000; church at St. Hermas, loss, $3 000. Lumber warehouse at Scotstown, loss, $5,000; stable and residence at Victoriaville, loss, $1,500. Barns at l'Abord à Plouffe and Sutton.

Ontario.—Sawmill at Atikokan, loss, $50,000; boat house at Amherstburg, loss, $1,000; factory at Berlin, loss, $3,500; outbuildings and farm house at Galetta, loss, $2,500; boarding house at Haileybury, loss, $6,000; tinning factory at Hamilton, loss, $2,000, ten men out of employment; lumber yard and skating rink at Hawkesbury, loss, $2,500; hardware store at Huntsville; business block at Kemptville, loss, $50,000; woodworking factory at London; paint factory at London, loss, $20,000 tool and vehicle shop, livery stable and dwellings at Midland; boarding house at Niagara Falls, loss, $3,500; hotel at Orilla, loss $3,000. At Ottawa: drug store, loss, $8,000; mica factory and residence, loss, $6,000; stable and eight horses, loss, $12,000, abattoir, loss $10,000. Sawmill and lumber yard at Powassin, loss, $7,000; hotel and outbuildings at Pembroke; stave mill and cars of lumber at Ruscom station; hotel at Orangeville, loss, $3,000; foundry at Sault Ste. Marie, loss, $30,000, fifty men out of employment; sawmill at Spanish River; brick works at Toronto (partial) loss, $1,300. Forest fires in the neighbourhood of Port Arthur and Fort William cause damages to railway construction camps along the line of the National Transcontinental Railway and to standing timber estimated at over $2,000,000. These fires continued during the last two weeks of the month, and at the close were still burning, but with less intensity. The resulting smoke seriously impeded navigation on Lake Superior.

Manitoba.—Outbuildings and contents at Boissevain, loss, $3,000; warehouse at Dugald, loss, $10,000; three stores at Pilot Mound, loss, $43,000; lumber sheds and contents at Portage la Prairie; bedding factory at Winnipeg, loss, $35,000, 100 hands out of employment.

Saskatchewan.—Twenty buildings destroyed by cyclone at Halbrite; railway station at Watson; school house at Weyburn.

A cyclone in Saskatchewan and Manitoba on June 27, caused heavy damage to property and some loss of life.

Alberta.—Hotel, stables and forty-one horses at Irving, loss, $10,000; telegraph office at Mirror Lake.

British Columbia.—Cannery at Eagle Harbour, loss, $30,000; church, three stores and residences at Port Essington; packing factory at Vancouver, loss, $50,000.

Conditions in the Industries and Trades.

Conditions of employment during June in the several industries and groups of trades throughout Canada, as indicated by reports of correspondents of *The Labour Gazette*, and by information received at the Department of Labour from other sources, may be briefly summarized as follows:—

Agriculture.

Interest centered on the progress of the growing crops during June, especially in Western Canada. Throughout May the weather was dry and backward, but a fall of snow later afforded a supply of moisture. This was followed during the first half of June by rising temperatures and growth was exceptionally rapid. Wheat in Alberta has already headed out and will be ready for cutting by the third week in July. Later in the month, anxiety for lack of rain was felt in several sections, and some damage was reported, especially in southwestern Manitoba. In the closing week, however, general rainfalls relieved the situation and at the end of the month the outlook was generally favourable. Little or no damage from frost has occurred. Farm labour was already in active demand,

[1] See report of St. Thomas, Ont., correspondent.

though the active immigration movement supplied the needs in most sections. The number of extra labourers required to harvest this year's crop is estimated to exceed 26,000. Agricultural conditions in Ontario and the Eastern Provinces are regarded as very favourable. Hay will be heavy and will be harvested earlier than usual. Hot weather in southern Ontario caused a diminution in the yield of small fruit. Wheat was downward and meat prices also declined. Corn and coarse grain followed, the chief cause attributed being the promise of good crops.

In the dairying branch, the flow of milk was heavy owing to the uniformly excellent condition of the pastures. The output of butter and cheese was heavy.

The *Census* and *Statistics Monthly* for June estimates the total area of field crops in Canada at 30,554,200 acres, or 2,359,300 acres more than last year, and 4,951,050 acres more than in 1908. The largest increase has taken place in the acreage devoted to wheat, which now amounts to 9,294,800. It is stated that replanting has been necessary to a less extent than usual.

The June Bulletin issued by the Government of Saskatchewan pronounces the condition of the crop satisfactory at the close of May, the cool weather having developed a good root system.

According to reports received at the Ontario College of Agriculture, the crop outlook from that Province is encouraging. Seeding was early and was followed by cool weather. Clover is a very heavy crop, but fall wheat is patchy. Germination took place under favourable conditions and the yield is expected to surpass that of last year.

Sessions were held by the Saskatchewan Elevator Commission at different points in the Province. The executive of the Saskatchewan Grain Growers' Association presented their views with regard to the establishment of a system of Government owned and operated elevators.

The Commission appointed by the Government of Manitoba to investigate the condition of live stock market facilities at Winnipeg, submitted its report during June. It recommends the establishment of public abattoirs and market to be conducted as a public utility by the Government of the Province.

Fishing.

Favourable reports were received from the coastwise and deep sea fisheries of the Maritime Provinces. Good catches of cod, shad and halibut were taken. Herring and mackerel were fairly abundant. The lobster catch was fair during the first half of the month and improved towards the close. Canners were obtaining good prices. New Brunswick harbour fishermen made fair returns. On the Great Lakes coarse fish were taken in fair quantities. The season at Lake Winnipeg has been more active than usual and it is expected that the prescribed limit will be reached earlier than last year. An inspection of the Lake Winnipeg fisheries was being made by the Commission recently appointed by the Dominion Government. In British Columbia, the run of spring salmon was light until the closing week of the month when some good catches were made. Preparations are under way for a normal run of sockeyes. The question of the rating of boats for the northern canneries was under discussion between the Dominion and Provincial Governments during the month.

Lumbering.

Driving conditions in New Brunswick were improved by rainfalls and many logs hung up during May were brought safely to the mills. Wages paid to stream drivers in this Province ranged from $2.25 to $2.75 per day; exceptionally good men received $3 per day. Low water interfered somewhat with the getting out of logs in Quebec and Ontario, but conditions improved in this respect, towards the end of the month. In British Columbia both mills and camps were very active. Some scarcity of labour was experienced in the mountain section. A steady improvement in the foreign lumber trade continued and prices were firm, hemlock in Ontario having shown advances. The industry throughout Canada is regarded as on a more favourable basis than for some time past.

TABLE SHOWING STATE OF EMPLOYMENT IN

This table is based largely on the reports of the correspondents of *The Gazette* as published in the present issue several trades and industries throughout the Dominion. The table has reference only to the amount of employment headings in *The Gazette*. In tabulating the information in question, the terms employed are divided into two groups, the very active, (2) quiet and very quiet.

An Order-in-Council has been passed setting aside the eastern slope of the Rocky Mountains, from the international boundary northward as far as the fifty-fourth parallel of latitude, from settlement or occupation, to be administered as a forest reserve and for the protection of the water supply. The total area affected is about 14,400 square miles. The width of the area varies from 10 to 50 miles.

Mining.

The month was one of steadily increasing activity throughout almost the whole of Canada. In the Nova Scotia collieries, outputs were increased, marked activity prevailing in the several districts, with the exception of Springhill, where strike conditions were still operative, though at this point also there was an increase in output, Activity has also been pronounced in the metalliferous mining districts of the Province and in New Brunswick. The annual examinations for coal miners' certificates were held in Nova Scotia. In Quebec, experienced miners were in demand in the asbestos and copper mines of the Eastern Townships, and mica factories were steadily increasing their output. Activity prevailed in the Cobalt and tributary camps. The collieries of Alberta and British Columbia were working steadily, with trade prospects favourable and gradual expansion promised. Very favourable reports were received from the metalliferous camps of the interior of British Columbia, the output showing a heavy increase compared with the previous year.

Manufacturing.

There was little change compared with the preceding month, the general situation being one of pronounced activity. Industrial establishments in nearly all branches and localities were running to full capacity and in many cases were working overtime. The scarcity of female help continued. Textile workers were also in active demand.

The annual statement of the Dominion Iron and Steel Compnay, Limited, gave the following as the output for the year:—

The output for the year was as follows:—

Pig Iron	255,161	Gross	Tons.
Steel Ingots	302,118	"	"
Steel Rails	146,967	"	"
Steel Wire Rods	81,581	"	"

The balance remaining at credit of Profit and Loss Account, after providing for depreciation, etc., and for accruing interest and dividend, amounts to $2,058-225.55. The Company's plant and property have been maintained in their usual state of efficiency; the output for the year, was not aided in any way by the additions undertaken since the last meeting. Of the additions referred to, the coke ovens are nearly completed, the blast furnace, open hearth furnaces and power plant are well under way, and contracts have been let for the new finishing mill. The additional coke ovens will increase the efficiency of the existing plant, as the present blast furnaces are capable of a larger output with an ampler supply of coke.

The organization of the Dominion Canners, Limited, with head office at Hamilton, and with an authorized capital of $12,500,000, of which $5,700,000 has been issued, was announced. The merger took over the following factories:—

Aylmer Canning Company, Aylmer; Brighton Canning Company, Brighton; Kent Canning Company, Chatham; Delhi Canning Company, Delhi; Dresden Canning Company, Dresden; F. R. Lalor Canning Company, Dunnville; Grimsby Canning Company, Grimsby; Aylmer Canning Company, Hamilton; Simcoe Canning Company, Hamilton; Imperial Canning Company, Kingsville; Lakeport Preserving Company, Lakeport; Warehouse, Hamilton; Delhi Canning Company, Niagara-on-the-Lake; A. C. Miller, Picton; W. Boulter & Sons, Picton; Port Hope Preserving Company, Port Hope; Simcoe Canning Company, Simcoe; Simcoe Canning Company, St. Catharines; Ontario Pure Food Company, St. Catharines; Kent Canning Company, Sandwich; Strathroy Canning Company, Strathroy; Lowery Brothers, St. Davids; Miller & Company, Trenton; Bowlby Brothers, Waterford; Belle River Canning Company. Belle River; L. N. Schenck & Company, St. Catharines; A. B. Taylor Canning Company, Bloomfield; Wellington Packing Company, Wellington; West Lorne Canning Company, West Lorne; Leamington Canning Company, Leamington; Amherst Canning Company, Amherstburg; Aylmer Condensed Milk Company, Limited, Aylmer; Belleville Canning Company, Belleville; Bloomfield Packing Company, Bloomfield; Farmers' Canning Company, Limited, Bloomfield; Burlington Canning Company, Burlington; Hillier Preserving Company, Hillier; Jordon Station Canning & Preserving Company, Jordan Station; Napanee Canning Company, Napanee; Niagara Falls Canning Company, Niagara Falls; Old Homestead Canning Company, Picton; J. H. Wethey, Limited, St. Catharines; St. Thomas Canning Company, St. Thomas; Tilbury Canning Company, Limited, Tilbury; Lakeside Canning Company, Limited, Wellington.

Railway Construction.

Reports received during the month were of pronounced activity in connection with the various large contracts under way throughout Canada. Labour was in very active demand, especially in British Columbia.

The chief consulting engineer of the National Transcontinental Railway stated during June that the work was going ahead well, the chief difficulty in the way of early completion of the line being a scarcity of labour and the heavy work in the mountain section. West of Winnipeg, 915 miles of track have been laid and of these 820 are being operated.

The mountain section is 836 miles long, of which 438 miles are under construction, track-laying being in progress for the first 100 miles. The annual report of the Commissioners shows that sixty-three per cent. of the grading of the whole line is finished and forty-five per cent. of the bridging. Five hundred and twenty-one miles of track were laid during the year ended March 31, 1910.

A contract was signed in the last week of June between the Nova Scotia Government and the Halifax and Eastern Railway Company, under which a railway is to be built from Dartmouth to Guysboro and a branch from New Glasgow to Country Harbour. The contract specifies that the whole undertaking must be finished by September 1, 1913.

Large orders were placed during June by the Grand Trunk Railway Company for rolling stock.

General Transport.

Railway and water traffic was heavy and workmen in both branches were well employed. Canal traffic was very heavy.[1] Railway earnings showed large increases over the corresponding period of 1909.

Traffic through the Sault Ste. Marie canals during May, 1910, was as follows:—

	U.S. Canal.	Canadian Canal.	Total.
Vessel passages No...	1,587	1,271	2,858
Reg'strd Tonnage Net	3,646,521	3,585,163	7,231,684
Freight—			
East Bound Net tons	2,062,314	4,707,390	6,769,704
West Bound Net tons	1,096,653	661,929	1,758,582
Total freight Net tons	3,158,967	5,369,319	8,528,286

The annual meeting of the Canadian Street Railway Association, held at Montreal, Que., June 9 and 10, was the most largely attended in the Association's history.

The annual report of the Montreal Harbour Commissioners, recently issued, shows a large increase in revenue. The sum of $878,570 was disbursed on capital account.

The Trades.

Building.—The activity noted during April and May was continued during June, the number of permits issued and the value of buildings contracted for in nearly all the large centres, showing a large increase compared with the corresponding period of 1909.

Metal and woodworking.—Industrial establishments were very active and there was a good demand for labour throughout Canada. Electrical workers, linemen and coopers were especially busy.

Printing.—The allied trades had a good month. The activity of the previous months of the season being well maintained.

Clothing.—Journeymen tailors, garment workers, hat and cap makers were very active. Dullness, due to seasonal causes, prevailed in the boot and shoe factories.

Textile.—Cotton and woollen mills were busy; in the former a scarcity of help was reported in some localities.

Leather.—Trade conditions were active, and tanners, curriers and leather workers were well employed.

Food and tobacco preparation.—There was a strike among cigar makers at London, Ont., but otherwise the output of cigars, tobacco, etc., was well maintained.

[1] See report of Montreal correspondent.

Miscellaneous.—Barbers, hotel and restaurant employés had a good month. The tourist traffic though late in opening, owing to prevailing cool weather, promises well. Laundry workers were busy. Domestic help was very scarce.

Unskilled labour.—This class was well employed in nearly every section of Canada, and in many localities there was a demand for additional workmen.

Canadian Trade and Revenue.

Foreign trade.—During May, 1910, the total value of imports into Canada entered for consumption was $38,821,963, compared with $28,159,077 in May, 1909. For the first two months of the present fiscal year ending May 31, 1910, the total value of imports entered for consumption was $69,688,950, compared with $50,760,648 in the corresponding period of the past fiscal year. The total value of domestic exports during May, 1910, was $18,347,432 compared with $15,810,207 in May, 1909. The domestic exports for the two months ending May 31, 1910, were $32,855,113, compared with $27,673,004 in the corresponding months last year. During May, 1910, there were increases in exports of the forest, the fisheries, agriculture and decreases in products of the mine, animals and their produce and manufacture. The grand total of Canadian trade for May, 1910, was $59,187,972, compared with $44,911,736 in May, 1909.

According to reports of Trade Commissioners received at the Department of Trade and Commerce there is a market in Peru for British Columbia ties (sleepers), lumber, railway equipment, wheat and wood pulp.

Imperial trade.—The reports of the Trade Commissioners of the Department of Trade and Commerce, Canada, show trade openings in Great Britian and the different Dominions of the Empire as follows:—For Canadian fish in British Guiana, Ste. Lucia, Grenada and St. Vincent; for carriage supplies in South Africa; for salted mackerel, British Columbia canned salmon of the best quality, and Nova Scotia lobsters in Australasia. The text of the Australian Customs' declaration affecting Canadian shippers was published in the weekly report of the Department of Trade and Commerce for June 13, 1910. More frequent visits from Canadian commercial travellers to Barbadoes was recommended. The importance of Bristol as a distributing centre for Canadian products is mentioned The directory of foreign importers published in the Departments' weekly reports gives the names of importers in South Africa, St. Kitts, Antigua, Mexico, Shanghai, British Guiana and Havana. Trade treaties with Belgium and Italy were completed on much the same basis as the Franco-Canadian agreement.

Domestic trade.—The heat wave caused an increase in the demand for summer wear and the favourable crop reports imparted a buoyant tone to general trade. The market for heavy materials was very active. Groceries and hardware were moving freely.

The bank statement for May showed a decrease in call loans and a growth in current loans. Deposits continued to increase but circulation showed a shrinkage compared with the preceding month. Bank clearings have shown large gains compared with the corresponding period of last year.

The annual report of the Home Bank showed a large growth in deposits and total assets. Three new branches have been opened during the past year.

At the thirty-fifth annual meeting of the Imperial Bank of Canada a large increase in deposits and circulation was reported. The statement of the Bank of Montreal for the half year ending April 30, shows a decrease in profits. The Quebec Bank's annual statement was favourable. Winding up proceedings have been begun in connection with the Monarch Bank.

Notes.

The annual conference of Canadian Charities and Correction was held at Guelph, Ont.

The annual meeting was held of the Montreal branch of the Canadian Manufacturers' Association.

Further sittings were held by the Commission appointed by the Government

of Saskatchewan to inquire into the public ownership of grain elevators.

The Retail Merchants' Association of Ontario and the Wholesale Grocers' Guild held their annual meetings at Kingston, Ont., and Montreal, Que., respectively.

An Order-in-Council was passed by the Government of Ontario appointing Chief Justice, Sir William Meredith, a Commissioner to consider the question of workmen's compensation for injuries. The full instructions to the Commissioner are as follows:—

To inquire and report as to the laws relating to the liability of employers to make compensation to their employés for injuries received in the course of their employment which are in force in other countries, and as to how far such laws are found to operate satisfactorily, and to cause to be prepared and report a bill embodying such changes in the law as in his opinion, should be adopted.

A conference of forty-four emigration societies, called by the Colonial Institute, was held at London, Eng., for the purpose of discussing the question of emigration and promoting plans for diverting to British colonies the stream of emigration now going elsewhere.

The Board of Control of Montreal, Que., has recommended that provision be made for the education of the children and for the maintenance of the widow of Constable O'Connel who lost his life while making an arrest, in addition to the benefit from the Police Benevolent Fund.

The first general meeting of the shareholders of the Dominion Steel and Coal Corporation was held at Montreal, Que., June 17, 1910, for the election of officers and directors.

The International Aviation Association Limited, has been incorporated with a capital of $100,000 and headquarters at Montreal, Que., for the purpose of manufacturing and dealing in aeroplanes, balloons and other devices and machines for travelling in the air.

Under an Act passed at the recent session of the New Brunswick Legislature the following have been appointed as a Board of Public Utility Commissioners for the Province: D. M. L. Vince, D.C.L., K.C., Woodstock, chairman; G. O. D. Otly, K.C., Hampton; O. M. Melanson, Shediac; with F. P. Robinson, Fredericton, as secretary.

An official statement has been handed out regarding the recent merger of various steel manufactures, the head office of which will be in Hamilton. The consolidation includes the Hamilton Steel & Iron Company, the Montreal Rolling Mills Company, the Canada Screw Company, the Dominion Wire Manufacturing Company, Limited, and the Canada Bolt & Nut Company. The officials summarize the advantages as follows: Reduction in cost of administration; economies to be effected in the purchase of supplies and materials; reduction of selling, distribution and transportation charges; increased efficiency by specializing the manufactures of the individual plants, and the avoidance of unnecessary competition. The merger is capitalized at $25,000,000.

According to the Montreal Municipal Gazette, the number of dwellings in Montreal is 75,122. It is further shown in an abstract of the property assessment rolls for last year, that the highest rental paid is $4,000 a year, which is accredited to but one dwelling. As regards the homes of workingmen the following information is given: For a rental of $150 a year there are 3,069 dwellings; for a rental of $130 a year the dwellings are 3,769; for a rental of $120 the dwellings are 5,752; and for a rental of $100 a year the dwellings number 7,466, which is the highest number in the list. For a rental of $90 a year the number of dwellings is 6,076; and for a rental of $80 a year the dwellings number 6,170. Rentals of $60 a year have 4,980 dwellings, and of $50 a year there are 2,446 dwellings. There is one dwelling reported to be worth a rental of but $10 a year, and two other shacks valued at $20 a year.

A noteworthy feature of the current discussion of the subject of workmen's compensation for injuries, was the meeting on June 10, in Chicago, Ill., of the first International Conference on Industrial

Diseases ever held on this continent. Delegates designated by the Governors of various states, representatives of trade organizations, members of labour commissions in various states, representatives of universities, manufacturers' associations, and trade unions, took part in the discussion. The President of the Chicago Tuberculosis Institute presided, and the programme included addresses by many well-known authorities on labour legislation and industrial hygiene, followed by discussions. Among the subjects dealt with were, phosphorous poisoning in the manufacture of matches, lead poisoning, the conservation of human resources, the importance of industrial hygiene, and the problem and extent of industrial diseases. The statement was made that the money lost in the United States in one year due to preventible occupational diseases is nearly one billion dollars.

The annual convention of the Associated Boards of Trade of Western Canada was held at Brandon, Man. A general discussion of the labour problem in the West, with particular reference to its bearing upon the harvest, was a feature of the convention. The following resolution was adopted:

"Whereas, owing to the increased acreage of land under cultivation in the Western Provinces this year, and the excellent crop prospects that prevail at the present time, the number of harvest hands required will be greatly in excess of that required in any previous year, and, whereas, the sources from which the supply has been procured heretofore are rapidly diminishing.

"Therefore, be it resolved that the associated Boards of Trade of Western Canada request the Dominion Government and the Provincial Governments of Manitoba, Saskatchewan and Alberta to co-operate with the railway companies through the agents of the latter and with the labour exchanges in the older countries to procure the supply of labour necessary to assist in harvesting the grain crop.

"Further—that the associated Boards request the Dominion Government and the Governments of the three Western Provinces to each appoint one or more parties who shall furnish in good time, reliable information as to the number of harvest hands required and to assist in a systematic and equitable distribution.

"And further—That the Dominion Government be requested to modify the existing immigration laws so as to allow harvest hands to enter the country without unnecessary monetary restrictions."

II. REPORTS OF LOCAL CORRESPONDENTS.

SYDNEY, N.S., AND DISTRICT.

Mr. John Moffatt, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions were very active during June and business all over the district was brisk. A more settled feeling now prevades industry and a more confident tone is expressed by all business concerns as to trade stability in the future.

The steel and coal trades were active, the demand for steel products and coal being very good. Transportation facilities are at their best during this season and large quantities of coal were shipped by water into Quebec and Montreal territory. Steel products were also sent out in large cargoes while iron ore, limestone and dolomite is being stocked in the steel yards. All factories, foundries and allied trades of the coal and steel industry were active.

Woodworkers and building trades were very busy.

The Sydney Steel plant worked up to its full capacity in nearly all departments. The new additions to the plant are going ahead with all possible speed. Repairs on the Sydney Mines steel plant were carried on throughout the whole month of June and will be continued well on in July.

The coal industry was very active, some of the Dominoin collieries being placed on double shift. Large outputs are being obtained and with the product of the New Dominion collieries on the Victoria areas, record days in the coal output will soon become common. Work on the opening up of three collieries, two of which are on the Victoria areas at New Waterford and one at Birch Grove, Port Morien, was begun late in the month, and just as soon as prospect work has been completed, the slopes of No. 16 Dominion will be opened up, and work on No. 17 will follow shortly afterwards. The coal heaps of this Company

have been untouched and are being kept for use later on in the season.

The output of the Nova Scotia Steel Company was much the same as in May, the increased output over the first six months of 1909, being upward of 70,000 tons. This Company in response to a request from the Provincial Workers' Association granted all the low paid colliery labour an increase of five per cent., beginning on June 1. Wage adjustments of other classes were also made.

Transportation by rail and water was heavy. A night train between Sydney and Halifax was put on early in the month.

The building trades in Sydney and in the colliery towns were active. There is much building going on in the district at present but as the labour supply is good, the work will all be completed before the end of the season.

Wholesale and retail trade was normal.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—While weather conditions have been fine and favourable to the growth of the hay crop, yet it was rather cold for roots and vegetables and these have not advanced as they should have done, seeing the season came in so early.

Fishing.—Fish was not as plentiful as desired, although fair catches of cod, shad and halibut were obtained. Lobster catches were fairly good.

WESTVILLE, N.S., AND DISTRICT.

Mr. T. Hale, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market in June was active Some of the collieries had some off days and some men left the district. The output and shipments were about equal to the corresponding month of 1909.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The crops were looking well. It is expected that the hay crop will be above the average and will mature some weeks earlier than usual in this district. Many of the old farms in this district have lately changed hands, the former owners retiring and selling out to new farmers chiefly of British extraction.

Lumbering.—Active conditions prevailed, the hauling of deals to shipping points being the chief occupation. The sawmills were active.

Mining.—This industry was active, the mines, with few exceptions working full time, with expectations of the continuance of the same. The Acadia Coal Company has acquired additional areas.

CONDITION OF PARTICULAR TRADES.

Building was very active in some parts of the district, especially in New Glasgow, Stellarton and their neighbourhoods. The printing trades were active. Business was fair with tailors and good with boot and shoe workers. The food and tobacco preparation group had a good month. Barbers reported trade fair, hotel, restaurant and laundry workers and stenographers were active. The transport trades were active. The supply of unskilled labour was not equal to the demand for good steady men in some parts of the district.

HALIFAX, N.S., AND DISTRICT.

Mr. A. J. Smith, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during the past month has been dull. As far as the building and kindred trades are concerned, it has been the dullest for some years. Much of the work now in hand consists of the large buildings began some time ago. The principal contract is for the excavating and foundation work on the new Young Men's Christian Association building. There are two other good-sized structures contemplated—the new St. Edward's church and the new Home of the Guar-

dian Angel, but it is doubtful if these will be begun this season. There are several small brick and wooden buildings going up, but none, (with the exception of one $8,500 dwelling) exceed $4,000 in value.

Under an Order-in-Council of the Provincial Government passed on the thirteenth of June, 1910, a charter has been granted the Halifax and Eastern Railway Company, Limited. The incorporators are John B. Bartram, Toronto, Ont; Thomas B. Fogg, Toledo, Ohio, U.S.A.; George H. Raw, London, Eng.; Sigmund Hirch, London, Eng.; The objects of the Company, among others, are the construction of a railroad between Dartmouth, Halifax county, to Guysboro, in the county of Guysboro, with such branch lines as the Governor-in-Council thinks fit. The capital stock of the Company is $3,000,000, divided into shares of $100 each. Considerable land, it is understood, has already been bonded in the town of Dartmouth.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Average crops are indicated both in fruits and vegetables. Some late June wholesale quotations are: Flour, Royal Household and Five Roses, $6-$6.20; Ontario blends, $5-$5.30; rolled oats, $4.75-$4.85; feed flour, $1.70-$1.75; oats, 48c.-50c.; cornmeal $1.50-$1.55; bran, $20.50-$21.50 per ton; hay, $12-$16 per ton; peas, whole, $4.65-$4.75 per 196 lbs; split, $5.40-$5.50; beans, prime, $2-$2.05; hand-picked, $2.10-$2.15.

Fishing.—Local fishermen report but small catches; but halibut, cod and haddock were more plentiful than in May. Mackerel were not taken as steadily as usual for June, although some stops of 600, 1,500 and 3,000 were secured, besides miscellaneous catches of smaller quantities.

Mining.—Gold reports from the Musquodoboit region are bright. Some good specimens have been secured near the surface, and many prospectors are interested. The silver mines at this section also indicate profitable returns.

Manufacturing has been above the average.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, stonecutters and builders' labourers were dull. Lathers and plasterers were fairly active. and painters and decorators had a good month. Plumbers, gasfitters and electrical workers were fairly busy. Blacksmiths and horseshoers were dull, as were shipwrights, caulkers and boilermakers. Printers, pressmen and bookbinders had a fair month. Tailors were well employed. Barbers were busy. Butchers, meat cutters and laundry employés were busy, and railroad clerks were fairly busy, as were freight handlers, maintenance-of-way employés and longshoremen. Unskilled labour was quiet.

AMHERST, N.S., AND DISTRICT.

Mr. A. D. Ross, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

A steady improvement has taken place in labour conditions outside of the strike centre at Springhill. Every one who desires employment can find it. The Rhodes Curry Company is adding an extensive warehouse to its already large plant for the accommodation of local trade. All the industries are adding to their working staffs, and industrial conditions show an all-round improvement. There has been a decided betterment in the building trades, and several new dwellings are under construction. That the tendency is upward is evidenced by the fact that during the first five months of 1910, freight receipts show an increase of over $30,000 as compared with the receipts for the previous year. The Custom receipts also show a marked increase. The wholesale traders report business up to normal, with collections good. There have been no changes in wages effecting any large number of employés although on the whole, wages are about ten per cent. lower than last year in the building trades.

In Springhill the strike continues. The strike has now lasted for eleven months, and has had a depressing effect all over the country.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—June was cold and backward, heavy rainfall seriously retarding seeding, but the crops are well advanced. A heavy frost occurred in the middle of the month doing some injury to small fruits. The hay crop is very promising. Farm produce continues to command high prices.

Fishing.—The lobster catch has been fair, and the output of the factories commands good prices. Large catches of herring are reported all along the coast.

Manufacturing.—All local industries have been busy, working to full capacity and with orders on hand sufficient to keep them busy for months ahead. The situation is very encouraging.

Mining.—The strike at Springhill still continues, but the Company is steadily increasing its output. In May the output of the mines was less than 300 tons. This month the Company has been averaging over 400 tons. A number of miners from Europe have been brought to Springhill. In the other collieries work has been active, and miners well employed.

Lumbering.—The cut was not up to the average, and hence there is a falling off in shipping, but prices are good.

CONDITION OF PARTICULAR TRADES.

During the past month the buiding trades have been well employed. There has been no great demand for bricklayers or masons, but carpenters and joiners have been exceedingly busy. Painters report men scarce and work abundant. In the metal trades, men have been well employed. Moulders have had abundant work. Machinists and engineers have had steady employment. Boiler makers have been busy; in fact all lines in the metal trades have had a busy month. Nearly all classes of the woodworking and furnishing trades have had steady employment, car builders are working overtime and carriage and wagon makers report a good month. Printers have had steady work. In the clothing trades, business is rather dull, due to the season of the year. Garment makers have been exceedingly busy, but some shops will close for a fortnights' holidays. Boot and shoe makers were very busy. Bakers and confectioners also report business improving and men well employed. Trunk and bag makers were busy, with some demand for additional help. Furriers have little work. Unskilled labour has been well employed.

CHARLOTTETOWN, P.E.I., AND DISTRICT.

Mr. F. J. Nash, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market in June differed little from that in May, supply and demand being well balanced. Throughout the Province, a number of Government contracts, such as the building of the Elmira Branch Railroad, including stations and other structures, and the building of several wharves, gave employment to a considerable number of men. In Charlottetown, work in a number of residences was carried on. The month was favourable for outdoor operations and considerable progress was made. Wholesale and retail merchants report a good month for trade, and relations between employer and employés were harmonious.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The end of the month found seeding completed, and the pressure of work somewhat relaxed. The immigrants that came out from England, found ready employment on the farms and are proving satisfactory. A number of parties who came out to buy land, are still waiting to secure suitable properties. The weather has been exceptionally cool, but favourable for a good hay crop. The cheese season opened auspiciously, the number of boxes boarded at the first meeting being the largest yet received at the beginning of a season.

Fishing.—The lobster fishing which had been fair the first and middle of the month, showed an improvement towards the close. In other lines the catch was good, and the industry on the whole promises to be, at least, up to the average.

Railroad construction and employment.—A feature of the month was the visit of the Board of Management of Government Railways, and an inspection of the Prince Edward Island Railway was made. They were waited on by a number of delegations, the principal request being an improvement in the timetable between Summerside and Charlottetown. One of the trains that had been diverted west was restored to Charlottetown again for three days in the week.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters and joiners, lathers and plasterers, painters and paper hangers were busy. Plumbers, gas and steamfitters, stone cutters, and builders' labourers were active. Other skilled trades were well employed. There was a fair demand for unskilled labour.

MONCTON, N.B., AND DISTRICT.

Mr. J. C. Graves, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During June activity pervaded the various branches of labour and commerce in this locality. Conditions were nearly equal to those of the corresponding seasons of 1908 and 1909, when exceptional circumstances existed. Building operations were fairly active, and though not to such an extent as last season, yet a large number of houses are being constructed and much repair work and remodelling done. Corporation work on permanent sidewalks, macadamizing streets, and sewer extensions is being carried on on an extensive scale and furnishes a large amount of employment. Construction work upon the new public wharf has commenced and about twenty men are employed. Beside the Intercolonial Railway Company which employs about 2,000 men, the largest industrial concerns in operation are the Dominion Cotton Mill, 250 hands; the Record Foundry and Machine Company, 250; the Humphrey Woollen Mills, 150; the Lea Woodworking Company, fifty-five; the Marvin Biscuit factory, forty-five; the Abrams Machine Shop, thirty; the New Brunswick Wire Fence Company, twenty; the stave and head factory, thirty; and the Lewisville brick works, fifteen. A canvas of all these industries showed that they are all in active operation and with one exception, the stave and head factory, running with either the same complement of operatives as last season or with increased staffs. A Greater Moncton Club has been organized with the aim to advertise the city's possibilities and promote its industries. The City Council has also adopted the Compulsory Education Law, to go into effect at once and a truant officer has been appointed to see after its enforcement. The summer timetable on the Intercolonial Railway went into effect on June 19, and with it the placing on of trains Nos. 3 and 4, between St. John and Pt. du Chêne and 199 and 200 (Ocean Limited) between Halifax and Montreal. The Maritime Oil Fields Company Limited is actively at work on the development of the mineral oil and natural gas deposits in lower Coverdale, near Moncton. Eleven wells have so far been sunk and each has given satisfactory evidence of the existence of both natural gas and mineral oil in abundance. From well No. 5 the estimated daily yield of gas is 1,000,000 cubic feet and from well No. 8, 5,000,000 cubic feet. Several of the wells have given 20 barrels of crude oil daily and 800 barrels are already stored. Additional tanks to accommodate the output are being constructed. Plans for the piping of the gas to Moncton and its installation here are being made. Wholesale trade continues in a progressive and satisfactory state, while retail trade is up to the average. The Marvin Biscuit Company has extended the Satur-

day half-holiday privilege to its operatives. The demands of the Shepody lightermen for an increase of rates has been met by the shippers and work is going on satisfactorily.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The very humid conditions of the month were favourable to the growth of crops, especially hay which looks excellent. Grain and roots are flourishing. A successful sale of imported shorthorn and Ayrshire cattle and Clydesdale horses was held in St. John, June 9, and good prices realized. A considerable number of immigrant farmers and boys have arrived and have been placed in various parts of the Province by the Department.

Fishing.—Mackerel and lobster catches along the shore were fair and fishermen busy.

Lumbering.—Heavy rains aided in bringing out drives hung up during May. The scale of lumber cut upon Crown lands last winter is estimated at 280,000,000 feet, an excess of 75,000,000 feet over the cut of 1909.

Mining.—At the Drummond mines fifty men are at work and it is expected that this number will be increased to several hundred in a few months. The spur line from the mines to Nepisigint Junction on the Intercolonial Railway is completed, much machinery has been placed and an early commencement of extensive operations is anticipated.

Railroad construction and employment.—The total estimates for the Grand Trunk Pacific Railway Company during May, in New Brunswick, were $230,910. In view of the advanced state of the work it is not expected that the monthly estimate will much exceed this amount. About eighty per cent. of the road has been completed. This does not include the steel superstructures and bridges, but it is expected to have this section virtually completed by the end of the year. The Moncton and Buctouche Railway has added a new engine and passenger coach to its rolling stock and made considerable station improvements. Work upon the Intercolonial Railway diversion at Nelson and Chatham has commenced.

CONDITION OF PARTICULAR TRADES.

Bricklayers were quiet, carpenters and joiners active and in fair demand, painters and decorators very busy and in demand, plumbers steady, stonecutters active, and builders' labourers in fair demand. In the metal engineering and shipbuilding trades craftsmen were reported busy. Woodworkers, upholsterers, carmen and shingle weavers were busy. Printers, pressmen and bookbinders were busy. Journeymen tailors were active as were garment workers and milliners. Bakers and butchers were active and ice drivers were busy. The leather trades were active. Barbers were busy, also clerks and stenographers. Delivery employés, hotel, restaurant and theatre employés were active, and laundry workers had steady work. Railroad conductors, engineers, firemen, trainmen, trackmen, teamsters and expressmen were busy. Unskilled labour was in good demand and at fair wages. The local supply was sufficient, however.

ST. JOHN, N.B., AND DISTRICT.

Mr. W. H. Coates, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During the month of June the labour market continued brisk, although not much new work was under construction. This has been noticeable among plumbers, consequent upon the Board of Health compelling property holders to install sanitary closets. Printers, too, have been very busy, overtime having been resorted to in some establishments.

Messrs. T. H. Estabrooks, Alexander Wilson, Stanley E. Elkin, W. I. Fenton (of St. John), and John Galey (of Milford), are seeking incorporation as the Wilson Box Company, Limited, with a capital stock of $50,000, and have purchased the Dunn Pork Factory at Grand Bay.

Bank clearings for the four weeks ending June 23, were $5,915,045, and for the corresponding period last year, $5,367,760, being $547,285 greater in 1910 than in 1909, and $285,446 in excess of

the four weeks ending May 26, of the current year

During the month of May there were deposited in St. John branch of the Dominion Savings Bank the sum of $85,466.25. The withdrawals amounted to $105,883.11.

The stone quarries at Spoon Island were sold at auction in St. John, on June 4, and brought $3,700. J. H. A. L. Fairweather was the purchaser.

The annual meeting of the St. John Street Railway Company was held on June 7. The report of the directors showed a net profit, after providing for the interest on the bonds and all other charges, of $54,479.85, out of which two half-yearly dividends of three per cent. were declared, amounting to $48,000, leaving a balance of $6,479.85, which was transferred to profit and loss account.

At a meeting of the Bricklayers and Masons' Union, held on June 6, it was announced that at St. John contractors employing union labour had agreed to grant the request for 45 cents an hour.

A Building Trades' Council has been organized in St. John, and at a meeting held on June 17, the following officers were elected: Jacob S. Brown, Sheet Metal Workers' Union, president; James McGirr, Mason's Union, vice-president; James Sugrue, Carpenters' Union, secretary-treasurer.

The usual Saturday half-holiday for hardware clerks started on June 4.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—At the Crown Land office Fredericton, on June 7, three vacant lots of Crown Land were sold at public auction. A lot of 57 acres of northwest Miramichi to William Forsythe; a lot of 170 acres at Skiff Lake, to Hugh Smith; an island in Baker lake, containing a third of an acre was bid for Honourable John Costigan. The lots all sold at upset prices of $1 per acre, except the last named lot, which sold at $10.

Lumbering.—The Smith Lumber Company,on the south side of the Meduxnakeag, is employing between twenty-five and thirty men. Since January last over 2,000,000 feet of lumber have been cut, and there are yet to cut over 2,500,000 feet. There is a cooperage plant in connection with the mill, which is turnnig out large numbers of barrels daily.

A big lumber and property transfer involving an expenditure of over $200,000, was completed when the Eastern Canada Lumber and Construction Company, Ltd., a New York corporation, took over the immense Prescott property in Albert County. The property includes 20,000 acres of valuable timber lands, large sawmill, storehouses, dwelling, five employés' tenement houses, barns and a general store, doing a business of over $50,000 a year. The new corporation has also purchased 3½ miles of branch railway connecting the sawmill with Harvey wharf.

CONDITION OF PARTICULAR TRADES.

From active to busy conditions prevailed in the various skilled trades. Unskilled labour was well employed.

DISTRICT NOTES.

Fredericton.—The City Council decided on June 7, to have two blocks paved with tarvia. The tax rate for 1910, will be $1.50. Last year's tax rate was $1.44, and two years ago it was $1.50. This year's assessment shows an increase in valuation of assessable property in the city.

NEWCASTLE, N.B., AND DISTRICT.

Mr. James Falconer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Conditions in the labour market during June were satisfactory, there being work for all who desired it. The lumber mills ran full time and had a good supply of logs. The drives were late in getting into the booms, the weather being dry in the beginning of the month, but

abundant rain later on corrected this condition. Considerable building was being done, some new residences being erected and the Baptist Church undergoing repairs valued at over $3,000. The Miller Extract Company closed its doors, a large number of men being thereby thrown out of employment.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Cold weather and heavy rain together with some frost retarded growth and the potato crop suffered.

Fishing.—Fishing was fair all round; salmon were plentiful and catches of shad and mackerel were good.

CONDITION OF LOCAL INDUSTRIES.

Full employment was reported in the building, metal, engineering and shipbuilding trades, conditions being good in general, in all the skilled trades.

QUEBEC, QUE., AND DISTRICT.

Messrs. E. Little and *P. J. Jobin, correspondents,* reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

An improvement over last month characterized the month of June, although in the first half of the month there was some loss of time with outside workers owing to wet weather. In the shoe trade the month was, as usual, dull, but orders were being received which will relieve the situation. The demand for unskilled labour improved, but the supply was still in excess of the demand.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have had trouble seeding as the spring was cold and wet. Should weather conditions permit of its being properly saved, the hay crop from present appearances, promises to be a heavy one.

Lumbering.—The large sawmills were all running full time. Log driving is about over. On the other hand some of the small sawmills, especially the cedar shingle mills, are closed down owing to a decline in prices.

Railroad construction.—A large gang of men were actively employed at Sillery in construction work for the Transcontinental Railway. The work of constructing the new freight shed at Point-à-Carcey wharf, to replace the one destroyed by fire last fall, was progressing steadily.

Civic improvements.—The Road Committee of the City Corporation will spend $162,000 in civic improvements and street repairs.

CONDITION OF PARTICULAR TRADES.

Stonecutters were active, bricklayers, masons, carpenters, joiners, painters and builders' labourers were busy; the other building trades were quiet. Electrical workers and linemen were quiet; the balance of the metal trades were busy. Bookbinders were active and printers and pressmen busy. Journeymen tailors and garment workers were busy, but glove makers and boot and shoe workers were quiet. Cigar makers reported quiet conditions, as did tanners and curriers. Hotel and restauarnt employés were active, and laundry workers busy. Steamboat men were busy. Longshoremen were active, but ship labourers were dull. The supply of unskilled labour was in excess of the demand.

SHERBROOKE, QUE., AND DISTRICT.

Mr. H. Logie, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Every branch of labour has been well employed during June. Skilled and unskilled labour have been in demand. So far as the latter is concerned, the demand is greater than the supply.

During the latter part of the month the newly organized Sherbrooke Street Railway & Power Company started operations on the power plant. Some

fifty men are employed, and more would be taken on if available. The Company is erecting a power house for the street railway and other industries along both banks of the Magog river. The surplus at present, they estimate will be 1,200 horse power, and this will be transmitted to other concerns at not less than $15 per horse power. Some $250,000 will be expended on this development alone, so that it will be seen that for the summer months employment will be given to a large number of workmen.

The machine shops are busy, and the orders in hand indicate that employment will be given for some time to come.

The wholesale and retail trades report business good.

The valuators will finish their labours by the middle of next month, and taking the figures already given it would indicate that there will be a large increase in this direction. With the valuators go a special clerk for the purpose of taking a census of the population. Approximately it is figured that the population of Sherbrooke will be, at least, 16,200. This is a considerable increase over that of the previous year.

There has been no change in the rate of wages during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Agricultural work is well advanced. The cry is that sufficient help cannot be secured. Several farmers started haying at the end of the month, about ten days earlier than usual. The crop promises to be larger than the average. Other crops are looking well.

Manufacturing.—All branches of the manufacturing industry are fully employed, and factories are running full time.

Mining.—The mining industry is in full operation, and with some of the larger concerns, especially at the Eustis Copper mines sufficient men cannot be secured. This Company has imported a number of workmen, and they are proving desirable citizens.

There is little or no *railway construction* in this section, although a number of men are employed in general repair work. The printing trade was busy, and extra men were advertised for. Journeymen tailors and garment workers were busy. Bakers, confectioners, butchers, and icemen were busy. Cigar makers were active. All miscellaneous trades were active during the month. Railway employés and expressmen, cabmen and teamsters had a good month. Unskilled labour was in good demand.

CONDITION OF PARTICULAR TRADES.

All branches of the building trade are busy. Machinists, moulders and iron workers are active. Clerical workers, linemen and jewellery workers are busy. The woodworking trades are busy. Carriage workers are active.

DISTRICT NOTES.

Farnham.—The by-law in regard to the Dominion Safe & Vault Works was passed without a poll being asked for. The Company will manufacture vaults, safes, flying cabinets, safety deposit boxes and various kinds of office furniture and furnishings, besides several other lines of a similar nature. The town is to grant exemption from taxes (except school) and free water for a term of ten years, and agrees to furnish power at the rate of $20 per horse power. It is expected that operations will be begun within a very short time.

Lake Megantic.—After a two days' poll the voting on the by-law, granting a bonus of $10,000 to the Lake Megantic Furniture Company has resulted in 156 votes being cast—150 for and six against, leaving a majority of 144 in favour of the by-law, out of 310 eligible votes in the town.

THREE RIVERS, QUE., AND DISTRICT.

Mr. Joseph J. Ryan, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

All classes of labour were fairly employed during June. Employment is being given to a large number of labourers

by the Railroad Company, and the City Corporation.

Work is progressing in connection with the Canada Iron Corporation's Plant.

All the lumber mills have started sawing logs, giving employment to several hundred men. A number of buildings are being erected. Commercial activity was fair during June, both in wholesale and retail trade. Rates of wages and hours of labour remained the same, and there were no strikes or lockouts.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers completed seeding in the early part of the month, having been delayed by rain during May. They were kept busy selling strawberries during the last part.

Fishing was rather quiet.

Manufacturing.—Factories reported a good month, and one of the glove companies is about to double its plant.

Railroad construction.—The Canadian Pacific Railway Company is giving employment to a number of labourers repairing the line and completing the St. Maurice Valley line between Shawingan Falls and Grand Mere.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters and joiners, lathers and plasterers and all others in the building trades were active. The metal, engineering and ship repairing trades were also active. Jewellers report a good month. All woodworking and furnishing trades were very active. Printers, pressmen and bookbinders were very busy. Journeymen tailors, garment workers and glove makers had more work than they could do, and boot and shoe workers were fairly active. Bakers and confectioners, butchers and meat cutters and ice drivers were active. Cigar makers and tobacco workers could not complete orders this month. Barbers, clerks, stenographers, delivery employés, hotel, restaurant and theatre employés and laundry workers were very active. Railroad conductors, locomotive engineers, railroad telegraphers, trainmen, switchmen, trackmen all reported a good month. Freight handlers and specially steamboat men and firemen were very active, ship labourers, and longshoremen had plenty to do. Cab drivers, hackmen and carters reported a very good month, as did teamsters and expressmen. There was a good demand for unskilled labour, but the supply was nearly equal.

DISTRICT NOTES.

The St. Maurice Valley Railway is expected to be in operation between Shawinigan Falls and Grand Mere early in July.

SOREL, QUE., AND DISTRICT.

Mr. J. A. Chênevert, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The number of workmen employed in the Government shops during June has not diminished. It will probably be increased, as new dredges will be built for the purpose of deepening the channel to 35 feet. Orders are coming in well in the various industrial establishments, and in several places men are working nights, two or three times a week. Wages remain at $1.25 for unskilled labour and from $1.90 to $3.00 for joiners and iron and steel workers. Navigation companies are doing a good business and their earnings are larger than at the same time last year.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—In spite of the rain in May and the first part of June, crops look well. Hay is plentiful and of a good quality; pastures are in a splendid condition; there is plenty of milk for the butter and cheese factories, and the season is very promising. Market prices were as follows:—

Butter, 25c. a lb.
Eggs, 22c. to 25c. a dozen.
Maple syrup, $1.20 per gallon.
Potatoes, 25c. to 30c. per bushel.

Pork, 17c. to 18c. a lb.
Beef, 12c. to 17c. a lb.
Veal, 80c. to $1.00 per quarter, 12c. to 13c. a lb.
Lamb, $1.00 to $1.25 per quarter, 15c. to 16c. a lb.
Spring chickens, 75c. per pair.
Fowls, $1.00 to $1.25 per pair.
Vegetables are plentiful at high prices.
Wild strawberries, $1.00 per gallon.
Garden strawberries, $1.50 per gallon.

ST. HYACINTHE, QUE., AND DISTRICT.

Mr. Victor Phaneuf, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Conditions in the outside trades were very active during June, but the local supply was more than sufficient to meet the demand. The month was a very active one in industrial establishments. Both shoe factories were working full time. The iron industry had a good month. There was considerable activity in the leather industry, and a busy fall is expected. Sash and door factories were employing full staffs. Organ workers were very active. The garment factory had a very active month. Many were employed on the improvements at the cathedral. Wholesale and retail trade was good. Banks reported easy collections.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Agricultural conditions are favourable. Hay looks well; a heavy crop is expected throughout the district. Fruits and vegetables find ready purchasers. The demand for farm labourers was satisfactory, but was well met.

CONDITION OF PARTICULAR TRADES.

The building trades were more active than in May. The month was good for carpenters, painters and plumbers, and dull for bricklayers, masons, stone cutters and building labourers. The metal, woodworking and printing trades were very active, as were journeymen tailors and garment workers. Bakers and confectioners were active. Butchers had a good month, and ice handlers were well employed. Activity prevailed in the miscellaneous trades. Railroad employés, cab drivers, hackmen and carters were very active. Unskilled labour was very active.

ST. JOHNS AND IBERVILLE, QUE., AND DISTRICT.

Mr. A. D. Pepin, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general labour market is active, several large buildings being in course of erection. The Canadian Trenton Pottery Company is building a large three-storey addition, 100 x 50 feet, together with a wing 80 x 40 feet, and two furnaces, which will double its capacity. Sash and door factories are active, with many orders ahead. A new company has entered into negotiations with the purpose of locating here and promises to employ 300 men.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are busy marketing produce; prices of dairy products, eggs and meat are going up.

Fishing.—Fishing is active and good prices prevail.

Railroad construction.—The Canadian Pacific Railway Company is still employing a large number of men improving the roadbed.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters and joiners were all very active, and in demand. Lathers and plasterers, painters and decorators reported a good month. Plumbers and steamfitters reported a fair month. Stone cutters and building labourers were very active, and in demand. The metal trades reported a good month for the season. Woodworkers of all classes had a busy month. The printers and allied trades were well employed. Journeymen tailors, garment workers, hatters and glove makers

were well employed. Bakers and confectioners, butchers and meat cutters and ice handlers were all active. Tanners and curriers, leather workers and sadlers reported a good month. Barbers, clerks, stenographers, delivery clerks, hotel, restaurant and theatre employés and laundry workers were all very active. Railway conductors, engineers, firemen, operators, trainmen, switchers, maintainance-of-the-way men, freight handlers, steamboat employés, ship labourers and longshoremen reported a good month. Cab drivers, hackmen, carters, draymen and expressmen reported a fair month. Unskilled labour was well employed.

MONTREAL, QUE., AND DISTRICT.

Mr. G. Audet, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

A report from the Superintendent of Buildings shows the value of the building permits issued during the first five months of the year, almost twice as much as for the same period of last year, as follows:—

	1910	1909
January	$ 136,560	$ 99,745
February	235,800	183,400
March	587,239	283,400
April	1,647,235	1,016,856
May	1,580,615	1,107,790
Total	$4,187,509	$2,691,191

Traffic on the Lachine Canal, since the opening of navigation, has been heavier than ever before. It was stated at the Canal Office that never at this time in past years had the canal statistics shown such an increase. Transportation of grain, for instance, on the canal, in May, was as follows: Wheat, 30,280,095 bushels; corn, 181,094 bushels; oats, 1,887,285; rye, 101,225; buckwheat, 10,547; flour, 95,836 bags; eggs, 6,640 cases; butter, 604 cases; cheese, 15,461 cases; coal, 19,506 tons for the harbour and 51,865 for the canal; linseed, 57,169 bushels.

Since the Government has approved the plans of the Montreal Harbour Commissioners, much activity prevails on the wharves. About a thousand men are employed.

The receipts of the Montreal Street Railway Company for May were:—$370,234.13, and expenses $199,616.79, leaving a surplus of $170,617.34, or an increase of $22,425 over the corresponding month of 1909.

CONDITION OF PARTICULAR TRADES.

All the skilled trades were from active to busy. Unskilled labour was active.

HULL, QUE., AND DISTRICT.*

Mr. E. E. Cinq-Mars, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour was in more active demand in the mills and in the different trades, than in the preceding month. Exceptional activity was reported in the cement industry. Business was fairly good, although merchants were not satisfied with the result of their collections. No change in rates of wages of unskilled labourers has occurred. In the sawmills and other industrial establishments a larger number of immigrants are employed than usual. These work here and there for whatever wages they can obtain, according to their respective ability. Good Canadian labour however, received the same rate as this time last year. There was no unrest in the labour market.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers in this district are well satisfied with prospects.

Manufacturing.—There is no probability of the Canadian General Explosive Company ever resuming business in Hull, after the fatal explosion of May 8, last. The absence of this industry will affect only about half a dozen workmen. The

* In the report from Hull, Que., published in the May issue, it was stated that the MacLaren Company, of Buckingham, Que., had disposed of its business to a syndicate which would further develop the business. This statement was incorrect, no transfer of the kind having taken place.

Company has settled all claims for loss of life or limb, and negotiations as regards loss of property are nearing completion. The E. B. Eddy Company has allowed its employés Saturday evenings off, during the summer months.

OTTAWA, ONT., AND DISTRICT.

Mr. W. Gilchrist, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Opportunities were numerous for employment during June. The Civic Corporation increased its staff of day labourers by a couple of hundred over the previous month, and also over the corresponding month of 1909. The city has 800 men employed on water mains, roadway repairs, sidewalks, pavements, sewers, etc. Another 150 men are engaged with contractors who are doing street paving for the city. As a consequence of this activity in the municipal field, the Ottawa Gas Company, Ottawa Electric Company, and Municipal Electric Commission, and Bell Telephone Company have a few hundred extra hands laying conduits, erecting poles and such other work as can be done advantageously in advance of the corporation improvements. Building is progressing on several of the largest structures ever planned for commercial purposes in Ottawa. May's building permits totalled $651,150, being $23,000 more than in May, last year. The brisk demand for labourers is reflected in the reports of city charity and benevolent institutions. The dependent element is almost nil.

The City Council increased the minimum wage of its labourers from $1.75 to $1.80 per day of nine hours. Men engaged in trench work are to receive a greater increase, amounting to $1.90, $2 and $2.25 per day, at the discretion of the engineer. The advance in wages will mean an expenditure by the city of $5,000 or $6,000 additional in wages this year. In many instances, contractors have been compelled to follow the city's lead with respect to wages, in order to get help.

The Ottawa Separate School Board adopted a new salary schedule, on June 10, providing an annual increase of $75 per year in teachers' salaries, the first increase to go into effect on September Sixty-seven teachers will benefit. A minimum of $400, and a maximum of $700 are established for teachers holding only necessary qualification. The minimum is $500 for those with three years' experience. The lowest salary for principals holding second class certificates is $1,000 a year, and the highest $1,400. For assistant principals with second class certificates the maximum salary is $1,100 and the minimum, $900, with an increase of $100 per year. The degree of B.A. will entitle any teacher to an extra $100.

Employers of sheet metal workers signed an agreement with the International Sheet Metal Workers' Union, Local 47, providing a minimum wage of 30 cents an hour, from July 1 to January 1, 1911, and 35 cents an hour from the latter date till July 1, 1912. The demand of the metal workers was for 35 cents an hour. The pay in force has ranged between 27 and 35 cents per hour.

The Moulders' Union made a demand on two local manufacturers of stoves for an advance in the minimum scale from $2.50 to $2.75 per day. Both firms refused to make the increase, and one discharged eleven union men. The other shop discharged four union men, whom it claimed were not worth the wage increase. Nearly all the vacancies created in both shops by dismissals, were filled with new hands. An increase in wages, amounting to ten per cent., was made in both shops.

Several of the large stores have arranged to close Saturday afternoons, during July and August, including those who did so last year. A movement is under way among clerks to have the Saturday noon closing made more general.

Two of the largest Ottawa bakeries amalgamated under the name of Slinn-Shouldis Limited, capitalized at $200,000. The Company will erect a new plant.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Rains in the middle of June helped the crops, and the outlook

for large yields is favourable. Farmers have sold lambs in great numbers at record prices. All meats are more plentiful on the Ottawa market, but prices continue stiff. The berry crop was large. Dairy produce is plentiful.

Lumbering.—Sawmills are favoured with a constant supply of logs, and the season's production of lumber is ahead of the corresponding date last year. Export of assorted box lumber, spruce and telegraph poles improved in the last month. Fifty barges of all kinds of lumber were loaded near Ottawa, for United States points.

Mining.—Ottawa mica factories became busier. One factory with 150 employés was visited by fire, but business was so brisk that, in two days, the staff were at work again.

CONDITION OF PARTICULAR TRADES.

Contractors are looking for men in nearly every branch of the building trades. Electrical workers and linemen are very busy. One large factory is curtailing the output of stoves, and for a while, at least, reduced demand for moulders, stove mounters and certain metal workers. Iron workers in general are busy. Woodworking and furnishing trades are steadily employed. Factories making stair works, clapboards, etc., are especially busy. Printers are very busy. The clothing trades are active. A steady business is being done by bakers, butchers and ice drivers. The leather trades are quiet. The demand is slight for clerks and stenographers. Hotel employés are fairly busy. The scarcity of domestic help is very marked. Activity prevails in every branch of transport. Unskilled labour is much in demand.

KINGSTON, ONT., AND DISTRICT.

Mr. William Kelly, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of June was dull in Kingston. This was occasioned, in great measure by the long continued strike of carpenters. Not only was the carpenters' trade affected, but the masons and helpers were also injured. The bad influence will also tend to indoor work for the winter. Not more than $1,200 worth of building was represented in the permits issued during the first week in June. Buildings that were contemplated are not likely to materialize this season, as contractors are so far behind on other work. The award made by the Board of Arbitration, which ordered the men back at the old wage-rate, is not acceptable to many of the men and they refuse to abide by it.

During the early part of June, the traffic on the river and among the Thousand Islands was backward on account of the continued cold weather. On the other hand, the railways and manufacturers were active. During the month arrangements were made for the leasing of several barges to be operated by Forwarders' Limited, between Kingston and Montreal.

The annual military camp for this district was held successfully during the month. It is said that fully $25,000 is expended here as a result of the twelve days training.

The binder twine plant of the Dominion penitentiary has been in operation during the past year. Capitalists are now negotiating for the purchase of the plant and stock. A cold storage plant is to be installed at the local Dairy School. A new engine was placed on the Bay of Quinte Railway during the month.

The Kingston Trades and Labour Council has sent a resolution to the Legislature of Ontario, asking that the assessment Act be amended so that municipalities may tax improvement values at a lower rate than land values, business assessments, incomes and salaries, to be classed with improvement values, and the difference in rates, in each case, to be determined by the municipalities; to the end that a more equitable adjustment of rates be made possible.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are busy haying, and report an exceptionally large crop, with a dearth of farm help. Large wages are being offered.

Fishing was active during the month.

Lumbering was quiet.

Manufacturing, mining, railroad construction and other industries were very active.

CONDITION OF PARTICULAR TRADES.

The building trade was comparatively quiet during the month, but the metal, engineering, shipbuilding, woodworking and other trades were very active.

Printers, clothiers, bakers, ice cutters, butchers, cigar makers, tanners, curriers, barbers, broom makers, clerks, hotel, restaurant, theatre and laundry workers and all lines of transportation, together with unskilled labour, reported an active month.

BELLEVILLE, ONT., AND DISTRICT.

Mr. H. G. MacDiarmid, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour of all classes has been in active demand in this city and district during June. No necessarily idle men could be found. All branches of industries were very active, and in many shops employés worked night and day. There was a very active demand for unskilled labour as many local as well as private improvements were in progress. The Dundas street sewer gave employment to a large number of men. The Canada Cement plant worked night and day with a full staff of men. The rolling mills and horseshoe mill were running to full capacity, while the Belleville Hardware Company and the brass and steel factory could not keep up with orders. Many men were employed putting down cement walks. All branches of skilled labour were well employed at good wages, a number of new buildings being in course of erection. Work will soon start on a new round house for the Grand Trunk Railway, which will cost $100,000. Transportation by both boat and rail was very brisk. Banks report money plentiful. Wholesale and retail merchants had a very busy month. There was no unrest in the labour market and no changes in wages or hours of labour.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers look for a bountiful crop, all grains, hay, vegetables and fruits looking well. Cheese offerings were large.

Fishing was active, large catches being made of bass, pike, eels and lake salmon.

Lumbering was active in the northern part of the county.

Manufacturing was very active in all branches.

Mining.—A large number of men were engaged in this industry, several mines being in operation.

Railroad construction and employment.—Many were employed extending the Central Ontario Railroad while a number of surveyors were laying out the route of the Canadian Northern Railway.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, lathers and plasterers, painters, paperhangers, plumbers, gas and steamfitters and builders' labourers report a busy month. Iron moulders, iron workers and helpers, machinists and engineers, electrical workers, linemen, brass workers, blacksmiths, boilermakers, shipwrights, horseshoers and metal polishers were all employed. Woodworkers, upholsterers, varnishers and polishers, carriage and wagon makers had a busy month. Coopers report a very active month on cheese boxes and apple barrels. Printers, both job and news, were very active, there being not a single member of the craft idle. Journeymen tailors had to work overtime in many shops to keep up with the orders. Bakers and confectioners, butchers and meat cutters, ice drivers and cigar makers were all active during June. Harness makers reported a busy month.

Barbers, clerks, stenographers, delivery employés, hotel, restaurant, theatre employés and laundry workers were active. Railway men of all classes were very busy. Steamboat men, steamboat fire-

men, ship labourers and longshoremen were well employed. Cab drivers, hackmen, carters and teamsters had a very active month. Unskilled labour was in good demand.

PETERBOROUGH, ONT., AND DISTRICT.

Mr. J. Arthur Sharp, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market was very active throughout June. There was continued activity in the building trades. All branches of industry have become more active and the outlook is for a very busy season. The Healey Falls Syndicate, which has acquired certain rights of various interests in the power privileges at that place, have purchased the interests of the Peterborough Light and Power Company in connection with lighting by electricity and gas. They have also acquired the Auburn dam and power privilege and will begin a new concrete dam and power house. The same Company has purchased the Burleigh Falls' power privileges, and the Peterborough Street Railway and will build several miles of new railway in the city this year. The city has decided to pave two streets. A by-law to sanction the expenditure of $30,000 for sewers, was passed. The labourers employed by the Construction Company on the Quaker Oats Company's new warehouse, went on strike for 25 cents more per day. They were receiving $1.75. About sixty of them are out. A number of finishers also left work on account of the strike. A new joint stock company, capitalized at $25,000 has been organized, known as the Ontario Marble Table Advertising Company, with factory and offices at Peterborough.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are very busy. Crops are promising.

Lumbering.—All the local mills were running to their full capacity.

Manufacturing.—All factories were running full time. The moulders who were out on strike for a minimum rate of $2.75 per day have returned to work, having been granted the increase.

Railway construction.—Surveyors and trackmen are very busy. A large gang is working on the roadbed between Midland and Belleville strengthening bridges and cutting down grades. They will also lay heavier rails.

CONDITION OF PARTICULAR TRADES.

All branches of the building trades were actively employed and activity also prevailed in the metal trades. Electrical workers and linemen were very busy. Woodworkers were well employed, also upholsterers and polishers. The printing trades were fairly active. Journeymen tailors were fairly well employed. Bakers and confectioners, butchers and meat cutters were very busy. Leather workers and saddlers were active. Railway and street railway employés, expressmen and teamsters had a good month. There was a good demand for unskilled labour.

DISTRICT NOTES.

Port Hope.—The town has let a contract to R. Curram, of Orillia, for the construction of cement walks at 9⅓ cents per foot and 7 cents for tile drains. The total amount will be $9,861.

Lindsay.—Horn Bros are putting in a new boiler and engine.

TORONTO, ONT., AND DISTRICT.

Mr. Phillips Thompson, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

June was a busy month in all departments of industry, with plenty of work for both skilled and unskilled labour. Manufacturers continued to complain of the scarcity of female help in the lighter branches of manufacture. The building trade was very brisk with some disputes over wages, which, however,

were not of a serious or protracted character. Building permits were issued during May to the number of 2,148, representing an approximate value of $1,870,350, as compared with 1,871 permits representing $1,887,532 in May, 1909. The Canadian Pacific Railway Company has bought the Government House property on King and Simcoe streets for $800,000, on which an office building and freight sheds will be erected.

Contracts have been let for the erection of the central section of the Western Hospital which will be completed this year, at a cost of about $50,000.

The new head office of the Bank of Toronto, for which plans are being prepared to be erected on the corner of King and Bay streets will be four storeys high, of marble or granite and of fireproof construction throughout.

The Bell Telephone Company is erecting a telephone exchange on Bismarck Ave., of reinforced steel construction to cost $40,000.

A new hydraulic dredge launched from the shipyard of the Polson Iron works, for the Great Lakes Dredging Company of Port Arthur, is believed to have the largest capacity of any dredge in America. Its gross displacement is 800 tons and it is 120 feet in length by 40 feet in width with an engine of 1,500 horse power.

The new ferry boat *Trillium* built by the Polson Iron Company, for the Toronto Ferry Company was launched on the eighteenth. It is a steel double-ended boat, 150 feet in length and cost $75,000.

The National Iron Works is preparing plans for extensive new docks to be built of concrete on deep piling providing for a depth of water from 26 to 28 feet, the work on which will be begun at an early date.

The Board of Education has let contracts amounting to about $50,000 for the new Brown school, and $60,000 for a new school at Earlscourt. The Norway school is to be enlarged.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were all very busy with satisfactory harvest prospects. Both fall and spring wheat crops were looking well and promised a good yield. A good fruit crop was also anticipated, but rain was badly needed toward the end of the month.

Manufacturing.—Activity continued in nearly all lines, with orders coming in well. Many additions to plants are being undertaken.

The Toronto Engraving Company will erect a new building five storeys high of reinforced concrete. The Pinchin Johnson Company, Limited, of London, Eng., manufacturers of paints and varnishes are erecting a four-storey brick factory on Carlaw avenue. The Standard Sanitary Manufacturing Company is putting up a six-storey warehouse on Royce and Lansdowne Avenue at a cost of $45,000. J. L. Nichols & Company, publishers, are erecting a two-storey brick factory on Spadina avenue, to cost $20,000.

CONDITION OF PARTICULAR TRADES.

All branches of the building trade were busy excepting for some slight interruption caused by strikes. A strike of the lathers was ended on the sixth by the signing of an agreement for one year providing for a graded scale of wages. The members of the Builders' Labourers' Union struck on the first demanding an increase in the rate of wages from 25 cents to 28 cents per hour. Many of the employers conceded the advance.

The metal, engineering and shipbuilding trades were all busy. Jewelers and silversmiths had plenty of work. Furniture workers, cabinet makers, coopers, upholsterers and carriage and wagon workers had steady work. Piano workers had a good month. The printing and allied trades were well employed. Custom tailors were active. Garment workers fair but not so active as in May. Boot and shoe workers, hat and cap workers and whitewear operators were busy. Bakers and confectioners, butchers, brewery employés and cigar makers had continuous employment. Leather workers were active. Railway and street

railway employés, expressmen, teamsters, sailors and longshoremen had plenty of work. Hotel and restaurant employés, laundry workers, clerks and salesmen were active, especially during the latter part of the month. Unskilled labour was generally well employed.

NIAGARA FALLS, ONT., AND DISTRICT.

Mr. Hewlett Green, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Reports of industrial activity and business prosperity continued during June All working people were employed and on several occasions there were urgent demands for unskilled male and female labour for short periods.

Contractors on the Niagara boulevard engaged many local men and teams and brought a number of foreign labourers from elsewhere. The contracts now undertaken total $95,000. All the work must be finished by July 1, 1911.

The Bell Telephone Company commenced the erection of a large new exchange building.

A new hotel was opened.

Foreign immigrants examined by Dominion officers here during the last fiscal year numbered 8,034. Of this number 2,260 were adjudged undesirable and refused admission to Canada.

Fifteen residents of the Canadian city of Niagara Falls, but employed in offices of the Lehigh Valley Railway at Niagara Falls, N.Y., were affected by a six per cent. increase of wages on that road.

Trackmen of the Grand Trunk Railway struck for an increase of wages from $1.50 to $1.65 per day. After a few days the Company offered to pay $1.60 per day and the men returned to work. All the trackmen are foreigners. The railway has had difficulty in getting sufficient men for this class of work. The gangs have been recruited by canvassing among the passengers on passing immigrant trains.

The Ontario Power Company made good progress with its construction work and it seems probable that the force of unskilled labourers will be reduced before the end of July.

The transforming stations and transmission lines of the Ontario Hydro-Electric Power Commission were being rushed to completion by large forces of men. Power was turned on part of the station equipment for testing purposes. Transmission to Hamilton and Toronto will be commenced in July.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers and fruit growers were very busy. Strawberries—first of the fruit crops—were plentiful and pickers were in great demand throughout the district. All small fruit crops will be heavy. Late cold and wet weather destroyed a portion of the tomato plants in the fields and this crop may be short.

Manufacturing.—Factories were generally active, though the shirt factory reduced its staff of girls. Female labour was advertised for by the corrugated paper and fruit canning factories and a laundry. Metal working, corset, chain and trap and shredded wheat factories were particularly busy.

Railway employment was steady.

CONDITION OF PARTICULAR TRADES.

The building trades continued active. All crafts were well employed, except stonecutters and there were short demands for more painters, fitters and carpenters. All the metal trades were busy. Foundry men and linemen were in demand. Electric light and power lines are being extended and special illuminations in connection with the carnival involved much wiring. The haberdashery factories were somewhat less active. Fruit canning factories demanded all the female help they could get for the strawberry season. They will give much employment till October. Shredded wheat employés were busy as were also bakers and butchers in retail trade. The tourist season opened early making more work for hotel and restaurant employés. Laundry workers were in demand. Office and sales people were well employed. Railway employment was

good. Passenger traffic was quite heavy, but freight was lighter, except the live stock class. The Grand Trunk-Wabash stock-feeding yards here were being enlarged to double their former capacity. Trackmen were busy. Lake and canal traffic was rather quiet. Electric railway men were busy, new crews being engaged on some lines. Cab and auto drivers were active. Teamsters were in demand. Unskilled labour has been in demand, but this demand may fall off in July.

DISTRICT NOTES.

Fort Colborne.—A contract for harbour improvements to the amount of $74,000 was let. Good progress was made in erecting the new flour mill. Contract for the cork factory buildings was let. They are to be finished in August and will cost $40,000.

ST. CATHARINES, ONT., AND DISTRICT.

Mr. Jas. A. Wiley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Activity was general in the labour market for June, labour being well employed. Very few idle hands were to be found. The building trades continue with sufficient work on hand to keep all busy. Among other contracts for building let during the month was one for an addition to the General and Marine Hospital which will be proceeded with at once, the contract price being $46,000. Civic improvement work will give employment for some time to come. The canning factories were busy on small fruits and are rapidly adding to their staff of hands. They will be up to full strength soon. The Crocker Wheeler Company manufacturers of electric machines, lately located in the city have more than realized expectations and the contracts secured will keep them busy for some time to come. The A. W. Gardner basket factory, a new industry, is employing seventeen hands, and is looking for more help. Their output will be a million baskets this season.

Business, wholesale and retail, was reported good. The Wednesday half-holiday for clerks has been granted again this year for July and August. This effects the entire retail trade of the city, with few exceptions. It is much appreciated by the employés, and is growing in favour with the merchants who believe good results are obtained thereby.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers and fruit growers were busy. Small fruits, particularly strawberries, engaged the attention of the later. The crops this year were heavy owing to the abundance of rain during April and May, followed by very warm weather.

Manufacturing.—All mills and factories were busy.

CONDITION OF PARTICULAR TRADES.

The building trades were busy. All branches of the metal and engineering trades were from active to busy. The woodworking and furnishing trades were well employed. The allied printing trades were busy with conditions of employment good. Journeymen tailors and boot and shoe workers were busy. Bakers, confectioners, butchers and meat cutters, ice cutters and drivers, cigar makers and tobacco workers were active. Tanners, curriers, leather workers, saddlers, and trunk and bag makers were active. The miscellaneous trades, viz., barbers, clerks, stenographers, delivery employés, hotel and restaurant employés, and laundry workers were active. All lines of transportation were active and conditions of employment good. Unskilled labour was well employed, conditions being better than for any previous month of the year.

DISTRICT NOTES.

Port Dalhousie.—Labour was well employed. Initial steps have been taken to provide a water system for the city by means of artesian wells.

Merritton.—All mills and factories

were running full time. Stores closed for the Wednesday half-holiday during June, adding that month to July and August this year.

Thorold.—All labour was well employed.

HAMILTON, ONT., AND DISTRICT.

Mr. P. Obermeyer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The active conditions of last month were maintained throughout June, and the demand for additional labour was even more urgent. The building trades were very busy, and there is still a large amount of work in sight. Building permits were over double in value those for June, 1909, and several large permits have been held over, owing to contractors being filled up with contracts. Work has commenced preparing the ground for the Oliver Chilled Plow Works buildings. Bank clearings continued to show increases per week of from $200,000 to $500,000 over the same periods in 1909. Real estate transactions were very active the new residence districts opened up this year showing many transfers. The brisk demand for labour was accompanied by several efforts on the part of workmen to improve their working conditions. On June 13, about sixty longshoremen struck for an advance of 5 cents per hour, over the 25 cent rate. Their places were filled by others at the old rate. Electrical workers, who had made a demand for 35 cents per hour, settled on a basis of 30 cents. The matter was adjusted without a strike. Brewery workers went on strike June 30, to enforce a new agreement, providing for an increase of $1.50 per week, and time and one-half for overtime, a fifty-five hour week in summer, and fifty hours in winter. About seventy-five men are involved which comprises practically all the brewery employés in the city.

The demand for unskilled labour was very brisk, but a large number of labourers came to the city during the month, which kept the supply pretty well up to requirements.

Fruit growers in the district had difficulty in getting enough female labour to harvest their crops of strawberries, and the canning factories were in the same predicament for help to prepare the fruit for canning. Now that the schools have closed, more help will be available.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The extremely hot and dry weather brought the strawberry crop on with a rush the latter part of the month. The fruit is of excellent quality; the price averaged 8 cents per box. Rain is badly needed for the raspberry crop, which has not reached maturity yet. Vegetables of all kinds are reported to be in good condition, and prospects are for a large yield.

Manufacturing. — Factories continue busy. The International Harvester Company is still adding to its plant. A $65,000 warehouse was in course of construction during the month. The Oliver Chilled Plow Works Company is almost ready to start construction work on the large tract of land acquired for its works in the northeast section of the city. Brick yards are very busy, supplying material for the immense amount of building contruction under way and in prospect. The Baynes Carriage Company has increased its capital stock from $250,000 to $375,000. The Wood-Vallance Hardware Company is extending its warehouse capacity.

CONDITION OF PARTICULAR TRADES.

The exceedingly active conditions in all lines of industry render it unnecessary to particularize, as nearly every concern in the city is working to its capacity. Cigar makers were unusually busy, many extra men having been put to work. The building trades were busier than in the same month in several years. Unskilled labour was in demand, both in the city and on the surrounding farms and market gardens. Owing to the demand the wages of this class of labour are slightly higher, 15 cents per hour being found hardly sufficient to keep

employés at work. City departments are finding it difficult to get and keep employés. Resignations have occurred on the city fire department, and the chief advises a raise in the wage schedule of about $5 per month. The question is still under consideration by the committee in charge.

BRANTFORD, ONT., AND DISTRICT.

Mr. J. C. Watt, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally was well employed during the month, which was busier than May, and the corresponding month of last year. The building trades were busier than for some years. Factories also were very busy, large additions being made, and there being a demand for more men.

The Cockshutt Plow Company is erecting large additions, as follows:—

Warehouse	6 storeys	60 x 150 ft.
Engineering Department	4 "	64 x 65 "
Machine shop and erecting rooms	3 "	60 x 106 "
Casting storage and paint shop	3 "	60 x 105 "
Pattern storage	3 "	40 x 50 "
Foundry	3 "	70 x 215 "
Engine gang, structural shop	1 "	50 x 192 "
Blacksmith shop	1 "	70 x 154 "
Iron storage	1 "	100 x 128 "
Shear shop	1 "	32 x 100 "
Cupola House		32 x 50 "
Transformer station		12 x 14 "

About 500 more men will be employed.

The new factory for the Crown Electric Company is nearing completion; the plant of the Ontario Brass and Copper Company of Toronto, will be operatd by the Crown Company here.

The employés of the Verity Plow Company, and the Massey-Harris Company observed the first Saturday half-holiday on June 4.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers and market gardeners were very busy, the former report a scarcity of competent farm labourers.

Manufacturing.—Manufacturers continue to be very busy. In several of the factories, there is a demand for more men. The Verity Plow Company will build a large addition.

CONDITION OF PARTICULAR TRADES.

The various skilled trades were from busy to very busy, with unskilled labour in demand.

DISTRICT NOTES.

Paris.—The factories and mills are very busy. There is an increasing demand for labour, particularly for female operatives for the fabric mills. The Penman Manufacturing Company is erecting an addition, to cost $50,000.

GUELPH, ONT., AND DISTRICT.

Mr. Wm. Drever, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions continued very active in all lines of the building trades. Fine weather prevailed, and the men had very little lost time. Manufacturers also had a very good month, in some cases putting on extra men, and the outlook is good for the summer and fall. The Guelph Textile and Weaving Company has commenced work on the erection of the new factory; the work will be rushed through to completion this fall. The Standard Valve Company has resumed operations with a full staff of men. The annual June excursions to the Ontario Agricultural College were very largely attended, about 22,990 excursionists having visited the college As a result, street railway, hotel and restaurant employés had a very busy month. Wholesale and retail merchants also reported trade very good. The Retail Merchants' Association has granted clerks the usual weekly half-holiday, during July and August.

Customs returns for the month of May were $15,981.25, an increase over the corresponding month last year of $130.32.

The annual conference of Canadian Charities and Correction was held here

during the month, and was very largely attended, many important resolutions being passed.

The Brussels Carpet weavers strike is still unsettled.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers had a busy month, and there is a strong demand for farm labourers and domestic help. All indications point to a good harvest, though the hay crop will be rather light. Root and corn crops are in splendid condition, and promise good yields.

The public sale of thoroughbred Shorthorns, held in the Winter Fair building, was a most successful one. The bidding was fairly brisk, and the prices good, the highest price paid being $1,025.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, lathers and plasterers reported a very active month. Painters and decorators were busy, and plumbers and steamfitters, were active. Builders' labourers were very busy, the demand for this class being in excess of the supply. Iron moulders, coremakers and helpers were active, with tube mill workers very busy. Machinists, electrical workers and linemen were busy, also stove mounters and blacksmiths. Piano makers had a busy month, also sewing machine makers. Carriage and wagon makers were fairly active, as were coopers and pattern makers. The printing and allied trades had a very active month. Journeymen tailors had a fair month, while garment workers were very busy. Bakers, confectioners, butchers had a very active month, also hotel and restaurant employés. Street railway employés were very busy. Teamsters, carters and draymen reported a very good month. There is a good demand for unskilled labour.

BERLIN, ONT., AND DISTRICT.

Mr. R. F. Gofton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During June, all classes of skilled labour were fully employed, and there was an increased demand for unskilled workers. There was a slight demand for cabinet workers, finishers and boot and shoe workers in some of the factories. The Kauffman Rubber Company also needed additional male and female employés. The J. S. K. Weber block, on Queen street, was completed, and good progress made on other new industrial establishments and public and private buildings. Thirteen building permits, valued at $39,675, were issued during the month. Work was being vigorously carried on the the double tracking of the street railway, and the paving of King street. Commercial activity and bank clearings were reported favourable. There were no changes in wages, but printers obtained an eight-hour day. Notice was given on June 21, to the employers, and negotiations tions followed. As a result, an agreement was arrived at: "That forty-eight hours constitute a week's work in book and job offices, and on evening and weekly newspapers. This clause is to cover compositors, machine operators, make-up foremen, pressmen and pressmen's assistants". Wages will remain practically the same as they have been, but printers will receive time-and-a-half for overtime. The agreement takes effect from July 1, 1910, and expires on June 30, 1911.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy cleaning up the root crops and preparing for the harvesting of hay. Clover promises to be a good crop, but timothy is light. Fall wheat also gives good promise, but crops generally have suffered from want of rain. Market prices on Saturday, June 25, were as follows:—Butter, 20 to 22 cents per pound; eggs, 22 cents per dozen; potatoes, 60 cents per bag; strawberries, 10

to 12½ cents per box; cheese, 15 cents per pound; apple butter, 25 cents per small crock; green onions, 5 cents per bunch; asparagus, 5 cents per bunch; lettuce, 5 cents per bunch; rhubarb, 5 cents per bunch; chickens, 60 to 70 cents each; summer sausage, 25 cents per pound; slabs, $4 per load; old hay, $16 per ton; small pigs, $5 each. Strawberry growers state that unless there is a shower of rain soon the crop will be a light one.

Manufacturing establishments were all busy, a number making additions to their factories in order to meet demands for their products.

CONDITION OF PARTICULAR TRADES.

Active conditions prevailed in the building, metal, woodworking, printing, clothing, food and tobacco preparation, leather and transport trades. Unskilled labour was also very active.

DISTRICT NOTES.

Preston.—All classes of labour were well employed during the month, the building trades being very busy. The new shoe factory was finished during June, as was also the addition to the Pullman Car and Coach factory. Carpenters and machine hands were wanted at the car shop. All manufacturing establishments were active.

Waterloo.—The month was a busy one for labour generally. Building operations were very active. Work was commenced on the new Grand Trunk Railway station. Manufacturing establishments were all active.

WOODSTOCK, ONT., AND DISTRICT.

Mr. J. Markey, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Although this is the mid-season with many of the local industries, all factories are reported busy. This applies to furniture, manufacturers, stovemakers, wagon makers and musical instrument manufacturers, all working full time, and with full staffs. Most of the factories are well supplied with labour; but there is some demand. The Bain Wagon Company, for instance, reports difficulty in securing painters and shippers, and the Stewart Stove Works are in need of common labouring men. Labourers are scarce. The removals out West, the opening up of the building season, and the demand for help from the farmers account for this scarcity. Many farmers are still looking for men.

There is still a demand for girl help. The Oxford Knitting Company reports business very brisk, and has room for several girls.

The printers of this city have secured a reduction of hours from fifty-three a week to forty-eight. The reduction applies to job printers, pressmen, binders, &c. News compositors were already working forty-eight hours or less. About fifty printers, pressmen, &c., are effected by the change.

There was some disturbance in the Tobin Arms factory a few days ago, over the question of raising the windows from the bottom or lowering them from the top. The men and the management got together, and after mutual explanations, a satisfactory understanding was reached.

CONDITION OF PARTICULAR TRADES.

There is not much activity in the building trades, but the prospects are fairly good. Iron moulders, stove mounters, blacksmiths are busy. There is frequently a demand for blacksmiths here. Woodworkers, upholsterers, varnishers and polishers, wood carvers, carriage makers are busy, but there does not seem to be any present demand for help. Printers and pressmen are busy, but the local offices are fully supplied at present. The clothing trades are busy; there is still a scarcity of garment workers. Bakers, confectioners, butchers and cigar makers are all busy. There is some demand for unskilled labour, both in the city and in the surrounding country.

STRATFORD, ONT., AND DISTRICT.

Mr. Joseph T. Carlin, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market was active, especially in the building trades. Building permits to the value of nearly $22,000 were issued, and good progress was made on the many buildings in course of erection. The brickwork on the hospital extension, and the new Registry Office is nearing completion. There is no complaint of want of employment, and some of the factories find difficulty in securing all the help required, both skilled and unskilled. The banks did a good business. Wholesale and retail merchants reported business very good. The Customs returns were $14,258.81, an increase over the same month last year of $3,107.77. No changes in rates of wages or hours of labour, and no trouble in the labour market were reported.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were engaged on the root crops, and the latter part of the month they were cutting the hay. Market prices were:—

Eggs, 20c. a dozen.
Butter, 20c. a lb.
Hogs, $8.75 to $8.90 per cwt.
Wheat, 88c. per bushel.
Oats, 35c. per bushel.
Barley, 45c. per bushel.
Peas, 70c. per bushel.
Bran, $19 per ton.
Shorts, $23 per ton.
Flour, $2.85 to $2.95 per cwt.

Manufacturing.—All factories were busy, with plenty of orders ahead.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, lathers and plasterers were very busy. Painters, paper hangers and decorators were active. Plumbers, gasfitters, stone cutters, and builders' labourers were busy. Iron moulders, iron workers and helpers and machinists were active. Blacksmiths, boilermakers and horseshoers were busy. Jewellers did a good trade. Woodworkers, coopers, upholsterers, polishers, varnishers and wood carvers were busy. Carriage and wagon makers were well employed. Printers were very busy, especially ad. and job hands. Journeymen tailors, garment workers and factory workers were steadily employed. Bakers, confectioners, butchers and cigarmakers were active. Leather workers and saddlers were busy. Barbers, clerks and delivery employés were active. Hotel, restaurant and laundry workers were very busy. The demand for female help in hotels and factories was active. Railroad conductors, engineers, firemen and telegraphers were busy. Trainmen, trackmen and freight handlers were active. Cab drivers, draymen and teamsters did a good business. Unskilled labour was well employed.

LONDON, ONT., AND DISTRICT.

Mr. A. Woonton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Industrial conditions were active throughout June in all lines, with the exception of building. In the factories and foundries work was plentiful, and larger forces were being worked than last year. Building operations have fallen off this year, the present month's permits being $100,000 behind the same month last year. A large number of workers in these trades have left the city to secure work. On the railroads, business is brisk, but the increasing of the length of the trains to about ninety cars is reducing the number of men needed. A larger number of clerks than ever are enjoying the Wednesday half-holiday during June, July and August. This year the bakers, barbers, butchers, dentists, grocers, hardware stores and newspaper employés are included. Wholesale and retail trade is good. And travellers report large sales. The preparation for installing Niagara Power continues to provide a large amount of work, especially for electricians, linemen

and labourers, wire being strung over a large area of the city already. It is expected that the city will be ready to supply this power to consumers by September. The question of female help for domestic purposes is causing difficulty. The scarcity is also in the large candy, biscuit, paper box and other factories. A couple of firms have announced a bonus of ten per cent. on all earnings, to girls who continue to work for them from now until November, the percentage to be paid in November, as an inducement for the girls to stay with them. A large number of empty houses are still to be seen throughout the city, caused principally by the exodus to the Northwest.

The bricklayers, who requested an increase from 45 cents to 47 cents this year and to 50 cents for the two following years, of a three-year agreement, withdrew the request early in the month, owing to a scarcity of work, and have decided to work for the 45 cents this year. Cigar makers, who went on strike last month for a $1 increase per 1,000 on all cigars made, were granted their demands, and returned to work June 13. The relations with their employers was of the best throughout the strike. A number of new organizations have been formed here during the past two months, as follows: Metal Trades' Council, Stove Mounters, Electricians, Boiler Makers, Piano Workers and Brewery Workers.

CONDITION OF PARTICULAR TRADES.

Bricklayers are all working, but very few are left here. Lathers and plasterers report trade fair. Painters are busy. Moulders and Iron Workers are very busy. Electricians and linemen are exceptionally busy. Metal polishers and stove mounters report trade fair. Carriage painters report that the best men from this section are leaving to work in the automobile works in Detroit, making help scarce here. Car builders report a large amount of repair work ahead. Coopers are busy. Printers and pressmen are all working. Journeymen tailors report trade very good. Garment workers and shoe workers are busy. Cigar makers are very busy, as the stock was greatly reduced during this strike. A number of jobs are reported open. Tanners are very busy. Unskilled labour is being continually recruited with new arrivals from the Old Country, and the supply is always more than equal to the demand.

ST. THOMAS, ONT., AND DISTRICT.

Mr. J. A. Killingsworth, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during June varied little from the preceding month. The building trades were active, and work was generally plentiful. The demand for skilled labour was good, especially in the railway shops. Work is progressing actively on the new Michigan Central Railway round house, which when completed will be one of the finest structures of the kind in Ontario. A large gang of men are employed on this construction. Work on the Nursery Shoe Company factory is nearing completion and stock is beginning to arrive. Street railway receipts showed a decided advance during June; the advent of warm weather being responsible for liberal patronage of the evening cars. The Pere Marquette Railway inaugurated its Sunday service from London and St. Thomas to Port Stanley, on Sunday, June 26. Cars were well patronized, the Port being crowded with Sunday excursionists.

Pere Marquette trainmen have been notified of an increase in wages to take effect July 1. The men's time is kept at Detroit, and until such time as schedules are issued, it is impossible to know exactly what increases have been granted. The schedule granted is the same as that which is known as the B. & O. schedule, and equalizes the wages for Canadian and American employés. Heretofore the American employés have been paid a higher rate of pay for the same class of work. Under the new schedule conductors on through freights will receive $3.63 per 100 miles, increased from $2.85, and brakemen on through

freights will receive $2.42 per 100 miles, increased from $2.00 per 100 miles. On local freights the conductors will receive $3.75 until January 1, 1912, when the standard rate of $3.85 per 100 miles will be paid. Brakemen will receive $2.60 until January 1, 1912, and thereafter $2.70 per 100 miles.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The markets have been well attended during June with buyers and sellers. Vegetables were plentiful. Berries from this locality are now being offered on the markets, and give promise of being a good crop. The grain crops look well throughout this district, and with sufficient moisture will undoubtedly produce a large yield.

Manufacturing. — Normal conditions prevailed.

CONDITION OF PARTICULAR TRADES.

Bricklayers, mechanics, cement workers and carpenters were well employed. Plumbers were busy. In the metal, engineering and shipbuilding trades labour was well employed during June, especially in the railway shops. Printers had a fair month. Tailors were quieter. All classes engaged in railway transportation reported a good average month. For unskilled labour the demand slightly was in excess of the supply.

CHATHAM, ONT., AND DISTRICT.

Mr. Alex. Gregory, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Active conditions in all branches of industry prevailed throughout the month except in the building trades which still remained very quiet. Carriage and wagon factories were especially active. The Walker Shirt and Pants Company is busy installing machines, twenty in number, having already been placed in position. They will all be operated by electricity. Wholesale and retail trade has been very good. The Grand Trunk Railway is planning improvements to the station in the immediate future. The City Council also intends constructing a large amount of granolithic sidewalks, and work will begin at once. The printers of the city were granted the eight-hour day to begin June 15.

The local manager of the Bell Telephone Company reports 1,100 phones in use in the city and district. He expects that fully 1,500 will be in use in the next couple of months

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers began haying the last of the month and report the crop better than that of 1909. It is estimated that the bean crop will amount to 1,000,000 bushels in the district. Reports of other crops are favourable. The Michigan Sugar Company has in all some 6,000 acres in crop this season. There is a very large acreage of tobacco planted.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were quiet. Carpenters and joiners were busy, mostly on repair, with plasterers busy and painters and paper hangers very busy. Plumbers and builders' labourers were only fairly well employed. Iron moulders, machinists and steam engineers were busy, with electricians very busy. Metal polishers, buffers, platers and brass workers reported trade brisk. Blacksmiths, boiler makers and sheet metal workers were busy. Woodworkers, upholsterers, carriage and wagon makers, and pattern makers reported a good month. Printers, pressmen and bookbinders were very busy. Journeymen tailors, garment workers and boot and shoe workers were busy. Bakers and confectioners, butchers and meat cutters were well employed. Ice drivers and cigar makers and tobacco workers were busy. Barbers, clerks, stenographers, delivery employés, hotel and restaurant employés were busy, and laundry workers very busy. Carters and draymen were busy. Unskilled labour was fairly well employed.

WINDSOR, ONT., AND DISTRICT.

Mr. D. Mitchell, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market has been very active during the month and men in all branches of trade were in demand at good wages. The Paterson Automobile Company of Flint, Michigan, has leased a large building and is having it remodelled into an auto sales place and distributing point for Canada. Fuller Bros., manufacturers, whose plant was destroyed by fire a short time ago, have started up again and are giving employment to from forty to fifty hands. On May 25, by a vote of 376 for and twenty-one against, the property owners gave the Council power to sell 3½ acres of land in the factory district, to the Regal Automobile Company. On June 20, the property owners voted on a by-law for Niagara power. The vote was 622 and 618 against. Wholesale and retail merchants are very busy. The only unfavourable feature in the labour market at present arises from the scarcity of help.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The warm weather has been favourable for farmers and market gardeners, but the crops are not as far advanced as they were a year ago. If fine weather continues there will be a fair crop, though fruit will be light.

Manufacturing.—Manufacturing concerns are very busy. The Canadian branch of the Postum Cereal Company has been started and is running night and day, giving employment to about seventy-five hands.

CONDITION OF PARTICULAR TRADES.

The building trade is active but the principal work is on small buildings as very few large contracts have been let so far. Good carpenters are in demand. The iron trades are very active, with plenty of work for every one. Woodworkers, carriage and wagon makers are active. Journeymen tailors report plenty of work. Garment workers are in demand. Bakers and confectioners have had a very busy month. Cigar and tobacco workers are fully employed. Leather workers are busy. Owing to the warm weather the barbers have had a busy month. Hotel, restaurant and laundry workers were busy. Business was good on the railways, both in freight and passenger departments, and all hands were busy. Teamsters and expressmen were busy. Unskilled labour was well employed.

DISTRICT NOTES.

Walkerville.—There is a building boom on in Walkerville at present. The Peabody Overall Company is building a large plant. The Bridge Company is building a large addition, and a large number of dwellings are under construction.

SAULT STE. MARIE, ONT., AND DISTRICT.

Mr. F. A. Denman, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour was fully employed, the demand in nearly all lines exceeding the supply. Conditions were good in nearly all lines, particularly in building. The Lake Superior Corporation has a number of contractors employing large staffs of workmen engaged in the various additions it is making to its docks, steel works, etc., also extensions to the Algoma Central Railway. A large St. Paul, Minn., firm has located here to engage in the manufacture of calendars and advertising novelties. The firm intends supplying its Canadian trade from this point, and will employ about twelve travellers and fifty other hands. It has been announced that the Dominion Government has granted a subsidy for the construction of a dry dock and shipbuilding plant there. The dry dock company will receive a bonus of $5,000

per year for twenty years from the municipality, and will begin construction work immediately. Everything points to this season being the best in the town's history.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Weather rather dry and hot, but otherwise, conditions are good. A market twice a week has been started here. It is proving a success and will serve to stimulate agriculture in this district.

Fishing and mining.—Normal conditions prevailed.

Manufacturing.—This industry was busy.

CONDITION OF PARTICULAR TRADES.

Very busy conditions were reported in the various skilled trades.

PORT ARTHUR, FORT WILLIAM, ONT., AND DISTRICT.

Mr. R. Urry, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour during June has been as fully employed as strikes would allow. All operatives in the building trade were busily employed until the carpenters struck work. Numbers of men are employed on the streets and in street extension work, and exceptional activity prevails in the improvement work of the two cities. At the docks conditions have been busy, and transport workers have been very busy. Wholesale and retail trade is normal for the time of year.

There has been a change in the rate, paid to carpenters, from 35 and 37½ cents per hour, to a minimum rate of 40 cents an hour. The month has been noteworthy for the number of small strikes of labourers.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Small farmers in the vicinity are suffering from continued dry weather, and bush fires are causing dismay among the settlers in outlying districts. The village of Murrilo is reported safe, but Stanley and other villages in the immediate vicinity are reported in danger. With the exception of a short heavy shower on Saturday, the twenty-fifth instant, no rain has fallen for several weeks. The cities are overspread with a pall of smoke.

Manufacturing.—The industries have continued employing the usual number of men, except the joinery shops and the lumber mills which were hindered by the strike of the carpenters.

An extension of sixteen freight sheds is being contemplated, and a new breakwater is going to be put in operation. Work is being pushed on with vigour.

CONDITION OF PARTICULAR TRADES.

The whole of the building trades have been affected by the three weeks' stoppage of the carpenters. Construction work had been pushed ahead, so that the bricklayers, lathers and plasterers, plumbers and steamfitters had enough work to keep them steadily employed. Iron moulders and iron workers, machinists and engineers, electrical workers and linemen have all been actively employed, also boiler makers, blacksmiths, sheet metal workers and tool sharpeners. All the woodworkers in the two cities have been quiet, especially the workers in the lumber yards. The printing and allied trades have been actively employed. The journeymen tailors also have been busy. There are no manufacturers of hats, gloves or shoes in this district, but the retail trade has been active. Bakers and confectioners, and ice merchants have been kept busy, but the hot weather has given the butchers and meat cutters a quiet season. The retailers in fruit have had a busy time. Barbers, clerks, stenographers, delivery employés, hotel, restaurant and theatre employés, also laundry workers have all been exceptionally busy as many visitors have landed during the months. Railway men, freight handlers, ship labourers, long-

shoremen, teamsters, expressmen and street railway employés have all been busy.

INDUSTRIAL ACCIDENTS.

There have been no serious accidents reported but some of the labourers working on street improvements have been exhausted by the extreme heat, and several have had to lay off work for a few days.

Among the general labourers work is very brisk this summer. General labourers are being paid from 20 to 25 cents an hour.

The street railway employés are unsettled. The street railway commission offered them a very slight advance this month, but the men would not accept the offer, they will present their schedule again next month.

WINNIPEG, MAN., AND DISTRICT.

Mr. John Appleton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The demand for labour throughout June was very strong. All classes of workpeople were in demand. Towards the latter part of the month, however, there was a slight change due to fears respecting the crop on account of the extremely hot weather which continued for an exceptionally long period. At the close of the month the heat and the drought was relieved by rains all over the Province and the West generally, which had the effect of again stimulating business. Trade, however, has not been so active as in May. The number of building permits issued has not been quite up to expectations. The bank clearings for the month amounted to $69,889,227, as compared with $49,452,397 for June, 1909. During the month, thirty-five tailors employed by one firm went on strike and presented the following demands:—

1. We refuse to return to work under the new and proposed system of piecework.
2. Since we are out, there are many things which in the past have been unsatisfactory, which we feel ought to be remedied.
3. Since it is the custom in the trade in Winnipeg not to work Saturday afternoon we want Saturday afternoons off without reduction of pay.
4. We want time and one-half pay for all overtime.
5. We want a more efficient system of timekeeping, and no fines or reductions of pay without explanations.
6. We want better treatment from the foreman, and less abusive and profane language, especially in the presence of the women.

These terms were accepted by the employers with the exception of the half-holiday on Saturday without pay. The strikers agreed to go back to work and accept the reduction for Saturday afternoon holiday. The men were out four and a half days.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—During the latter part of June the weather was exceedingly hot all over Manitoba and the Northwest, with the result that serious damage was done to wheat crops. In some sections of Southern Manitoba the farmers have ploughed up their wheat and in other parts, it is expected that only half a crop will be obtained. In the immediate vicinity of Winnipeg no damage was done, and also in the northern parts of Manitoba, there has not been any lack of rain to the extent of damaging the growing crops. During the last few days of June the weather was showery, and in consequence there has been great improvement in the outlook.

Railroad construction.—The demand for men for the rougher kinds of work is very keen, and as a result an advance in rates is expected as soon as the harvest approaches.

CONDITION OF PARTICULAR TRADES.

The amount of building in the course of construction is unusually large, but the number of new buildings for which permits have been issued during June was lower than in May. The Royal Commission appointed by the Provincial Government to inquire into the stockyards' question, and also as to the advisability of public abattoirs, has made

its reports and have advised the erection of stockyards on a given site in St. Boniface. If the report of the Commission is accepted and the new yards are built as recommended, it is expected that there will be great building activity in that locality. During the hot weather of the latter part of June the water supply of Winnipeg was found to be on the verge of being short. As a result the question of changing the source of supply has been discussed by the City Council.

BRANDON, MAN., AND DISTRICT.

Mr. E. Fulcher, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market shows a continued improvement in the demand for all classes of labour.

In the building trades, especially, there is much activity. The new Court House, costing in the neighbourhood of $100,000, will be ready for use in a few weeks. The brickwork of the two additional stories to the Empire Hotel has been completed and the two entire flats will be ready for occupation by the opening of the Summer Fair. The brickwork of the new convent has been completed. An addition to Hanbury's Sash and Door factory is finished. Brick work is also nearing completion on the new Vaudeville Theatre, the addition to the Brandon Hardware Block, and the addition to the Hamilton Provident Loan Company's building. Basement walls have been commenced on the five-storey Cement Block, the five-storey McKenzie Block, the Cecil Hotel, the Royal Hotel, Knox Church and the three-storey business block for Messrs. Clement & Clement. Excavating has been started on the new $150,000 depot for the Canadian Northern Railway. On July 6, the ratepayers will vote on the money by-law for the purpose of providing for a $25,000 Free Hall and $20,000 improvements to the City Hall.

The Hanbury Manufacturing Company has started to work overtime. On the whole, a very busy season for Brandon is expected.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The splendid rains of the past month have caused the crops to improve very rapidly.

CONDITION OF PARTICULAR TRADES.

The building, metal, clothing and cigar making trades were busy. Other skilled trades also were active. Unskilled labour was very active.

REGINA, SASK., AND DISTRICT.

Mr. W. B. McNeil, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During the first part of June, little or no change was apparent in comparison with the preceding month. Building operations were confined to the erection of residences, all the larger buildings under construction, such as the new Legislative Buildings, the convent and hospital, etc., being stopped, as an outcome of the strike of the building trades at that time. There was very little demand for labour in other branches of industry, as the effect of the building trades strike was widely felt.

Since building operations were resumed labour has been well employed, and the labour market well supplied, though there has been a fair demand for bricklayers. Many buildings which were postponed indefinitely are now under construction, the number of building permits exceed those of the corresponding period of past years. Building permits for the month of May, aggregated $392,975; $300,000 more than the corresponding month of last year, and $90,000 more than those issued in April, of this year. Among the permits issued are the following: Grey Nun's hospital, $115,000; Whitmore Brother's store, $25,000; J. H. Haslam's block of stores, $15,000; and Hay & James' block, real estate and insurance agents, $10,000. The new market building now in construc-

tion bids fair to be one of the most complete buildings of its kind. The structure will be 138 feet by 40 feet, and is estimated to cost in the neighborhood of $16,000.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Very favourable reports were received from the surrounding districts, the continued warm weather and frequent rains making the prospects for this year's crops brighter as time goes on, the average height of wheat being 28 inches.

Manufacturing.—The Regina Foundry Limited, is the re-organized form of the late Regina Machine and Iron Works. The rapid development of the country made it imperative for re-organization, and some of the most prominent business men of the city liberally subscribed to the $100,000 new capital. The Company has purchased from the city a site 200 by 270 feet, it being the intention to build a solid brick building fully equipped with modern machinery, travelling cranes, &c., which when in full operation, is to be capable of turning out 120 to 140 tons of casting a day, or three car loads.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons continue well employed, and a fair demand exists. Carpenters and joiners are very active, the supply meeting all requirements. Much the same may be said of lathers, plasterers, painters, and plumbers. Stone cutters are kept busy, and builders' labourers are much in demand. Iron moulders and machinists have been very active. The local foundry has found it necessary to build more spacious premises. Steam engineers were kept busy, as were electrical workers. Bicycle workers report a good month, the past month being busier than the corresponding period of any other year. Upholsterers and tent makers were exceptionally busy, but carriage and wagon makers had but a fair month. Soap workers at the local factory had a very busy month. The management will add to their present structure to cope with the rapid growth of business. Printers and pressmen were busy, while electrotypers and bookbinders were much in demand. Journeymen tailors and garment workers reported a very active month, labour being scarce. Bakers, butchers and ice carriers were kept well employed, while cigar makers reported a poor month, this, it was stated, being the effect of an influx of foreign produce. Barbers, clerks, stenographers and delivery employés fully supplied the respective demands, while hotel and restaurant employés were scarce. Laundry workers were very busy, and help was scarce. Freight handlers were well employed, as were cab-drivers and draymen. Teamsters had a very active month, the demand being greater than the supply. Unskilled labour was kept busy, the recent arrival of European immigrants supplying all demands.

MOOSE JAW, SASK., AND DISTRICT.

Mr. T. Backus, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market has been very active during the past month; more so than during the corresponding period of last year. As regards building construction, the present season will undoubtedly produce a new record for both commercial and residential property, and in all branches of the building trade labour has been in brisk demand. Carpenters, lathers and plasterers especially, had a very busy month, and in many cases worked considerable overtime.

Work on civic improvements is proceeding at a rapid rate. Sidewalk construction and sewer and water connections have been carried on, and in a few days the street paving programme will begin. It is probable that at the same time the lines for the street railway will be laid down.

An announcement of considerable importance to Moose Jaw was made by the Canadian Pacific Railway Company during the month, to the effect that this city, from the first of July, will be the divisional point of the system for the Province of Saskatchewan.

Five by-laws calling for the expenditure of $100,000 were passed by the ratepayers. This money will be applied to the erection of an isolation hospital, a new fire-hall, improvements to the exhibition grounds, the extension of the electric light system, and the erection of a produce market.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The weather during the past month has been somewhat variable, but on the whole, the crops in this district are looking fairly well. The weather during the early days of the month, was excellent and growth rapid. Plenty of moisture encouraged root growth, and prospects were exceedingly bright. Latterly, however, much hot weather, with dry winds and occasional thunderstorms, have proved trying, and have undoubtedly committed some damage. To what extent, it is impossible to estimate at present. Instances are also reported of damage by hail. These affect but small patches, however, Cooler weather, with rain is needed.

CONDITION OF PARTICULAR TRADES.

Carpenters lathers and plasterers were very busy. Bricklayers and masons were active, and painters and decorators busy. Builders' labourers were in good demand. Iron workers, machinists, blacksmiths, boilermakers were all fairly active, also electrical workers and linemen. Printers and pressmen were very busy. All grades of railway employés had a busy month. Teamsters and expressmen were very active. Barbers, hotel employés, store clerks and restaurant employés were busy.

LETHBRIDGE, ALTA., AND DISTRICT.

Mr. J. M. Ritchie, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market during the month of June has been dull, owing to the extreme dry weather, and the supply of labour being greater than the demand. Work in the building trades has been fairly active. Several large buildings have been started. The excavation for the Young Men's Christian Association building was begun, also for the new Bryan block and the Hull block. Work on the new Court House was resumed. The Alberta Railway Company has come to an understanding with the City Council with regard to sites for factories. Two sash and door factory companies are making arrangements to build in Lethbridge. Building permits during the month of May totalled in value $354,535. The highest figures reached in any previous month were reached in May, 1909, when they were $236,200, showing an increase for the month of May, 1910, of $118,335. With the exception of the Young Men's Christian Association building, no public buildings were included in the total. The city has awarded a contract for 27,000 square yards of cement sidewalks. The fair-wage clause mentions 25 cents per hour. The rate for 1909, was 27½ cents an hour.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The weather has been very dry, drier in fact than for several years, yet the crops are looking well. Some outlying districts are having more rain. Cardston has had plenty of rain. In the little Bow district the crops are coming along well.

Mining.—Miners were working short time, there being little demand for coal at present. Some new coal companies are starting in this district; the McWilliams Company, of Kipp, has a shaft down 370 feet, and expects to reach coal in 12 or 20 feet lower. This is about 100 feet deeper than at Lethbridge. This mine is on the Crow's Nest line, about 15 miles from Lethbridge.

CONDITION OF PARTICULAR TRADES.

Bricklayers have been very busy, as also have been builders' labourers. Carpenters were rather dull.

DISTRICT NOTES.

Diamond City about 12 miles from Lethbridge reports great building activity. This is a new town, rapidly becoming known. There are sixteen houses under construction, mostly of brick, and prospects of more as the season advances. The local coal company operates its own line of railway to meet the Canadian Pacific Railway at Kipp. The town has a population of about 800.

Magrath.—A new public school, costing $37,000, has just been opened. On the opening of the school, the chairman of the School Board stated that he was afraid they had not built large enough, so rapid was the growth of the municipality.

Warner.—Building operations were very active. This is a new town, to the south of Lethbridge. Three new stores have been built this year, besides several private dwellings.

Taber.—Conditions were quiet here, owing to the depression in the coal trade, and the uncertainity of the crops, due to the dry season.

CALGARY, ALTA., AND DISTRICT.

Mr. E. Howell, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market for June was distinctly good, with a slight improvement over last month, and a marked improvement over the corresponding period of last year. Calgary is just now experiencing a very busy period, but the supply of labour equals the demand up to the present time. Bricklayers have shown the greatest improvement, as brick is being shipped in in greater quantities. The excavation for the First street subway is almost completed. The foundations for the east wing of the Canadian Pacific Railway depot is well under way. Wholesalers and retailers reported an exceptionally busy month, the volume of business being greater than last month, and considerably in excess of the same period of last year. The local unions of carpenters and joiners are asking for an increase of wages and alterations of working condition. The schedule will be referred to an arbitration board. The newly formed union of the bakers and confectioners are asking for a working agreement.

CONDITION OF PARTICULAR TRADES.

Bricklayers were fairly well employed, as compared with the previous month, but masons had a very dull month. Carpenters and joiners, lathers and plasterers were busy. Painters and decorators were actively employed, as also were plumbers and gasfitters. Steamfitters and stone cutters were dull. Iron moulders, iron workers and helpers had a good month. Machinists, engineers, electrical workers and linemen were busy. Blacksmiths, boiler makers, sheet metal workers, tool sharpeners and horseshoers all experienced a very busy month. Woodworkers, upholsterers, polishers and pattern makers were well employed. Printers, pressmen and bookbinders were very busy, as also were journeymen tailors and garment workers. Bakers and confectioners, butchers, meat cutters and ice cutters were busy. Leather workers, saddlers, trunk and bag makers were busy. Barbers, clerks, stenographers experienced a good month. Hotel and restaurant employés had a very busy month. Laundry workers also were busy. All classes of transport employés, without exception, had a very busy month. Teamsters and expressmen were busy. Unskilled labour was well employed.

EDMONTON, ALTA., AND DISTRICT.

Mr. P. C. Foley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

All classes of skilled labour were well employed, except plumbers and steamfitters, who reported trade quiet.

Owing to the steady influx, the supply of labour has been greater than the demand. While there has been a good demand for unskilled labour for railway construction a great many labour-

ers prefer work in the city, consequently local employers have had no difficulty in securing the help required. A large force of men is employed on the east end park and exhibition grounds, which must be completed in order to accommodate the annual fair in August; $175,000 will be expended on this work.

On the twentieth instant the ratepayers endorsed money by-laws for the following purposes: $75,000 to supplement a former grant for improving the east end park and erecting exhibition buildings; $175,000 to the Royal Alexandra hospital, and $25,000 to purchase a site for a public library. An earlier grant was made to the hospital of $50,000. Two by-laws were endorsed to grant franchises to the Pintsche Gas Company for the supply of artificial gas for the lighting of railway coaches, and to the Edmonton Radial Railway Company, granting certain running rights over the municipal railway lines.

The J. Y. Griffin Company is making extensive improvements at its packing plant. Workmen are engaged at present in the construction of an additional storey to the manufacturing building, two ice houses and an office. The addition of a storey to the manufacturing building will make it possible for the Company to use two more of the present storeys of the plant for cold storage and freezing purposes.

The two ice houses will be 50 by 80 feet and will triple the ice capacity of the plant which at the present time is 2,000 tons. The office building will be 62 feet by 70 feet. The building inspector reported a much larger percentage of business blocks being erected than in former years, and a slight decrease in first class residences. The statistics for May and the corresponding month last year, are as follows:—

	1909	1910
Building permits	$368,005.00	$231,055.00
Customs returns	19,125.87	26,179.65
Bank clearings	3,794,559.00	5,368,879.00
Homestead entries	391	584

Wholesale and retail trade was fair. There were no changes in rates of wages or hours of labour, and no strikes or lockouts.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—A crop bulletin just issued by the Provincial Department of Agriculture places the loss of grain during the winter and spring owing to weather conditions, at thirty per cent. of the area sown. The most careful inquiries have failed to elicit information of any damage sustained in this district. Conditions have been most favourable to winter crops.

Railroad construction and employment.—The Canadian Northern Railway Company has let the contract for the first section of the main line from Edmonton to the Pembina river, a distance of 70 miles. It calls for the completion of the work this year.

NELSON, B.C., AND DISTRICT.

Mr. A. B. Docksteader, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market throughout Kootenay district, during June, has been active, the demand exceeding the supply of lumbermen. A slight shortage also existed for coal and quartz miners, which condition is likely to continue until after harvest in the Prairie Provinces, when usually an over-supply is received in this district. The construction of the new sawmill for the Edgewood Lumber Company, at Castlegar is nearing completion, the machinery having arrived. A Canadian Pacific Railway spur to the mill, 1,800 feet long is being built. A second fruit canning factory within this district is being erected near Proctor, B.C. On May 27, the steamer *Keals,* which plies the Kootenay Lake was sunk near Ainsworth, B.C., a gale of wind driving the steamer on to a pile at the wharf. There were no personal injuries or loss of cargo or equipment. A crew is at work endeavouring to float the steamer; in the meantime the passenger traffic and mails are being handled by the Canadian Pacific Railway steamers. A force of men is engaged on the Kaslo and Slocan

Railway rebuilding several bridges to the end that transportation facilities to Sandon by that railway line will soon be in effect. Valuable shoots of silver lead ore have been struck at the Rambler-Cariboo mine on the 600 and 1,000 foot levels which has caused the price of that Company's stock to increase considerably during the past few months. Sheep Creek and adjoining country, near Salmo, B.C., is attracting both the capitalist and the prospector by the regularity of the gold bricks produced by the "Queen", "Nuggett," and other mines, and by the favourable development of the various new mines in that locality.

NEW WESTMINSTER, B.C., AND DISTRICT.

Mr. J. P. McMurphy, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market has been very active during the past month, more so than at this period during many seasons. Labour in all its branches has been in brisk demand. New business blocks and residences, particularly the latter, are in course of erection throughout the city. Messrs. Pilksy & Wolz, cigar manufacturers, have called for tenders for the erection of a large factory and apartment house. The Customs returns for the last month show an increase of over $9,000 over the corresponding month of last year.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The weather conditions during the past month have been fairly good for agriculture, and the present outlook is favourable. There may be a slight shortage of labour at harvest time.

Fishing.—The fishing industry is inclined to be quiet, owing to the few salmon appearing in the river. The canneries are making preparations for a fairly good year.

Lumbering.—The mills are running to their fullest capacity.

CONDITION OF PARTICULAR TRADES.

Labour conditions in the building lines were active. The supply is about equal to the demand, especially with plumbers, steamfitters and sheet metal workers. Other skilled trades were active.

VANCOUVER, B.C., AND DISTRICT.

Mr. Geo. Bartley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Activity prevailed in the building trades. Business in general, was very active. Real estate in the business districts was active, but somewhat quiet in the residential portions of the city. The Bank of Montreal took out a $65,000 building permit, and the Empire Supply Company, one for $57,000. The Canadian Pacific Railway Company purchased 75 feet of land on Hastings street for offices, costing $171,500. The National Paper Mills, Limited, proposes to erect a paper mill on a large scale to be able to supply British Columbia and the Prairies. A train line is in course of construction on Richards street. Twenty-two acres (1,410 feet) of waterfront land, half a mile east of Second Narrows on Burrard inlet was sold for $150,000. The Grand Trunk Pacific will build a large hotel here in time, to handle travel over its line. The boat building concerns reported good progress. Shipping was very active. Lumber chartering, however, was quiet. A High School Teachers' Association was formed. The Labour Temple Company decided to sell a limited number of shares outside the labour unions. The Trades and Labour Council strongly urged the adoption of a Civic, or Provincial control of the city hospital, and expressed themselves as being opposed to the present system of soliciting alms. The Bakers' Union reported that several large bakeries adopted the union label for bread. A Committee of the Trades and Labour Council was appointed to interview readymade clothing dealers and urge

upon them the advisability of employing union tailors to manufacture clothes locally.

DISTRICT NOTES.

Stewart.—Work was started on the docks, and a contract let for grading the Short Line railway. A bank building is being constructed. The demand for labour continued.

Prince Rupert's population is computed at 5,000 with 1,219 names on the voters' list.

VICTORIA, B.C., AND DISTRICT.

Mr. W. E. Ditchburn, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour of all classes has been well employed during the past month, the supply, in some instances, not being up to the demand. This is particularly the case of carriage blacksmiths, where a shortage of help has been reported. As a large amount of building is still in progress all employed in the building trades have been kept constantly employed, and the prospects are bright for many months to come. Unskilled labourers have been well employed, there being now employed by the city, at least 1,000 men in different municipal improvements. The city has so much work in hand that the Council has decided to depart from the practice of day labour and have let out some work by contract. The contractors will be governed by the same conditions as apply to the day-work system as to hours and pay.

During the month of May the new scale of wages went into effect in all the printing offices in this city, as well as Nanaimo, *viz*: Day work, $27 per week of forty-eight hours, in job offices, and forty-seven hours in evening newspapers; and $30 per week on morning newspapers, with a seven and one-half hour night. The new scale is an increase of 50 cents per day and night, with a decrease of one-half hour per night on morning papers, and one hour per week on evening papers.

A change in wages has also gone into effect in all plumbing, steam and gas-fitting establishments in the city, whereby the men get an increase of 50 cents per day for a week of forty-four hours, the new scale calling for $24.50, as against the old one of $22.

The previous monthly building records, this year, were beaten during the month of May, when permits for buildings aggregating $257,290 were issued, compared with $192,440 in the month of April. The monthly returns for the year, to date, compared with the same month of the two previous years, were as follows:—

Month.	1910	1909	1908
January	$128,985	$ 78,080	$ 54,275
February	151,760	122,680	72,325
March	244,760	121,640	110,800
April	192,440	188,060	129,625
May	257,290	188,620	79,295
Total, 5 months	$975,235	$699,080	$446,770

The bank clearings for the month of May also show a considerable increase over the same month of last year, being $7,485,447, as against $5,407,596 for May, 1909.

A strike in the different machine shops of this city took place on the fourteenth instant, and is the result of a general movement along the coast to establish the eight-hour day. The firms affected are the British Columbia Marine Railway Company, the Victoria Machinery Depot, the Ramsay Machine Works, and the Marine Iron Works. In all sixty machinists went out. The regular minimum wage for machinists in the past has been $3.25 for a nine-hour day. The scale provides for an eight-hour day at 45 cents per hour, or $3.60 per day.

A short strike among the plasterers on one of the large buildings, took place during the month when the workmen demanded in increase of 50 cents per day. The strikers places were filled.

CONDITION OF PARTICULAR TRADES.

All engaged in the building trades were kept in constant employment during the month.

Iron moulders found plenty of employment, as did iron workers and helpers. Machinists were busy up to the time of the strike, which took place on the fourteenth

instant. There are now sixty members of the Machinists Union out of work. Steam engineers (stationary) are in demand. Electrical workers and linemen were kept busy during the month. Blacksmiths and carriage blacksmiths have plenty of work, and carriage makers were much in demand. Boiler makers and iron shipbuilders have all the work they can handle at present. Shipwrights and caulkers were well employed, and the same may be said for the sheet metal workers. Woodworkers have been busy for months, particularly on store furnishings. Upholsterers found business normal. There is not much of this work done in the city, but at the local furniture stores their staffs were kept constantly employed. Carriage and wagon makers were also steadily employed at the various shops. Pattern makers stated that they are kept busy. There is only one cooper shop here, but it is always kept well supplied with work. Printers, linotype operators and pressmen have found trade brisk. Linotype operators have been in demand, but now that the new scale of wages has gone into effect it is thought that the shortage will be readily supplied. Until recently, Victoria had about the lowest scale on the coast, and for this reason it has been difficult to keep operators here. Bookbinders have been well employed. Journeymen tailors and garment workers have found trade active on spring and summer orders. Bakers, confectioners, butchers and meat cutters all were kept constantly employed. Cigar makers found business about normal. Barbers, clerks and stenographers have been busy. Hotel and restaurant employés, now that summer travel has set in, are kept steadily employed. Railway employés on the Eastern and Northern Railway are working to their capacity, owing to the fact that a double daily service has recently been put into operation. Ship labourers and longshoremen were well employed, and the same condition existed with street railway employés. Cab drivers, automobile drivers and draymen are making good earnings. All the available unskilled labourers were employed, city work keeping about 1,000 labourers employed. There has been a demand for unskilled labour of late.

NANAIMO, B.C., AND DISTRICT.

Mr. A. E. H. Spencer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There has been very little change in the labour situation in this district during the month, there being abundance of work going on in the city and district. With the commencement of the coming month the city will start a sewerage system, which will, when completed, cost in the neighborhood of $200,000; a large amount of cement sidewalk (several miles), and an addition to the waterworks, costing about $25,000. There are a good many men looking for work in the coal mines, due largely to the number of miners coming from the Old Country, but they are gradually getting work. The coal trade is active for the time of year. Wholesalers and retailers report business brisk and promising. There have been no changes in rates of wages or hours of labour during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers are quiet at present, getting ready for haying and harvesting.

Fishing.—There is little activity among the fishermen at present. The whaling stations on the west coast of the island are very busy, and from present indications, the catch, this season, will be larger than last year.

Lumbering.—The sawmills in the district are working steadily, with prospects good. The logging camps are in full operation, with more camps than last year.

Mining.—The coal mines in this district are working steadily with good prospects ahead. The Wellington Collieries, which have been bought by the Canadian Northern Company, will be opened up to a larger extent than ever before.

Railroad construction work is being pushed as rapidly as possible, and the heavy work is well ahead.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons report work as active. Carpenters and joiners are very active, there being more building going up than for a number of years, as well as remodelling and improving work. Painters and paper hangers, plumbers and builders' labourers have been well employed. Blacksmiths and carriage makers report business as good. Printers, teamsters and expressmen have been active. Unskilled labour has been well employed, and although there have been a good many men looking for work, they have not stayed long.

THE COST OF LIVING IN CANADA DURING THE PAST TWENTY YEARS—SPECIAL REPORT ON WHOLESALE PRICES, 1890-1909, ISSUED BY THE DEPARTMENT OF LABOUR.

WHAT is undoubtedly the most comprehensive statement on the subject of prices ever published in Canada was issued in the closing days of the past month by the Department of Labour in the form of a special report on the course of wholesale prices in Canada during the past twenty years, *i. e.*, from the beginning of 1890 to the close of 1909. Appearing as it does at a time when the recent rapid increase in the cost of living is perhaps the most widely discussed economic problem of the day, the report, as the first minute and scientific analysis of the situation in this country, will undoubtedly meet a very widely felt need. It has been in preparation by the Department for upward of a year, under the direction of Mr. R. H. Coats, Associate Editor of the *Labour Gazette*.

The report runs to 500 pages in length and contains about 150 charts and diagrams, 114 being in colours on heavy paper.

Object of the Investigation.

Briefly, the object of the investigation was to determine as accurately as possible the nature and extent of the general rise in prices which has occurred during the past few years, to present the material relating thereto in the most approved method, and to accompany the same with other matter not readily accessible for the study of price fluctuations in Canada. Though the results are more complete with regard to some branches of the inquiry than others it has been thought advisable to issue the report at the present time in view of the very pronounced interest now attached to all questions appertaining to prices and the cost of living.

The following is a review of the more important features of the report.

The Recent Rise in Prices.

Referring to the current interest in the cost of living question the reports states as follows:—

"For some time past, and especially since the beginning of the present century, one of the most important features of the general economic situation in Canada has been a rapid and continuous advance in prices and the cost of living. The upward tendency seemed to have reached its highest point in 1907, when prices attained a level unprecedented in many years previous. The financial panic of the autumn of that year operated in arresting this tendency, and in many departments set in motion a recession which extended over 1908. The check, however, proved but temporary; the comparative slightness of its effect and the early recovery of the upward trend constituted in fact an especially noteworthy feature of the stringency in Canada. This became marked with the increasing industrial activity and trade prosperity of 1909, in the closing months of which the high cost of living had become a subject of widespread discussion, affecting as it did the immediate personal well-being of nearly every one in the

community, especially those of the wage-earning and other classes dependent on fixed incomes. Since the opening of the present year public interest has been still more intense, a large number of the trade journals and daily newspapers of the country having published articles dealing with the question in greater or less detail, while a number of investigations of varying character into the nature and causes of the rise have been made by public and private initiative. At the present time it is safe to say no economic question equals in public interest, that of the recent rise and the existing high level of prices. 'When the history of 1910 comes to be written,' says one of the most recent and authoritative writers on the subject,[1] 'not the least memorable of its happenings to be chronicled will probably be the great agitation, partaking of the proportions of a national revolt, against the high prices of food.'

"In the United States, with which so many problems of this kind in Canada are intimately shared, the situation has apparently been even more acute than in this country. Public feeling arose to such a pitch during January, last, that a systematic boycott against the use of meats was undertaken in several localities, in which thousands of people joined. Congress has instituted an investigation into the general subject of prices, and several of the State legislatures have taken action in the matter. The movement extended to Canada, and the feasibility of a similar boycott was discussed at several points in Ontario, the object being primarily by way of protesting against what was felt to be an undue enhancement in the price of many of the most important commodities entering into the cost of living."

Genesis of the Investigation.

It was the primary object of the investigation undertaken by the Department to measure as accurately as possible the extent of the changes in Canada fraught with such importance to the community. Before intelligent discussion of a situation of this kind is possible it is necessary to define it both as a whole and in its component parts; especially before any attempt towards remedial treatment is made. The investigation, as above stated, represents the first effort to measure the extent of recent price fluctuations in Canada with proper breadth of view. This special object of the report was carried out in such intimate connection with the general statistical work of *The Labour Gazette* with regard to prices, as to require a word of explanation of its relation to that work as a whole.

To quote the report:—

"*The Labour Gazette* has for some time past dealt in a general way with prices in the monthly review of industrial and labour conditions throughout Canada, published as the leading article in each issue. In this article a paragraph has been devoted to a brief mention of the more important price changes reported in the preceding month. Prices have been regarded in this statement in a twofold light: (1) as indicating tendencies in the cost of living; and (2) as reflecting current industrial and trade conditions. For the former purpose, retail prices, which represent the actual cost of goods to the consumer, are the more suitable; for the latter, wholesale prices, including those of important raw materials, being much more sensitive than retail to passing sentiment, form the better barometer.

"The unsatisfactoriness of general statements in such a matter led the Department some time ago, to design a more comprehensive and systematic means of treating the subject of prices in this monthly summary. It was decided to deal henceforth with wholesale and retail prices separately. As the latter depend largely on local conditions, quotations for over thirty staple commodities entering largely into the cost of living (including foods, fuel and lighting) to which rentals are added, are to be obtained monthly from the forty-eight important industrial centres throughout the Dominion. This, it is thought, will cover adequately the cost of living aspect.[2] With regard to

[1] The Managing Editor of *Bradstreet's Journal* in the *Outlook* for March 12, 1910. 13722—1.

[2] Publication of these statistics was begun in the February, 1910, issue of *The Labour Gazette*.

wholesale prices, a list of 230 articles, representing the most important departments of Canadian production and trade, was carefully compiled; and quotations for each article will be obtained from month to month in the governing or representative wholesale market — the whole to be combined and analysed in accordance with statistical practice.

"The present investigation represents the carrying backward into the past of this second division of the subject, namely, the portion relating to wholesale prices. Apart from the special interest attaching to such an inquiry at the present moment, the method of presentation proposed rendered action of the kind necessary in order to obtain a proper basis on which to establish a comparative record of future prices. The investigation into past conditions, though confined to wholesale prices, will serve at the same time to indicate tendencies in cost of living, for though wholesale prices fluctuate much more frequently and violently than do retail, their accessibility and reliability render them the medium usually chosen for the purposes of an inquiry into cost of living."

General Plan of the Investigation.

The investigation was limited to the past twenty years (1890–1909) owing to the fact that it was found possible within that period to go back some distance prior to the time at which the recent rise in prices began and thus to obtain a sufficiently detached point of view. Records within these limits are on the whole easily accessible, but tend to become scarcer and less reliable as the review backward is extended.

The general plan followed in the inquiry was, to select a comprehensive list of representative staple commodities, and to trace the course of prices for each, from month to month back to 1890. With this material as basis, an interpretation and measurement of the movement of prices, both as a whole and in the more important departments of trade, is attempted.

Commodities Included.

The first step in the inquiry proper was to determine what commodities should be included. The object being to obtain a result representative of cost of living and the industrial life of the community as a whole, the plan was to embrace as many as possible of the main staple articles of Canadian production and consumption consistent with the avoidance of duplication and the preservation of proportion as between the several divisions into which the inquiry fell. Manufactured articles as well as raw materials were introduced, though specialized lines were avoided. Choice was in some branches limited by the difficulty of securing continuous quotations of certain articles, and it is hoped to add a few commodities[3] to the investigation as carried forward into the future. On the whole, however, the list is a comprehensive one, and the items have been carefully distributed. It is thought that the selection in this respect will compare with those of the well-known price records maintained in other countries and will fulfil the accepted canons of statisticians. The number of articles included, namely 230, is much larger than in the great majority of similar investigations.

The commodities have been arranged, for the purposes of the inquiry, in thirteen general groups, as follows:—

Group.	Number of Commodities.
1. Grains and fodder	13
2. Animals and meats	15
3. Fish	9
4. Dairy produce	5
5. Other foods (groceries, fruits, vegetables, &c.)	57
6. Textiles—	
(a) Woollens	5
(b) Cottons	4
(c) Silks	3
(d) Linens	3
(e) Jutes	2
(f) Miscellaneous	2
7. Hides leather, boots and shoes	11
8. Metals and implements	27
9. Fuel and lighting	10
10. Building material—	
(a) Lumber	11
(b) Miscellaneous building materials	14
(c) Paints, oils and glass	14
11. House furnishings (furniture, crockery and glassware, kitchen furnishings and table cutlery)	16
12. Drugs and chemicals	15
13. Miscellaneous—	
(a) Furs	4
(b) Liquors and tobacco	4
(c) Sundry	6

[3] Notably, flax seed, asbestos, mica, tea (black, Indian), onions (Canada red), B.C. fir timber and paper.

The above grouping may, of course, be varied for special purposes, and has been so varied in analysing the returns so as to show the movement of all products of the farm, all foodstuffs, all manufactured products, &c.

In chosing the articles covered the consumption standard was made the basis, though the aim was to reflect production and general trade as well. For example, under the heading 'grains and fodder' the main products of the chief agricultural Provinces, whose prices either rule or reflect conditions for the whole of Canada, are taken. Under the heading 'fish' the more important products of the three great divisions of the Canadian fisheries, viz., the fisheries of the Maritime Provinces, the fisheries of the great lakes of the interior, and the fisheries of the Pacific coast, are included. In lumber, staple products of the New Brunswick, Quebec, Ontario and British Columbia forests will find a place. Under textiles, quotations of woollens, cottons, linens, silks, jutes and oilcloths are given, the first-mentioned group being represented by quotations of wool, washed and unwashed, a typical Canadian yarn, a typical all-wool woven fabric and a typical knitted product. Under 'other foods' the wholesale grocery and provision trades of Toronto and Montreal are reflected. Similarly with metals, meat products, leathers, house furnishings, chemicals and the rest.

Sources of Information.

For each of the above 230 commodities an effort was made to secure a reliable price quotation in a primary or representative wholesale market, for the opening week day of each month in each year back to 1890. The daily press and weekly trade journals of the country, the printed reports of Exchanges, Boards of Trade, etc., were the first sources laid under contribution. Toronto and Montreal markets furnish the great mass of the quotations. The records thus obtained were verified by reference to long-established and favourably known business firms dealing in the articles in question. Where reliable printed matter failed, the books of manufacturers and wholesalers were by courtesy of the owners, consulted, and some valuable data obtained. Monthly quotations were not in all cases considered necessary, as in the case of articles of which the prices are fixed at considerable intervals, and in a few other cases were not available; here yearly averages, based in each case on expert opinion, were secured. Seventeen of the 230 series of quotations represent annual averages obtained in this way. It may be added that every care was taken to insure that the prices quoted for each article represent a uniform quality and uniform conditions of sale throughout.

An Index Number Constructed.

An explanation is given as to the method employed in analyzing and interpreting the results found as above. This is the well known method of index numbers, which is described as follows:

"The object of an index number is to show the combined or final effect of several price changes. The nature and extent of changes in the price of a single commodity may be seen at a glance by the inspection of a series of actual price quotations. Suppose, however, the price of Ontario wheat advances within a given period, say, 10 cents a bushel, while the price of New Brunswick spruce lumber declines, during the same period, say, $3.00 per 1,000 feet—how may the net result of the two changes be expressed? The answer is, by reducing actual price quotations in each case to the form of a percentage of the price during a common standard period, (*i.e.*, translating the quotations into the terms of a common denominator) in which form they may be combined. This, in effect, is the method of index numbers. An index number of any article or number of articles at any date is the percentage which the price of that article or number of articles at that date is of the price of the same article or articles at another date or period selected as a standard.

"In the present investigation the period selected as the base or standard period is the decade 1890–1899. When it is stated,

therefore, that the index number of lard in 1909, is 161.3, the meaning is that the average price of lard in 1909 was 61.3 per cent. above the average price of that commodity during the decade 1890–1899. When, similarly, it is said that the index number of 'grains and fodder' for 1909 is 149.9, the expression simply means that, combining and averaging the 1909 prices of the thirteen products included in that division of the investigation, the result shown is 49.9 per cent. higher than the result for the decade 1890–1899. Again, when it is said that the Department's final index number for 1909 is 127.5, the meaning sought to be conveyed is that the prices of the 230 commodities included in the whole investigation show, when reduced to an average, an increase of 27.5 per cent. compared with the average level of prices during 1890–1899."

As the calculation of an index number is a technical process, a description of the method followed in the present report has been reserved for an appendix, to which the reader is referred for details as to the manner of combining the price statistics, considerations influencing the selection of the base period, the reckoning of the average, &c.

By the publication of the index number established in the report from month to month in future, the Department will be able to supply an analysis of current prices in Canada similar to that furnished by the London *Economist's* index number in the case of Great Britain, or the index numbers of Dun and Bradstreet in the United States. The need for such contemporary analysis is obvious. It is true that for many of the most important Canadian products the price is fixed in the world-market, and the index numbers of other countries accordingly apply to a degree here; yet the rapid development of the Dominion and the differentiation in conditions implied thereby have created a demand for independent statistics. For example, it has been asserted that the effects of the financial stringency of 1907, were less severe on prices in Canada than in the United States. Yet no means of statistical comparison on broad lines has hitherto been available.

Arrangement of Material.

In presenting the statistics obtained, with an analysis of the same, the arrangement of the report is as follows:—

The subject matter has been divided into three parts with an introduction and an appendix:—

Part I.—In the first part of the report, the records of actual price quotations obtained are given. These represent the complete body of statistical matter secured in the case of each commodity and form the ground work of the whole report. Full details are given at the head of each table of the source of the statistics, exact quality of the article quoted, &c. The average price for each year is also shown.

Part II. Following the tables of actual prices, a series of tables is given in which the average annual prices shown in Part I. are expressed in the form of index numbers. This enables the price fluctuations of the several commodities from year to year to be compared on a similar basis and to be combined so as to show the movement of related groups. An index number is given for each commodity, for each of the several divisions and subdivisions indicated in the list of commodities, and for certain other groupings.

Part III. In the third division of the report a series of charts is published which will show at a glance the more important features of the price movement of the past twenty years. These charts are based on Parts I. and II., and are self-explanatory.

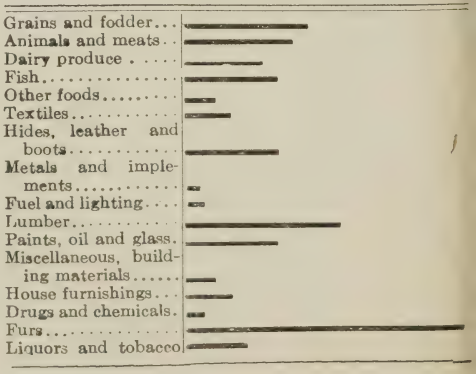
Appendix. The appendix to the report is in three parts: (1) A description of the technical problem involved in the construction of the index number. (2) A review of the more celebrated index numbers of Great Britain and foreign countries, with tables and diagrams of the results which they severally show, the whole being given in illustration of the problem described in Part (1) and as of direct interest in connection with existing conditions in Canada. (3) A statement as to the causes and effects of price variations, with special reference to existing conditions in Canada, and the character of the data necessary to determine the same with exactness.

General Result of the Investigation.

The net result of the investigation is perhaps most clearly indicated by the chart published on the opposite page, in which the line indicates the course which the averaged prices of all commodities included in the investigation followed from 1890 to 1909, inclusive. The level indicated by the number 100 in the table represents the average price of the commodities during the decade 1890–99.

The aggregate index number on which the chart is based is shown in the table published on the next following page, which also contains from year to year the index numbers for the several groups into which the commodities are divided.

On referring to the table and chart, the reader will see that prices in Canada followed a downward course from 1890 to 1897. This was succeeded during the ensuing decade by a more rapid upward movement which culminated in 1907. The last mentioned year was by a considerable margin the highest point in the twenty-year period. Prices fell in 1908, but were upward again in 1909.



Comparing the more important points in this progress with the average level of prices during the decade 1890–1899, it will be seen that in 1890 prices were somewhat over ten per cent. above that average. In 1897, after three years of panic depression and political unrest in the United States and Canada, they had fallen to a point nearly eight per cent. below. Within six years thereafter, however, they regained this loss. Continuing to mount with extreme rapidity, in 1907, they reached a point over twenty-six per cent. above the average of the base decade. The recession in 1908, amounted to nearly five points. During 1909 this recession was checked and a gain in the opposite direction registered.[1]

Comparing the high year 1907, with the low year 1897, the advance amounted to approximately thirty-seven per cent. Comparing the year 1909, with the low year 1897 the increase shown is approximately thirty-one and five-tenths per cent.

Referring to the several groups, it will be seen that the chief advances occurred in lumber, grains and fodder, animals and meats, furs, hides and leather, paints, fish and dairy produce. None of the other groups show a decline compared with the base decade, but metals and implements, fuel and lighting and drugs and chemicals are but slightly above the average of 1890–1899. Somewhat larger advances are shown by textiles, fruits, groceries, house furnishings, miscellaneous building materials, and liquors and tobaccos.

In arriving at the above conclusions, the simple average of the prices of all the commodities covered in the investigation was taken. In other words the several commodities of the list were regarded as of equal importance from the standpoint of the consumer. This, of course, is not true to the fact. Wheat is of vastly greater importance in consumption than, say, pepper. For considerations, however, which are regarded by competent authorities as sufficient, and which being largely of a technical nature are explained in detail in the appendix, the method of taking a simple average may be relied upon, in an investigation covering so many commodities as the present to show an accurate result.

DIAGRAM SHOWING COMPARATIVE EXTENT OF INCREASE OF PRICES IN THE SEVERAL GROUPS IN 1909, AND DURING THE DECADE 1890–99.

[1] During the first half of 1909 the downward tendency of 1908 was continued, the gain for the year as a whole having been made during the closing months, so that the upward tendency in progress during the autumn was more pronounced than is indicated by the number for the year as a whole.

Chart Showing the Course of Wholesale Prices in Canada during the Twenty years 1890-1909

High and Low Prices.

In order to show at a glance the extreme range of actual prices in the case of each commodity a table is published of the highest and lowest prices shown for each article.

Following this an extended analysis is given of the results of the investigation by groups and commodities, each of the 230 articles being dealt with in a separate paragraph.

Variations in Groupings.

The groupings into which the commodities are arranged were dictated largely by Canadian industrial and commercial conditions. Other arrangements of the commodities may be desirable with specific ends in view. For example, the report gives the following tables as showing the general level of prices in 1909, compared with those of the decade 1890–1899 for the following groups:—1. Crude farm products; 2. Manufactured farm products; 3. Imported foods; 4. All foodstuffs, and, 5. Products of the mine.

Crude Farm Products.

Wheat, western	140.5
Wheat, Ontario	143.0
Oats, western	133.3
Oats, Ontario	150.7
Barley, western	160.9
Barley, Ontario	145.1
Corn, No. 3, Ontario	164.6
Peas, Ontario	158.4
Rye, Ontario	140.4
Hay	135.0
Straw	133.8
Cattle, western	112.4
Hogs, Ontario	147.5
Cattle, Ontario	152.2
Sheep	100.0
Fowls	188.3
Turkeys	185.8
Milk	127.8
Eggs	171.5
Beans	177.9
Honey	147.4
Wool, washed	106.6
Wool, unwashed	107.5
Apples	150.5
Grapes	104.9
Peaches	105.7
Pears	102.1
Plums	89.4
Potatoes	142.8
Turnips	93.7
All	137.3

Manufactured Farm Products.

Flour, straight roller	136.7
Flour, strong bakers	123.2
Flour, winter wheat patents	124.5
Flour, Manitoba first patents	123.9
Bran	182.2
Shorts	162.2
Oatmeal	143.3
Beef, dressed	168.2
Veal, dressed	142.6
Mutton, dressed	121.7
Bacon	146.0
Hams	131.1
Hogs, dressed	166.8
Lard	161.3
Tallow	112.9
Salt pork	157.1
Hides, steers and cows	205.4
Calfskins	192.3
Horsehides	100.5
Leather	119.5
Linseed oil, raw	109.7
Linseed oil, boiled	109.9
Butter	122.3
Cheese	124.4
Maple sugar	108.0
Apples, evaporated	93.6
Flax, fibre	117.2
Tow	60.6
Malt	123.4
All	134.1

Imported Foods.[1]

Chocolate	110.9
Coffee, Rio	51.8
Coffee, Santos	62.8
Cream of tartar	84.7
Currants	137.2
Raisins	78.8
Bananas	115.2
Molasses	78.6
Pepper	101.6
Rice	113.3
Sugar, yellow	107.8
Sugar, granulated	95.0
Tapioca	93.2
Tea	132.6
All	96.2

All Foods.

Grains and fodder	149.9
Animals and meats	148.6
Dairy produce	133.6
Fish	134.0
Other foods	107.6
All	126.7

Products of the Mine.

Antimony	68.9
Copper	105.8
Lead	99.1
Silver	69.6
Spelter	105.8
Tin	149.7
Coal, Nova Scotia	124.7
Coal, Crow's Nest Pass	113.3
Coal, Pennsylvania, anthracite	113.9
Iron, pig, No. 1, foundry, Nova Scotia	114.3
All	106.5

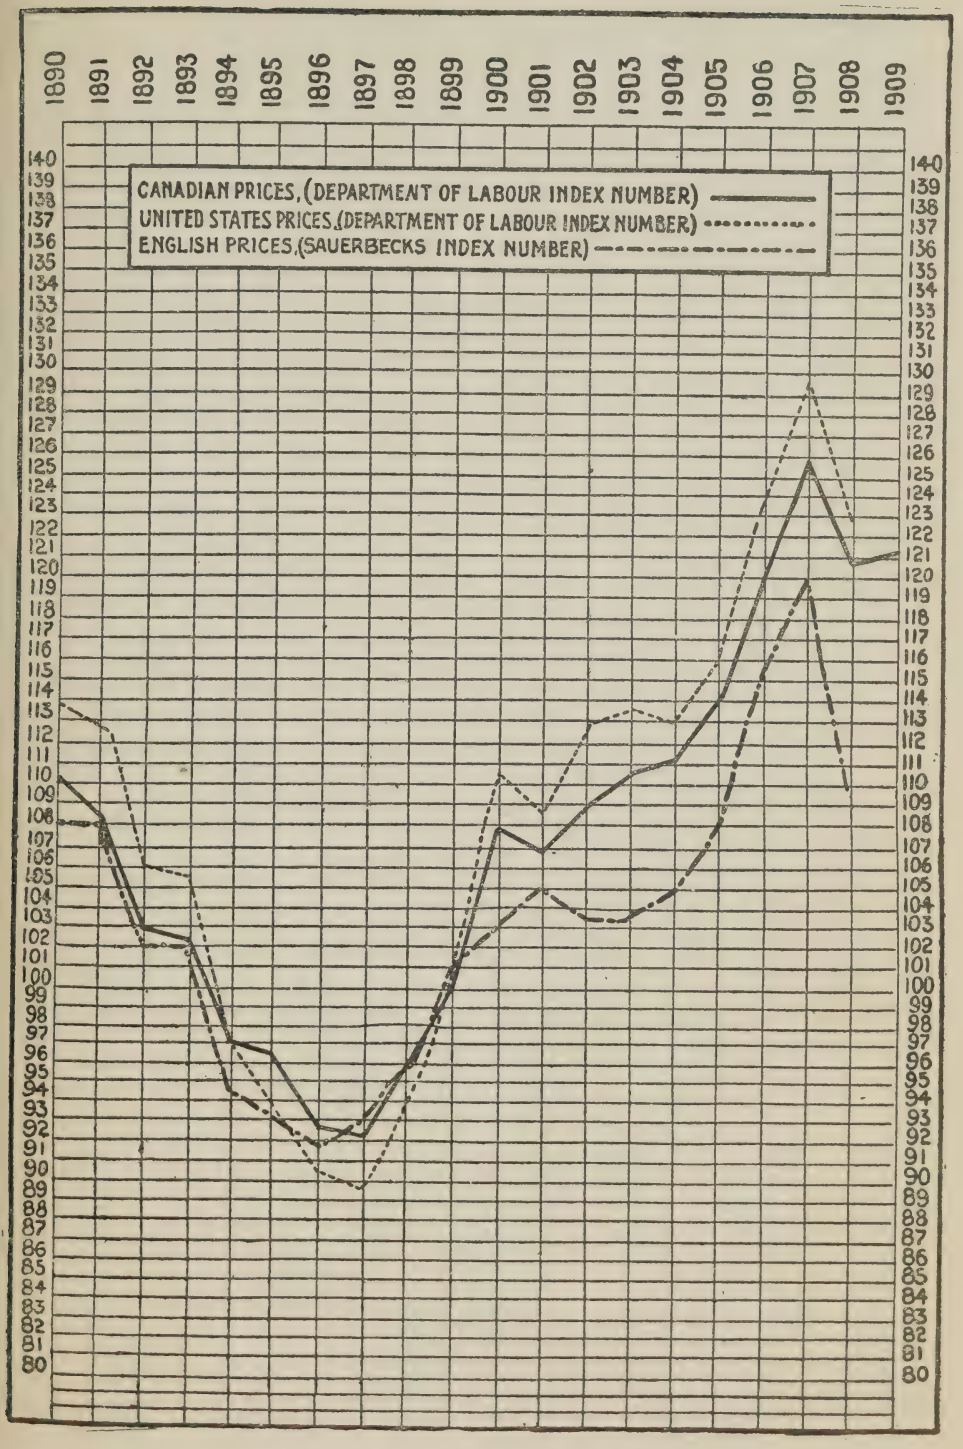
[1]Including foods manufactured from imported raw materials.

To the above it may be added that the 110 articles manufactured in Canada contained in the list of commodities quoted in the investigation show an average level of 114.1 per cent. in 1909, compared with the average for the decade 1890–1899.

Commenting on the above, the report states:

"From the above and other analyses several important central facts as to the general situation at present may be ascertained. Of the great producing industries, agriculture seems to show the largest increase in prices. Crude farm products (grains, fodder, meat producing animals, milk, eggs, wool, fruits, vegetables) have advanced by over thirty-seven per cent. compared with the base decade. The products made therefrom (meats, bran, flour, hides, leather, etc.) have increased by over thirty-four per cent. On the other hand imported foods are lower than they were during the decade 1890–1899. Fish products are nearly but not quite so high as farm products. Products of the mine are only slightly above the level of the decade, and, if coal be excluded, are below that average. Coming to Canadian manufactured products, the general level is about fourteen per cent. above the level of the base decade. Included in this estimate are various grades of Canadian lumber which on an average are fifty per cent. dearer than during the base period. If lumber be excluded, the manufactured products of Canada show a gain of less than ten per cent. compared with the decade 1890–1899. These and other facts of a like nature are of the utmost significance in connection with the interpretation of the results of an investigation like the present. The tables of index numbers will permit of many variations upon the theme."

Comparative Prices, 1890-1899, in Canada, Great Britain and the United States.



Part II. of the appendix to the report contains, as above stated, a review, in greater or less detail, of the findings of the best known index numbers of Great Britain, the United States and other countries. Based on certain of the tables and diagrams therein reproduced, a comparison is given in the chart reprinted on the opposite page of the course of prices in Canada as shown by the investigation, with the current movement in Great Britain and the United States, the two countries with which the commercial and economic interests of the Dominion are most closely associated. Referring to the chart, it will be observed that the general course of prices has been similar to the three countries, but that the movement as between Canada and the United States has been on lines more nearly parallel from year to year than as between Canada and Great Britain.

Tables and Charts.

As above stated, the report contains for each of the 230 commodities covered by the investigation, a table setting forth in full the statistics collected by the Department and the source of each quotation. The reader is thereby enabled to follow every step towards the conclusions reached. A specially noteworthy feature of the report is Part III. which, as above pointed out, is devoted to a series of charts illustrating the more interesting and significant conclusions shown by the investigation. The charts in this section are printed in colours on heavy coated paper and number in all 114. As nearly all show the variations of two or more commodities or related commodities in combination, a large number of phases of the situation is illustrated in this way.

Review of Various Index Numbers.

An interesting and valuable portion of the report is the appendix, in which after a detailed discussion of the problems involved in the construction of an index number, with special reference to the manner in which the present number has been calculated, an extended review is given of the more celebrated index numbers of Great Britain, the United States and the continent of Europe. As the price of many of the most important articles of consumption is to a considerable degree determined

by conditions in the world's market, the finding of these investigations have a direct significance in connection with the present situation in Canada. During the past few months frequent citations of certain of these numbers have appeared in the public press. The object of the report is to render easily accessible for the Canadian public full information as to the origin, methods and findings of such well known index numbers as those of the London *Economist*, Jevons, Sauerbeck, the British Board of Trade, Soetbeer, the United States Senate Committee on prices, the United States Department of Labour, Dun, Bradstreet, etc. In each case full tables of the numbers are given, with diagrams based thereon.

The Causes and Effects of Price Variations.

The concluding portion of the appendix is devoted to what is perhaps the most interesting aspect of the question, namely, an analysis of the causes and effects of variations in prices with special reference to the existing situation in Canada. In proceeding with this discussion the report states:

"The primary object of the present inquiry has been throughout, to afford an accurate and comprehensive view of the movement of prices in Canada during the past two decades. No attempt has been made to deal with causes, except incidentally, in referring to important temporary fluctuations of particular commodities arising out of obvious or special circumstances. For example, an advance in brooms which took place during the autumn of 1909, is mentioned as a result of the exceptionally high price of broom corn, due in turn to crop failure, similarly, it is pointed out, a sharp decline in the price of silver-plated ware in 1907, occurred simultaneously with the equipment of a large establishment for the manufacture of this class of goods in Canada; while a reference is made, in a general way, under the heading of lumber, to a number of circumstances which have accompanied, and have been suggested as explaining, the recent pronounced rise in that commodity. To go further than this, in a report like the present, would be to trench on ground which another and quite different kind of investigation is required to open up, namely, an inquiry into recent industrial, commercial and financial conditions and methods in the light of the economic theory of prices.

"The striking nature, however, of the circumstances prompting the investigation, and of the results now shown, namely, a rise of considerably over one-third in the general level of prices within the past twelve years—a rise which is still in progress—has directed very widespread attention to the question of what are the causes of a phenomenon which implies so many serious consequences to the community. It may be well, therefore, in concluding to point to some of the leading agencies which may produce a rise or fall in prices; which have probably been operative either separately or in combination to a greater or lesser degree in bringing about the present situation, and which should be taken into account by any one seeking an explanation of the changes illustrated in the accompanying tables and charts—whether they be changes temporarily in the price of a particular commodity, and comparatively easy of solution, or changes in the general price level, extending over a period of years, persisting through and in spite of temporary fluctuations, and involving considerations perhaps as wide as the organizations of society itself. Taking the last sixty years, as portrayed by the index numbers previously cited, such a general movement (upward) prevailed from 1848 to 1873; such a general movement (downward) from 1873 to 1897; and such a general movement (again upward) from 1897 to the present time."

In discussing the causes of price movements differentiation is made in the report between causes primarily affecting the commodities themselves and causes primarily affecting money. Dealing first with conditions arising in connection with the commodities themselves,

the question is approached from the two points of view of supply and demand, though it is pointed out that the two viewpoints do not involve distinct sets of phenomena. As causes affecting in their immediate or more natural application the supply of an article the following are mentioned: Variations in harvests or yields; improvements or other changes in methods of production or transportation, with special reference to cold storage; the operation of trade combines, trade agreements, etc., and legislative enactments. From the standpoint of causes primarily affecting demand the following are mentioned: seasonal causes; changes in custom or fashion; industrial expansion, involving deferred productivity. Under the last heading the following paragraph occurs:—

"Under this heading falls to be considered a feature of the present situation which has been declared to lie at the very basis of the high prices prevailing. The past decade has been one of exceptionally rapid industrial expansion in Canada. Immigration has been on an unprecedented scale. Large areas of new lands have been brought under cultivation. Accompanying this has been a heavy expendtiure, chiefly of borrowed capital, on railways, towns, public works and other large undertakings. The point emphasized in this connection is that many of these enterprises have not yet become productive. Hence the weight thus far has been thrown almost entirely into the demand side of the scale. The demand has been, in the first instance, for the materials consumed in the actual undertakings; but the circle of industrial and trade activity, once set in motion, has gone on widening until it has reached all but the uttermost edge of the community. In the tables it will be seen that heavy increases have taken place in lines brought primarily under the influence of the expansion, such as lumber, food supplies, and articles produced by the labour deflected, whereas goods of distant growth and manufacture appear in many cases less affected, other things being equal. In the general result, wages and prices have been following each other for some time past in what has been described as 'an ascending spiral.' The shortening of hours and the slackening of effort mentioned above are perhaps best considered as a parallel phenomenon with the rise of wages. So likewise is the fact that with greater spending power, has come a general rise in the standard of living. Wastefulness and extravagance may have supervened, having their root in the distribution of so much accumulated wealth. A standard of this kind once established is very difficult to dislodge. 'The luxury of to-day' says John Stuart Mill, 'is the necessity of to-morrow.' This point of view in its present application has been summed up in the remark that the problem to-day is not one of the high cost of living, but one of the cost of high living. But the situation is wider than any merely personal issue, and its solution depends to a degree on the transition from potential to actual productiveness of the buildings, railways and towns now under construction, whereby what have hitherto been very potent factors in demand will become factors also in supply."

Analysing the agencies which act upon prices through the monetary and financial systems the following statement is made:—

"Without expressing any view on so frequently debated a subject as the so-called 'quantity theory' of money (except to say in passing that in no case is it to be regarded as capable of simple application) it may be pointed out that the gold supply of the world has within recent years received a heavy accretion. According to estimates of the United States Mint, the gold production, which in 1895, was approximately $199,304,000, rose steadily to over $300,000,000 in in 1899. It has continued to increase since, reaching $435,000,000 in 1908. But several equally important considerations must be dealt with in collaboration with these returns. The gold side of the problem, like the commodity side, is of two aspects, supply and demand. In the first place, the annual supply of gold as estimated above, must be con-

sidered relative to the total stock—gold not being subject to destruction like most other commodities, except to the insignificant extent represented on losses and abrasion. This at once reduces materially the significance of any increase or decrease in annual output. On the side of demand, likewise, careful investigation must be made to see if any offset to the increase in supply may not have occurred. The possibly increased use of the precious metal in the arts and in hoarding as well as for currency must be borne in mind. There is the fact also that Japan, Mexico and several South American States have adopted the gold standard during the past fifteen years, thus creating a new demand for the metal. Again, has the increase in the gold supply been greater proportionately than the increase in the commerce of the world has required? And has the rapidity of circulation been unchanged in the past decade? In any event the part which gold plays as a direct vehicle of exchange dwindles into insignificance beside that of the credit system which, though, resting on a metallic basis is not necessarily proportioned to metallic reserve, and the organization of which is therefore a most important factor in the modern financial world. The whole level of prices is swayed at intervals according to the confidence or timidity of purchasers and investors. That the organization of this system has been increased and perfected of late there would seem evidence to believe. The rapid recovery from the panic of 1907, is by many attributed to the increased confidence which increased organization has been able to produce. But to appraise this accurately would require an investigation of the entire financial system."

Dealing with the effects of variations in prices the concrete question discussed is as follows: Prices having risen approximately one-third in the past twelve years what is the meaning of the change to the individual and the community? The bearing of the statistics contained in the report on this question is fully explained. In conclusion it is pointed out that a change in prices affects the well-being of the consumer only where no corresponding change in income has occurred. No final investigation of wages tendencies within the past twenty years was possible within the limits of the report, though the records of the Department of Labour show that there has been a continuous upward tendency since 1901, this tendency becoming pronounced in 1903 and in 1907. As throwing a partial light on this aspect of the question a table is appended showing the wages of several classes of employés throughout Canada in 1899 and 1909. The data are presented without analysis as it is hoped to add considerably to the same in future.

In articles published in recent issues of the *Labour Gazette* several of the tables and diagrams above referred to have been printed. The several commodities included in the animals and meats, grains and fodder, fish, dairy produce, and hides and leather groups have thus appeared. On the following pages the charts which show the remaining groups in combination are given.

CHART SHOWING RELATIVE PRICES OF OTHER FOODS—GROCERIES, FRUITS AND VEGETABLES, 1890-1909.

Commodities included: (1) Groceries: Beans, Biscuits, Chocolate, Coffee, Cream of Tartar, Flour, Honey, Maple Sugar, Molasses, Oatmeal, Pepper, Rice, Salt, Soda, Sugar, Tapioca, Tea, and Vinegar; (2) Fresh Fruits: Apples, Bananas, Grapes, Peaches, Pears, and Plums; (3) Dried Fruits: Apples, Currants, and Raisins; (4) Fresh Vegetables: Potatoes and Turnips; (5) Canned Vegetables: Corn, Peas, and Tomatoes.

(Average Price 1890-1899=100)

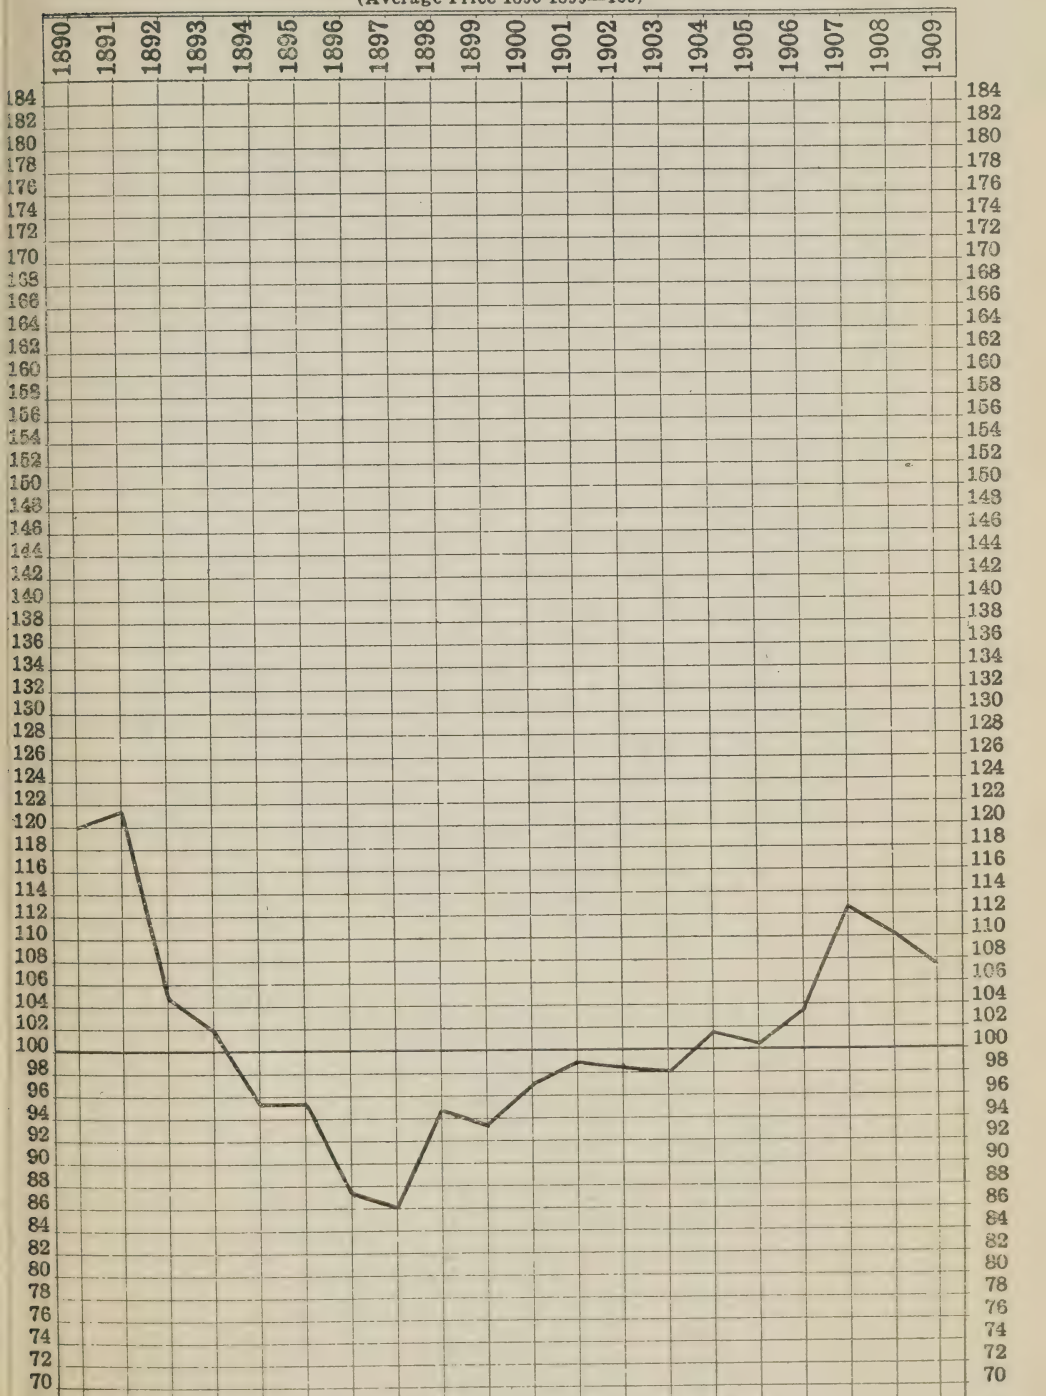

CHART SHOWING RELATIVE PRICES OF TEXTILES, BY GROUPS, 1890-1909.

Commodities included: Wool and Woolens; Wool, Ontario, washed and unwashed; Canadian Worsted Yarn; Knitted Underwear; Beaver Cloth; Cotton and Cottons: Raw Cotton Upland Middling; Grey Cottons; Woven Coloured Fabrics; Prints; Flax products: Tow, coarse and fine; Flax fibre; Sewing flax; Jute: Jute, first marks; Hessian, 10 1-2 oz., 40 in.; Silk and Silks: Silk, Raw, Japan and Italian; Spool Silk; Machine twist.

(Average Price 1890-1899=100)

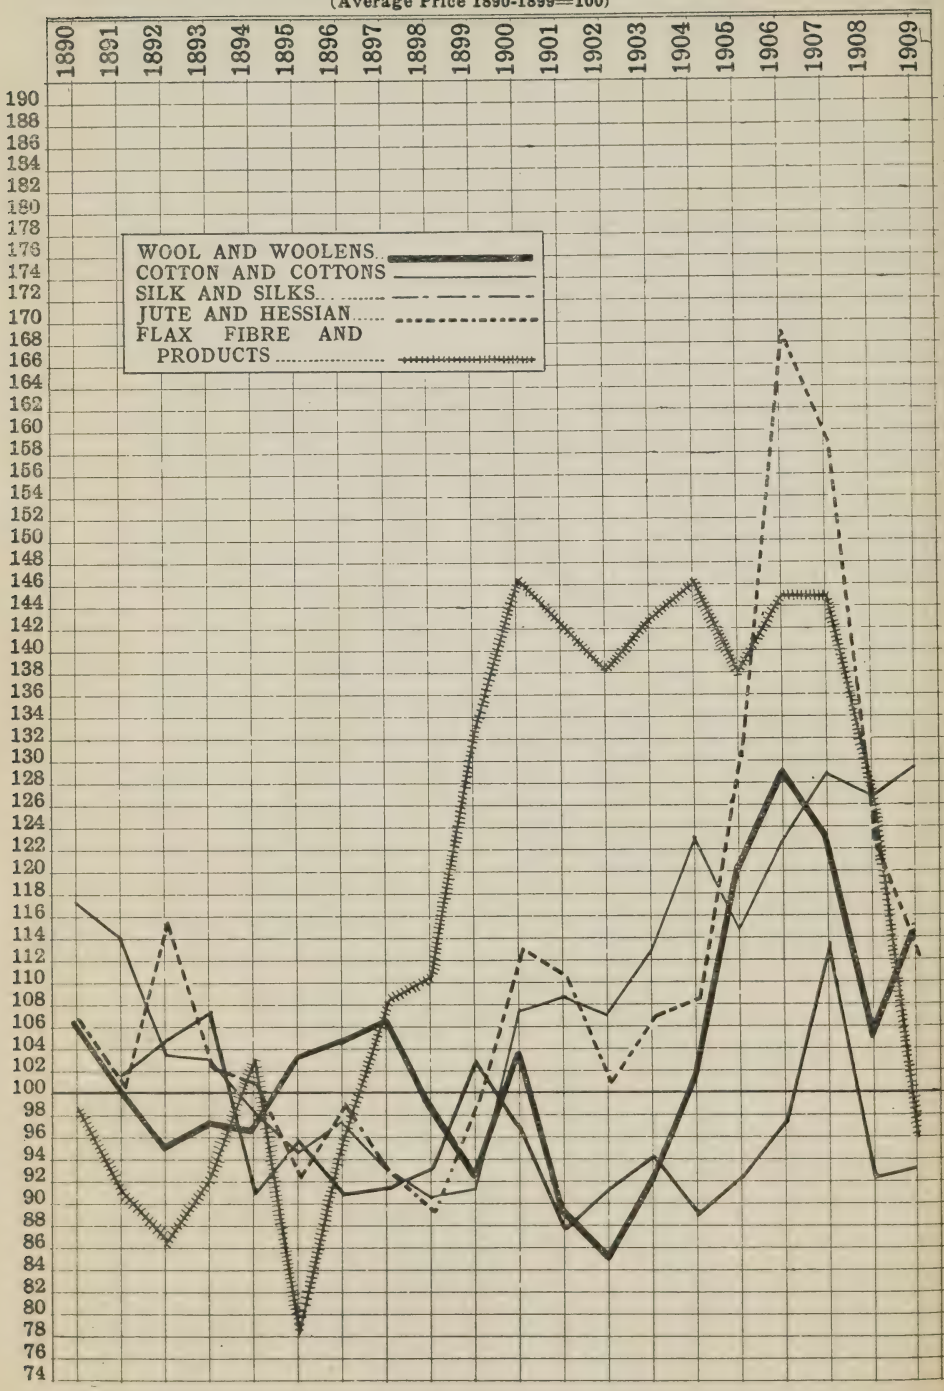

CHART SHOWING RELATIVE PRICES OF LUMBER, 1890-1909.

Commodities included: Pine, Ottawa, good sidings, shipping culls, and box boards; Pine, Ottawa, average cut, all grades; Pine, Georgian Bay, No. 1 cuts; Pine Laths; Hemlock; N. B. Spruce; N. B. Shingles; Birch; Maple (soft); and Red Oak.

(Average Prices 1890-1899=100)

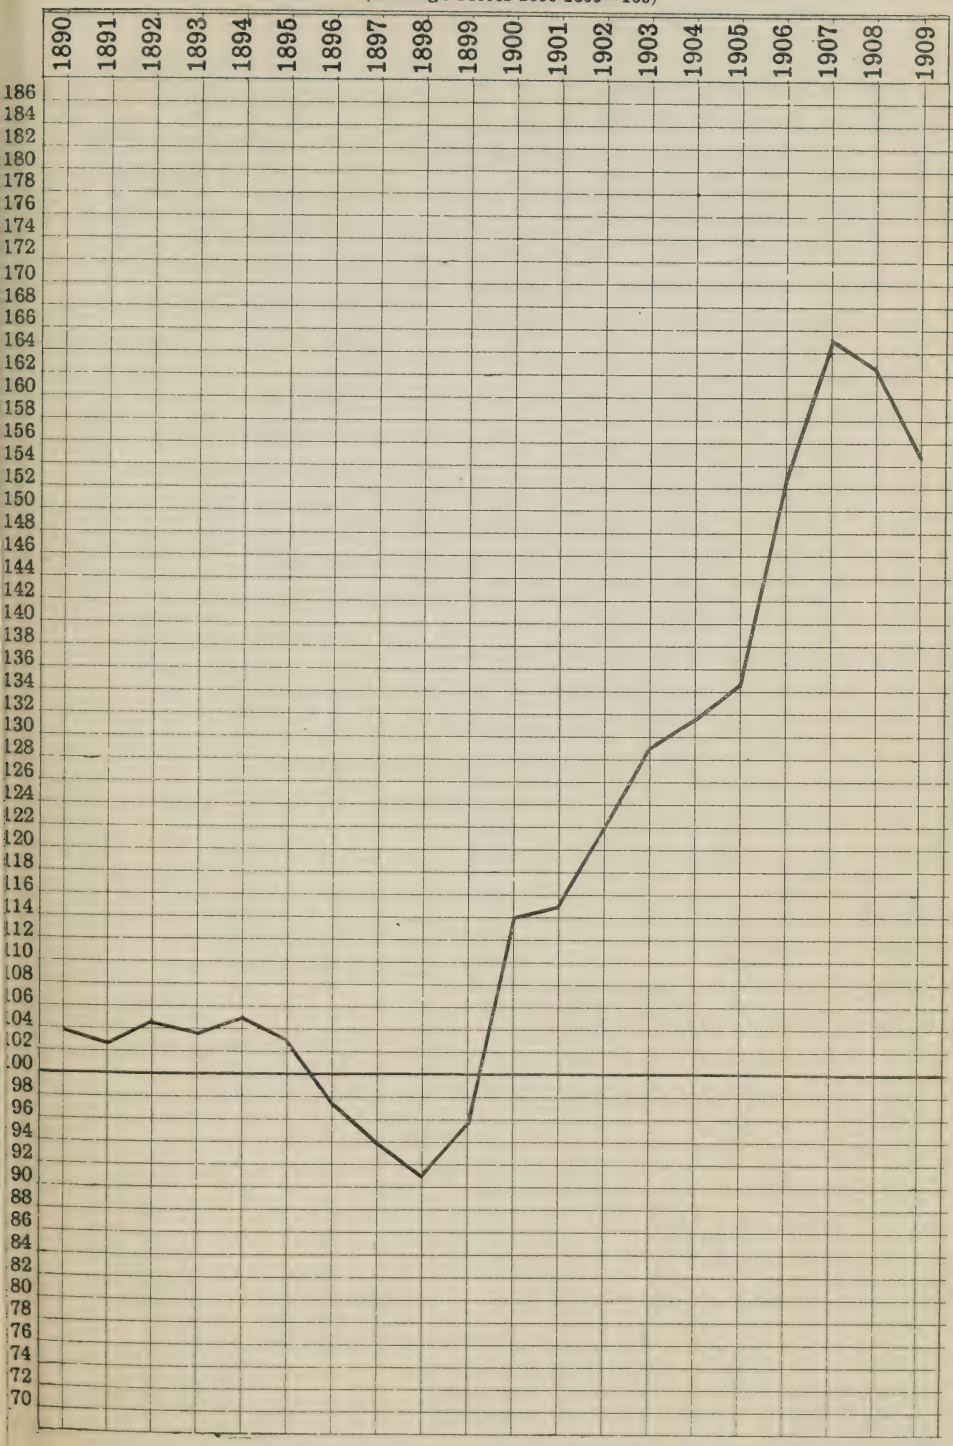

CHART SHOWING RELATIVE PRICES OF PAINTS, OIL AND GLASS, 1890-1909.

Commodities included: Benzine, Canadian; Glue, Domestic broken sheet; Linseed Oil, raw and boiled; Paris Green, English and Canadian; Prepared Paints, 1st quality, pure; Putty; Rosin, white; Shellac, pure orange; Turpentine; Varnish, No. 1 Furniture; Venetian Red (dry colour); White Lead, pure, ground in oil; Window Glass, "Star" (first break.)

(Average Price 1890-1899=100)

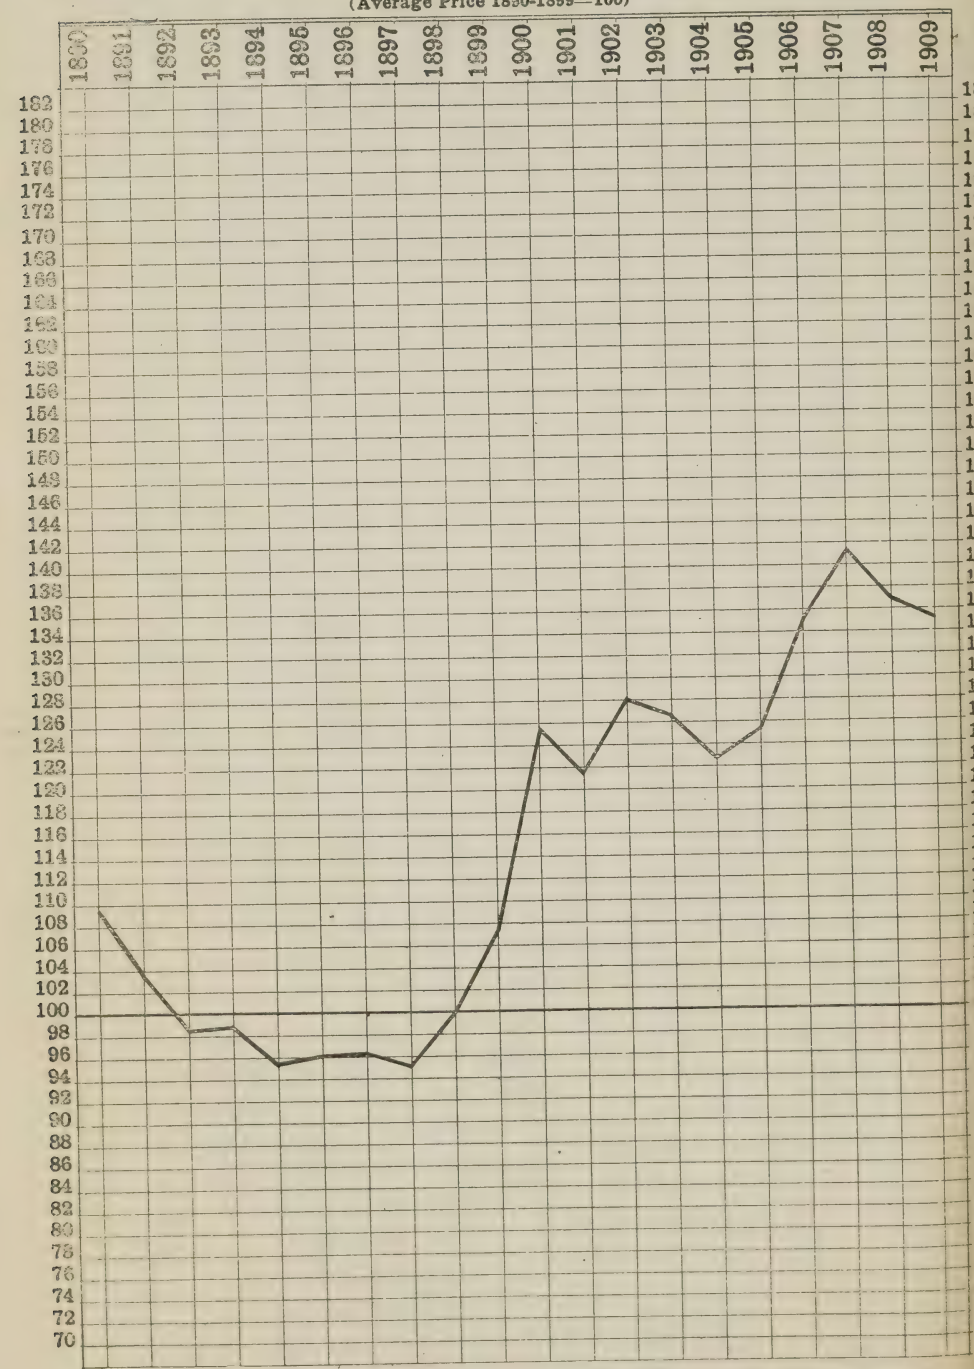

CHART SHOWING RELATIVE PRICES OF MISCELLANEOUS BUILDING MATERIALS, 1890-1909.

Commodities included: Bricks, common building; Bricks, fire; Cement, Canadian Portland; Hinges, heavy; Lime, high calcite; Nails, cut; Nails, wire; Plaster of Paris; Pitch, roofing; Sash Weights; Soil Pipe, 4 in., medium; Tar, Crude coal; Wire Cloth; and Wire Fencing.

(Average Price 1890-1899=100)

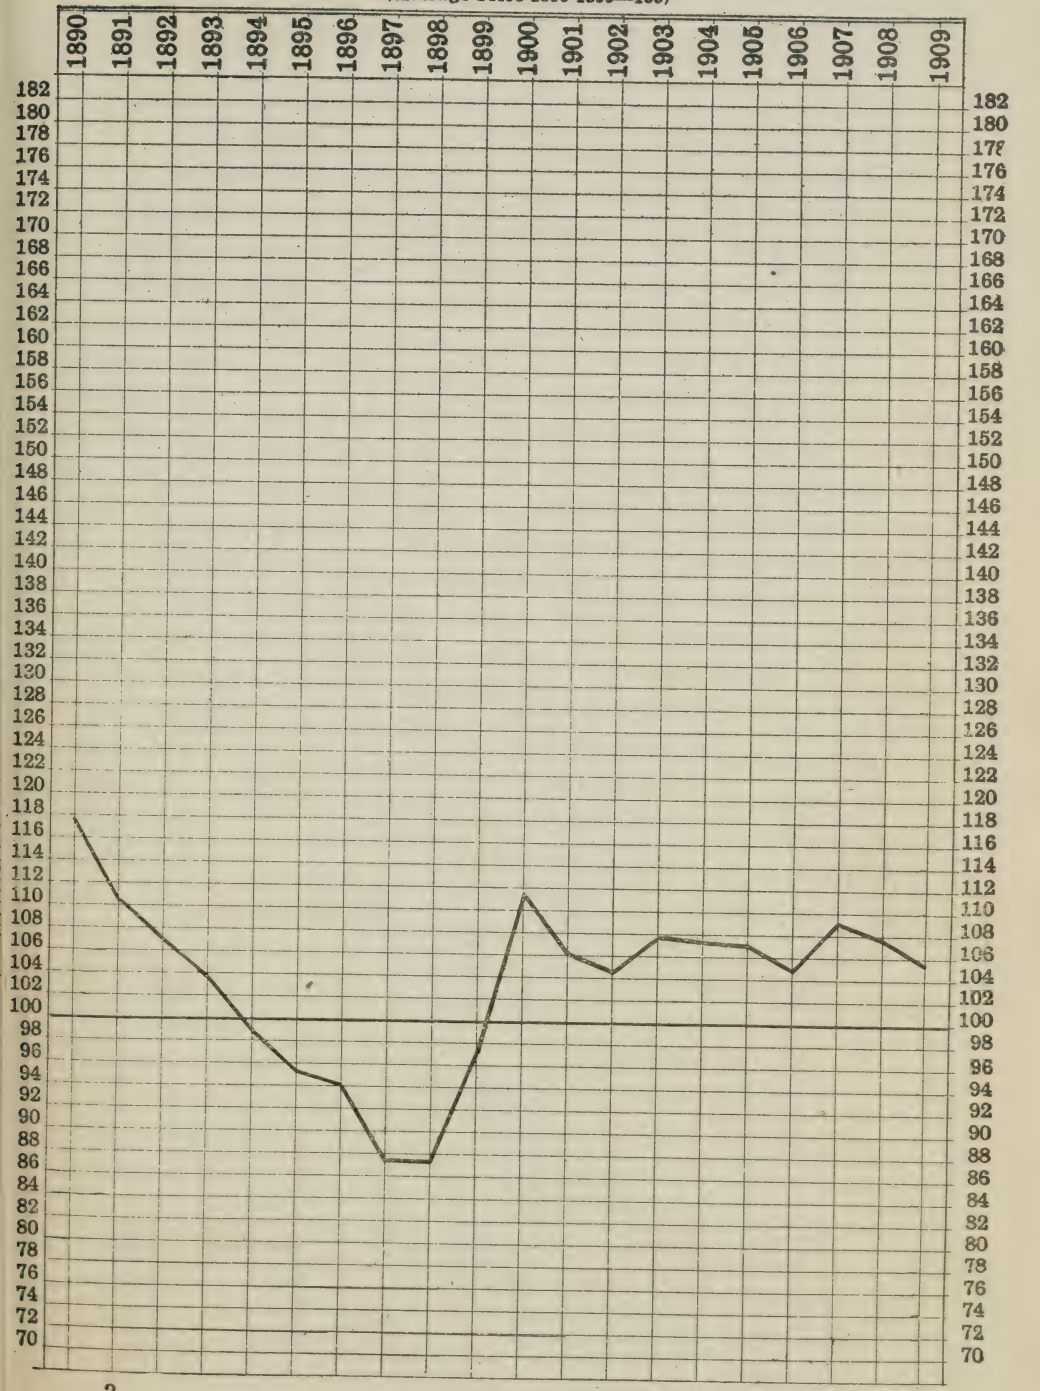

CHART SHOWING RELATIVE PRICES OF FUEL AND LIGHTING, 1890-1909.

Commodities included: Coal, Bituminous, N. S. run of mines; Coal, Bituminous, Crow's Nest Pass; Coal, Penna. Anthracite; Coke, Connellsville, Furnace; Coke, Crow's Nest Pass; Coal Oil, Canadian Standard, water white; Coal Oil, Canadian Standard, water white; Calcium Carbide; and Matches, Eddy's Telegraph.

(Average Price 1890-1899=100)

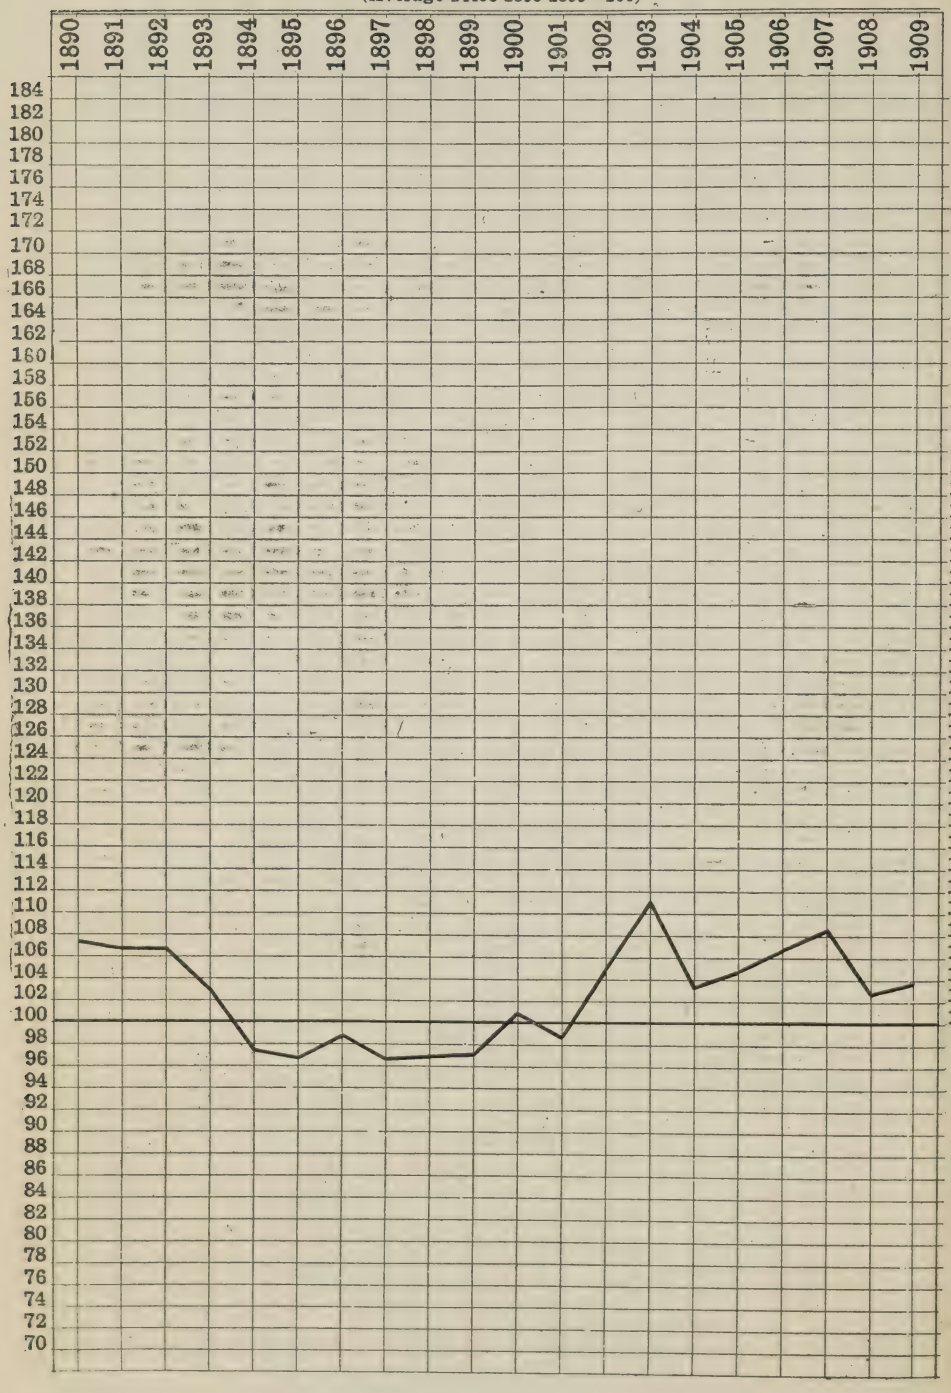

CHART SHOWING RELATIVE PRICES OF METALS AND IMPLEMENTS, 1890-1909.

Commodities included: Metals: Antimony, Brass, Copper, Pig Iron, (Summerlee); Pig Iron, (N.S.); Iron, Common Bar; Iron, Black Sheets; Iron, Galvanized Sheets; Iron, Tinplates; Iron, Boilerplates; Lead; Silver; Solder; Spelter; Steel Billets; Tin; and Zinc Sheets.
Implements: Axes; Anvils; Grindstones; Hammers; Horseshoes; Mallets; Picks; Wood Screws; Soldering Irons; and Vises.

(Average Price 1890-1899=100)

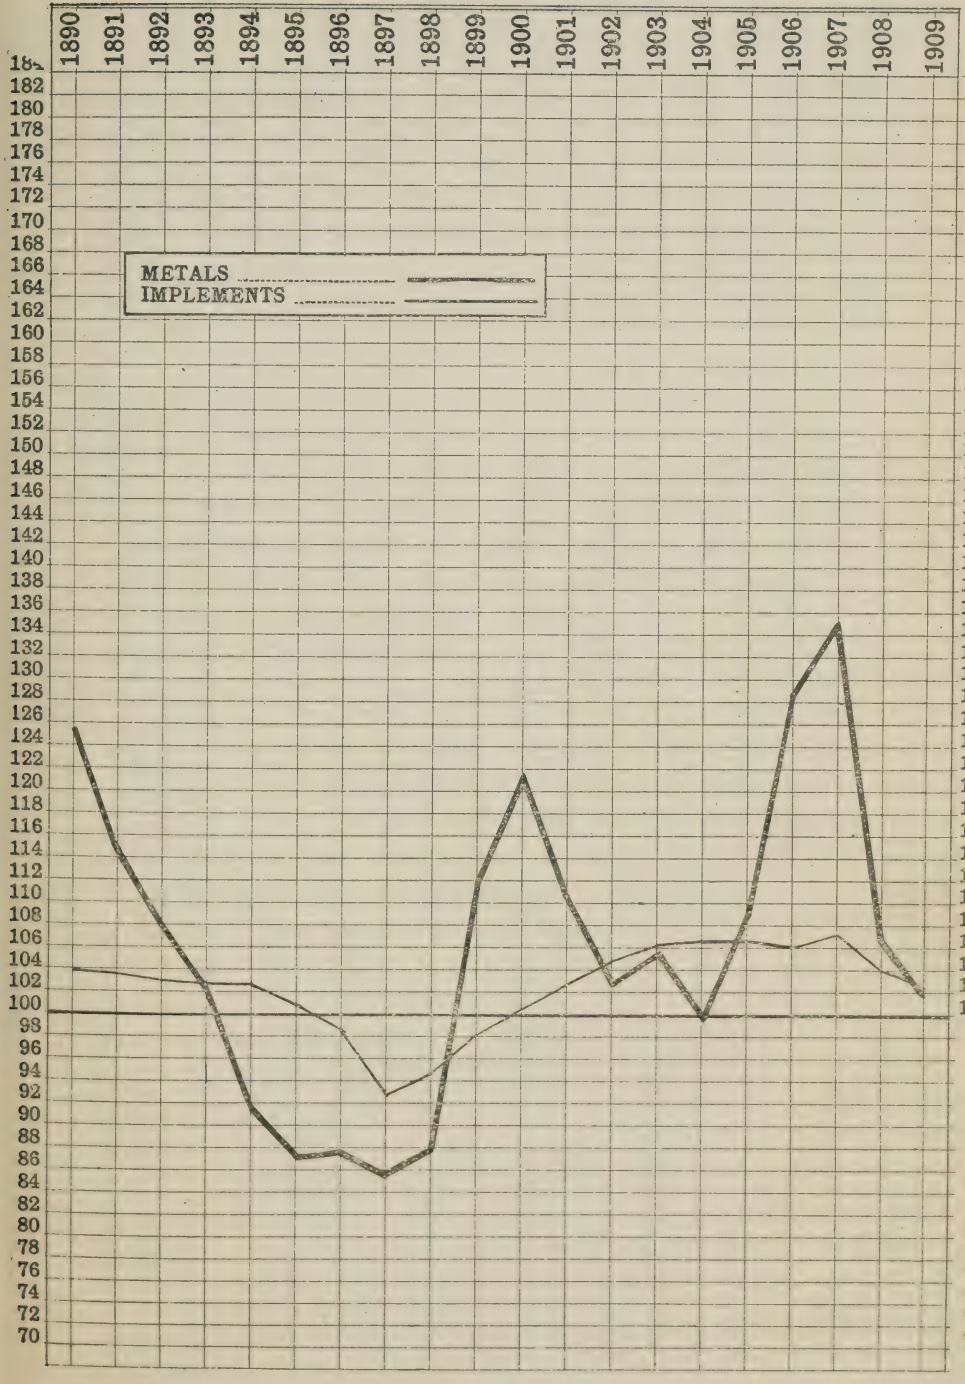

CHART SHOWING RELATIVE PRICES OF IRON AND STEEL, 1890-1909.

Commodities included: Pig Iron, Summerlee, No. 2; Pig Iron, No. 1 Foundry, N. S.; Iron, Common Bar; Iron, Black Sheets; Iron, Galvanized Sheets; Iron, Tinplates, Charcoal; Iron, Tinplates, Coke, Bessemer; Iron, Canada Plates, ordinary; Iron, Boilerplates; and Steel Billets (N. S.)

(Average Price 1890-1899=100)

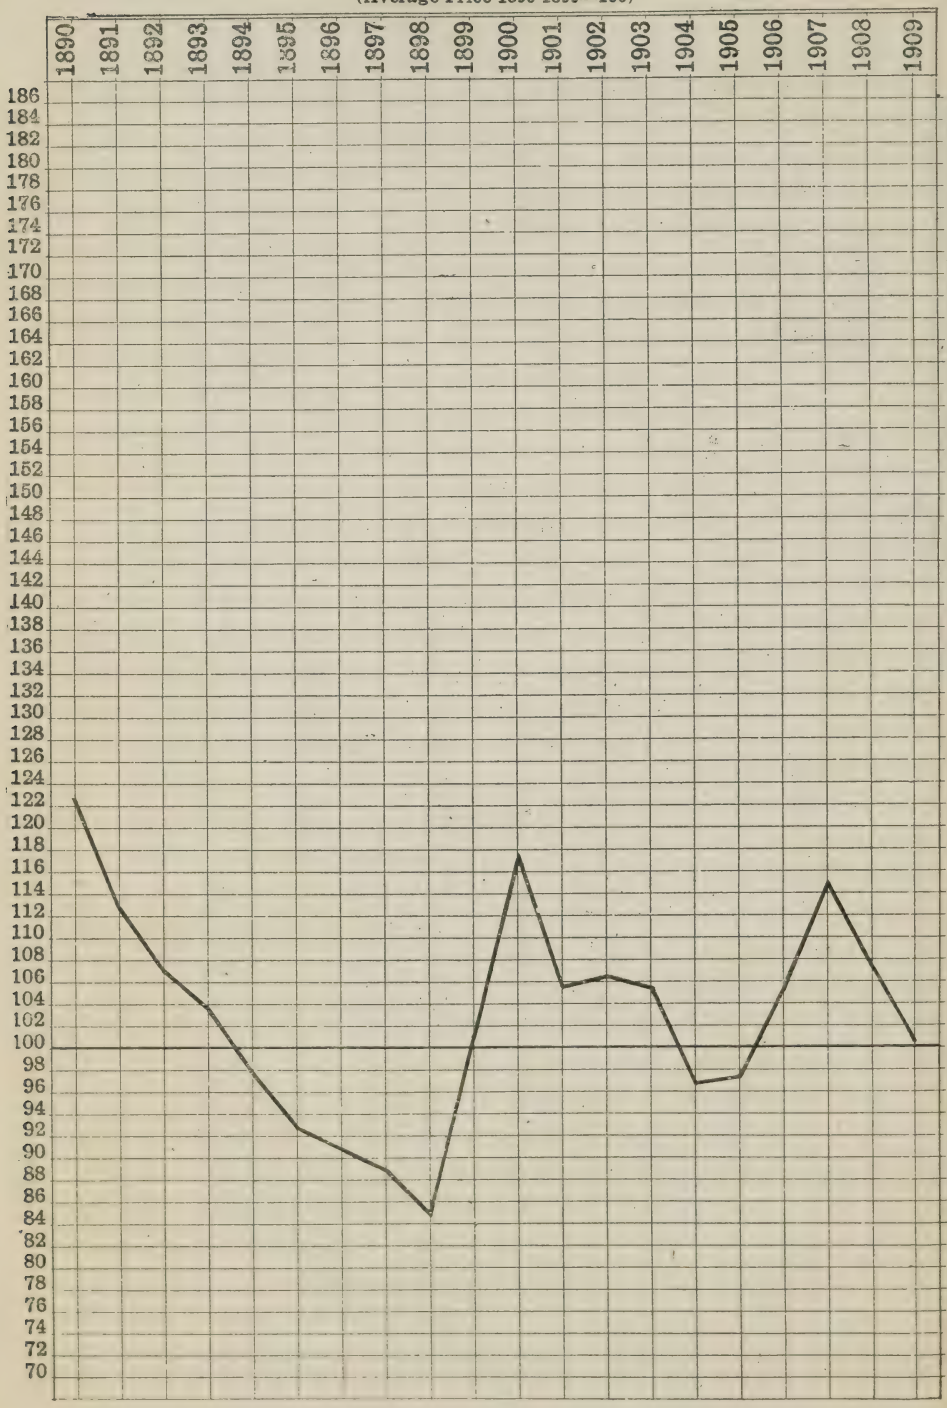

CHART SHOWING RELATIVE PRICES OF HOUSE FURNISHINGS, 1890-1909.

Commodities included: (1) Furniture—Kitchen Chairs; Kitchen Tables; Dining Tables; Sideboards; Bedroom Suites; and Iron Beds; (2) Crockery and Glassware: Glass Tumblers; White Cups and Saucers; Printed Dinner Sets; and Printed Toilet Sets; (3) Table Knives; Silver-plated Knives and Forks; and (4) Kitchen Furnishings: Pails; Tubs, and Brooms.

(Average Price 1890-1899=100)

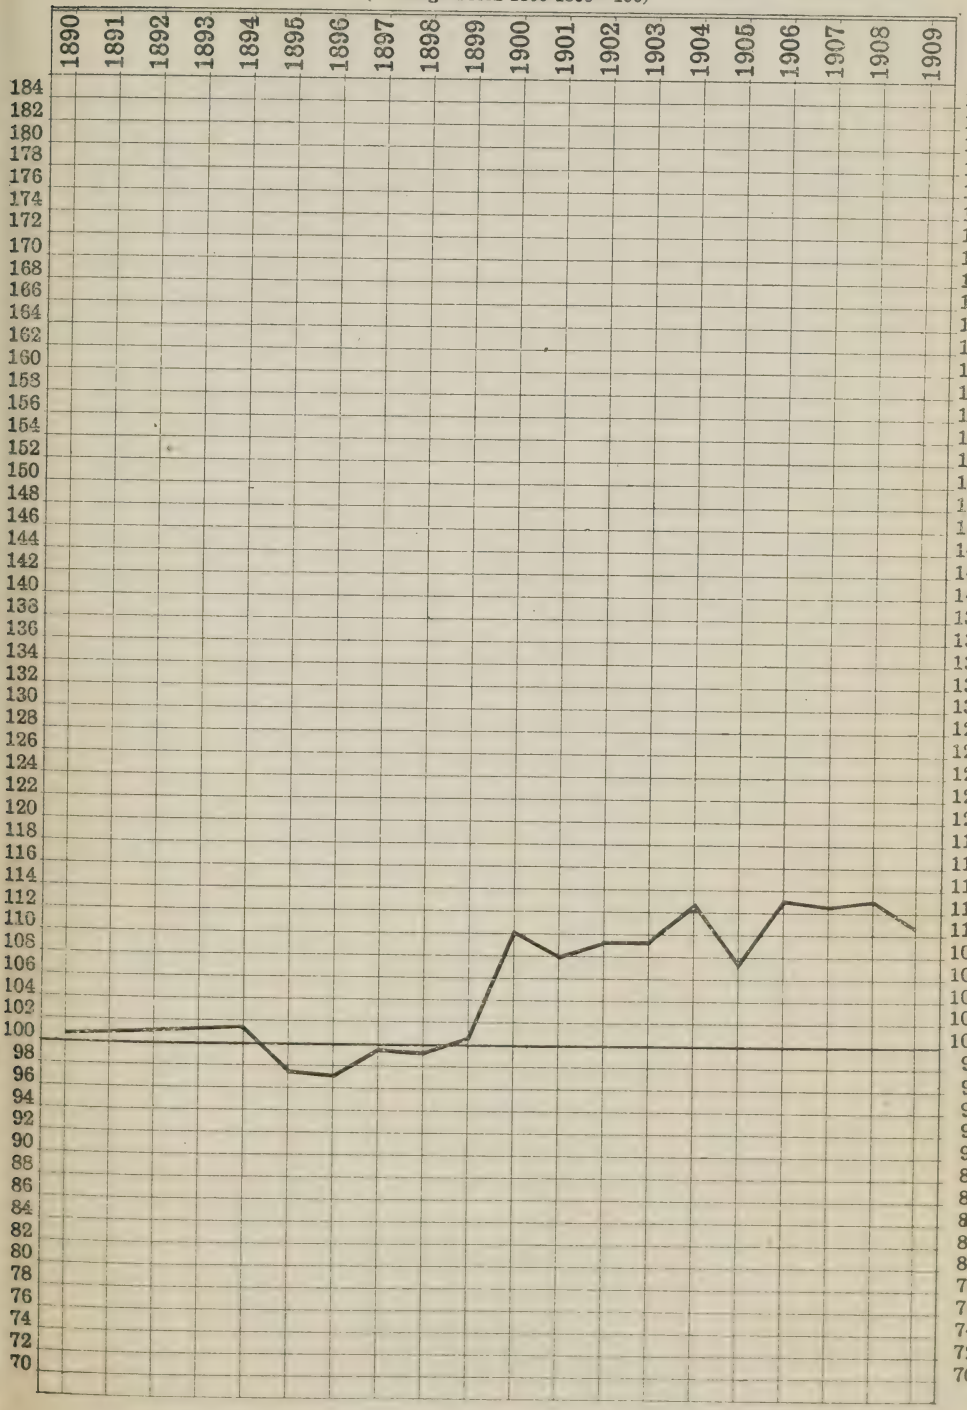

CHART SHOWING RELATIVE PRICES OF DRUGS AND CHEMICALS, 1890-1909.

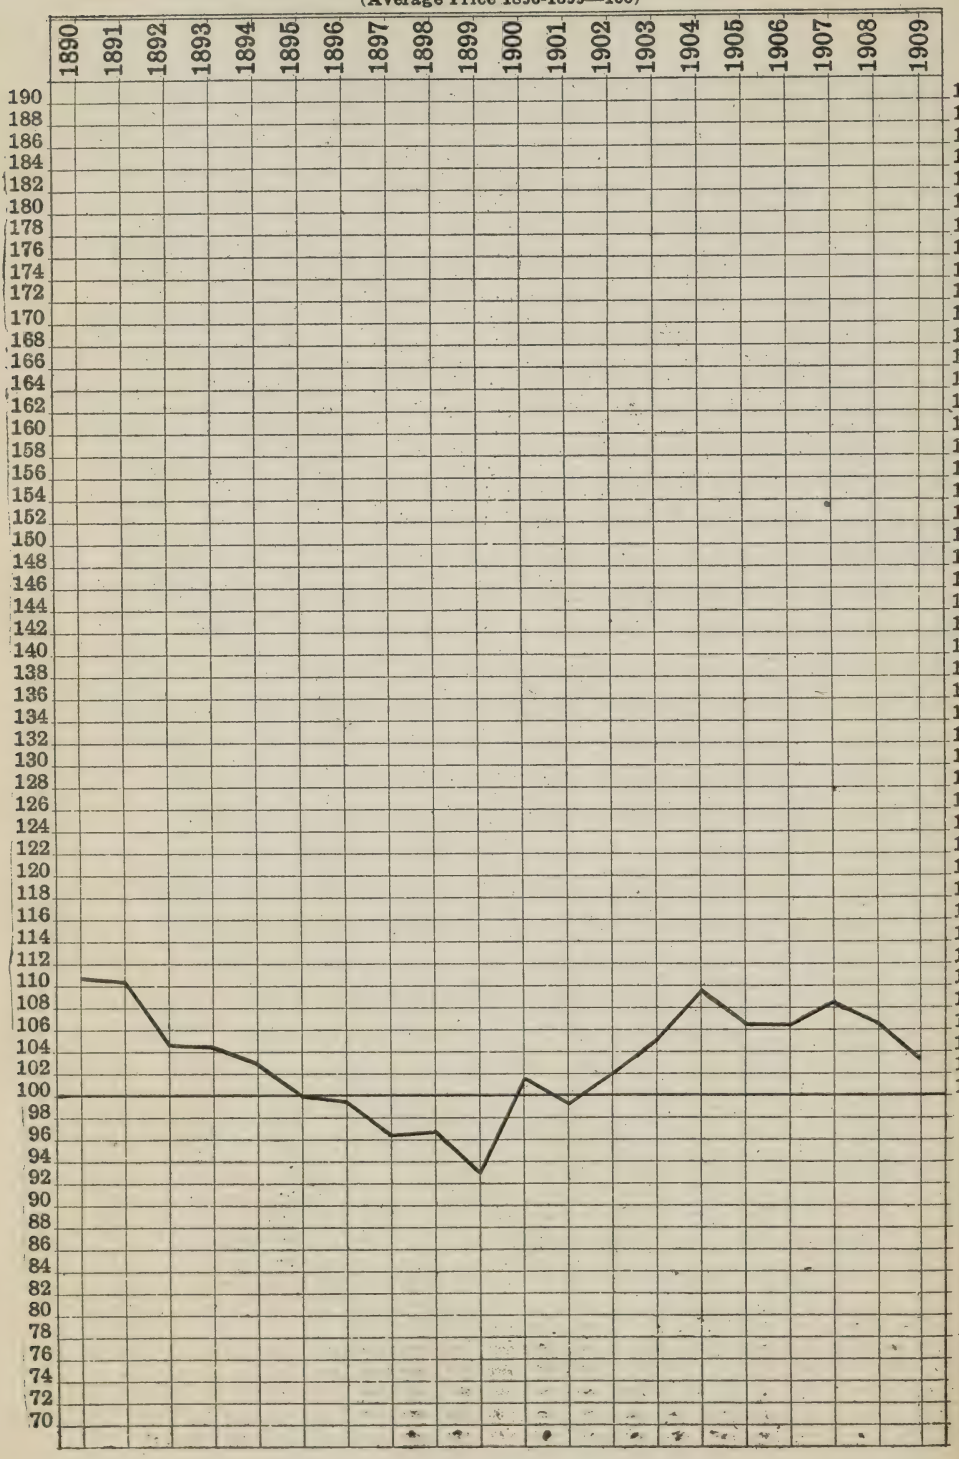
Commodities included: Alcohol; Wood Alcohol; Alum; Bleaching Powder; Borax; Brimstone; Carbolic Acid; Caustic Soda; Copperas; Glycerine; Indigo; Muriatic Acid; Opium; Quinine; Soda Ash; Sulphuric Acid.

(Average Price 1890-1899=100)



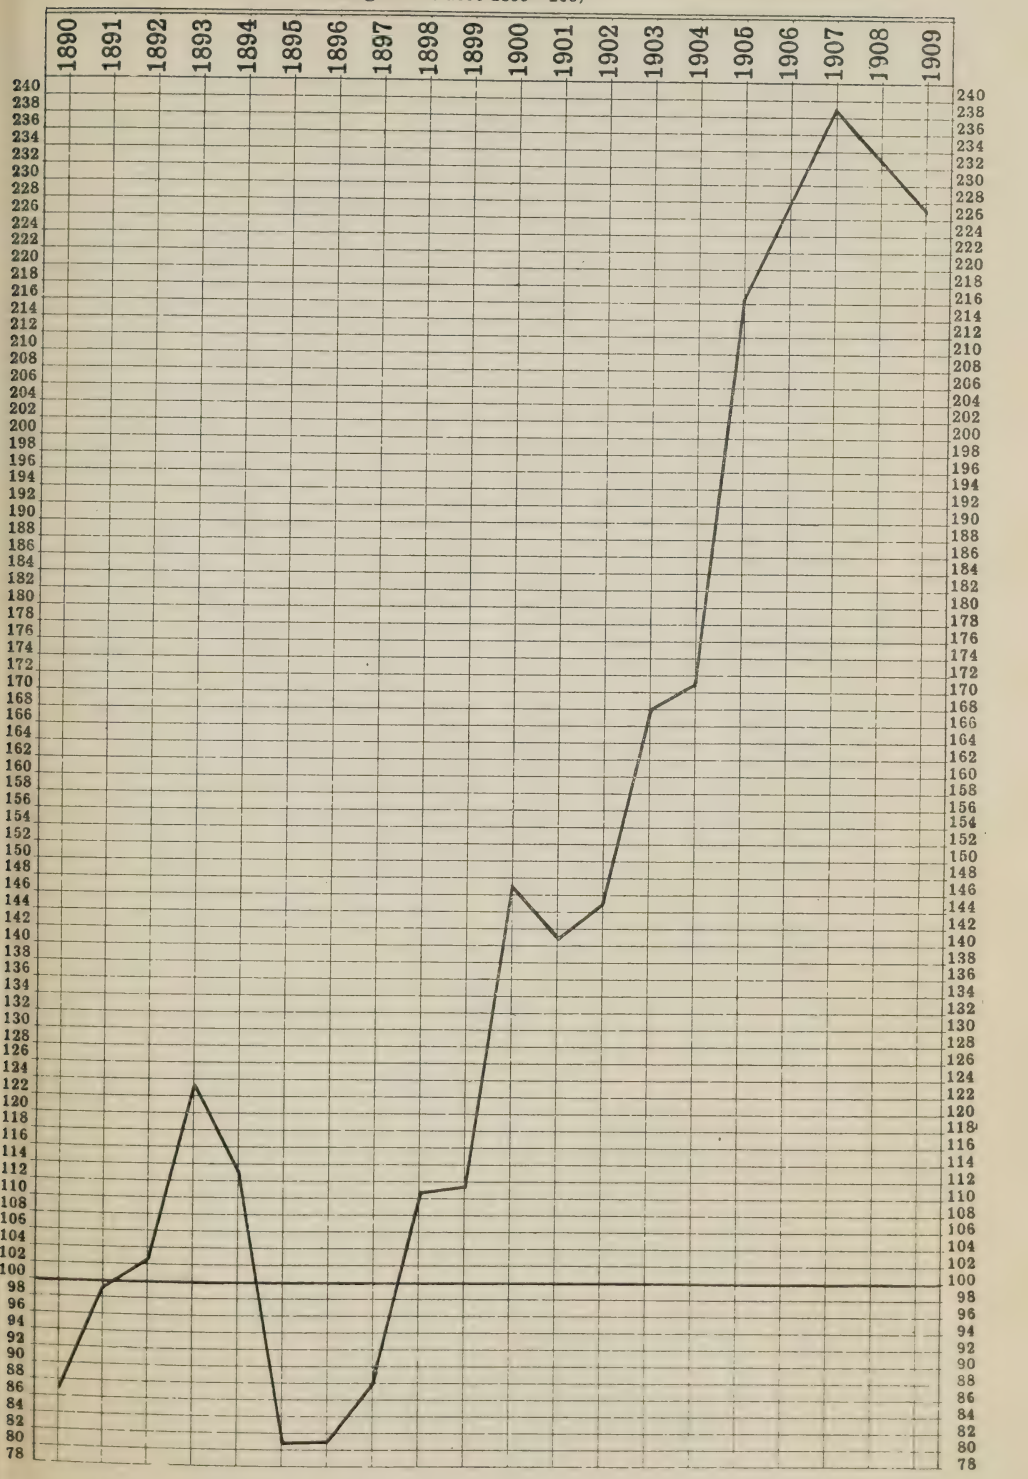


CHART SHOWING RELATIVE PRICES OF FURS, 1890-1909.
Commodities included: Mink; Muskrat; Raccoon; and Skunk.
(Average Price 1890-1899=100)

INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907.—PROCEEDINGS UNDER THE ACT DURING THE MONTH OF JUNE, 1910.

DURING the month of June, two applications for the establishment of Boards of Conciliation and Investigation were received, as follows:—

1 From the commercial telegraphers employed on the lines of the Canadian Pacific Railway Company, the dispute affecting, it was stated, 500 male and 100 female employés.

2. From the brass workers employed in the Brass Shop of the Motive Power Department of the Grand Trunk Railway Company, in Montreal, Que., the number of employés affected being twenty-four.

Reports Received.

During the month of June reports were received in the case of three disputes, as follows:—

1. In the dispute between the Canadian Pacific Railway Company and its conductors, baggagemen, brakemen and yardmen. In this case a minority report was also received, bearing the signature of Mr. J. G. O'Donoghue.

2. In the dispute between the Grand Trunk Railway Company and its conductors, baggagemen, brakemen and yardmen. In this case a minority report was also received, bearing the signature of Mr. Wallace Nesbitt, K.C.

3. In the dispute between the Canadian Northern Railway Company and its carmen and steamfitters.

Other Proceedings Under the Act.

In the application of the commercial telegraphers employed by the Canadian Pacific Railway Company for the establishment of a Board of Conciliation and Investigation, it was stated that the dispute in question related to demands of the employés for improvement in wages and working conditions, as set forth in an accompanying schedule. The number of employés concerned was 600. A Board was established by the Minister of Labour in this matter, on June 25.

In the application of the brass workers employed by the Grand Trunk Railway Company in the Company's Motive Power Department, in Montreal, for the establishment of a Board of Conciliation and Investigation, it was stated that the dispute in question grew out of a demand on the part of the employés for a minimum rate of 30 cents per hour. The number of employés concerned was twenty-four. A Board was established by the Minister of Labour in this matter, on June 28.

I. REPORT OF BOARD IN DISPUTE BETWEEN THE CANADIAN PACIFIC RAILWAY COMPANY AND ITS EMPLOYÉS IN TRAIN AND YARD SERVICE.

THE Minister of Labour received on June 22, the report of the Board of Conciliation and Investigation, to which had been referred certain differences between the Canadian Pacific Railway Company and its conductors, baggagemen, brakemen and yardmen, members of the Order of Railway Conductors and of the Brotherhood of Railroad Trainmen, respectively; also a minority report bearing the signature of Mr. J. G. O'Donoghue, of Toronto, Ont., one of the members of the Board.

The differences in question arose out of a demand on the employés part for a new schedule of agreement providing for increased compensation and improved conditions of employment. The schedule of wages and hours as proposed by the employés was understood to correspond to demands made by these classes of employés upon the Grand Trunk Railway Company, the Toronto, Hamilton and Buffalo Railway Company, and the branch railways in the Eastern United States, for the establishment of what were

commonly referred to in the negotiation as uniform standard rates. The number of employés affected was declared, in the application, to be 4,360. Similar applications had been received, it will be remembered, in the cases of the Grand Trunk Railway Company and the Toronto Hamilton and Buffalo Railway Company, in connection with both of which also, Boards had been established.

The Board, which was appointed to investigate the present dispute, was composed of Mr. J. E. Atkinson, of Toronto, Ont., Chairman, who was appointed by the Minister, in the absence of any recommendation from the other members of the Board; Mr. Wallace Nesbitt, K.C., of Toronto, Ont., appointed on the recommendation of the employing Company; and Mr. J. G. O'Donoghue, of Toronto, Ont., appointed on the recommendation of the employés. The Board was convened in Montreal, on April 25, where a number of sittings were held and a number of witnesses examined. Sittings were held afterward in Toronto, where its work was concluded on June 21.

The Company was reprensented during the hearings by Mr. D. McNicoll, Vice-President, Mr. C. Murphy, General Superintendent Eastern Division Operating and Maintenance Department, and Mr. A. D MacTier, Assistant to Mr. McNicoll. The employés were represented by Mr. S. N. Berry, of Toronto, Ont., Vice-President of the Order of Railway Conductors; and Mr. James Murdock, of Toronto, Ont., Vice-President of the Brotherhood of Railroad Trainmen, and the General Chairman.

The report of the Board, as presented to the Minister, bore the signatures of Mr. J. E. Atkinson, of Toronto, Ont., Chairman, and Mr. Wallace Nesbitt, K.C., of Toronto, Ont.

In its report, the Board—a majority thereof—arrived at a finding which it recommended as a fair and reasonable basis for the settlement of the dispute. The finding in question dealt with the hours and rates of pay for employés in train and yard service, and also embodied the views of the Board on the various rules of service.

Mr. J. G. O'Donoghue, of Toronto, Ont., in his minority report expressed regret that he had found himself unable to agree with the majority of the Board as to the rates, etc., that should obtain between the Company and the men concerned in the present dispute. Mr. O'Donoghue further observed that he saw "no reason for differentiating between the Canadian Pacific Railway Company and other first-class roads in the eastern part of this continent". Mr. O'Donoghue embodied in his report the rates of pay and rules which, in his judgement, should be accepted by the Company and the employés concerned.

Upon receipt, on June 22, of the report and minority report in this matter, copies were immediately forwarded to the employing Company and the employés concerned, and at the close of the month of June it was understood that negotiations were still in progress between the parties interested.

Report of Board.

The text of the findings of the Board of Conciliation and Investigation in this matter is as follows:—

The Board composed of the Honourable Wallace Nesbitt, K.C., Mr. J. G. O'Donoghue, and Mr. J. E. Atkinson, Chairman, met in Montreal on April 25.

The employés were represented by Mr. S. N. Berry, Toronto, Vice-President of the Order of Railway Conductors, and Mr. James Murdock, Toronto, Vice-President of the Brotherhood of Railroad Trainmen, and the General Chairman.

The Company was represented by Mr. D. McNicoll, Vice-President, Mr. C. Murphy, General Superintendent Eastern Division Operating and Maintenance Department, and Mr. A. D. MacTier, Assistant to Mr. McNicoll.

The Board continued to sit in Montreal and afterwards in Toronto with brief adjournments until June 21.

The Board—a majority thereof—arrived at the following finding which it recommends as a fair and reasonable basis for the settlement of the dispute as to rates of pay and rules. Where rules herein submitted were not adopted un-

animously, but by a majority, the names of the members composing the majority are in each case given.

Rates of Pay.

Passenger train service not otherwise herein specified:

Conductors,	2·60 cents, per mile.
Baggagemen,	1·50 cents, per mile.
Brakemen,	1·45 cents, per mile.

Exceptions, if any, to be specified by the Company, and to be agreed upon between the employés and the Company in a way consistent, and in harmony with the increases herein given.

Minimum allowances for passenger service:—

Conductors,	$4.05, per day.
Baggagemen,	2.33, per day.
Brakemen,	2.25, per day.

Exclusive of overtime, regular assigned passenger train employés who are ready for service the entire month, and who do not lay off on their own accord, shall receive the following minimum sums, exclusive of overtime for the calendar month:

Conductors,	$110.00.
Baggagemen,	66.00.
Brakemen,	61.60.

Ten hours or less, 155 miles or less, will constitute a day's work in passenger service, and will be paid for at the following rates: Conductors, 40 cents; baggagemen, 24 cents; brakemen, 23 cents, per hour. And overtime will be paid for, less than thirty minutes not to be counted, thirty minutes or over to be counted as an hour.

Through freight, mixed and all other trains to be paid as follows: Conductors, 3·55 cents, per mile; brakemen, 2·37 cents per mile; runs of 100 miles or less, either straight-away or turn-around, to be paid for as 100 miles, but the representatives of the Company and of the employés may agree upon certain instances in which an individual employé or a crew, not having made 100 miles, may make two or more short runs in continuous service without being entitled to 100 miles allowance for each such trip.

Way freight service to be paid as follows:—

Conductors, 3·90 cents, per mile; brakemen, 2·65 cents per mile, 100 miles or less to be paid for as 100 miles. Mileage in excess of 100 miles in any day will be paid for in addition *pro rata*; ten hours or less to constitute a day. Where regularly assigned crews, working less than the calendar working days of the month, are employed, they will be guaranteed not less than 100 miles for each calendar working day.

In all freight or mixed service, 100 miles or less, ten hours or less, to constitute a day's work; on runs of 100 miles or less overtime after ten hours. On runs of over 100 miles, overtime will be paid on a basis of speed of ten miles per hour. The working time of men to begin at time required to report for duty and do so report, and to continue until registered in at the end of the trip. Overtime to be paid for, at the rate of ten miles per hour, for class of service performed. Less than thirty minutes not to count, thirty minutes or over to be paid for as one hour.

Reductions in crews or increases in mileage in passenger service from assignments in effect, November 1, 1909, will not be made for the purpose of offsetting these increases in wages. This, however, is not to be understood as preventing readjustment of runs in short turn around and suburban service that are paid under minimum rules, for the purpose of avoiding payment of excess mileage or overtime that would accrue under these rules without reducing the number of crews.

Rules governing special or incidental services not provided for herein shall be arranged between the officers of the Company, and representatives of the employés upon the basis consistent and in harmony with the rates and rules herein awarded.

(*Sgd.*) J. E. ATKINSON,
(*Sgd.*) WALLACE NESBITT.

Rules.

Article One.—When mixed or through freight trains, handle way-freight, at five

or more stations, pick up or set out (a car or cars) at five or more stations, or make twelve or more switches en route, way-freight rates will be paid for the trip. —Chairman and Mr. O'Donoghue.

Article Two.—Rates for passenger and mixed trains include making up and setting away trains at terminals where yardmen are not on duty, provided monthly minimum mileage not exceeded.

Points on current time-table where one or more trains end, are terminal points for such trains. The meaning of "Terminal" in the foregoing article is understood to be the regular points between which crews regularly run; for instance, the terminal from which a branch line projects would be the terminal for the branch, but not necessarily for the section from which the branch line springs.—Unanimous.

Overtime will not be allowed for layover at home terminals. This not to conflict with Rule 24.—Chairman and Mr. Nesbitt.

Article Three. — Company's rule. — Unanimous.

Article Four. — Company's rule. — Chairman and Mr. Nesbitt.

Article Five. — Company's rule. — Unanimous.

Article Six.—Company's rule.—Chairman and Mr. Nesbitt.

Article Seven. — Company's rule. — Unanimous.

Article Eight.—Company's rule with the words "In the same class of service" inserted in the second line after the word "used".—Chairman and Mr. Nesbitt.

Article Nine. — Company's rule. — Chairman and Mr. Nesbitt.

Articles Ten, Eleven, Twelve.—Company's rules.—Unanimous.

Article Thirteen.—Trainmen will be paid for work or wreck train service en route when the time occupied at such work exceeds one hour, and the time so paid will not be included in computing overtime.—Unanimous.

Article Fourteen. — Company's rule with the following words added: "Trainmen running with light engine or engine and caboose will be paid full through freight rates."—Unanimous.

Article Fifteen.—Company's rule with the words "General Division" inserted in third line before the word "District," and the following words added at the end, "For all mileage over two hundred."—Unanimous.

Articles Sixteen and Seventeen.—Company's rules. Struck out and nothing substituted for them.

16—Chairman and Mr. O'Donoghue.

17—Unanimous.

Article Eighteen.—Company's rules, amending the rule as follows:—

"Trainmen acting as pilots will be paid conductor's through freight rate. When a pilot as defined in operating rules is required a competent man will be supplied in addition to the regular crew. A man unfamilar with physical characteristics of the road will not be required to go."—Unanimous.

Articles Nineteen and Twenty.—Company's rules.—Chairman and Mr. Nesbitt.

Article Twenty-one.—When unassigned crews are available and are run around at terminals, they will be paid 50 miles for each run around and stand first out run around as above will not be considered to exist if crews are called in turn and go out on the train ordered for. —Unanimous.

Articles Twenty-two and Twenty-three. —Company's rules.—Chairman and Mr. Nesbitt.

Article Twenty-four.—Passenger train employés on short turn around runs no single trip of which exceeds 80 miles including suburban service shall be paid overtime for all time actually on duty or held for duty in excess of eight hours computed on each run from the time required to report for duty to the end of that run within twelve consecutive hours; and also for all time in excess of twelve consecutive hours computed continuously from time first required to report to final release at end of last run. All other passenger train employés shall be paid for overtime on the basis of 15 miles per hour to be computed from the time the men are re-

quired to report for duty until released and separately for each part of a round trip run.—Chairman and Mr. O'Donoghue.

Article Twenty-five.—Company's rule struck out.

Article Twenty-six.—Company's rule. —Chairman and Mr. Nesbitt.

Article Twenty-seven. — Company's rule.—Unanimous.

Article Twenty-eight.—Company's rule, with the following words added:—

"Trainmen will not be required to do this work where section men are available.".—Unanimous.

Article Twenty-nine.—Trainmen held off on Company's business or on the Company's order will be paid schedule rates for time or mileage lost and reasonable expenses if away from home.—Unanimous.

Article Thirty. — Company's rule.—Unanimous.

Article Thirty-one.—Trainmen will not be compelled to ride in snow plows or flanger, but will be supplied with van or other suitable car properly equipped. —Unanimous.

Article Thirty-two.—Company's rule. —Unanimous.

Article Thirty-three. — Unless senior conductors desire otherwise, junior conductors, if competent, will be assigned to work-train service.—Unanimous.

Article Thirty-four.—When a deadhead crew is required the first crew out will be called to deadhead, and will hold its turn out at the distant terminal.—Unanimous.

Article Thirty-five.—Company's rule, with the hour in the third line changed to "four o'clock, a.m."—Chairman and Mr. Nesbitt.

Article Thirty-six. — For the Company's rule substitute article nineteen, of the Schedule of Rates and Rules of the Canadian Pacific Railway Company, Central and Western Divisions, in effect April 1, 1907.

(NOTE.—A list of exceptions to this rule is to be arranged between the Company and its employés.—Chairman and Mr. O'Donoghue.)

Article Thirty-seven.—Trainmen will be advised with reason and without unreasonable delay if mileage or time claimed is not allowed.—Unanimous.

Article Thirty-eight.—Company's rule, with the following words added: "Trainmen on regular runs will be allowed to go home Sundays, provided the train service they are employed on permits." —Unanimous.

Article Thirty-nine.—Through freight crews will be run first in first out of terminal points on their respective sections. —Unanimous.

Article Forty. — When unassigned crews are held at other than their home terminals longer than eighteen hours, exclusive of Sundays without being called for duty, they will be paid schedule through freight rates for each hour thereafter, time to be computed from the time crews go off duty until one hour before the departure of the train on which they resume duty. When men book rest of their own accord, the time booked will not be included.—Chairman and Mr. O'Donoghue.

Article Forty-one.—Company's rule.—Chairman and Mr. Nesbitt.

Article Forty-two. — Company's rule with these words inserted, after the word "case" in the fifth line, "and the evidence against them will be stated to them." Also with the words added in the eighth line after the word "Superintendent," "and higher officials.".—Unanimous.

Article Forty-three.—Company's rule with the word "practicable" changed to "possible".—Unanimous.

Article Forty-four.—Company's rule. —Unanimous.

Article Forty-five.—All passenger and mixed trains will have, at least, one train baggageman and one brakeman. All passenger trains of eight or more cars will have two brakemen and one baggageman, if there is a local baggage car on the train. One or two box-baggage or refrigerator cars to count as one car, and three or four as two cars.—Unanimous.

Article Forty-six.—One brakeman on

each freight or work train and one brakeman or baggageman on each passenger train must have, at least, six months' experience, and the same or another man be acquainted with the run. The conductor will not be required to take out an incompetent brakeman.—Chairman and Mr. Nesbitt.

Article Forty-seven.—Company's rule.—Unanimous.

Article Forty-eight.—Company's rule.—Chairman and Mr. Nesbitt.

Article Forty-nine.—Company's rule.—Unanimous.

Article Fifty.—Company's rule struck out and Men's rule forty-three substituted for it, the Men's rule being amended by striking out the words "and the first day of June."—Unanimous.

Article Fifty-one.—Men's rule forty-two with the following amendment:—

In the sixth line strike out " in writing". In the fifth line of the second paragraph insert after the word "will", "subject to the approval of the superintendent." In the third paragraph strike out "present schedule" and substitute "1906 rules." At the end of the third paragraph strike out the word "properly" before the word "belong."

In the fifth paragraph in the second line insert after the word "general" the word "superintendent." Insert in a proper place in the rule the following paragraphs:—

"The promotion of passenger brakemen shall be to passenger baggagemen, or to any run in passenger service to which their seniority as brakemen or baggagemen entitles them."

"Brakemen have no seniority standing during the first six months' service. They will then rank as brakemen from date entering service."—Unanimous.

Article Fifty-two.—Men's rule forty-one, with the words inserted in the sixth line after the word "districts", "provided they are competent."—Unanimous.

Article Fifty-three.—Company's rule.—(General order to issue about cleaning of the cars.)

Article Fifty-four.—Any question of interpretation which may arise will be adjusted by the General Chairman with the General Superintendent and then if necessary with the General Manager. But this is not to interfere with the present practice of the individual's right to make his own complaint.

Article Fifty-five.—This schedule of rates and rules for trainmen and yardmen will take effect May 1, 1910, and continue until terminated by thirty days' notice in writing.—Chairman and Mr. Nesbitt.

Additional Rules.—The following rules submitted by the men are adopted, and will be placed in their proper place in the new schedule.

Men's rule thirty-two, with the word "Refrigerator" inserted after the words "responsible for."—Unanimous.

Men's rule thirty-eight, with the word "freight" inserted in the first line after the words "to handle."—Chairman and Mr. O'Donoghue.

Yard Service.—"*A*".—Company's rule stands, except that twenty-nine is struck out and fifty (now forty-three of trainmen's rules) is inserted.—Chairman and Mr. Nesbitt.

"*B*", "*C*" and "*D*".—Company's rules adopted.—Chairman and Mr. Nesbitt.

"*E*".—Company's rule struck out and Men's rule "11" substituted with the following changed; "in writing" is struck out after "Advise of the reason" and the following words "subject to the approval of the Superintendent" are inserted after the words "Refusing promotion will."—Unanimous.

"*F*".—Company's rule, with the words "or by the Company's order" inserted after the word "Business".—Unanimous.

"*G*".—Men's rule, four.—Unanimous.

"*H*".—Company's rule.—Chairman and Mr. Nesbitt.

"*I*".—Company's rule struck out, the following substituted "Yardmen held off on Company's business or by the Company's order will be paid at schedule rates for time lost and reasonable expenses, if away from home. Yardmen working nights will not be called during the day for the purpose of investigation until they have at least, eight hours rest.—Unanimous.

"*J*".—Company's rule. — Chairman and Mr. Nesbitt.

"*K*".—Montreal and Toronto terminals; foremen, 35 cents, per hour; yardmen, 31 cents, per hour.

Ottawa, West St. John, London, Windsor, Quebec, Owen Sound, foremen, 33 cents, per hour; McAdam, Farnham, Smith's Falls, North Bay yardmen, 29 cents, per hour. All other yards: foremen, 31 cents, per hour, yardmen, 27 cents, per hour. Night work 2 cents an hour in addition.

Additional Rules.—Men's rule, seven, with the following words "Ready for service the entire month, and who do not lay off of their own accord" inserted after the words "Yard Service."—Unanimous.

Men's rule "Six".—Unanimous.

Men's rule "Fourteen" with the words struck out "Placed on the rear end of the train.".—Unanimous.

Men's rule "Fifteen" with the words struck out "As prescribed in rule No. eight" and the last sentence to read "Yardmen will be relieved in the yard where they commence work."—Unanimous.

Men's rule "Seventeen" with the works added "Where sufficient shed staff is employed or where weighmasters are employed."—Unanimous.

Men's rule "Twenty-two" with the words "Where two or more crews are employed" inserted after the words "Yard Office.".—Unanimous.

Men's rule "Twenty-five and Twenty-six."—Unanimous.

Men's rule "Twenty-seven.—Amended to read as follows:

"In the event of any difference of opinion as to the intent or application of any rule or rules, the question will be taken up directly by the General Chairman with the General Superintendent, and if necessary by the General Manager. This is not to interfere with the present practice of the individuals' right to make his own complaint.

(*Sgd.*) J. E. ATKINSON,
(*Sgd.*) WALLACE NESBITT.

Note.—In this finding the Board has not dealt with rates of pay for junior men with whom the Company is, therefore, free to deal as in the past, they not being members of the organizations.

MONTREAL, QUE., 17 June, 1910.

J. E. Atkinson,
Editor, Toronto Star,
Toronto.

We wholly forgot to state at the close of the finding that it did not refer to junior men with whom the Company were, therefore, free to deal with as before, they not being in the organization. Please do this.

(*Sgd.*) WALLACE NESBITT.

Minority Report.

The text of the minority report of Mr. J. G. O'Donoghue is as follows :—

I regret that we have not been able to bring the parties together in this matter, and that I have not been able to agree with the majority of the Board as to the rates, etc., that should obtain as between the Canadian Pacific Railway Company and the men concerned.

I see no reason for differentiating between the Canadian Pacific Railway Company and other first-class roads in the eastern part of this continent.

In my view the following rates and rules should be put in force in the Canadian Pacific Railway Company:—

Article A. — On runs of 155 miles per day or over, the rates of pay on passenger trains, in steam or electric service will be at the following rates per mile:—

Conductors	2·68 cents.
Baggagemen	1.55 cents.
Brakemen.	1.50 cents.

Article B.—On runs of less than 155 miles per day the minimum allowances for passenger train employés in both steam and electric service for each day used exclusive of overtime shall be:—

Conductors	$4.20 per day.
Baggagemen	2.75 "
Brakemen	2.55 "

Regularly assigned passenger train employés, who are ready for service the entire month, and who do not lay off on their own accord, shall receive the following minimum sums, exclusive of overtime, for the calendar month:—

Conductors	$125.00
Baggagemen	75.00
Brakemen	70.00.

Article C.—Passenger train employés on short turn-around runs, no single trip of which exceeds 80 miles, including suburban and branch line service and all work incident to such service, shall be paid overtime for all time actually on duty or held for duty in excess of eight hours (computed on each run from the time required to report for duty to end of that run) within twelve consecutive hours, and also for all time in excess of twelve consecutive hours computed continuously from time to time, first required to report to final release at end of last run. All other passenger train employés shall be paid for overtime on the basis of 20 miles per hour, computed from the time required to report for duty until released, and separately for each part of a round trip run.

Overtime in passenger train service shall be computed for each empolyé on the basis of actual overtime worked or held for duty, and at the following rates:—

Conductors	42	cents per hour.
Baggagemen	25	"
Brakemen	24	"

Article E.—Reductions in crews or increases of mileage in passenger train service, from assignments in effect Nov. 1, 1909, shall not be made for the purpose of off-setting the above increases in wages. This, however, is not to be understood as preventing readjustment of runs in short-turn around branch and suburban service, that are paid under minimum rules, for the purpose of avoiding payment of excess mileage or overtime that would accrue under these rules, without reducing the number of crews.

Article F.—Through and irregular freight service to be paid as follows:—

Conductors,	$3.63	per mile.
Brakemen,	2.42	"

Runs of 100 miles or less, either straight way or turn-around, to be paid as 100 miles.

Article G.—Local freight, pick-up and drop service to be paid as follows:—

Conductors,	$3.97½	cents per mile.
Brakemen	2.70	cents "

One hundred miles or less, to be paid for as 100 miles.

Article H.—In all freight and mixed train service 100 miles or less, in ten hours or less, shall constitute a day's work. On runs of 100 miles or less, overtime shall be paid for time in excess of ten hours, and of runs of over 100 miles, overtime shall be paid for that time used in excess of the time necessary to complete the trip at an average speed of 10 miles per hour. The working time of men shall begin at the time they are required to report for duty, and do so report, and shall continue until they are relieved from duty at end of run. Overtime shall be computed for each employé on the basis of actual overtime worked, or held for duty, and shall be paid for at the rate of 10 miles per hour for the class of service performed.

Article I.—Work, construction, snow plough or wrecking train service to be paid through freight rates, 100 miles or less, ten hours or less, to constitute a day's work; overtime pro rata.

Article N.—Yard Rates.—At West St. John, Montreal, Ottawa and Toronto, terminals, McAdam, Farnham, Smith's Falls, London, Windsor, and North Bay, yardmen will receive the following rates:—

Day Conductors	37	cents per hour.
Night "	39	cents "
Day Brakeman	34	cents "
Night "	36	cents "

At all other yards, yardmen will be paid as follows:—

Day conductors	36	cents per hour.
Night "	38	cents "
Day Brakemen.	33	cents "
Night "	35	cents "

Ten hours or less to constitute a day's work. Overtime computed for each employé on the basis of actual time worked or held for duty pro rata.

In addition to the rules mentioned in the Chairman's report as having been agreed to unanimously, I would add—and as substitutes for these to which only the Chairman and Mr. Nesbitt agree—I would substitute the following:

Article Four.—In cases where crews are assigned to runs a portion of which is passenger and the balance mixed or freight, through freight mileage rates will apply for entire service.

Article Six.—Passenger trainmen will not be required to do extra work other than their regular trips on their assigned runs except in cases where no other crews are available. When so used they will be paid through freight rates. (This rule covers Articles 6 and 8 of the Company's rules).

Article Nineteen. — Through freight rates will be paid for all time occupied in switching at terminals and turn-around points. The full crew shalll be used. This rule shall apply to the making up or setting away of trains.

Article Twenty.—Trainmen called for duty and not required will be paid through freight rates, with a minimum of 30 miles, and will stand first out. Trainmen held for duty and not used will be paid for all time or mileage lost.

Article Twenty-two.—(a) Trainmen in through freight service will be paid for not less than equivalent to 2,600 miles at through freight rates in any one month. This will not apply to spare men. When necessary to reduce the number of crews it will be done in the order of seniority, commencing with the junior men. This will not prevent crews from making as many miles as they are consistently able to make provided they take the proper rest. The spare brakemen's list will be so regulated that the men can make reasonable average monthly pay.

(b) When trainmen are detained at terminals for any reason after train arrival at the yard limits, for instance, on account of being blocked or facilities not being such that train can be put away without delay; baggagemen being held in their cars on account of baggage delivery being delayed; brakemen held to take the engine to shop track, etc. In all such cases as specified above men will be allowed overtime rate per class of train for all time so detained irrespective of mileage made for the trip. (This also covers the Company's Article 48).

Article Twenty-three.—For train service performed in or between yards of terminals trainmen will be paid overtime rates per hour for time occupied.

Article Twenty-six.—Time or mileage made in doubling or assisting other trains will be paid for at schedule rates per class of train and such time will not be deducted when computing overtime.

Article Thirty-five.—Train crews will not be required to handle way-freight at night or on Sunday. The hours for starting way-freight trains will be from 4 a.m. to 12 noon. Trainmen will not be required to unload way-freight at terminals when way-cars can be placed at shed or on delivery track.

Article Forty-one.—Crews will not be required to abandon their vans while en route between terminals or when being moved from one to the next sectional terminal for freight service or when handling colonist or emigrant extras. The intent of the rule will also apply to additional sections of regular trains not handling sleeping or dining cars but handling the class of passengers usually travelling on colonist or emigrant.

Article Forty-six.—One brakeman on each train must have at least six months' experience and the same or another man be acquainted with the road over which the train is to be moved. A conductor will not be required to take out an incompetent brakeman.

Article Fifty-five.—This schedule of rates and rules for trainmen and yardmen will take effect April 1, 1910, and continue until terminated by thirty day's notice in writing by either side.

I should also add the following rules in addition to those in the majority report:—

Trainmen will not be compelled to handle express, and if required to handle mail it will be sorted and placed in car.

Trainmen will not be required to use the telephone or telegraphone for the purpose of receiving or transmitting train orders except in case of wrecks, washouts or snow blockades. All train orders except those that may be required as per above exceptions, will be delivered in the usual way in writing and as per operating rules to the conductor.

All baggage cars in service will be equipped with the chains, extra brasses, wedges, pail of dope, extra knuckles, pins, and extra hose necessary for the safe and proper operation of the train, Car inspectors will see that baggage cars are properly equipped as above before cars leave terminal, but this will not relieve trainmen from knowing that the necessary equipment has been supplied.

Freight trains handling five or more heated cars, seven or more coaches or three and five combined, between the months of November and March, will be allotted a man to attend to the heaters, who will be held accountable for regulating the temperature of the cars.

The same increases as given in freight service shall be given in mixed and all other freight service. In all classes of freight, mixed, helper or other freight service not over ten hours will be required for a day's work. Overtime after ten hours pro rata rates.

The adoption of the foregoing rates and rules shall not operate to reduce rates or allowances now existing in passenger, freight, yard, mixed, work train or other service.

Yard Service.—I would substitute the following for Articles, A, C, D, H, and J, of the majority report:—

A.—Articles 14, 15, 27, 29, 37, 42, 43, 47, 50 in trainmen's schedule will apply to yardmen. Article 55 as recommended by me shall also apply.

C.—Where conditions will permit the established time for day and night yardmen to start work shall be 7 a.m. and 7 p.m. respectively. Yardmen started at other times than between 6 a.m. and 8 a.m. will be paid night rates.

D.—Yardmen shall be allowed one hour for meals between the hours of 11.30 a.m. and 1 p.m., and between the hours of 11.30 p.m. and 1 a.m., but if required to work the meal hour or any part thereof they shall be paid for the hour in addition to the minimum day and be allowed thirty minutes under pay for meal. Yardmen will not be required to work longer than six hours without being allowed thirty minutes for lunch.

H.—Regular or spare yardmen required to act as switchmen or switch tenders will be paid yardmen's rates and no man entrusted with the care of switches over which trains or cars are moved will be paid less than 20 cents per hour.

J.—Yardmen will not be required to couple or uncouple hose bags in yards where carmen are employed.

And I would make the following additions:—

Yardmen deadheading on freight or passenger trains will be paid for such service at full rates for the class in which they are regularly engaged.

Yardmen who have worked one trick or more will not be required to continue on duty or accept further duty during the rest period. The men will be judges of their own condition and as to their ability to accept further service.

Yardmen will not be required to work with engines not properly equipped with automatic couplers, grab iron and foot boards on both ends or with engines from which the steam is leaking or blowing so that it interferes with the exchange of signals.

When for any reason the time claimed by time slip is not allowed or if the time slips are not made out correctly they will be promptly returned and the reasons given therefor.

A yard crew shall consist of not less than one foreman and two helpers.

This schedule or rates and rules for yard service will take effect April 1, 1910, and continue until terminated by thirty days' notice in writing from either party.

The above schedules for trainmen and yardmen shall apply to the Kingston & Pembroke Railway.

(Sgd.) J. G. O'DONOGHUE.

Toronto, June 21, 1910.

II.—REPORT OF BOARD IN DISPUTE BETWEEN THE GRAND TRUNK RAILWAY COMPANY AND ITS EMPLOYÉS IN TRAIN AND YARD SERVICE.

THE Minister of Labour received on June 22, the report of the Board of Conciliation and Investigation, to which had been referred certain differences between the Grand Trunk Railway Company and its conductors, baggagemen, brakemen and yardmen, members of the Order of Railway Conductors and the Brotherhood of Railroad Trainmen, respectively; also a minority report in this matter bearing the signature of Mr. Wallace Nesbitt, K.C., of Toronto, one of the members of the Board.

The difference in question grew out of a demand on the part of the employés for a new schedule of agreement providing for increased compensation and improved conditions of employment. The schedule of wages and hours, as proposed by the employés was understood to correspond to demands made by these classes of employés upon the Canadian Pacific Railway Company, the Toronto, Hamilton and Buffalo Railway Company, and the branch railways in the eastern United States for the establishment of what were commonly referred to in the negotiations as uniform standard rates. The number of employés affected in this dispute was given, in the application, as 3,017. The Board was one of three established to adjust differences with railway companies in Canada, the other Boards established being in the cases of the Canadian Pacific Railway Company and the Toronto, Hamilton and Buffalo Railway Company, respectively.

The Board in this case was composed of Mr. J. E. Atkinson, of Toronto, Ont., Chairman, who was appointed by the Minister, in the absence of any recommendation from the other members of the Board; Mr. Wallace Nesbitt, K.C., of Toronto, Ont., appointed on the recommendation of the employing Company; and Mr. J. G. O'Donoghue, of Toronto, Ont., appointed on the recommendation of the employés. The Board assembled in Montreal, on May 25, where a number of witnesses were heard, and continued its sittings in Toronto where its work was concluded on June 21.

The Company was represented during the hearings by Mr. E. H. Fitzhugh, First Vice-President, and Mr. W. G. Brownlee, General Transportation Manager. The employés were represented by Mr. S. N. Berry, of Toronto, Ont., Vice-President, the Order of Railway Conductors, and Mr. James Murdock, of Toronto, Ont., Vice-President, the Brotherhood of Railroad Trainmen, and the General Chairman.

The report of the Board as presented to the Minister, bore the signatures of Mr. J. E. Atkinson, of Toronto, Ont., Chairman, and Mr. J. G. O'Donoghue, of Toronto, Ont.

In its report the Board—a majority thereof—expressed the opinion "that the men are justified in asking that roads in the same territory should standardize their rates of pay and their rules in so far as they may deal with like general conditions of service.

"To enable the standardization of rates of pay on the Grand Trunk Railway to be carried out, the Board recommends that the Company should extend its adoption of the mileage basis of pay to cover not only its through freight service, as in the past, but also (1) its passenger services (except for such a list of specified runs as may be agreed upon between the Company and its employés); (2) its way-freight service; and (3) its mixed and all other train services. Also that whatever rates of pay may be adopted should be applied to all divisions of the railway in in the eastern territory.

"The Board believes that the rates of pay upon the Grand Trunk Railway Company should be brought up to the standard paid on roads in the same territory. But inasmuch as to do this at once would place upon the Company a heavy increase of its wage list, the Board recommends that standardization should be reached by two increases. It is the opinion of the Board that the first in-

crease should be made to take effect May 1, 1910. Regarding the date of the second increase the Chairman and Mr. O'Donoghue do not agree. Mr. O'Donoghue's opinion is that the men and the Company should meet together to arrange a date when the completion of the standardization of rates should take effect. The Chairman, however, would give to the Company a longer time in which to complete the standardization than Mr. O'Donoghue thinks would be either fair to the men or necessary for the Company."

The Board appended to its report schedule of rates of pay which it believe would afford to the employés concerned a substantial part of the difference between present rates and the standard rates which had been demanded, "and by so doing will constitute a measure of justice to the men". The Board also included in its report its recommendations in respect of the rules which should obtain between the Grand Trunk Railway Company and its employés in train and yard service.

In his minority report, Mr. Wallace Nesbitt observed that there seemed to be no possibility of conciliation in this matter, as the parties were absolutely apart on principle. In his view, the only remedy was for the parties concerned to submit their differences to some person whose decision would govern, or to three parties, the majority to govern. Continuing, Mr. Nesbitt said: "The men frankly stated when they made their demand for the standardization for rates of pay, that it embraced some forty-five roads. The rate of pay was determined on by the Eastern Association, having, as I understand, its headquarters at Chicago, and claims the same rate of pay from the Grand Trunk Railway Company as from any of the great trunk lines in the United States, some of which have over five times the gross earnings per mile from operation as that of the Grand Trunk Railway Company, and owing to better grades, curves, etc., have about one-half the cost per ton per mile as the Grand Trunk Railway Company." Mr. Nesbitt also dealt with the employés demand that railways should adopt the same basis of payment, namely, payment by the mile, whether for passenger, through freight, or way-freight service. In this respect, Mr. Nesbitt was of opinion that the system of fixed runs prevailing on the Grand Trunk Railway Company was preferable. As regards the remuneration of the Company's employés in train and yard service, Mr. Nesbitt proposed that an increase of fifteen per cent. should be made in the present rates of pay all over the sysetm. In conclusion, Mr. Nesbitt said, "The claim made by the men that no option is left to them but to obey the orders received from Chicago to demand precisely the same rate of wages all over the Grand Trunk Railway Company as is paid by the eastern roads of the United States, would mean that the road could not operate, and would mean just so many men who are now getting employment not getting employment. It is no part of my business, sitting on this Board, to discuss public questions, but, in meeting after meeting, the spokesman for the men has stated that there was no use of the Board attempting to conciliate; the men would not abate one jot or tittle of their demands; that when they first made the claim they made it under instructions from Chicago, and I merely draw attention to the fact to suggest that this is a situation as if the railways of France had to take orders from Berlin as to their methods and cost of operation. Put in that light, is seems like a national danger, but that seems to be the situation in this country at the present time."

Upon receipt, on June 22, of the report and minority report in this matter, copies were immediately forwarded to the employing Company and the employés concerned, and at the close of the month of June, it was understood that negotiations were still in progress between the parties interested.

Report of Board.

The text of the findings of the Board of Conciliation and Investigation in this matter, is as follows:—

The Board composed of the Hon. Wallace Nesbitt, K.C., Mr. J. G. O'Donoghue, and Mr. J. E. Atkinson, Chairman, met on the twenty-fifth day of May, 1910, at ten o'clock, in Montreal, and having taken the oath of office, proceeded with the reference. On behalf of the trainmen there were present Mr. S. N. Berry, Toronto, Vice-President, The Order of Railway Conductors, and Mr. James Murdock, Toronto,, Vice-President The Brotherhood of Railroad Trainmen, and the General Chairman. The representatives of the Company were Mr. E. H. Fitzhugh, first Vice-President, and Mr. W. G. Brownlee, General Transportation Manager. The sittings of the Board were continued in Montreal and afterwards in Toronto, and were concluded on the twenty-first day of June.

The following is the finding of the Board:—

The Board—a majority thereof—is of the opinion that the men are justified in asking that roads in the same territory should standardize their rates of pay and their rules also so far as they may deal with like general conditions of service.

To enable the standardization of rates of pay on the Grand Trunk Railway to be carried out the Board recommends that the Company should extend its adoption of the mileage basis of pay to cover not only its through freight service as in the past, but also (1) Its passenger services (except for such a list of specified runs as may be agreed upon between the Company and its employés), (2) Its way freight service, and (3) Its mixed and all other train services. Also that whatever rates of pay may be adopted should be applied to all divisions of the railway in the Eastern territory.

The Board believes that the rates of pay upon the Grand Trunk should be brought up to the standard paid on roads in the same territory. But inasmuch as to do this at once would place upon the Company a heavy increase of its wage list, the Board recommends that standardization should be reached by two increases. It is the opinion of the Board that the first increase should be made to take effect May 1, 1910. Regarding the date of the second increase the Chairman and Mr. O'Donoghue do not agree. Mr. O'Donoghue's opinion is that the men and the Company should meet together to arrange a date when the completion of the standardization of rates should take effect. The Chairman, however, would give to the Company a longer time in which to complete the standardization than Mr. O'Donoghue thinks would be either fair to the men or necessary for the Company.

The Board from the information presented, believes that the adoption of the following rates of pay will give to the employés of the road a substantial part of the difference between present rates and the standard, and by so doing will constitute a measure of justice to the men:—

Rates of Pay.

A. Passenger train service both steam and electric not otherwise herein specified;

Conductors	2·458 cents	per mile.
Baggagemen	1·408 cents	"
Brakemen. .	1·361 cents	"

exceptions if any to be specified by the Company and to be agreed upon between the employés and the Company in a way consistent and in harmony with the increases herein given.

B. Minimum allowances for passenger service both steam and electric;

Conductors	$3.81	per day.
Baggagemen	2.18	"
Brakemen	2.11	"

exclusive of overtime. Regular assigned passenger train employés who are ready for service the entire month and who do not lay off of their own accord shall receive the following minimum sums

exclusive of overtime for the calendar month;

Conductors	$101.00.
Baggagemen	58.00.
Brakemen	56.00.

C. Passenger train employés on short turn around runs no single trip of which exceeds 80 miles including suburban and branch line service, and all work incident to such service, shall be paid overtime for all time actually on duty or held for duty in excess of eight hours (computed on each run from the time required to report for duty to the end of that run) within twelve consecutive hours; and also for all time in excess of twelve consecutive hours computed continuously from time first required to report to final release at end of last run. All other passenger train employés shall be paid for overtime on the basis of—(see note below)—miles per hour to be computed from the time the men are required to report for duty until released and separately for each part of a round trip run.

Overtime in passenger train service shall be computed for each employé on the basis of actual overtime worked or held for duty and at the following rates:—Conductors, 38 cents per hour, baggagemen, 22 cents per hour, and brakemen, 21 cents per hour.

(NOTE.—With reference to article "C" there is a difference of opinion between the Chairman and Mr. O'Donoghue. The former would insert 15 miles as the speed basis and the latter 20 miles.)

D. Through freight, mixed, and all other trains including work, construction and wreck train service, to be paid as follows: Conductors, 3·36 cents per mile; brakemen, 2·225 cents per mile; runs of 100 miles or less, either straight-away or turn-around, to be paid for as 100 miles, but the representatives of the Company and of the employés may agree upon certain instances in which an individual employé or a crew not having made 100 miles may make two or more short runs in continuous service without being entitled to 100 milles allowance for each such trip.

E. Way-freight service to be paid as follows:—

Conductors, 3·687 cents per mile; brakemen, 2·487 cents per mile; 100 miles or less to be paid for in addition pro rata; ten hours or less to constitute a day. Where regularly assigned crews working less than the calendar working days of the month are employed, they will be guaranteed not less than 100 miles for each calendar working day.

F. In all freight, mixed, work, construction and wreck train serivce 100 miles or less, ten hours or less, to constitute a day's work; on runs of 100 miles or less overtime after ten hours. On runs of over 100 miles, overtime will be paid on a basis of speed of 10 miles per hour. The working time of men to begin at time required to report for duty, and do so report, and to continue until registered in at the end of the trip. Overtime to be paid for at the rate of 10 miles per hour for class of service performed. Less than thirty minutes not to count, thirty minutes or over to be paid for as one hour.

G. Reductions in crews or increases in mileage in passenger service from assignments in effect November 1, 1909, will not be made for the purpose of offsetting these increases in wages. This, however, is not to be understood as preventing readjustment of runs in short turn-around and suburban services that are paid under minimum rules, for the purpose of avoiding payment of excess mileage or overtime that would accrue under these rules without reducing the number of crews.

H. Rules governing special or incidental services not provided for herein shall be arranged between the officers of the Company and the representatives of the employés upon a basis consistent and in harmony with the rates and rules herein awarded.

Rules.

1. When mixed or through freight trains handle way freight at five or more stations, pick up or set out (a car or cars) at five or more stations, or make twelve or more switches en route, way freight rates will be paid for the trip.

2. Rates for passenger and mixed trains include making up and setting away trains at terminals where yardmen are not on duty, provided monthly mileage not exceeded.

Points on current time-table where one or more trains end are terminal points for such trains. The meaning of Terminal in this article is understood to be the regular points between which crews regularly run; for instance, the terminal from which a branch line projects would be the terminal for the branch, but not necessarily for the section from which the branch line springs.

Overtime will not be allowed for layover at home terminals. This not to conflict with article "C" above.

3. Constructive mileage will be allowed freight trains as follows:—

Between Brockville and Belleville 100 miles.

Between Richmond and Point Levis 100 miles.

Between Mimico and Fort Erie 100 miles.

4. Crews assigned to mixed train runs or to runs a portion of which is passenger and the balance mixed or freight or both will be paid mileage rate for each class of train with a minimum of 3,000 miles per month at mixed train rate.—(Mr. O'Donoghue would insert Men's Rule.)

5. Freight trainmen running passenger trains will be paid through freight rates, except when relieving regular passenger trainmen, when they will be paid the passenger rates of the men relieved.

6. Passenger trainmen making extra mileage on other than their assigned runs will be paid through freight rates, except when turned between section terminal points, in which case they will be paid their passenger rates.—(Mr. O'Donoghue would insert Men's Rule.)

7. (a) Mileage will be paid for when trainmen are run more than one mile off main line.

(b) Track mileage will be paid for plowing or flanging sideings.

8. Crews making less than equivalent to minimum mileage on assigned runs may be used in the same class of service on their own sections to the extent of making up to such mileage. Crews making minimum mileage will not be compelled to do extra running except as provided for in Rule 6.—(Mr. O'Donoghue would insert Men's Rule.)

9. Trainmen held on trains laid up between terminals will be paid actual mileage made and overtime rate per hour for the first ten hours, with a maximum of 100 miles for each twenty-four hours so held.—(Mr. O'Donoghue would insert Men's Rule.)

10. Trainmen while assigned to work train service will be paid 10 miles per hour from hour ordered until laid up, less time taken for meals, with a minimum of ten hours for each working day, exclusive of overtime previously earned.

11. When work trains run 40 miles or more to or from working limits, through freight rates will be paid for such mileage, and work trains rates while at work.

12. Trainmen on wrecking trains will be paid mileage to and from working limits and work train rates while at work.

13. Trainmen will be paid for work or wreck train service en route when the time occupied at such work exceeds one hour, and the time so paid will not be included in computing overtime.

14. Trainmen deadheading will be paid same mileage and rate as the corresponding men on trains on which they travel. Trainmen running with light engine or engine and caboose will be paid full through freight rates.

15. Trainmen travelling passenger will be paid same rate as corresponding men on trains on which they travel except when transferred from one general division to another and distances over 200 miles, when they will be paid one half passenger rates for all mileage over 200.

16. Trainmen acting as pilots will be paid conductor's through freight rate. When a pilot, as defined in operating rules, is required, a competent man will be supplied in addition to the regular crew. A man unfamiliar with the physical characteristics of the road will not be required to go.

17. When trainmen come on duty and are not required they will be paid through freight rates, with a minimum of 30 miles, and will stand first out. Trainmen held for duty and not used and their vans have been sent out will be paid for not less than 100 miles.—(Mr. O'Donoghue would insert Men's Rule.)

18. When unassigned crews are available and are run around at terminals they will be paid 50 miles for each run around and stand first out; Run around as above will not be considered to exist if crews are called in turn and go out on the train ordered for.

19. Trainmen held at terminal point for train service after train has been registered in, will be paid at overtime rates for time so held.—(Mr. O'Donoghue would substitute Men's Rule.)

20. For train service performed in or between yards at terminals trainmen will be paid overtime rates per hour.—(Mr. O'Donoghue would substitute Men's Rule.)

21. Time or mileage made doubling or assisting other trains will be paid for at through freight rates.—(Mr. O'Donoghue would substitute Men's Rule.)

22. Trainmen while shovelling coal for tenders en route will be paid 30 cents per hour and this time will not be deducted in computing overtime. Trainmen will not be required to do this work when sectionmen are available.

23. Trainmen attending court, coroner's inquest, or other legal case for the Company, shall receive one day's pay for each twenty-four hours and, if away from home, reasonable expenses in addition. The court, witness and mileage fees shall be assigned to the Company.

24. Brakemen relieving yardmen will be paid yardmen's rates.

25. Trainmen will not be compelled to ride in snow-plows or flanger, but will be supplied with van or other suitable car properly equipped.

26. Trainmen assigned to work train service will not be considered absent from time work is through Saturday night until starting hour Monday, unless notified before laid up Saturday that they will be required.

Trainmen will be allowed to go home Sundays if train service permits and absence will not interfere with work service.

27. Unless senior conductors desire otherwise junior conductors, if competent, will be assigned to work train service.

28. When a number of crews are deadheaded, the crew which stands first out shall run the train and the other crews deadheaded shall stand in the order in which they started. In case one of the crews is required between terminals the last crew out shall be held. Returning these crews will come out of terminals in the order in which their cabooses arrived, regardless of the order of the conductors.

29. The Company will arrange their way-freight service to avoid the handling of shed freight at night and on Sundays. Trains leaving terminals between four o'clock a.m., and noon will not be considered night trains.—(Mr. O'Donoghue would substitute Men's Rule.)

30. NOTE.—The Board recommends the adoption of a rule similar to rule nineteen of the schedule of rules of the Canadian Pacific Railway, Central and Western Divisions, in effect April 1, 1907, in so far as that rule is applicable to this road with a list of exceptions to be arranged between the Company and its employés.

31. Trainmen will be advised with the reason, and without unreasonable delay, if mileage or time claimed is not allowed.

32. Trainmen assigned to regular runs will not be considered absent from duty after arrival at terminals, but if called for service will be given their turn out with unassigned crews. Trainmen on regular runs will be allowed to go home Sundays provided the train service they are employed on permits.

33. Through freight crews will be run first in first out of terminal points on their respective sections.

34. When unassigned crews are held at other than their home terminals, longer than eighteen hours exclusive of Sundays, without being called for duty, they will be paid schedule through freight rates for each hour thereafter, time to be computed from the time crews go off duty until one hour before the departure of the train on which they resume duty. When men book rest of their own accord, the time booked will not be included.

35. Employés leaving the service of the Company for any cause will be given a service letter stating time of service.

36. If a trainman be taken off his run for any cause, he shall be given a hearing, at which time he shall have the right to have another trainman of his own selection appear and speak for him, and shall have the right to appeal from the decision of the local to the general officers of the Company. Should no decision be rendered within fifteen days, he shall receive his regular pay until the decision is arrived at. The accused party, if he so desires, shall be allowed to see all evidence produced against him.

37. Freight crews to be called, as nearly as possible, two hours before trains are ordered to leave. Trainmen to sign book showing time called.

38. One brakeman on each freight or work train and one brakeman or baggageman on each passenger train must have, at least, six months' experience, and the same or another man be acquainted with the run. The conductor will not be required to take out an incompetent brakeman.—(Mr. O'Donoghue would substitute Men's Rule.)

39. Trainmen who have been on duty twelve hours or more will not be called again if they have booked rest on arrival, the men to be judges of their own condition, and not less than six hours rest to be booked at any terminal except in extreme cases.

40. The number of crews shall be as far as possible adjusted in order that unassigned through freight crews in the service three years or more shall have an opportunity to make at least 2,600 miles, per month.—(Mr.O'Donoghue would substitute Men's Rule.)

41. When the business of the Company requires temporary transfer of men from one district or division to another, the competent junior men in the service shall be transferred, and hold their seniority in the districts to which they belong.

42. Superintendents will prepare separate seniority lists for each promotion district or territory, and will have them posted on the first day of January in each year. Said list will be posted in conspicuous places at all terminal registering points and employés whose standing is incorrectly shown must protest in writing within the life of each seniority list or no action will thereafter be taken.

43. Promotion in each promotion district or territory will be made according to the seniority of men in that district or territory, and will be governed by merit, fitness and ability. Men not promoted in their turn will be advised the reason. The promotion of conductors will be to any run in either freight, mixed or passenger service to which their seniority as a conductor entitles them, and in the event of a conductor refusing to accept any particular run to which he is entitled, he will lose his rights to that run until it again becomes vacant, but will otherwise retain his seniority standing. Permanent vacancies or new runs created will be bulletined for ten days and given to the senior qualified man applying therefor. In the event of a reduction of crews the junior men will be reduced.

Senior freight brakemen will be required to pass their examination as conductor in turn. Brakemen refusing promotion to conductors, or failing to qualify within thirty days of day set for their examination, will subject to the approval of the Superintendent, thereafter rank junior as conductor to the men promoted in their place.

The promotion of passenger brakemen shall be to the passenger baggagemen, or to any run in passenger service to which their seniority as brakemen or baggagemen entitled them.

Promotion for freight brakemen will be to any run in either freight or mixed service to which their seniority as brakemen entitled them, and in the event of a

brakeman refusing to accept any particular run that his seniority entitles him to, he will lose his rights to that run until it becomes vacant, but will otherwise retain his seniority standing. Permanent vacancies, or new runs created, will be bulletined for ten days, and given to the senior qualified man applying therefor. In the event of a reduction in staff, the junior men will be reduced. Where the promotion to any mixed run has been made from the passenger service previous to the existing schedule, the men will remain on such run and take their promotion to passenger service, but in the event of any vacancy occurring on those runs in future, it will be filled from the freight service. Runs changed under the present schedule from freight to passenger promotion will be placed back in the class to which they belong.

Brakemen have no seniority standing during the first six months' service. They will then rank as brakemen from date entering service.

Promotion to runs extending over more than one division will be divided and assigned between such divisions as nearly as possible on a mileage basis.

In the event of a transfer of existing lines from one General Superintendent's division to another, trainmen affected will have the choice of being transferred according to seniority. The men transferred will rank with those in the promotion district to which they transfer according to the dates from which they rank as conductor, baggageman or brakemen respectively, but no man will be reduced unless the number of crews employed is reduced.

44. At terminals where car inspectors are employed, they shall couple and uncouple hose and test air brakes, but this does not relieve train crews from seeing that their train is in proper condition.

45. Trainmen will not be held responsible for refrigerator cars in their trains found to contain freight when such cars are billed as empty from stations having a station staff.

46. Any question of interpretation of this schedule which may arise will be adjusted by the General Chairman with the General Superintendent, and then if necessary with the General Manager. But this is not to interfere with the present practice of the individual's right to make his own complaint.

47. This schedule of rules and rates for trainmen and yardmen will take effect May 1, 1910, and continue until terminated by thirty days' notice in writing.

Rates of Pay.

YARD SERVICE.

EAST OF DETROIT AND ST. CLAIR RIVERS.

	Foreman per hour.	Helper. per hour.
Portland, Montreal Terminals, Toronto Terminals, Hamilton London, Sarnia Tunnel, Stratford, Windsor, Niagara Falls, Fort Erie, Ottawa.....	$.34	$.30
Island Pond, Richmond, Brockville, Belleville Allandale, Palmerston St. Thomas, Coteau Junction, Depot Harbour.....	.33	.29
All other yards.....	$.31	$.27

Night rate 2 cents an hour additional.

NOTE.—So far as "All other yards" are concerned Mr. O'Donoghue would make the rates of pay 32 cents and 28 cents.

WEST OF DETROIT AND ST. CLAIR RIVERS.

	Foreman per hour.	Helper, per hour.
Detroit.....	$.35	$.31
Port Huron, Durand, Battle Creek and Nichels.....	.34	.30
All other yards.....	.32	.28

Night rate 2 cents an hour additional.

NOTE.—So far as "all other yards" are concerned Mr. O'Donoghue would make the rates of pay 33 cents and 29 cents.

Rules.

1. Rules 14, 15, 23, 31, 35, 36, 39, 42, 47 and 48 in trainmen's schedule will apply to yardmen.

2. Ten hours will constitute a day's work; five hours or less a half day; over five hours a full day. After ten hours overtime will be paid at schedule rates per hour. Less than thirty-five minutes will not be counted. For thirty-five minutes, or over one hour will be allowed.

3. Crews will be allowed one hour in which to take their meals between the fifth and seventh hours on duty. If only thirty minutes are given the men will be paid for the meal hour.

4. The promotion of yardmen in their respective yards will be according to seniority of the men in that yard, and will be governed by merit, fitness and ability. Men not promoted in their turn will be advised of the reason. Any yardman failing to qualify for, or refusing promotion will, subject to the approval of the Superintendent, thereafter rank junior to the man promoted in his place for that position only, but will otherwise retain his seniority standing. Permanant vacancies or new jobs created will be advertised for ten days and given to the senior qualified man applying therefor. In the appointment of yardmasters or assistant yardmasters the oldest qualified yardman will be considered.

In the event of a yard being abolished, the men in such yard will be assimilated with the men in other yards on the Superintendent's district ranking according to seniority from the time of entering the service. When a new yard is created yardmen on the Superintendent's district will be given preference to positions in that yard in accordance with seniority in their respective classes.

5. Yardmen will not be required to go outside of yard terminals except for switching service and yard crews whose work takes them outside of a switching terminal will receive yardmen's rates.

6. Yardmen required to do other than their regular work during regular hours will be paid regular yard rates.—(Mr. O'Donoghue would substitute Men's Rule.)

7. Yardmen working nights will not be called during the day for the purpose of investigation until they have had, at least, eight hours rest.

8. Yardmen will not be compelled to couple or uncouple hose bags on passenger cars in yards where carmen are available.—(Mr. O'Donoghue would substitute Men's Rule.)

9. Unassigned yardmen called for duty and not used will be paid for three hours and stand first out.

10. Yard crews in transfer service will be furnished with a properly equipped van or caboose.

11. The working time of yardmen will commence at the time required to report for duty, and will continue until they are relieved from duty at the end of the day's work, excepting the time taken for meals. Yardmen will be relieved in the yard where they commence work.

12. Yardmen will not be required to handle way-freight or act as weigh-masters in weighing cars where sufficient shed staff is employed or where weight masters are employed.

13. A bulletin will be kept in each yard office where two or more crews are employed on which assigned yardmen and extra yardmen will be registered.

14. In filling vacancies or positions as switch tenders, preference will be given to yardmen disabled in the service of the Company, whose disabilities are not such as to unfit them for the service.

15. No privilege heretofore enjoyed by yardmen shall be abrogated by reason of this agreement.

NOTE: Mr. O'Donoghue would add Men's Rules, 3, 7 and 10 to Yard rules.

NOTE: *Re* Trainmen's Schedule. Mr. O'Donoghue would add the rules on page six of his minority report in the Canadian Pacific Railway case.

(*Sgd.*) J. G. O'DONOGHUE,
J. E. ATKINSON.

Minority Report.

The text of the minority report of Mr. Wallace Nesbitt, K.C., is as follows:—

In this matter there seems to be no possibility of conciliation. The parties are absolutely apart on principle and both present their case with clearness. In my view the only remedy is for the parties to submit their differences to some person whose decison will govern, or to three parties, the majority to govern. The men frankly stated when they made their demand for the standardization for rates of pay that it embraced some fifty-five roads. The rate of pay was determined on by the Eastern Association, having, as I understand, its headquarters at Chicago, and claims the same rate of pay from the Grand Trunk Railway as from any of the great trunk lines in the United States, some of which have over five times the gross earnings per mile from operation as that of the Grand Trunk, and owing to better grades, curves, etc., have about one-half the cost per ton per mile as the Grand Trunk.

The men also demand that the roads shall adopt the same basis of payment, that is, payment by the mile, whether it is in passenger, or through freight or way-freight service.

The original instructions from the Executive Committee contained the statement: "If a compromise proposition is offered by the Company no settlement should be made by any Committee unless authorized by the grand officers"; which I think properly describes the attitude throughout in this matter. In other words, hitherto although the men belonged to an international organization, each body of employés through their proper committees, as I understand, had authority to deal with the Company to settle the rate of pay for the employment and the rules which should govern the employment. In this case the authorities at Chicago have insisted upon themselves dealing with the matter.

The Grand Trunk officers say that payment by the mile in passenger, mixed and way-freight service adopted on their system would be quite unworkable, as many of the small side lines necessarily have little mileage, during the month as compared with the mileage made on the long runs over the double track system. The Grand Trunk system has been operated for a great many years by what are called "specified runs," that is, the men are getting so much per month. They know precisely what the wage is and precisely what their work is. Under the other system a man's earnings per month are dependent entirely upon what work he gets to do, and some of the work that he performs he performs much more easily and quickly than on other parts of the system, and if you pay so much per mile quite irrespective of whether a man can make a run quickly and easily or slowly and with difficulty it seems to me that a great injustice is likely to result.

In the case of fixed runs between definite points, involving a definite number of hours per day and days per week, my personal view is that a fixed monthly wage is the fair and proper way of dealing with it. However, it is the method under which the road has been operated for nearly fifty years, and so far as I know without any real ground of complaint, and if I were one of the men myself I should much prefer to know what my wage was as a definite, fixed thing per month, so that I could gauge my finances accordingly, than to have it an uncertain and variable quantity, dependent upon the number of miles that I run, etc., etc.

After hearing all the evidence and the discussions pro and con, my view would be to add to the present rates of pay, all over the system, so far as the trainmen are concerned, fifteen per cent. This gives in a number of instances over $120 per month to a conductor, and I do not know of an instance where a conductor would get less than $80 per month even in out-of-the-way branch lines, where there is very little business and where there is very little traffic, and I am satisfied that his yearly income would be a good deal larger than ninety-five per cent. of the community in which he is serving.

In the case of through freight, I would increase the rate which is now 2·90 to 3·20

a mile; in other words an advance of 30 cents a 100 miles for conductors.

I would make the same relative increase to baggagemen and brakemen as I have suggested in the case of conductors.

In the case of yardmen, I would make the same proportionate relative increases of fifteen per cent. as in the case of specified runs.

The rules which now prevail upon the Grand Trunk are said by all parties to be well and fairly administered and no grievances under them were pointed out, but it was claimed by the men that they ought to have their duties more clearly defined by rule. I have over and over again expressed my view that multiplicity of rules leads to inefficiency in service. It is the modern craze for continually tinkering with statutes and passing laws. If the service is well administered and no hardships are complained of, the fewer rules, to my mind, the better. I think they only serve to create grievances, and for a certain type of mind to study them over and to find something justifying refusal to perform his ordinary work, or at least to argue about whether it is his work or some other person's in the employment.

The claim made by the men that no option is left to them but to obey the orders received from Chicago to demand precisely the same rate of wages all over the Grand Trunk as is paid by the eastern roads of the United States, would mean that the road could not operate, and would mean just so many men who are now getting employment not getting employment.

It is no part of my business, sitting on this Board, to discuss public questions, but in meeting after meeting, the spokesman for the men has stated that there was no use of the Board attempting to conciliate; the men would not abate one jot or tittle of their demands; that when they first made the claim they made it under instructions from Chicago, and I merely draw attention to the fact to suggest that this is a situation as if the railways of France had to take orders from Berlin as to their methods and cost of operation. Put in that light, it seems like a national danger but that seems to be the situation in this country at the present time.

(*Signed*) WALLACE NESBITT

III. REPORT OF BOARD IN DISPUTE BETWEEN THE CANADIAN NORTHERN RAILWAY COMPANY AND ITS CARMEN AND STEAMFITTERS.

THE Minister received, on June 28, the unanimous report of the Board of Conciliation and Investigation, to which had been referred certain differences between the Canadian Northern Railway Company and its carmen and steamfitters, members of the Carmen's Union and Plumbers', Gas and Steamfitters' Union No. 479, respectively.

The differences in question related to a demand on the part of the employés concerned for a separate schedule with the Canadian Northern Railway Company, for increased wages and for shorter working hours.

Mr. David H. Cooper, of Winnipeg, Man., and Mr. Philip C. Locke, of Winnipeg, Man., were appointed members of the Board on behalf of the Company and the employés, respectively; and on the joint recommendation of the foregoing the Board was completed by the appointment of Mr. Wm. E. Macara, of Winnipeg, Man., as Chairman.

In the report of the Board, it was stated that during the course of the sittings and after considerable evidence had been taken by the Board, it was suggested by the Board that the Company and the men get together and endeavour to eliminate as many as possible of the differences between them. This was done, with the result, that all points in dispute, with the exception of four, were settled; the four points being: (1) the question of wages; (2) the matter of hours for relay men; (3) the matter of overtime rates for shop men; and (4) the matter of a separate schedule for steamfitters. A schedule of agreement was

attached to the report of the Board; and the recommendations of the Board were as follows:—

"(1) That the Schedule hereto annexed, marked 'A,' shall be the rate of wages and working rules and regulations of the carmen and steamfitters of the Canadian Northern Railway Company.

"(2) That the request of the steamfitters for a separate schedule be granted."

In conclusion, the Board expressed its appreciation of the extremely pleasant manner in which the meetings were conducted between the Company and the men; and stated: "The case for both parties was most ably and concisely set out and there was, so far as the Board could see, absolutely no friction between the parties. Both the Company and the men spared no effort in order to give the Board the very fullest information on the matters in dispute, and the workings of a railroad corporation in the branches affected."

Report of Board.

The text of the findings of the Board of Conciliation and Investigation, in this matter, is as follows:—

To the Honourable,
The Minister of Labour,
Ottawa, Ontario.

HONOURABLE SIR,—

In the matter of the disputes between the carmen of the Canadian Northern Railway system and the Canadian Northern Railway Company, and the steamfitters of the Canadian Northern System and the Canadian Northern Railway Company, referred on the sixteenth day of May, A.D., 1910, under the provisions of the Industrial Disputes Investigation Act, to a Board of Conciliation and Investigation consisting of David H. Cooper, Esquire, representing the Canadian Northern Railway Company, Philip C. Locke, Esquire, representing the men and W. E. Macara, Chairman.

During the course of the sittings and after considerable evidence was taken by the Board it was suggested by the Board that the Company and the men get together and endeavour to eliminate as many as possible of the differences between them; and after several lengthy discussions, all points in dispute between the men and the Company were, with the assistance of the Board, settled, except four, which the Board were unable to get the parties together on, and on which they now beg to report, their findings being unanimous.

These four points were:—

1. The question of wages;
2. The matter of hours for relay men;
3. The matter of overtime rates for shop men;
4. The matter of a separate schedule for steamfitters.

The Board recommends as follows:—

1. That the schedule hereto annexed, marked "A" shall be the rate of wages and working rules and regulations of the carmen and steamfitters of the Canadian Northern Railway Company.

2. That the request of the steamfitters for a separate schedule be granted.

In conclusion, the Board wish to express to the Department, their appreciation of the extremely pleasant manner in which the meetings were conducted between the Company and the men. The case for both parties was most ably and concisely set out and there was, so far as the Board could see, absolutely no friction between the parties. Both the Company and the men spared no effort in order to give the Board the very fullest information on the matters in dispute and the workings of a railroad corporation in the branches affected. Through the courtesy of Mr. S. J. Hungerford, the mechanical superintendent of the Company, the Board were enabled to go through the shops with a view of ascertaining the class of work done by the men concerned, and Mr. Hungerford and also Mr. Sweetman and Mr. Fisher, two of the men's representatives, gave the Board most valuable assistance during the visit to the shops in the way of explaining the working of the various machines and the work done by the various mechanics.

Dated at Winnipeg, Manitoba, this twenty-fourth day of June, A.D., 1910.

(Sgd.) W. E. MACARA,
Chairman.

D. H. COOPER,
For Can. Nor. R'y. Co.

PHILIP C. LOCKE,
For the men.

Canadian Northern Railway.

Mechanical Department.

On and after May 1, 1910, the following rules and rates will govern carmen and steamfitters in all shops, roundhouses and repair yards.

ARTICLE I.

CLAUSE A.

Car inspectors, repairers, oilers, air brake testers, cleaners, ice men, lamp and gas men, and other employés who work in relays day and nights in traffic yards, will be considered relay men. Foremen will only assign as many men to this class, as, in their opinion, are necessary for the proper operation of trains.

All others employed in connection with car work, whether working in shops or repair yards, will be considered shop men.

Workinghouse for shop men.

CLAUSE B.

Nine hours will constitute a day's work. The working hours will be from 7 k. to 17 k. with one hour off for dinner from 12 k. to 13 k.; except from April 1 to October 1, when the hours will be from 7 k. to 17.30 k. the first five days of the week with one hour off for dinner between 12 k. and 13 k. and from 7. k. to 12 k. on Saturdays.

CLAUSE C.

Night hours in back shops will be from 19 k. to 6.30 k. with one half hour between 24.30 k. and 1 k. for supper; five nights per week, for which twelve hours per night will be allowed.

CLAUSE D.

In roundhouses nine hours will constitute a day's work; hours to be worked between 7 k. and 18 k.

Night hours in roundhouses shall be from 19 k. to 24.30 k. and from 1 k. to 6 k., for which eleven hours shall be allowed.

CLAUSE E.

Carmen working in roundhouses will be governed by roundhouse hours.

Working hours for relay men.

CLAUSE F.

Relay men as per clause A, Article I, unless otherwise arranged by the Company, will be from 7 k. to 19 k. for day work and 19 k. to 7 k. for night work, with one hour off for meals.

ARTICLE II.

Overtime rates for shop men.

CLAUSE A.

Overtime rates will be as follows:—From the close of schedule shop hours to 24 k. time and one half; after 24 k. double time. Sundays and all Dominion holidays, including New Year's Day, Good Friday, Victoria Day, Dominion Day, Labour Day, Thanksgiving Day and Christmas Day, will be paid at the rate of time and one half; should any of the above mentioned holidays fall upon Sunday the day observed by the Federal Government or Provincial Government will be observed. Men will not be laid off during regular working hours to equalize overtime made.

No call to work overtime will be paid less than five hours straight time.

Men on road repair cars will be paid straight time during schedule working hours while on road, whether waiting, travelling or working, also overtime at

usual rates, if worked. No time will be allowed while waiting or travelling after schedule hours. Seventy-five cents per day will be allowed while on the road for expenses.

Such men to work on repair tracks when not required on road.

CLAUSE B.

Hours between 12 k. and 13 k. will be considered overtime.

CLAUSE C.

Overtime rates for relay men.

Overtime will be paid at the rate of time and one half after working hours arranged as per Clause F, Article I.

When relay men are called out to attend trains within three hours after regular working hours, they shall be paid not less than one hour straight time; if beyond three hours, two and one half hours straight time.

CLAUSE D.

For both shop and relay men.

Night men called out during the day will receive the same consideration in regard to overtime as day men called out at night.

Men who while working are told to continue to work after shop hours, or who are told to come back and work overtime, commencing not over one hour after shop hours, will not be considered to have been called out.

ARTICLE III.

Employés called for wrecks will receive pay from the time called for, or from the time of registration. Straight time will be allowed when travelling to or from wrecks, except on Sundays or specified holidays, and time and a half when working at wrecks, or when in charge of wrecked engines. No time will be allowed when laid up for rest.

ARTICLE IV.

Employés sent out on the road temporarily to work will be allowed shop rates during the first twenty-four hours and straight time thereafter, except on Sundays and specified holidays, when time and one half will be allowed. When it is necessary to transfer employés to roundhouses or other shops they will receive one day's time for each day of travelling and reasonable expenses until they arrive at their destination. Receipt to be attached to expense voucher.

ARTICLE V.

When reduction of expenses is necessary, before reducing the force the time will be reduced to at least eight hours per day, five days per week in main shops; men who have families depending on them for support shall be given preference; seniority and proficiency to govern. When force is again increased or when vacancies occur, men who have been laid off will be given preference of employment, if available, provided services are satisfactory; men laid off at one point will be transferred to another in preference to hiring new men.

Men who have not been continuously in the service more than six months may be laid off when reduction is necessary before reducing hours.

ARTICLE VI.

Employés having grievances, either specific or of a general nature, may present the case to the proper officer. If investigation is desired, the aggrieved party, or another employé representing him, may, during working hours, arrange with his foreman for same; investigation to be held within forty-eight hours after such application, and in case a satisfactory adjustment cannot be made the case may be referred to the next highest officer of the Department until the Manager is approached. If after investigation the employé is found blameless he will be paid for all time lost.

ARTICLE VII.

CLAUSE A.

Leave of absence and free transportation will be granted to employés to go before the management.

CLAUSE B.

No employé representing his fellow workmen will be discriminated against.

ARTICLE VIII.

Employés leaving the service for any cause will receive their wages in full within forty-eight hours and clearance papers as soon as possible.

ARTICLE IX.

Employés will be granted leave of absence and passes or reduced rates in accordance with the current general regulations of the Company.

ARTICLE X.

Leading hands are those, who while working themselves, also direct and supervise the work of others, and are paid by the hour. They will receive not less than 2 cents above the minimum rate.

ARTICLE XI.

Employés required to do superior work will be paid at the rate for such superior work after the seventh day, but should they be required to do such work for two weeks or over they will be paid from the time they start on such work.

ARTICLE XII.

Apprentices out of their time will be paid the minimum rate for journeymen, and after six months the maximum rate, provided their services are satisfactory.

ARTICLE XIII.

Carmen required to furnish and regularly use carpenter's tools will be classed as freight carpenters.

ARTICLE XIV.

All pipe work on locomotives and coaches, whether new or repairs, shall be done by steamfitters, when there is sufficient work to warrant their employment.

ARTICLE XV.

CLAUSE A.

Boys serving an apprenticeship to learn the trade shall be designated apprentices. Any boy hereafter engaging himself to learn the trade shall be over sixteen years and under twenty-one years of age, must serve not less than five years, must be able to read and write English and know the first four rules of arithmetic.

The number of apprentices shall be one for the shop and one for every five mechanics employed.

CLAUSE B.

Apprentices, who having served one year, in the opinion of the shop foreman, show no aptitude for acquiring the trade, will be transferred or dismissed, and all obligations accepted by the Company will of necessity, be forfeited.

ARTICLE XVI.

Rates of pay shall be as follows:—

	Port Arthur to Humboldt	Humboldt and West (including Humboldt).
Air brake testor	26½	28½
Air brake cleaner	26	28
Air brake triple testor	27½	29½
Air brake triple testor, Winnipeg only	29	
Bench carpenter, coach shop	34½	36½
Carpenter, coach and locomotive	33	35
Carpenter, freight	28½	30½
Car stripper and trimmer	25	27
Car inspector	26½	28½
Car repairer and oiler	25	27
Car heat and lampman	23	25
Car cleaner and washer	21½	23½
Cleaner for painter	21	23
Cleaner brass, coach shop	22	24
Driller, freight shop	23	25
Leading pipe fitter	35½	37½
Pipe fitter	33½	35½
Pipe machine man	23½	25½
Pipe fitters' helper	21½	23½
Wood machinist	33	35
Wood machinists' helper	21½	23½
Locksmith	30	32
Painter ldg., coach and tender	34½	36½
Painter, coach and locomotive	33	35
Painter, freight	26½	28½
Painter, brush hand	23	25
Painters' helper	21	23
Saw filer	32	34
Tinsmith, leading	34½	36½
Tinsmith	33	35
Tinsmiths' helper	21½	23½
Truck repairer, leading	31½	33½
Truck repairers, coach and tender (shop)	26	28
Truck repairers, coach and tender (yard)	25½	27½

Upholsterer	33	35
Coal and ice men	21½	23½
Operator of paint gun	25	27
APPRENTICES' RATES.		
First year	11	13
Second year	13	15
Third year	15	17
Fourth year	18	20
Fifth year	22	24

This schedule will be effective from May 1, 1910, and will remain in force for one year, and from year to year thereafter unless thirty days' notice in writing is given by either party concerned; such notice to be given thirty days previous to the first of May in any year.

STRIKE IN BUILDING TRADES AT REGINA—SETTLEMENT EFFECTED BY MEDIATION OF THE DEPUTY MINISTER OF LABOUR.

ON May 21 the Department received the following telegraphed message from Mr. B. Simmons, Secretary of the Federated Building Trades Council of Regina, Sask.:—

REGINA, SASK., May 21, 1910.

DEPUTY MINISTER OF LABOUR,
Ottawa.

Sir,—

All building trades in Regina have been on strike now for three weeks. Have tried to meet employés three times; received no satisfaction. Federal Building Trades Council request you to come and use your influence to bring employés and employers together to discuss terms.

Yours respectfully,

B. SIMMONS.

Inquiry on the part of the Department elicited the further information that the disputes concerned forty firms and almost 275 men, the secretary of the Building Trades Council stating in a message, to the Department, on May 23, that the demands of the employés had been submitted in January, that the men had tried "to meet the employers twice in April, and once since disputes commenced, May 1."

By the Minister's direction, the Deputy Minister of Labour, Mr. F. A. Acland, left for Regina on May 26.

The inquiries of the Deputy Minister showed that the demands of the men were for schedules giving increased wages to carpenters, plumbers, electricians, painters and plasterers, all which were members of the local building trades council, and for the closed shop for the same trades. The men had preferred these claims in January to individual contractors, but had received no reply. The trade involving the largest number of men was that of carpentry; and in this case, also, the claim for increase was largest, the old rate being 35 cents per hour, and the demand being for a minimum of 45 cents. The painters made no demand for increase; they had been working under an agreement when the strike occurred, and the strike on their part was sympathetic, based on the view that all the trades included in the Federated Building Trades Council must act in common. The strike commenced about May 1.

The building season was in full swing at the time of the dispute, and the strike caused considerable inconvenience. No important work appeared to the Deputy Minister to have been suspended, but there was evidence, and the master builders admitted, that much work which would have been undertaken had conditions been favourable, had been left untouched, and would so remain until the difficulty had ended, and this fact, in a city where the population is growing rapidly, as in the case of Regina, entailing a continual increase in housing accommodation, seriously menaced the interests of the community.

Shortly after the outbreak of the strike, there was a movement towards organization on the part of the master builders of Regina, which resulted in the formation of the Regina Builders' Exchange, Mr. R. J. Lecky, representative at Regina of Messrs. Peter Lyall & Sons, Limited, and in charge of the contract for the erection of the Provincial Parliament buildings, being president.

The Deputy Minister found the em-

ployers at first somewhat averse to negotiations, but succeeded in procuring a joint meeting of committees representing the two parties. At the outset, it became clear that the demand for a closed shop was the real point of trouble, the masters' committee insisting that this could not under any circumstances, be conceded. After a day or two of conference on this point, the men decided to waive this demand, and there remained only the question of schedules. No serious difficulty was involved in this respect, but the Masters' Exchange included forty members, all busy men, and unable to meet under their constitution, save at several days' notice, and it was therefore impossible to proceed very quickly in securing the consent of this body. On the representations of the Deputy Minister, a general meeting of the Exchange was held on Friday, June 3, when schedules were framed for the various industries, good until the end of 1911. At the request of the president, Mr. Acland was present and discussed certain aspects of the schedule, also, in reply to questions, gave information respecting the Industrial Disputes Investigation Act, and the possibility of applying it in the case of a dispute of this nature. Mr. Acland placed the proposition of the Exchange before the employés in a body, on the following day. The schedules and conditions were immediately accepted in the case of all trades concerned save the carpenters, and with the exception of the carpenters, the men returned to work a day or two later. The members of the Builders' Exchange met again to consider the representations of the carpenters. The latter objected to the employment of handymen for the rough work of carpentry claiming there was a tendency on the part of the masters to class good mechanics as handymen and get ordinary carpenters' work out of them, especially during the winter season. Some modification of the schedule on this point was originally effected, and the carpenters returned to work on June 14. When the Deputy Minister left Regina, excellent relations prevailed between the masters and the employés in all the building trades which had been concerned in the difficulty, and the committees were meeting each other on the easiest and most agreeable terms. The organization of an Exchange on the part of the Master Builders was agreed by both masters and men to be a distinct advantage, which promises to do much to avert danger of an early repetition of the recent trouble.

The schedules and conditions formulated by the Builders' Exchange, and accepted by the men, were as follows. having gone into effect on June 14, when the last of the trades concerned returned to work, and being good to remain in force until December 30, 1911:—

Hours of labour.—Carpenters, ten hours per day, except Saturday, which shall be nine; Factory hands, ten hours per day; Plasterers, nine hours (no overtime until after 6 P.M., Electrical workers, nine hours, to be worked between 7 A.M. and 6 P.M. (overtime to be paid only after 6 P.M., Plumbers and steamfitters, same as electrical workers; Painters and paperhangers, ten hours per day, with Saturday optional; Bricklayers, stonemasons and stone cutters, nine hours per day.

Wages, per hour.—Carpenters, 40 to 45 cents; Factory hands, 30 to 40 cents; Plasterers, 60 cents; Electrical workers, journeymen, 35 to 40 cents; helpers, 20 to 25 cents; Plumbers and steamfitters, journeymen, 50 to 55 cents; improvers, 30 to 45 cents; Painters, 30 to 35 cents; Bricklayers, stonemasons, stone cutters, 60 cents; Handymen, 25 to 30 cents; Labourers, 20 to 25 cents.

Overtime at the rate of time and one-half for all trades.

Wages before the strike were: Carpenters, 35 cents per hour; Plumbers, 45 to 50 cents per hour; Plasterers, 55 cents; Electricians, 35 cents; Painters, 30 to 35; Labourers, 20 cents per hour.

NEW BRUNSWICK LEGISLATION AFFECTING LABOUR, 1910.

THE third session of the fifth Legislative Assembly of New Brunswick was begun on February 17, and was prorogued on March 26. The following is a brief review of the more important legislation enacted:—

Public Utilities Commissions.

A Board of three commissioners was established for the purpose of supervising the following public utilities: Every corporation, company, person, association of persons, their lessees, trustees, liquidators, or receivers, appointed by any court, that now or hereafter owns or may own, operate or control any plant or equipment for the conveyance of telephone messages, or for the production, transmission, delivery or furnishing of heat, light, water or power, either directly or indirectly, to or for the public, and who may own and operate any street railway," and also "any city or incorporated town that now or hereafter owns or may own, operate, manage or control any plant or equipment for the conveyance of telephone messages, or for the production, transmission, delivery or furnishing of heat, light, water or power, either directly or indirectly, to or for any other city or incorporated town, or any street railway."

Every public utility included in the above enumeration is required to furnish reasonably adequate service and facilities for reasonable and just charges, and is to make a specified annual return of its proceedings to the Board. Rates and charges must be filed with the Board, and no change made except upon thirty days' notice. Rebates and concessions from public utilities are forbidden under a minimum penalty of $50. The Board is empowered in the discharge of its duties to hear evidence on oath and to compel the attendance of witnesses.[1]

Labour Statistics.

The Act of 1904, providing for the establishment of a Bureau of Labour is amended by an addition requiring that the head of the Bureau shall be known in future as the "Commissioner of Labour." The Commissioner is given power to appoint agents in the industrial centres of the Province to assist in obtaining statistical information, "to consult with the employers and employés in order to prevent or settle lockouts and strikes, and to confer with factory inspectors as to their duties and the making up of their annual reports."[2]

Government Annuities.

The property and interest of an annuitant, or of any person interested or entitled in or to any contract for an annuity, or an annuity itself, under the Government Annuities Act, 1908, is exempt from seizure, levy or attachment under the process of any New Brunswick Court and shall not be affected by any trust, charge or lien.[3]

[3] N.B. Stat. 1919, chap. 12.

IMMIGRATION AND COLONIZATION.

The official statements given below with regard to recent immigrant arrivals in Canada, number of homestead entries made, land patents issued, &c., are published, except where otherwise stated, by courtesy of the Department of the Interior, Canada.

British Emigration Returns.

DURING the month ended May 31, 1910, the number of passengers leaving the United Kingdom for British North America, according to official returns of the Board of Trade, was as follows:—

Nationality.	1910	1909
English	15,717	7,440
Welsh	288	157
Scotch	5,121	3,044
Irish	982	664
British Colonial	258	126
Total British subjects	22,366	11,431
Foreign	4,808	3,006
Total	27,174	14,437

During the five months ended May 31, 1910, the number leaving the United Kingdom, as above, was:—

Nationality.	1910	1909
English	47,377	25,802
Welsh	1,125	328
Scotch	16,777	7,433
Irish	2,980	1,797
British Colonial	1,193	459
Total British subjects	69,452	35,819
Foreign	15,873	10,927
Total	85,325	46,746

Homestead Entries.

The following statement shows the number of homestead entries made during the month of May, 1910, as compared with May, 1909:—

STATEMENT SHOWING THE NUMBER OF HOMESTEAD ENTRIES MADE DURING THE MONTH OF MAY, 1910, AS COMPARED WITH MAY, 1909.

Agency.	Manitoba.		Saskatchewan.		Alberta.		British Columbia	
	1910	1909	1910	1909	1910	1909	1910	1909
Battleford	.....	.....	332	259	.....	.....	.....	.....
Brandon	7	13	.....	.....	.....	.....	.....	.....
Calgary	.....	.....	.....	.....	904	527	.....	.....
Dauphin	93	66	.....	.....	.....	.....	.....	.....
Edmonton	.....	.....	.....	.....	582	392	.....	.....
Estevan	.....	.....	134	67	.....	.....	.....	.....
Humboldt	.....	.....	219	157	.....	.....	.....	.....
Kamloops	.....	.....	.....	.....	.....	.....	20	27
Lethbridge	.....	.....	.....	.....	121	280	.....	.....
Medicine Hat	.....	.....	308	.....	121	280	.....	.....
Moose Jaw	.....	.....	674	819	.....	.....	.....	.....
New Westminster	.....	.....	.....	.....	.....	.....	.....	2
Peace River	.....	.....	.....	.....	94	.....	.....	.....
Prince Albert	.....	.....	225	109	.....	.....	.....	.....
Regina	.....	.....	59	72	.....	.....	.....	.....
Red Deer	.....	.....	.....	.....	283	234	.....	.....
Saskatoon	.....	.....	646	.....	.....	.....	.....	.....
Swift Current	.....	.....	1,028	.....	.....	.....	.....	.....
Winnipeg	181	91	.....	.....	.....	.....	.....	.....
Yorkton	.....	.....	120	128	.....	.....	.....	.....
Total	281	170	3,745	1,611	2,328	1,433	20	29

It will be seen that there has been a net increase for May, 1910, of 3,131 in the number of entries made.

A statement of the entries made during the first five months of the calendar year 1910, compared with the corresponing month of May, 1909, is as follows:—

STATEMENT OF HOMESTEAD ENTRIES, JANUARY-MAY, 1910-1909.

Month.	Manitoba.		Saskatchewan.		Alberta.		British Columbia	
	1910	1909	1910	1909	1910	1909	1910	1909
January	152	125	976	605	1,558	566	12	12
February	161	168	1,069	636	1,007	543	17	17
March	202	219	2,688	1,271	1,901	1,077	28	25
April	324	231	4,240	2,395	2,620	1,934	25	44
May	281	170	3,745	1,611	2,328	1,433	20	29
Total	1,120	913	12,718	6,518	9,414	5,553	102	127

It will be seen that there has been a net increase during the first five months of 1910 of 10,243 in the number of homestead entries as compared with the corresponding months of 1909.

Nationalities of Homesteaders.

The nationalities of homesteaders during the month of May, 1910, as reported by the several agencies of the Department of the Interior in Manitoba, Saskatchewan, Alberta and British Columbia, were as follows:—

NATIONALITIES OF HOMESTEADERS DURING MAY, 1910.

Nationalities.	Provinces.				Total.
	Manitoba.	Saskatchewan.	Alberta.	British Columbia.	
Canadians from Ontario	12	245	361	3	801

Total	281	3,745	2,328	20	6,374

Number of souls represented by above entries 15,840.

Of 2,177 entries made by persons from the United States, there were 536 from North Dakota, 422 from Minnesota, 177 from South Dakota, 175 from Washington, 141 from Wisconsin, 116 from Michigan, ninety-two from Iowa, seventy from Illinois, forty-eight from Indiana, forty-four from Idaho, thirty-eight from Ohio, thirty-two from Oregon, twenty-nine from Oklahoma, twenty-eight from New York, twenty-seven from Kansas, twenty-four each from Montana and Nebraska, twenty-one from Massachusetts and twenty from Missouri.

Lands Patented.

An abstract of letters patent covering Dominion lands situate in Manitoba, Saskatchewan, Alberta, British Columbia and the Yukon Territory, during the month of May, 1910, as compared with the month of May, 1909, is as follows:—

Nature of Grant.	May, 1910.	
	No. of Patents.	No. of Acres.
Alberta Railway & Irrigation Company's sales	22	11,213.00
British Columbia homesteads	8	1,128.92
British Columbia sales	3	68.70
Coal lands' sales	5	1,316.25
Commutation grants		
Homesteads	1,362	215,944.19
Hudson's Bay Company	1	29,214.30
License of occupation	2	
Manitoba Act grants		
Military homesteads	1	320.00
Mineral rights (2,111.25 acres)	10	
North-west halfbreed grants	51	8,686.10
Parish sales	3	331.70
Quit claim, special grants		
Railways:—		
Calgary & Edmonton Railway Company		
Canadian Northern Railway Company		
Canadian Pacific Railway Company's grants	13	21,190.50
Canadian Pacific Railway Company's grants, Souris Branch	11	8,221.80
Grand Trunk Pacific Railway Company	16	220.44
Qu'Appelle, Long Lake & Saskatchewan Railroad and Steamboat Company		
Sales	58	7,370.53
School lands' sales	40	4,757.73
Special grants	15	464.015
Yukon Territory sales	20	857.04
Totals	1,641	311,305.215

In May, 1909, the number of patents issued was 1,993, covering an area of 311,617.18 acres, showing a decrease for the month of May, 1910, of 352 in the number of patents issued and of 311.97 acres in the area patented.

Notes.

It is estimated that the immigration movement into Canada since January, 1910, has already exceeded the movement for the entire year 1909.

RECENT INDUSTRIAL AGREEMENTS.

Bill of Prices of the Hamilton Branch, No. 149, Journeymen Tailors' Union of America.

THE following Bill of Prices was recently agreed upon between the Hamilton Branch, No. 149, of the Journeymen Tailors' Union of America, and the employing tailors of that city:—

COATS.

Dress coats	$9.00
Tuxedos	6.25
Double breasted frock	9.00
Single breasted frock	7.50
Double breasted cutaway	7.50
Single breasted cutaway	7.00
Double breasted sack	6.00
Single breasted sack	5.50
Double breasted skeleton sack	5.00
Single breasted skeleton sack	4.50
Double breasted flannel sack	4.50
Single breasted flannel sack	4.00

OVERCOATS.

Double breasted Newmarket	$9.25
Single breasted Newmarket	8.25
Double breasted Surtout	9.25
Single breasted Surtout	8.25
Paletot	9.25
Paddock	9.25
Double breasted Ulster	7.50
Single breasted ulster	7.25
Inverness	7.25
Raglan	8.50
Double breasted sack, overcoat	7.25
Covert coat	6.50
Single breasted, fly front	7.25

UNIFORM COATS.

As per agreement.

TRY ONS.

	Hours.
Skeleton baste	2½
Skeleton baste dress, double breasted frock and surtout	4
Basting centre back, shoulders, one sleeve and collar	1
Side seams	½
Both sleeves	½
Waist seams	½

Alterations after try on 25 cents per hour.

EDGES.

	Hours.
Double stitched	1
Bound by hand	2½
Flat braided by machine	2½
Flat braided by hand	5
Double binding by hand	3
Stoated in skirt coats	1
Stoated in sack coats	1½
Stoated in overcoats, fly fronts	2
Stoated in overcoats, double breasted	2
Felled in skirt coats	1
Felled in sack coats	1½
Edges corded to bottoms	2
Edges corded around bottom	3
Tubular braid same as cord, piped to bottom same as cord	2
Piped around bottom	3
Preparing piping 1 hour extra.	
Edges stitched by hand	3

SEAMS.

Serged	1
Raised and single stitched	2½
Raised and double stitched	3½
Slated	3

Raised and stitched sack coat	2
Raised and double stitched sack coat	3
Box seams stitched once	3
Box seams stitched double	5
Sleeves seamed in by hand	1
Side seams by hand	½
Shoulder seamed in by hand	½
Centre back by hand	½
Waist seams by hand	1
Under arm seams by hand	½
Lapel seams by hand	1
Taped seams	5
Taped seams when sleeves lined	3½
Taped seams, back only	1

POCKETS.

All pockets over three, each	1
Ticket pocket, all coats	½
If with flap	1
All flaps over two on sacks, each	½
Flaps on morning coat, each	½
Bellows pockets, each	1
Pockets with double mouth, opening through lining	1
Flaps on patch pockets, each	½
If with hole and button, each, extra	½

FACINGS.

Silk factings, 10 inches or under	1½
If quilted by machine, extra	2
If quilted by hand, extra	3
Silk facings to waist on body coats	3
If quilted by machine, extra	4
If quilted by hand, extra	5
Silk facings to bottom	4
If quilted by machine, extra	6
If quilted by hand, extra	7
Bound undercoats	1
Bound overcoats	1
Calf tongues on facings	½
Zig zag	2
Zig zag on overcoats	2½
Dovetailed	3
Dovetailed and punched	3½

LININGS.

Linings to holes	2½
Linings to edge, with holes through and stitched by hand	4
Linings to edge, with holes through and felled	3
Stitched by hand if felled	3
Silk or satin linings on shawl collar, extra	1
Linings loose, bottoms turned up	1
Linings loose, bottoms faced	1½
Quilted all through, 1 inch	4
Quilted all through, 1 inch, diamonds	6

Rows or diamonds smaller, or diamonds larger, at same ratio.

MISCELLANEOUS.

Capot or hood	5
Cape	5
Cape with fly and collar	7
Vent in sleeves, buttons only	1
Each hole and button in same	½
Centre vent in sack	1
Side vents	1
Side edges	1

Centre vents in all overcoats to be included in start.

Tab on collar	1
Fly in back, 4 holes allowed	1½
Extra holes, each	½
Bug trap on coat	1
Covering buttons, per dozen	1½
Under collar felled all round by hand	½
Under arm cuts across pocket mouth	1
Half velvet and half cloth collars	2
Quilted collars, not exceeding 4 rows	½
Quilted bottoms, not exceeding 4 rows	1
Extra rows on bottom, each	½
Quilted cuffs, not exceeding 4 rows	½
Each extra row	½
Imitation cuffs	1
Plain cuffs	1½
Rolling cuffs or lined cuffs	2½

Eyelet holes, each 3 cents.

Alterations and busheling, 25 cents an hour.

All extras not mentioned to be paid for at 25 cents an hour, and all work allowed not done to be deducted at same ratio.

VESTS.

Double breasted dress vest	$1.80
Single breasted dress vest	1.60
Double breasted vest, frock lapels	1.75
Double breasted vest, collar one piece	1.55
Double breasted vest, no collar	1.45
Single breasted vest, with collar	1.45
Single breasted, vest no collar	1.30
Clerical vest, open in front	1.60
Cassock, open in sides and shoulders	2.25
Golf, with sleeves	1.75
Golf, without sleeves	1.30s

EXTRAS.

Corded edges, or braided, 1 row	.25
Edges bound by hand	.25
Fly front	.18
Try on	.10
Flaps, per pair	.10
Inside breast pocket	.10

Four pockets included in start.

TROUSERS.

Dress trousers	$1.60
Trousers	1.50
Riding breeches	3.00
Golf breeches	2.00
Bicycle pants	1.50
If with extensions	.36
Broad falls	2.00

EXTRAS.

Pants, full lined	$ .25
Pants, half lined	.15
Try on	.25
French Beaver	.18
All pockets over three	.15
Watch pocket, 10 cents; if jetted	.15
Raised seams	.10
Loops for belt	.10
Each flap on hip pocket with hole and button	.10
Each hole and button in top or side pockets	.05

Extras not mentioned in this pant and vest bill to be paid for at the rate of 18 cents per hour. No deductions to be made from the start of this scale of prices for pants and vests.

Agreement Between Painters Union Local 583, of Calgary, and the Master Painters and General Contractors at Calgary.

1. A day's work to consist of nine hours, commencing at 7.30 A.M. and ending at 5.30 P.M., and 12 NOON on Saturday. (Decrease of four hours per week.)

2. The minimum rate of wages to be 45 cents per hour. (Increase of 5 cents per hour.)

3. That every contractor be allowed one apprentice to every four journeymen painters, and that the said apprentice shall serve at no less than three years, and shall be under the age of twenty-one at the time of apprenticeship.

4. That workmen be paid time-and-a-half from 5.30 P.M. until 12 P.M. Saturday, from 12 A.M. until 12 P.M., after that double time, also Sundays and Dominion holidays, double time.

5. The wages to be paid Saturday, at 12 NOON, fortnightly.

6. That Master painters and general contractors sending men outside the city to work shall pay railway fare and travelling fare one trip each way; also any extra expense that is incurred in the way of board and lodging.

7. Workmen to be on the job, or at the shop prepared to begin work at the time of starting.

8. This agreement shall come into effect on the nineteenth day of May, 1910, and shall continue to be in force for one year, until notice has been given in February prior to the expiration of any such yearly agreement.

9. That men wishing to again work for their former employers shall see such employer sometime between settlement and Monday, May 23, and make arrangements as to finishing any work they have on hand.

10. The Union By-laws pertaining to members contracting shall be strictly enforced.

FAIR WAGES SCHEDULE IN GOVERNMENT CONTRACTS AWARDED DURING THE MONTH OF JUNE, 1910.

The following is a list of contracts awarded by the Department of Public Works, Department of Marine and Fisheries, which have received the signatures of both parties, together with the fair wages schedule inserted in each contract, setting forth the minimum rate of wages to be paid to the labourers engaged upon the works. A statement of orders for supplies given by the Post Office Department is added.

Department of Public Works.

LANDING PIER, GASPÉ BASIN, QUE.

LANDING pier, &c., Gaspé Basin, Que., name of contractor, Horace Dussault, Lévis, Que.; date of contract, April 29, 1910; amount of contract, $273,985.

Trade or Class of Labour.	Rate of Wages, Per Day of 10 Hours, Not less than:
Foreman carpenter	$2.25
Carpenters	1.75
Blacksmiths	2.00
Blacksmiths' helpers	1.50
Common labourers	1.25
Driver, with 1 horse and cart	2.00
Driver, with 2 horses and wagon	3.00

WHARF AT PARTRIDGE ISLAND, N.B.

Wharf for quarantine at Partridge Island, N.B.; name of contractor, James E. Kane, St. John, N.B.; date of contract, May 11, 1910; amount of contract, $13,448.

Trade or Class of Labour.	Rate of Wages, Per Day of 9 Hours, Not less than:
Foreman carpenter	$3.00
Carpenters	2.50
Blacksmiths	2.25
Blacksmiths' helpers	1.50
Ordinary labourers	1.50
Driver, with 1 horse and cart	2.50
Driver, with 2 horses and wagon	4.00

For the construction of bridges over the Nicolet, Gentilly and Becancourt rivers. Date of subsidy agreement, June 1, 1910. Subsidy granted, Nicolet river bridge. $15,000; Gentilly river bridge, $15,000, and Becancourt railroad river bridge, $30,000; Railway company, Quebec, Montreal & Southern Railway Company.

RATE OF WAGES.

All mechanics, labourers or other persons who perform labour in the construction of the work hereby contracted for, shall be paid such wages as are generally accepted as current for competent workmen in the district in which the work is being performed, and if, there is no current rate in such district, then a fair and reasonable rate, and shall not be required to work for longer hours than those fixed by the custom of the trade in the district where the work is carried on, except for the protection of life or property or in case of other emergencies. In the event of a dispute arising as to what is the current or a fair and reasonable rate of wages, or what are the current hours fixed by the custom of the trade, it shall be determined by the Minister of Labour, whose decision shall be final.

These conditions shall extend and apply to moneys payable for the use or hire of horses or teams and the persons entitled to payment for the use or hire of horses or teams shall have the like right in respect of moneys so owing to them as if such moneys were payable to them in respect of wages.

In the event of default being made in payment of any money owing in respect of wages of any mechanic, labourer or other person employed on the said work, and if a claim, therefore, is filed in the office of the Minister of .....

and proof thereof satisfactory to the Minister is furnished, the Minister may pay such claim out of any moneys at any time payable by His Majesty under such contract, and the amounts so paid shall be deemed payments to the contractors.

Post Office Department.

During the month of May orders were given by the Post Office Department for the supplies below mentioned, subject to the regulations for the suppression of the *sweating* system, and the securing of payment to the working men and working women of fair wages, and the performance of the work under proper sanitary conditions.

Nature of Orders.	Amount of Orders.
Making metal dating stamps and type and making other hand stamps and brass Crown seals	$ 675.50
Making and repairing rubber dating stamps and type, also other stamps	52.70
Supplying stamping material and wooden boxes, and repairing stamping pads	974.44
Supplying mail bags	2,617.50
Repairing mail bags	1,320.44
Making and repairing mail locks and supplying mail bag fittings	213.40
Supplying Street Letter Boxes, and repairing portable letter boxes, Railway Mail Clerks' tin travelling boxes and parcel receptacles	1,190.25
Making and repairing miscellaneous articles of Postal Stores	13.75
Making and supplying articles of official uniform	354.00

FAIR WAGES SCHEDULE PREPARED DURING JUNE, 1910.

DURING the month of June the Department of Labour prepared, at the request of the Departments concerned Fair Wages Schedules for insertion in contracts for various public works, as follows:—

Construction of a line of railway from Winnipeg Beach to Gimli, Man.

Construction of 3½ miles of Intercolonial Railway, from Campbellton to the St. John river, N.B.

Construction of a line of railway from Midway to a junction near Merritt with the Nicola, Kamloops, and Similkemeen Railway, B.C.

Construction of concrete and cribwork breakwater at Richibucto Cape, N.B.

Construction of concrete revetment wall and dredging at Owen Sound, Ont.

Construction of concrete and cribwork extension and dredging at Wiarton, Ont.

Construction of concrete and cribwork retaining wall at Hamilton, Ont.

Construction of cribwork extension at Pelee Island, Ont.

Construction of public building at Roberval, Que.

Construction of cribwork extension to the breakwater at Miminegash, P.E.I.

Construction of cribwork extension to wharf at Montmagny, Que.

Construction of crib and pile trestle work wharf at Shelburne, N.S.

Construction of a public building at Waterloo, Ont.

Construction of armoury building at Niagara Falls, Ont.

Construction of a wooden lighthouse tower at Gull Cove, Whitehead Island, N.B.

Construction of a wooden lighthouse tower on Quaco eastern breakwater pier, N.B.

Construction of wooden building for lightkeeper at Pointe des Monts, Que.

INDUSTRIAL ACCIDENTS DURING THE MONTH OF JUNE, 1910.

Under this heading, account is taken of such accidents only, as were sustained by workmen in the course of their employment, and resulted in loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the Department through the press of the country or correspondents of *The Labour Gazette*. The Department is also indebted to the Bureau of Mines of Ontario and British Columbia, to the office of the factories' inspector of the Province of Ontario, the Ontario Railway and Municipal Board, and to the Department of Railways and Canals, for their kind assistance in furnishing the Department with the statement of returns of accidents reported to them.

INDUSTRIAL accidents occurring to 415 individual work people in Canada during the month of June, 1910, were reported to the Department of Labour. Of these, 168 were fatal, and 247 resulted in serious injuries. In addition, one fatal accident was reported as having taken place prior to the beginning of the month, information not having been received by the Department before June, 1910.

In the preceding month there were 133 fatal, and 243 non-fatal accidents reported, a total of 376, and in June, 1909, there were 129 fatal, and 292 non-fatal accidents, a total of 421. The number of fatal accidents reported in June, 1910, was, therefore, thirty-nine more than in the preceding month, and six less than in June, 1909. The number of non-fatal accidents reported in June, 1910, was four more than in the preceding month, and forty-nine less than in June, 1909. Altogether, there were thirty-nine more industrial accidents in June, 1910, than in the preceding month, and six less than in the same month of the preceding year.

Of 311 returns received during the month giving the ages of the victims of industrial accidents, thirty-six referred to persons under twenty-one years of age, sixty-one to persons between twenty-one and forty-five, and eleven to persons over forty-five. Two hundred and three persons were over twenty-one years of age, but their exact ages were not specified.

The following is a record of the accidents of the month, by industries and trades:—

STATEMENT OF ACCIDENTS DURING JUNE, 1910, BY INDUSTRIES AND TRADES.

Trade or Industry.	Killed.	Injured.	Total.
Agriculture	30	28	58
Fishing and hunting	1	.....	1
Lumbering	11	10	21
Mining	21	15	36
Building trades	6	16	22
Metal trades	8	54	62
Woodworking trades	.....	9	9
Printing trades	32*	16*	48*
Clothing trades	.....	6	6
Textile trades	.....	1	1
Food and tobacco preparation	3	7	10
Railway service	23	19	42
Navigation	3	9	12
General transport	9	19	28
Public employés	3	6	9
Miscellaneous	5	12	17
Unskilled labour	13	20	33
Total	168	247	415

Nature of Fatalities and Accidents.

The chief disasters of the month, causing the death of more than one workman, were, the collapse of a water tank on the roof of the Montreal Herald Printing Company's building, which fatally injured thirty-two employés and seriously injured fifteen others; the killing of three members of a railway crew in a derailment at Port Coldwell, Ont.; a railway crossing fatality about ten miles from Aylmer, Ont., which caused the death of three persons; a mine explosion at Chignecto, N.S., in which two miners were killed; a mine disaster at Hosmer, B.C., in which two miners lost their lives, and a dynamite explosion near Nepigon, Ont., which killed two miners.

Destruction of Herald Building, Montreal. —Loss of thirty-two lives.

The most appalling disaster of its kind that has ever occurred in Canada took place on the morning of June 13, when a large water tank installed for fire protection purposes on the roof of the Montreal Herald Printing Company's building in Montreal, collapsed and plunged through the building to the ground. Fire, caused by the bursting of the gas mains which fed the linotype and stereotyping machines, immediately broke out, and the building became an almost total wreck. In the general destruction, thirty-two employés lost their lives, either through being crushed by falling material or in the fire which followed, and fifteen were seriously, though not fatally, injured. Of the survivors, many were rescued by the firemen, and numerous deeds of heroism were performed by employés in saving their fellow workmen. Printers, pressmen and bindery employés were included in the list of killed and injured. No such loss of life among workpeople has occurred in Canada through accident since the disaster at Extension, B.C., on October 5, 1909, by which an equal number of coal miners were killed by an explosion in No. 2 mine of the Wellington Collieries Company. An inquest to inquire into the causes of the catastrophe was opened on the morning of June 15. After several sessions, proceedings were adjourned for the obtaining of expert evidence. No verdict had been rendered up to the close of June.

* The thirty-two fatalities, and fifteen of the non-fatal accidents, included in these totals occurred in the destruction of the *Herald* building, Montreal, by the collapse of a water tank.

Disastrous Railway Wreck at Port Coldwell, Ont.

On June 10, three Canadian Pacific Railway trainmen, the engineer, fireman and brakemen, lost their lives, when a freight locomotive, No. 694, struck a boulder on the track at Port Coldwell, Ont., 155 miles east of Port Arthur. The train left the track and plunged into Lake Superior, carrying with it several feet of permanent way and telegraph lines. One of the trainmen jumped, but was killed; the other two went down with the engine, and were drowned.

Fatal Level Crossing Accident at Aylmer, Ont.

On June 19, a farmer, his wife and sister-in-law were driving home, when their vehicle was struck by the second section of Wabash Express, No. 1, at a level crossing, about 10 miles from Aylmer, Ont., and all were killed.

Mine Explosion at Chignecto, N.S.

On June 20, two miners, whose duty it was to see that the colliery of the Mari-

time Coal, Railway and Power Company, at Chignecto, N.S., was clear of gas, descended into the mine, and were both instantly killed by an explosion of gas.

Mining Disaster at Hosmer, B.C.

On Saturday, June 11, a fall of rock in number 3 chute, number 6 mine, at Hosmer, B.C., instantly killed two miners.

Dynamite Explosion near Nepigon, Ont.

On June 30, an explosion of dynamite instantly killed two railway construction hands, near Nepigon, Ont. The cause of this disaster is unknown.

Record by Trades and Industries.

Agriculture.—There were thirty fatal, and twenty-eight non-fatal accidents in June, 1910, compared with twenty killed, and twenty-nine injured in May last, and twenty-nine killed, and twenty-seven injured in June, 1909. Seven of the fatalities were caused by electricity, six by being run over, four by runaways, three respectively, by live stock and by falling material, two respectively, by blood poisoning, by falls, by drowning, and one by being burned to death. Of the non-fatal accidents, nine were caused by flying material, four by runaways, three each by falls, by being run over, and by live stock, two each by machinery and by falling material, and one each by tools and by burns.

Fishing and hunting.—A trapper died from exposure in June, 1910. There were two fatalities the month before, and two also in June, 1909.

Lumbering.—Eleven workmen were killed, and ten injured in June, 1910, compared with fourteen killed and fourteen injured in May, last, and twenty-three killed, and twenty-six injured in June, a year ago. Five of the deaths were due to drowning, three to falling material, and one each to being run over, to machinery and to flying material. Five of the other accidents were due to machinery, three to falls and one each to falling and to flying material.

Mining.—In this industry, twenty-one workers met death by accident, and fifteen were injured, compared with fifteen killed and eleven injured in the preceding month, and sixteen killed, and eighteen injured in June, 1909. Ten of the deaths were caused by falling material, five by explosions of dynamite, and two respectively, by electricity, by being run over and by explosions other than dynamite. Of the injuries, five were caused by falls, four by falling material, two by being caught between cars and one each by an explosion of dynamite, by flying material, by electricity and by being run over.

Building trades.—Six in this group were killed and sixteen injured in June, last, compared with three killed, and twenty injured in the previous month, and four killed, and thirty-nine injured in June, of last year. Five of the deaths were due to falls, and three to falling material.

Metal engineering and shipbuilding trades.—There were, during June, eight fatalities, and fifty-four injuries, compared with nine killed and thirty-two injured in May last, and six killed and thirty-nine injured, in June, 1909. Explosions of steam, and electricity and machinery caused each two of the fatalities, sunstroke and being run over one respectively. Of the non-fatal accidents, three were caused by machinery, fourteen by falling material, five each by molten metal and by flying material, three each by explosions of steam and by falls and one by being run over.

Woodworking trades.—Nine of these workers were injured by machinery and two by flying material, as against nineteen non-fatal accidents the month before, and one killed and twenty-eight injured in June, 1909.

Printing.—Machinery injured one workman. There was one injury the month previous, and one in June, 1909.

Clothing trades.—In June, 1910, six of these workers were injured, four by machinery and one each by electricity and by a fall. In May, two were injured, and in June, 1909, there were no accidents.

Textile trades.—Machinery injured one in this branch in June. The month preceding, the record was one killed and two injured, and in June of last year, two were injured.

DEPARTMENT OF LABOUR, CANADA,
STATISTICAL TABLE SERIES, F. No. 78.

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF JUNE, 1910.

Trade or Industry.	Locality.	Date.	No.	Cause of Fatality.
Agriculture—				
Farmer	Saskatoon, Sask	June 3	1	Died of lockjaw from gunshot wound.
"	Bow Island, Alta	" 10	1	Fell 50 feet in well.
"	Johnsville, Que	" 20	1	Struck by lightning.
"	St. Mary's, N.B	" 16	1	Tree fell on him.
"	Near Aylmer, Ont	" 19	1	Struck by train at crossing.
"	Windthorst, Sask	" 20	1	Struck by lightning.
"	Near Calgary, Alta	" 20	1	Struck by lightning.
"	Shelburne, Ont	" 19	1	In a runaway.
"	Upper Hampstead, N.B	" 18	1	Gored by a bull.
"	Whitby, Ont	" 20	1	In a runaway.
"	High River, Alta	" 21	1	Struck by lightning.
"	Harrietsville, Ont	" 21	1	Beam fell on him.
"	Fenelon Township, Ont	" 1	1	Blood poisoning from cut.
"	Potton, Que	" 25	1	Fell from vehicle.
"	Near Moose Jaw, Sask	" 27	1	In a cyclone.

FATAL ACCIDENTS HAPPENING IN THE PREVIOUS MONTH, BUT ONLY REPORTED TO THE DEPARTMENT IN JUNE, 1910.

Miner	Greenwood, B.C	May 28	1	By fall of rock.

Food and tobacco preparation.—During June, three in this group were killed and seven injured, compared with four injured in the month before, and one killed and nine injured in June, 1909. The three deaths were due respectively to live stock, to being run over and to machinery. Three of the injuries were due to machinery, two to explosions, one to tools and one to falling material.

Railway service.—Twenty-three railway employés were killed and nineteen injured, compared with twenty-five killed and thirty-nine injured in May last, and twenty-three killed and twenty-six injured in June, 1909. Twelve of the fatalities were caused by being run over, four by derailment, three by being caught between cars, two by explosions of dynamite, and one each by falls and by drowning. Of the fatal accidents, five were caused by falls, four by derailments, three by being run over, two each by explosions of steam, by collisions, by being caught between cars, and one by machinery.

Navigation.—Falling material, a fall and drowning were each the cause of one accidental death in this branch. Falling material and falls caused serious injury to three workmen each, machinery injured two, and being struck by a train one. In May last, there were eleven killed and thirteen injured, and in June, 1909, five killed and thirty-two injured.

General transport.—Death through accident befell nine workers during June, 1910, and nineteen others were injured compared with three killed and eighteen injured in the previous month, and seven killed and nineteen injured in June, of last year. Four of the fatalities were due

to falls, two to falling material, and one each to electricity, to live stock and to sunstroke. Of the injuries, seven were due to falls, five to collisions, two each to live stock and to railways, and one each to being crushed, to falling material and to a runaway.

Public employés.—A fall, drowning and falling material each caused a death, while falling material injured four workmen and falls two, In May, the record was six killed and nineteen injured, and in June, a year ago, two killed and eight injured.

Miscellaneous.—In June, 1910, five workers were killed and twelve injured, compared with ten killed and ten injured in May last, and six killed and fourteen injured in June, 1909. One each of the fatalities were caused by machinery, by blood-poisoning, by an elevator, by being run over and by a fall. Three of the non-fatal accidents were caused by falls, two each by explosions, by collisions and by tools, and one each by being crushed, by machinery and by falling material.

Unskilled labour.—Thirteen labourers were killed and twenty injured in June last, as against nine killed and nine injured in the preceding month, and four killed and four injured in June, 1909. Four each of the deaths were due to being run over and to falling material, three to drowning, and one each to a fall and to machinery. Of the other accidents, eleven were due to falling material, three to falls, two to being run over, and one each to being crushed, to machinery, to a collision and to flying material.

MASSACHUSETTS COMMISSION ON THE COST OF LIVING—SUMMARY OF FINDINGS.

DURING the month of March, 1910, a special Commission of five was appointed by the Commonwealth of Massachusetts to report on the cost of living, with recommendations as to means of meeting the advance in the same. The final report of the Commission has not yet appeared. The following summary of findings and recommendations, however, has been issued as an interim statement:—

Findings of the Commission.

The findings of the Commission with regard to the causes of the recent advance of prices are as follows:

1. The primary cause of the world-wide advance of prices since 1897, has been the increase of the gold supply, which has reduced the purchasing power of money and brought about a corresponding increase of values measured in money in all the leading commercial states, and at least in the United States has served as the basis for a vast extension of credit.

2. The advance of prices in the United States has been accelerated greatly, by the enormous waste of income, through uneconomic expenditure for war and national armament, and through multiple forms of extravagance, both public and private, and of wastage, both individual and social. The increasing burden of disease, accident, crime and pauperism imposed upon society, and the loss through expenditure on a rising scale for luxuries, and through wasteful domestic methods, are potent factors contributing to the advance of the cost of living.

3. The advance of prices has been further promoted by a complexity of causes operating on the side of supply to reduce the volume and increase the expenses of production, and on the side of demand to extend and diversify the consumption of commodities. The main factors in restricting supply and enhancing the cost of commodities have been the drain of population from the land, which has decreased the proportion of persons engaged in producing the food supply; the exhaustion of natural resources, which has resulted in increased expenses of production and distribution, especially the latter. The chief influences on the side of demand, which have worked parallel to the forces affecting supply, have been the growing concentration of popu

lation in great cities, which has increased the proportion of non-producing food consumers; the general advance of the standard of living, which has enlarged the requirements on the part of individual consumers of all classes; and the national habit of extravagnace, which has further extended and diversified to an abnormal degree the demand for comforts and luxuries created by that advance.

4. With regard to the tariff, the trusts, and the unions, which have been declared to be either primary or contributory causes of the increase of the cost of living, the Commission finds that none of these factors can be regarded as a direct and active cause of the recent general advance of prices.

A. With regard to the tariff, the facts that prices have fallen and risen during long periods without relation to changes in duties; that prices have been rising in Great Britain, under free trade; and that large increases have taken place in the prices of commodities not appreciably affected by the tariff show conclusively that the tariff has not been the active factor in the recent upward movement of prices in this country. On the other hand, however, it is clear that in a period of rising prices like the present the tariff cuts off possible relief to consumers by closing access to the cheapest sources of food supply in the world's markets. In the past the duties on the necessities of common consumption, foodstuffs, have been largely inoperative, because the country produced not only its own food supply, but a large surplus for exportation. The United States appears, however, to be approaching rapidly the turning point when it will become, instead of a food-exporting, a food-importing country. Under these conditions, as the duties on food stuffs become actually operative, their effect must be to increase the cost of living to wage-earners and the expenses of production to manufacturers, thus hampering the development of industry and defeating the very purpose of the protective policy. The Commission is therefore of the opinion that when the tariff shall further be revised, the expediency of removing all duties on food products be considered carefully by the national congress, and it hopes that the Tariff Commission will be equipped with such funds and powers as may be necessary for researches adequate as a basis for future changes, to be founded on commercial rather than political considerations.

B. With reference to trusts, the facts that the prices of trust-controlled commodities have not risen conspicuously; that prices have advanced in other countries in which trusts have not developed on the American scale; and that the higher prices of food products, including meat, are accounted for by natural causes, and are not to be attributed to combination in any considerable degree, indicate that the trusts cannot be held responsible for the late great advance of prices. On the other hand, however, combination undoubtedly enables a group of producers to take advantage of any conditions that may tend to advance prices, to maintain a high price level once established, and to prevent the public from sharing in gains through improvements and economies. Under existing conditions constant vigilance with reference to the action of combinations, especially those dealing with the necessities of life, is doubly incumbent on all officials entrusted with the enforcement of laws against monopoly and combined regulation of prices.

C. Concerning the labour unions, the facts that less than ten per cent. of the workers of the country are organized, that the workers engaged in the production of the commodities that have risen most notably in price, especially food stuffs, are hardly organized at all, and that wages have risen in less degree and at slower pace than the prices of commodities, the wage advance beginning some time after the price advance, prove that the recent general increase of prices cannot be attributed to the influence of trade unions. Concerning the deeper questions of the general influence of reduction of hours, increase of wages and trade union policies upon expense of production, prices, and cost of living, the Commission expresses no opinion, on account of the impossibility

of determining the exact fact required for an impartial answer to this question within the time allowed for its investigation.

Summary of Recommendations.

The Commission submits for the consideration of the General Court the following suggestions concerning remedies for some of the influences that have contributed to the advance of the cost of living:—

1. The creation of a Commission of Commerce, before which citizens may lay complaints of injustice in the distribution of staple articles of consumption through combination in restraint of trade.

2. The creation of a Commission on market improvements in which the City Government of Boston, the commercial boards and the marketmen of the city and the Commonwealth shall be jointly represented, the subject of municipal slaughter houses to be included within the scope of its inquiry.

3. The transformation of the Cattle Bureau into a Bureau of Animal Industry, with powers adequate for the purpose of protecting effectively the health of the people, and of encouraging the home supply of meat products.

4. The extension of the services of the state free employment office of the Bureau of Statistics, to provide for the better distribution of immigrants through out the Commonwealth, especially in the farming regions.

5. The enactment of a law requiring that packages containing food products shall bear a label stating distinctly the amount of the net contents in units of weight, measure or numerical count.

6. The enactment of a law empowering and requiring local boards of health to make regular inspection of cold storage plants within their jurisdiction.

7. The modification of the present laws relating to the joint use of tracks in such ways as shall permit the development of a trolley freight service throughout the State.

8. The passage of a resolve instructing the State Commissioner of Weights and Measures to report to the next General Court what, if any, legislation is then necessary for the protection of the public against abuses connected with the sale of coal at retail in this state.

9. The passage of a resolve providing for a thorough investigation by the Director of the Bureau of Statistics into the present methods of collecting, tabulating and presenting statistical matter in the various departments of the state Government, with a view to systematizing and co-ordinating the entire statistical service of the Commonwealth in such ways as shall render the published information more intelligible and more serviceable in promoting the improvement of the public health, and the advancement of the industrial and commercial interests of the Commonwealth.

RETAIL PRICES OF STAPLE ARTICLES OF

The accompanying table sets forth the retail prices prevailing on, or about, the fifteenth day of the month preliving in the leading centres of industry throughout Canada.

The list of commodities includes twenty-eight varieties of food, with fuel and coal oil. In addition a statement usually occupied by workingmen.

The exact quality for which the quotation is given is set forth in the case of each commodity, and every care statistics may be available for purposes of comparison.

The list of localities includes nearly every place having a population of 10,000 people, and is representative of

The quotations contained in the table have been furnished by the correspondents of *The Labour Gazette* in the the Department.

TRADE DISPUTES DURING THE MONTH OF JUNE, 1910.

THERE were fewer trade disputes in Canada during June, than in the previous month, but building operations were seriously hampered by them, principally in Montreal, Toronto, Port Arthur and Fort William. Little change took place with regard to the situation at Springhill, N.S., where a strike of coal miners had been in existence since last August. The mines continued to be only in partial operation.

Number and magnitude.—The total number of trade disputes reported to have been in existence in Canada during June was eighteen, two less than in the previous month and two more than in June, 1909. About 394 firms and 5,729 employés were affected by those disputes, about 318 firms and 3,842 employés being affected by new disputes.

Loss of time in working days.—The loss of time to employés through trade disputes during June, was approximately 75,700 working days, compared with a loss of about 71,830 days in May, and about 86,900 days in June, 1909.

Trades affected by new disputes.—The following table shows the trades affected by new disputes of the month, and the approximate number of employés involved in each group of trades.

Trades.	No. of disputes.	No. of employés.
Building trades	6	2,955
Metal trades	2	776
Food and tobacco preparation	1	75
Unskilled labour	1	36
Total	10	3,842

Localities affected by new disputes.—The new disputes of the month occurred in the following Provinces of the Dominion.

Province.	No. of disputes.
Quebec	3
Ontario	6
British Columbia	1
Total	10

Causes of disputes.—The following were the causes of the new disputes of the month.

Cause.	No. of disputes.
For increase in wages	5
For increase in wages and recognition of union	1
Against employment of a particular person	1
For increase in wages and shorter hours	2
For change in time of payment	1
Total	10

Methods of settlement.—Of the eighteen disputes in existence during June, nine were terminated in the course of the month. One dispute was settled by arbitration, one by conciliation, and five by negotiations between the parties concerned.

Results of disputes.—Of the disputes that were terminated three ended in favour of the employers, four in favour of the employés, and in one other the employés were for the most part successful. In the remaining dispute a compromise was reached.

Disputes which Commenced Prior to the Beginning of the Month.

The trade disputes in existence during June, which began in previous months comprised strikes of coal miners at Springhill, N.S., building trades at Regina, Sask., carpenters at Kingston, Ont., cigarmakers at London, Ont., cotton mill hands at Hamilton, Ont., iron moulders at Peterborough, Ont., sheet metal workers at Vancouver, B. C., and carpet weavers at Guelph, Ont.

Strike of Coal Miners at Springhill, N.S.

A strike of coal miners at Springhill, N.S., which began on August 10, 1909, still continued unsettled throughout June, but it was reported that the Company had secured over 400 men to take the places of the strikers, and the mines were in partial operation. The cause of the dispute was the refusal of

the Cumberland Railway & Coal Company to grant a demand for recognition of the United Mine Workers of America, an increase in wages, and certain changes in the conditions of employment.

Strike of Building Trades at Regina, Sask.

A general strike in the building trades which began at Regina, Sask., on May 2, was terminated on June 14, when an agreement was signed to remain in force until December 30, 1911. The settlement was brought about through the friendly mediation of the Department of Labour under the Conciliation Act. The dispute, which involved about forty firms and 282 employés, arose from failure to reach an agreement with regard to wages and hours of labour. The new agreement, which was in the nature of a compromise, provided for the following rates of hours and wages.

Hours of labour:—

Carpenters, ten hours per day except Saturday which shall be nine.

Factory hands, ten hours per day.

Plasterers, nine hours. No overtime until after 6 p.m.

Electrical workers, nine hours to be worked between 7 a.m. and 6 p.m.; overtime to be paid only after 6 p.m.

Plumbers and steamfitters: same as electrical workers.

Painters and paperhangers; ten hours per day, with Saturday optional.

Bricklayers, stonemasons and stone cutters: nine hours per day.

Wages—	Per hour.
Carpenters	$.40-$.45
Factory hands	.30- .40
Plasterers	.60
Electrical workers—	
Journeymen	.35- .40
Helpers	.20- .25
Plumbers and steamfitters—	
Journeymen	.50- .55
Improvers	.30- .45
Painters	.30- .35
Bricklayers, stone masons, stone cutters	.60
Handy men	.25- .30
Labourers	.20- .25

Overtime at the rate of time and one-half for all trades.

Strike of Carpenters at Kingston, Ont.

A strike of carpenters at Kingston, Ont., which began on May 2, and originally involved about sixteen firms and seventy employés, was terminated on June 14, by the acceptance of the decision of a Board of Arbitrators, appointed by the President of the Kingston Board of Trade, upon the request of both parties. The question in dispute was whether the wages should remain at 31¼ cents per hour, or be increased to 37½ cents per hour for an eight-hour day. The decision of the arbitrators was that the rate of 37½ cents per hour should be maintained.

Strike of Cigar Makers at London, Ont.

A strike of cigar makers which took place at London, Ont., on May 16, on account of the refusal of five firms to grant a demand for an increase of $1.00 per 1,000 cigars, was terminated on June 11, when the desired increase was granted. It was reported that 208 employés were involved in the dispute, of whom thirty-four were female employés.

Strike of Cotton Mill Hands at Hamilton, Ont.

No settlement was reported in the case of a strike of cotton mill hands at Hamilton, Ont., which began on May 5, on account of the refusal of the employers to grant a demand for an increase of ten per cent. in wages. About 125 male and 150 female employés were reported to have been directly affected by this dispute.

Strike of Plumbers at Halifax, N.S.

A strike of thirty-eight plumbers which took place at Halifax, N.S. on May 2, on account of the refusal of fourteen firms to grant a demand for an increase in wages, was reported to have been settled on May 12, the employers agreeing to pay 30 cents per hour, an advance of twenty per cent.

Strike of Iron Moulders at Peterborough, Ont.

On May 24, a strike of iron moulders took place at Peterborough, Ont., which affected three firms and about thirty-nine employés. The cause of the dispute was the refusal of the employers to grant

[1] A fuller account of this dispute appears on another page of the present issue.

DEPARTMENT OF LABOUR, CANADA,
STATISTICAL TABLE, SERIES C, No. 117.

TABLE OF TRADE DISPUTES DURING THE MONTH OF JUNE, 1910.

Cotton mill hands	Hamilton, Ont	Demand for 10 per cent. increase in wages	1	.....	125	150	.....	.....	May 5	.....	No settlement reported at end of month.
Food and tobacco preparation—											
Cigar makers	London, Ont	For increase of $1, per 1,000 cigars	5	.....	208	.....	.....	.....	May 16	June 12	Increase in wages granted.

DISPUTES WHICH BEGAN DURING THE MONTH.

Building trades—													
Carpenters	Port Arthur and Fort William, Ont	For increase in minimum wage from 35 to 40 cents per hour			500				June	7	June	23	Conditions ceased to be effected, most of the employers having conceded demands of men.
Lathers	Toronto, Ont	For increase in maximum wage from $3.10 to $3.50 for an 8-hour day	10		120				"	1	"	6	Agreement signed, metal men to get $3.50 per day, woodmen $3.50, $3 and $2.50 per day.
Plasterers	Victoria, B.C	For increase in wages	1		40								
Stonemasons	Montreal, Que	For increase in wages and recognition of union			575				"				No settlement reported at end of month.
Bricklayers	Montreal, Que	Against employment of a foreman	1		45		175		"	20			No settlement reported at end of month.
Builders' labourers	Toronto, Ont	For increase in wages from 25 to 28 cents an hour, a 9-hour day, and time and one half for overtime	300		1,500				"	1			No settlement reported at end of month, but many strikers obtained work on terms demanded.
Metal trades—													
Iron moulders	Montreal, Que	Employés wanted earlier pay-day	1		750				"	3	June	4	Settled amicably, men to be paid every second Saturday.
Iron moulders	Ottawa, Ont	For increase of minimum wage from $2.50 to $2.75 per day	2		26				"	1	"	7	Employers ceased to be affected, places of most strikers having been filled.
Food and tobacco preparation—													
Brewery workers	Hamilton, Ont	For increase in wages of $1.50 per week, extra pay for overtime and shorter hours	4		75				June	30			No settlement reported at end of month.
Unskilled labour—													
Labourers	Port Arthur, Ont	For increase in wages from 20 to 22½ cents per hour	1		36				"	15	June	21	About half the strikers returned to work at old rate, and employers ceased to be affected.

*Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where after the declaration of a strike, some of the original strikers have returned to work or had their places filled with new hands, or where establishments affected have found that for either of these reasons, or both, or for the other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table therefore, includes mention only of such disputes as during the month or at its termination affected, to an appreciable degree, the carrying on of the industrial or business operations of the firm or establishments concerned. Mention moreover, is not made of disputes involving less than six employés, or of less duration than twenty-four hours.

a minimum wage of $2.75 per day. On June 14, work was resumed, one shop, according to the iron moulders' union, having agreed to pay $2.75 minimum wages, while the other two paid a minimum of $2.70 per day. All the men, however, employed at the time of the strike in one of these shops received $2.75 per day, and three men employed in the other received $2.85.

Strike of Carpet Weavers at Guelph, Ont.

No settlement of a strike of carpet weavers which took place at Guelph, Ont., on December 11, was reported during the month. The cause of this dispute, which originally involved twenty-eight men directly, and twelve indirectly, was a demand for extra pay for overtime and general dissatisfaction with the conditions of employment. A number of the strikers had sought work elsewhere in the course of the dispute, and some of their places had been filled.

New Disputes.

The new disputes of the month comprised strikes of carpenters at Port Arthur and Fort Williams, Ont., builders' labourers and lathers at Toronto, Ont., stonemasons and bricklayers at Montreal, Que., brewery workers at Hamilton, Ont., iron moulders at Montreal, Que., and at Ottawa, Ont., and labourers at Port Arthur, Ont.

Strike of Carpenters at Port Arthur and Fort William.

On June 7, a general strike of carpenters took place at Port Arthur and Fort William, Ont., in which about 500 men were reported to be involved. The object of the dispute was to obtain an increase in the minimum wage from 35 to 40 cents per hour. During the progress of the dispute many of the contractors agreed to the terms of the carpenters' union, and in about a fortnight industrial conditions ceased to be greatly affected by the dispute.

Strike of Bricklayers at Montreal, Que.

On June 20, a strike of bricklayers took place at Montreal, Que. According to a report received from the Bricklayers' Union, the dispute arose on account of dissatisfaction with a foreman, who was alleged to have been unfriendly to the Union. One firm and forty-five men were said to be directly involved in this dispute, and six or eight firms and 175 employés were indirectly involved. It was stated by the employers that the men had worked under this foreman for about three years without complaining, and that after they had gone out they claimed that he must become a member of the Union. The number of men directly affected was given by the employers as thirty. No settlement of the dispute was reported during the month.

Strike of Brewery Workers at Hamilton, Ont.

On June 30, a strike of brewery workers took place at Hamilton, Ont., affecting two firms and seventy-five employés. The cause of the dispute was the refusal of the employers to sign a new agreement in place of one which expired on May 1. The new schedule called for an increase in wages of $1.50 per week, pay for overtime, and shorter hours. The old hours ranged from ten to fourteen per day, and it was claimed that some employés were required to work seven days in the week. The new rate demanded was fifty-five hours per week in the summer, fifty hours in the winter, and overtime to count as time and one-half. No settlement of this dispute was reported during the month.

Strike of Iron Moulders at Montreal, Que.

On June 3, about 750 iron moulders stopped work at Montreal, Que., owing to dissatisfaction with the date fixed for pay-day, as they claimed it involved a long wait for their wages. A friendly settlement was quickly reached, by which the men were to be paid every second Saturday, and work was resumed, the strike only lasting one day.

Strike of Iron Moulders at Ottawa, Ont.

On June 1, a strike of iron moulders engaged in the manufacture of stoves

took place at Ottawa, Ont., involving two firms and twenty-six employés. The cause of the dispute was the refusal of the employers to grant a demand for an increase in the minimum wage from $2.50 to $2.75 per day. On June 7, it was reported that while the strike was still in progress, the firms were no longer affected. The employers refused to recognize the union and would only grant increases on the basis of individual merit.

Strike of Labourers at Port Arthur, Ont.

On June 15, about thirty-six labourers employed on the construction of a dry-dock at Port Arthur, Ont., were reported to have stopped work, owing to the refusal of the employers to grant a demand for an increase in wages from 20 cents to 22½ per hour cents. On June 16, five of the strikers were reported by the employers to have resumed work at the old rate. Eight more returned on June 18, and three on June 21. While there was no definite termination of the strike, the employers ceased to be affected by it.

The table which is published herewith it a compilation of the trade disputes of the Dominion of Canada, which began or were in continuance during the month of June, and which have been reported to the Department.

Strike of Builders' Labourers at Toronto, Ont.

On June 1, a strike of builders' labourers was declared at Toronto, Ont., in which about 300 firms and 1,500 employés were involved. The cause of the dispute was the refusal of the employers to sign the following agreement:

1. I agree to pay all builders' labourers employed by me not less than 28 cents per hour.

2. All time worked over nine hours per day to be paid at the rate of time and one-half.

3. If working with mechanics more than eight hours per day and after 12 o'clock on Saturday, the rate shall be time and one-half.

4. This agreement to take effect from the first day of June, 1910, until the first day of June, 1911.

No settlement of this dispute was reported during the month, but many of the strikers procured work on the terms demanded.

REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus were received at the Department of Labour during June, 1910.

DOMINION REPORT.

Mercantile Marine of Canada.

List of shipping issued by Department of Marine and Fisheries, being a list of vessels on the registry books of the Dominion of Canada, on December 31, 1909. Ottawa: King's Printer, 1910. Page 442. Price, 25 cents.

THE Report of the Department of Marine and Fisheries on shipping shows that the total number of vessels on the register books of the Dominion, on December 31, 1909, was 7,768, measuring 718,533 tons, an increase of 166 vessels, and 16,229 tons, as compared with 1908. The number of steamships on the register books on the same date was 3,229, with a gross tonnage of 513,962. Assuming the average value to be $30 per ton, the value of the net registered tonnage of Canada on December 31, 1909, would be $21,556,590. The number of new vessels built and registered in Canada last year was 327, measuring 25,306 tons net register. Estimating the value of the new tonnage at $45 per ton, the new vessels had a total value of $1,138,770. During the year, 246 vessels were removed from the register books. It is estimated that 36,430 men and boys, including the Masters, were employed on ships registered in Canada during the year 1909. A comparison with the other maritime states of the world, in respect to tonnage, shows that in shipping Canada retains her place as tenth.

ONTARIO REPORT.

Child-Protection Work.

Seventeenth report on Neglected and Dependent Children of Ontario. Toronto: King's Printer, 1910. Page, 137.

The seventeenth report on Neglected and Dependent Children of Ontario, for the year 1909, gives an account of the work carried on by the Children's Aid Societies, the Industrial Schools, and the Societies interested in juvenile immigration. The work of the Children's Aid Societies consists in improving the conditions of home which are unfavourable to the children, placing the children in better surroundings, where the home conditions could not be improved, and seeking to make good citizens out of children who were in danger of becoming criminals, owing to a bad environment. During the past few years, the average number of children placed out was 350, but in 1909 the total number was 605. It is estimated that ninety-eight per cent. of the children placed in foster homes turn out well, while a very large proportion of these would have been lost to the community if they had not been taken away.

It is pointed out that a large amount of disease, misery and crime is due to the slums in the large cities, and the following suggestions are made for their abolition. Rear houses and those built on the notorious alleys and lanes of the city should be pulled down. There should be a by-law that every dwelling must front on a 40 or 60-foot street, and that only one dwelling should be erected to each 20 by 100-foot lot. A philanthropic or municipal association should be formed to help workingmen to build and own their own homes, by advancing money at low interest. The poorer districts should be kept clean by the prompt removal of garbage and rubbish, the banishment of rag, bottle and junk yards, and the introduction of modern plumbing. A municipal lodging house should be erected for labourers and transients, and a municipal poor farm should be established in the suburbs for the care of the dependent and the training of inefficients.

BRITISH REPORTS.

Trade Statistics.

Annual statement of the Trade of the United Kingdom with foreign countries and British Possessions, 1909, compared with the four preceding years. Volume I, London: Wyman & Sons, 1910. Page, 652. Price, 5s., 2d.

The report on the Trade of the United Kingdom during the past five years shows that the value of imports from foreign countries increased from £438,368,020 in 1909, to £479,453,018, while in the same period the imports from British Possessions increased from £126,651,897 to £145,251,930. In the five-year period, the highest point was reached in 1907, and the lowest, in 1908. The exports to foreign countries increased from £215,599-171 in 1905, to £250,942,263 in 1909, and the exports to British Possessions from £114,217,443 to £127,238,084.

AUSTRALIAN REPORTS.

Statistics of Transport and Communication.

Commonwealth, Bureau of Census and Statistics. Summary of Commonwealth Statistics of Transport and Communication for the years 1901 to 1909. Melbourne: Government Printer, 1910. Page, 39.

The third bulletin dealing with statistics of transport and communication, issued by the Commonwealth Bureau of Census and Statistics of Australia, contains particulars relating to Government and private railways, tramways, shipping, and posts, telegraphs and telephones, for the years from 1901 to 1909. In that period, the Government railway mileage has increased from 12,579 to 15,073, and the revenue from these railways, from £11,038,468 to £14,750,207. The working expenses have increased from £7,149 060 to £8,826,325, and the net earnings, from £3,889,408 to £5,923,882. After paying working expenses and interest on loans, there was a net profit of £821,633 in 1909. The private railways in Australia, in 1908, had a mileage of 943, with a gross revenue of £560,907.

The oversea vessels entered at Commonwealth ports, numbered 2,022 in 1908, with a tonnage of 4,295,679. There were 2,719 vessels on the registers of the

several States of the Commonwealth, with a tonnage of 384,641.

Industrial Conditions of New South Wales.

Fourth annual report of the Director of Labour, State Labour Bureau of New South Wales, for the year ended June 30, 1909. Page, 55. Price, 2s., 6d.

In the annual report of the Director of Labour of New South Wales, for the year ended June 30, 1909, it is stated that the year was only fair from an industrial standpoint, droughty conditions having prevailed over most of the state for fully six months. There were fewer strikes than in the previous year, and the opinion was gaining ground in industrial circles that greater benefits were likely to accrue from the operation of the Industrial Disputes Act than from strikes. Many applications were received from trade unions for the appointment of wage boards under the Act.

There were 3,409 registrations of unemployed persons during the year, of whom 3,320 were sent to work. Out of 1,756 registered men who were notified of work awaiting them, no reply was received from 944, and work was refused by 155. The sum of £1,565, 18s., 7d. was advanced to the unemployed for the cost of railway and steamer tickets, of which £1,491, 8s., 8d. was refunded. Relief orders for food were issued to fourteen families, comprising 184 persons, at a cost of £165, 4s., 1d. In ninety-nine per cent. of the cases, labour was exacted in return for aid. A successful experiment has been tried during the last three years, in providing farm training for city youths. Out of 336 lads who had been sent to the Government farm in that period, only thirty-five proved unsuitable or unwilling to do the work.

OTHER REPORTS RECEIVED.

Canada.—Report of the first annual meeting of the Commission of Conservation of Canada, held at Ottawa, January 18 to 21, 1910.[1]

Ontario.—Annual report of the Dairymen's Associations, for 1909.

Annual report of the Bee-Keepers' Association, 1909.

Feeble-minded in Ontario: Fourth report for the year 1909.

Fourth annual report of the Ontario Railway and Municipal Board, to December 31, 1909.

Great Britain.—Report of the Royal Commission on Systems of Election.

Report of the Royal Commission on the Poor Laws and Relief of Distress. Appendix, Volumes VIII, VIIIa, XIXa, XXIII.

Australia. — Summary of Commonwealth Production Statistics, for the year 1901 to 1908.

Trade, Shipping, Oversea Migration and Finance, for January and February, 1910.

Vital Statistics of the Commonwealth, for the quarter ended December 31, 1909.

New Zealand.—Awards, Recommendations, Agreements, &c., made under Conciliation and Arbitration Act. Volume X, 1909.

United States.—Connecticut Bureau of Labour Statistics. Labour Laws of Connecticut, 1909.

Belgium.—Rapport sur la Réparation des Dommages résultant des Accidents du Travail, 1905-1908.

Rapports annuels de L'Inspection du Travail, 1908

Finland.—Statistisk Arsbok, 1909.

Undersokning af Kontors-och Handelsbitradenas.

Arbetstatisk. Utgiften af Industrylsen.

Industri-Statistik. 1907-1908.

France.—Conseil Superieur du Travail. Compte Rendu. Novembre, 1909

[1] An account of this meeting is given in the issue of *The Labour Gazette* for February, 1910, on page 912.

INDUSTRIAL ACCIDENTS AND WORKMEN'S COMPENSATION.

Statistics of Compensation and of Proceedings under the Workmen's Compensation Act, 1906, and the Employers' Liability Act, 1880, during the year 1908. London: Wyman & Sons, 1909. Page, 71. Price, 7d.

THE Report on Workmen's Compensation for 1908, issued by the Home Office of the United Kingdom, contains statistics for the first complete year during which the Act of 1906 was in operation. By this Act the field of compensation was widened by including all

occupations with but few exceptions, reducing the period of disablement from a fortnight to one week, and extending compensation to injuries caused by certain industrial diseases. Employers are required to furnish particulars as to (a) the number of fatal cases in which compensation was paid during the year, and the amount, distinguishing cases where persons wholly dependent, cases where persons partly dependent, and cases where no dependents were left; (b) the number of disablement cases in which compensation was paid during the year and the amount, distinguishing cases continued from previous years and cases in which the first payment was made during the year; (c) the duration of the compensation in disablement cases; (d) the settlement of disablement cases by lump sum payments. Collective returns were supplied by mutual indemnity societies, insurance companies and employers' associations, which accounted for sixty-nine per cent. of the total cases reported, and 71.10 cent. of the compensation. There were received 34,659 returns from individual employers, of which 31,416 reported no cases of compensation under the Act. The gross total of compensation paid under the Act, according to the returns, was £2,080,672, representing 3,473 cases of death, and 325,484 cases of disableement. It is estimated that about seven and a half million persons were employed in the industries included in these returns.

Injurious Processes in Lead Smelting.

Special report on dangerous or injurious processes in the smelting of materials containing lead, and in the manufacture of red and orange lead, and flaked litharage. By Edgar L. Collis, M.B. London: Wyman & Sons, 1910. Page, 29. Price, 6d.

A report has been issued by the Factory Department of the Home Office of Great Britain on the industries relating to the smelting lead ores and the production of red and orange lead and of flaked litharge, with a view to ascertaining the regulations required to render them safer. It is stated that there has recently been an increase in the number of reported cases of plumbism, there having been seventy cases in 1908, and sixty-six in 1909, compared with an average of thirty-four and four-tenths in the eight years prior to 1908. It is roughly estimated that over three per cent. of those engaged in lead smelting are attacked by plumbism each year, and the rate in spelter production is over one per cent. per year. In the potteries, the attack rate among all those exposed to lead contamination is about one and five-tenths per year. In certain factories specially unfavourable conditions caused an excessive prevalence of the disease.

A number of recommendations are made for the better protection of employés against the danger of lead poisoning. These provide that where a lead process is carried on, so as to give rise to dust or fumes, the floor shall be kept damp, and no material, unless damp shall remain on the floor, or moved to a furnace except mechanically. No furnace, melting pot, retort, condensing chamber or flue shall be taken to pieces or reconstructed until it is made damp. An efficient draught is required for certain processes. In cleaning flues and condensing chambers which are not damp clean respirators and overall suits must be worn. No person under sixteen years of age, and no female, shall be employed. Every employé shall be examined by the surgeon once a month, and a health register shall be kept in a form approved by the Chief Inspector of Factories. No food, tobacco or drink (other than a non-alcoholic drink approved by the surgeon) shall be brought into any place where lead process is carried on. Suitable washing facilities, and cloak-rooms and meal-rooms free from exposure to dust must be provided.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopses of recent cases affecting labour are based upon the latest reports of legal proceedings and other legal records of the different Provinces of Canada.

NEW BRUNSWICK CASES.

Employés of Canadian Pacific Railway Fined.

THE examination of a fireman of the Canadian Pacific Railway, charged by the trainmaster, with being intoxicated while on duty on a special train from Perth to Woodstock, took place before Magistrate Dibblee recently, and upon being arraigned for trial the fireman pleaded guilty to drinking liquor on certain days. An engineer, also pleaded guilty to the same charge and was out on $600 bail. Each of the men was sentenced to a fine of $50 and costs or three months in jail, the magistrate saying that the conduct of the Canadian Pacific Railway employés in this section had been exceptionally good during the thirty years that he had presided over this court. No similar case had ever been before it. This being the first case and though realizing the enormity of the offence, still he would make the sentence light and give warning that after this date the maximum punishment would be inflicted on violations of this part of the code.

QUEBEC CASES.

An Alien Labour Law Case.

The case of The King vs. Abraham Sommer, an action taken under the Alien Labour Law, the charge being that Mr. Sommer had made contracts to bring over from the United States one Max Sofranski, in defiance of the provisions of the Act, has been dismissed by Judge Leet.

Before the action is taken the consent of a judge of the Superior Court must be secured. Judge Lafontaine granted this, but the complaint did not set forth sufficient details, and the document from the Superior Court did not mention the name of Sofranski.

In commenting upon this Judge Leet said, it may be urged that this is only a clerical and evident error in drafting the judgement, but in my opinion that is fatal. The case was then dismissed.

Employés vs Grand Trunk Railway.

A very important case involving points of Provincial legal jurisdiction was recently before Judge Archibald and a special jury at Montreal. It was a case of a railway labourer, who was employed by the Grand Trunk in Quebec Province and then sent to Ontario, where he became involved in a collision between Grand Trunk and Canadian Northern trains, and suffered injuries for which he claims $10,000 from the two companies. It was claimed by the railways that the law of Ontario, where the accident happened, applies, in which case the plaintiff would be non-suited by the principle of common employment, exempting the company in case of negligence by a co-employé. The plaintiffs' counsel claim that the law of Quebec, where the contract was entered into, should govern, in which case the provisions of the civil code would give him the right of action. This is the first time that this question has ever been tested and many of the leading lawyers of the city were engaged on it, as it means much for the railways. Oddly enough, the question being one of foreign law is considered one of fact, and must be decided by the jury, not by the judge.

$7.500 for Loss of Arm.

A mixed jury, presided over by Mr. Justice Archibald, awarded a verdict of $7,500 to Mr. Alphonse Marleau, who had entered a joint action for $25,000 against the Grand Trunk, Railway Company and the Canadian Northern Railway Company.

The plaintiff had one of his arms torn off in a collision that occurred between two locomotives on the Grand Trunk

line, near Hawkesbury, Ont. He was working on a snow plow and had received instructions that the line was clear and to go ahead. At about 1,500 feet from the station at Hawkesbury, the locomotive pulling the snow plow collided with another locomotive of the Canadian Northern Railway, Mr. Marleau claimed that the Grand Trunk was responsible for the accident, as he had been instructed that the track was clear, and he also claimed that the Canadian Northern was also responsible for its failure to act in conformity of the Railway Act, which stipulates that in such cases a watchman should be left at the junction of two roads. It was stated after the verdict that the case be appealed.

Montreal Sunday By-law.—Judicial Disagreements.

Two judges in the same court have rendered judgements, one upholding the validity of the Montreal city by-law permitting the opening of certain stores on Sunday; one declaring it invalid. Judge Leet ruled that the by-law did not protect a seller from the operation of the general law, and that the sale of cigars on Sunday is an offence. He imposed a fine. Judge Bazin ruled that the by-law was valid, and entitled the accused to sell. He therefore dismissed the prosecution.

There were two points raised by the defence in each case, one of which was technical, relating to the form of the procedure. The other was that the sale was permitted by the city by-law. To the latter the prosecution replied that the Legislature of the Province of Quebec, which granted the charter of the city of Montreal, had no authority to give the city any power to pass the by-law in question.

Judge Leet, in his review of this point, held that the new Federal Lord's Day Act, when it excepted from the list of unlawful acts any act made lawful "in any Provincial Act or law now or hereafter in force," could not be intended to validate laws of the Provincial Legislatures which were otherwise invalid. The federal law said it was only Acts which were "in force" that were excepted.

"It is clear that only those Acts which are enforceable can be called in force.

"An Act may not be enforceable and consequently not in force for several reasons. It may be enacted sometimes before it comes into force, or brought into force only by proclamation, or it may have ceased to be in force by limitation of time or the happening of some event, or for the very good and sufficient reason that it is absolutely void "*ab initio*", the authority pretending to enact it not having the power to do so, in which case it is never in force or enforceable for a moment, and had no legal existence. I cannot believe the Dominion Parliament ever intended to confirm *ultra-vires* Provincial Legislation. It would be undignified to do so. I cannot conceive the Parliament intended to give the Provincial Legislatures carte blanche to pass any Act, constitutional or otherwise, that might have the effect of nullifying or abrogating altogether its own Act.

"If this exception can be so interpreted as to confirm the power of the city of Montreal to allow certain persons to sell on Sundays, there is nothing to prevent the Legislature from giving the city power to pass a by-law allowing other persons, or all persons, to carry on trade on Sunday, for the power given to the Legislature for the future is precisely that which it conforms for the past.

"I therefore hold that the Provincial Legislature had not the authority to give the city of Montreal the power to pass a by-law contrary to the provisions of the Consolidated Statutes of Lower Canada, Chapter twenty-three, and I find the defendant guilty. He was fined $1.00 and costs." The defence, announced their intention of carrying the case to the Appeal Court.

On the other hand, Judge Bazin, in the case of J. A. Couillard, charged with having sold a cigar on Sunday, held a different point of view. He said, in regard to the second contention of the defence, that the Provincial Law fifty-two, Victoria, Cap. fifty-eight, cannot be held as criminal legislation, and therefore does not come under the jurisdiction of the Dominion Parliament. The law giving the power to pass a by-law for the city

of Montreal is not a prohibitive one, but simply establishes a particular mode for the maintenance of good order and local police. In any event, the general law under which the prosecution was brought, was in force only in the Province of Quebec, and the Legislature of the Province had a right to amend or correct it.

"For these reasons, I hold that the law of Quebec (fifty-two Victoria Chapter fifty-eight) is *intra vires* and constitutional, as well as the by-law passed, by the city of Montreal, based on this very law."

Another Sunday Observance Case.

A regular session of the Magistrates' Court, presided over by District Magistrate Mulvena, was lately held at Coaticook. One case was a charge of an infraction of the Sunday Observance Act, made at the instance of the Council, by Constable Garceau, who charged Emil Ayoub with keeping open his place of business for trade and selling goods for profit on Sunday. Several of the small stores in town had been keeping open on Sunday and were specially notified some time ago to desist upon penalty of the law. This man disregarded the warning. He pleaded guilty and was fined $1.00 and costs.

Moving Household Goods. Railway Company's Liabilities.

That a railway or other carrier of goods cannot be mulcted for more than the amount specified in the release form even though it was not signed by the owner of the goods, is a decision given by Judge Dorion in the Circuit Court in the case of Dinelle *vs.* the Canadian Pacific Railway. In August, 1907, the plaintiff, who was moving to St. Faustin, shipped his household goods from Montreal to that place by the defendant's railway, and when he came to take delivery of the goods at St. Faustin it was found that one package was missing. The plaintiff then sued the company for $35, the value of the package. The company pleaded the terms of the usual special release form which is signed in connection with the shipment of household goods, by which the liability is limited to $5 for any one package and the company tendered this sum to the plaintiff together with the costs and deposited the money in Court. The evidence showed that the goods had been taken to the station by the plaintiff's brother-in-law, who had signed the release in his own name. The Judge held, however, that the release was binding upon the plaintiff, and that, in the absence of any fraud, the plaintiff must abide by the contract.

ONTARIO CASES.

Master and Servant.—Negligence.

Plaintiff brought action to recover damages for injuries received by falling from a gangway which was used in going to and from his work in a building, basing his right against contractor W. for breach of his duty to provide a safe and sufficient gangway, and to keep it in such condition, and basing his right to recover against contractor R. on alleged interference by him with the gangway, which contributed to its unsafe condition. The action was tried by Chief Justice Meredith, who dispensed with the jury, except as to damages, which the jury assessed at $800. He held, that there was nothing to indicate to the plaintiff that a certain addition which was made to the gangway by widening it was not intended to be used as part of the gangway, and that it was the duty of L. (W's foreman) to see that it might be safely used in its altered state, which could have been readily ascertained by an inspection of it. It if had been inspected the accident would not have happened. The Chief Justice held also, that the accident was caused by L's negligence in performance of the duty, with which he was entrusted by the defendant W., of seeing that the ways, etc., were in proper condition; that the plaintiff was not guilty of contributory negligence; and that he was entitled to judgement against W. for $800, the damages assessed by the jury, with costs. Action against R. dismissed, without costs.

(Christie v. Webb & Richardson, 15 Ontario, W. R. 802.)

Railway Company's alleged Negligence.

Action by plaintiff to recover damages for death of her son, the senior brakeman on defendant's train, by which he was killed. Deceased had charge of the signals by which the engine's movements were governed, and he lost his life by catching his foot between two converging rails, and, not being able to extricate it in time, was run over by the backing train. Plaintiff alleged that the train was negligently backed upon deceased without a signal. At the trial the jury found in favour of plaintiff and awarded her $500 damages. Upon appeal to the Court of Appeal it was held, that the question as to what is the proper number of men to carry on such operation —it being alleged by plaintiff that there was insufficient help for that purpose at the time the accident occurred— was not a question upon which juries could be permitted to trust to their own knowledge; that there must be evidence from witnesses duly qualified to express an opinion; and that, there being a total lack of such evidence, the appeal should be allowed, and the action dismissed, with costs if demanded.

(Canty v. Canadian Pacific Railway Company, 15 Ontario, W. R., 831.)

Attempt to Board a Train.—Railway Company not Negligent.

Plaintiff was a labourer in the employ of contractors grading a portion of defendants' line of railway. In attempting to board a moving train, plaintiff came in contact with a baggage truck left standing on the station platform, with the result that his leg was broken. Plaintiff sued to recover damages alleging negligence in (1) the truck; (2) inviting the plaintiff to board and starting too soon; (3) appliances for boarding the train imperfect and out of repair. At the trial Mr. Justice MacMahon held, that plaintiff had failed to establish negligence against defendants, and that plaintiff was himself negligent in attempting to board the train when in motion, and dismissed the action. Upon appeal to the Court of Appeal this judgement was confirmed.

(Perdue v. Canadian Pacific Railway Company, Ontario W. R. 836.)

Master and Servant.—No Negligence.

Plaintiff, a servant of defendants, sued to recover damages for injuries sustained while obtaining a load of sand from defendants' pit, by a large lump of frozen clay falling from the bank above, and breaking his leg, owing to the alleged negligence of defendants. At the trial Sir John Boyd, Chancellor entered judgement for plaintiff for $800, on the findings of the jury that the defendants were negligent in failing to see that the pit was kept in proper condition and in failing to remove a projection of clay. This question was also put to the jury: "Was there any special danger at the said bank known to the defendants, or either of them, which was not equally known to the plaintiff? If so, what was it?" The jury answered—"Yes, by knowing the pit best." The trial judge's judgement above mentioned, on these findings, was appealed against to the Divisional Court, where it was held that the whole situation was as well known to plaintiff as to the defendants, and that having chosen his own time to go into a situation of such obvious danger (i.e., in the dusk of a winter's evening), the defendant's ought not to be held liable. Appeal allowed and action dismissed.

(Arnold v. Stothers & Gaby, 16 Ontario, W. R. 234.)

A Transfer Baggage Case.

Judgement was given recently in the case of Maria Murphy vs. M. R. Dunlop in the Carleton county court. On December 27, 1909, Mrs. Murphy, who resides at 704 Gladstone avenue, employed Dunlop, a transfer man in Ottawa to take her trunk down to the Union station in order to meet a train going west at 1:55 p.m.

The defendant took the trunk down, but left it on the platform of the station, when it should have been in the baggage room. Meanwhile the plaintiff became ill, and could not catch the 1:55 train, and the trunk stayed on the platform for the rest of the afternoon.

Next day, Mrs. Murphy called down to the station for her trunk, but it was gone, with contents valued at $180. The plaintiff, therefore, brought damages

against Dunlop, as he had neglected to put her trunk in the baggage room.

Judge Smith, however, decided that the man was responsible for her trunk only until the train went out, and accordingly dismissed the case.

An Employés' Stock Agreement Case.

The case of Gee v. the Eagle Knitting Company was tried lately before Justice Sutherland, and decided in favour of the defendants. The question at issue was the construction of an employés' stock agreement whereby Col. J. R. Moodie, the president of the Eagle Knitting Company, set aside certain paid-up stock of the company, which certain employés were given the opportunity to earn during a period of ten years in yearly instalments, at the same time receiving the dividends on the whole amount of the stock set aside for the several employés. The object of this, as explained by Mr. Moodie, was to encourage faithfulness and diligence in the discharge of their duties on the part of the employés thus benefited. The plaintiff's employment was terminated when five years of the ten years' period had elapsed, and when the Company sought to redeem the stock transferred to the plaintiff in accordance with this agreement at par as provided for in the agreement, the plaintiff demanded that the unearned stock should also be redeemed at par. The amount in question was $2,500, and the Company disputed the plaintiff's claim and that the agreement could bear such a construction as he placed on it, and that if necessary the agreement should be re-formed.

After a hearing extending over the whole day, and the examination of quite a number of witnesses, the judge dismissed the plaintiff's action with costs, deciding in favour of the defendants' contention on every ground.

Co-operative Society Fined—Judgement Reversed by High Court.

The Preston Co-operative Association, Limited, organized under the Ontario Companies' Act, 1907, was recently fined $1 and costs by a local magistrate, for having violated the provisions of a local by-law relating to transient traders. An appeal was carried to the High Court and judgement rendered quashing the conviction on the ground that there was no evidence whatever that the defendants occupied their premises for a temporary period only. No action is to be brought against the magistrate nor any one acting on the conviction, and if the costs are paid, no action against the informant or town.

MANITOBA CASES.

Claim for Damages Against Railway Company.

In the supreme court of Canada, at its recent sittings, argument in the Canadian Northern Railway Company vs. T. D. Robinson was heard, Plaintiff (respondent) obtained an order from the Board of Railway Commissioners, in 1906, requiring the Company to replace a spur track to a siding in his yard in Winnipeg, which they had removed in November, 1904, and to supply transportation facilities there. On appeal the Supreme court of Canada held that the order was validly made by the Board under its statutory powers. In the meantime, through subsequent proceedings before the Board, railway connection was supplied on and after September, 27, 1906.

In October, 1908, the plaintiff sued the Company for $12,000 damages on account of failure to furnish reasonable and proper transportation facilities at his yard between the time when the tracks were torn up in 1904, and the time the siding was laid in September, 1906.

At the trial in the court of King's bench, Judge Metcalfe gave judgement against the Company, and ordered a reference to ascertain the damage.

This judgement was affirmed by the Court of Appeal for Manitoba. On the appeal it was contended that the Provincial court had no jurisdiction to entertain an action for damages for the causes alleged, and that the Board alone could give relief; also that by taking subsequent proceedings, under the Act of 1906, the plaintiff had aban-

doned all benefit from the former order, and that all right of action was barred by the limitation of one year provided by section 242 of the Railway Act of 1903. Judgement was reserved.

ALBERTA CASES.

Damages Under Building Contracts.

The defendants contracted to erect a building for the plaintiffs and to complete it by the tenth of January. On June 8, three weeks after the defendants had, as they alleged, completed the building, it collapsed, because, as was found, the stone work in the foundation had not been properly done. The contract stated that the work was to be done to the satisfaction of the architects, and also that no certificate be given or payment made under the contract, except the final certificate or final payment, should be conclusive evidence of the performance of the contract, either wholly or in part, and that no payment should be construed to be an acceptance of defective work or improper materials. In an action to recover the amounts expended by the plaintiffs in completing the building which the defendants had contracted to erect for the plaintiffs, and also to recover $17 a day, under the contract, for delay and other damages, Mr. Justice Stuart, who tried the action, held that no such direct expression of satisfaction was ever made by the architects as should be held, in the circumstances of the case, to be binding upon the plaintiffs, whose agents they were. The work in fact had not been properly completed, as the actual collapse shewed; and, in such circumstances, any expression of satisfaction by the architects must, in order to bind the plaintiffs, be clear and unambiguous, and must not be merely inferred from the facts proved. On June 8, the defendants had not completed the work to the satisfaction of the architects, and, when the building on that day collapsed, they were still bound to take up the work and complete it. A proper notice was given to them asking them to do so, and they refused. After the necessary time stipulated for in the contract had elapsed, the plaintiffs went on and completed the work and were entitled, under the terms of the contract, to recover from the defendants, the amounts expended by them in reconstructing the building and finishing it according to specifications. The plaintiffs were also entitled to recover at the rate of $17 a day (fixed by the contract), for the time which elapsed between January 10 and the date on which they entered into complete use and possession of the building. As the contract did not authorize the plaintiffs to deduct this amount from payments made, their omission to do so did not prevent them from recovering. But the plaintiffs were not entitled to damages for loss of business owing to the delay after the collapse, there being no definite evidence to sustain a claim therefor. Nor were they entitled to damages for implements injured in the fall of the building; they entered into possession before completion of the building at their own risk. On the defendants' counterclaim they were entitled to credit for such charges as should be found upon a reference to be properly due in respect of extras. Plaintiffs were given the costs of the action, but no costs of the counterclaim were given to either party.

(Cockshutt Plow Company v. Alberta Building Company, 13 Western L. R. 234.)

BRITISH COLUMBIA CASE.

Workmen's Compensation Case.

A decision of importance to miners has been given by Chief Justice Hunter at Fernie, B.C. Joseph Moore was hurt in a mine at Coal Creek in January, 1908. At that time claims were dealt with by a joint committee of operators and men. The case came before this body, and as a result he was paid the compensation to which he was entitled for some thirty-eight weeks.

The Company suddenly ceased payments and stated that this committee was not legally formed and its decisions did not bind them. Moore then began

proceedings under the Workingmen's Compensation Act, but was met with the objection that no notice of injury had been given to the Company. The arbitrator, his Honor Judge Wilson, held that after paying Moore for thirty-eight weeks it would be unjust to allow the employers to take the ground that they had had no notice of accident. The Company appealed this decision, with the result that the arbitrator's findings were upheld, and the Company ordered to continue payments.

Court of Appeal Judgement in Traders' License Case.

"The contention of the city of Victoria, that to grant a license to a trader, without compelling him to sign a memo. that he would do business only on week days, would amount to an authority by the city to such trader to commit a breach of the Lord's Day Act, or any other law, is, in my opinion, quite fallacious."

This was the view of Chief Justice Macdonald in delivering judgement in the traders' license case of Vasilatos v. Victoria, in which Mr. Justice Martin and Mr. Justice Galliher agreed with the Chief Justice in dismissing the city's appeal.

The appeal was from the order of Mr. Justice Irving granting the applicant a mandamus to compel the city to issue him a traders' license notwithstanding his refusal to sign an agreement, in effect, not to carry on his business of a vendor of fruit and light drinks on the Sabbath.

"Section 175 of the Act in question," His Lordship says, "was in my view meant to confer upon the city merely the power to impose a tax for revenue purposes. A trader has the right to carry on his lawful business subject only to the liability to pay that tax. I do agree with the proposition that what the city had the power to do directly, it could do indirectly. If that were so, the city could refuse to permit a trader to carry on business by refusing a license. Indeed, if that argument were sound, there would be no ends to impediments which the city under cover of a by-law of this kind could throw in the way of legitimate trading."

To this the Chief Justice adds the paragraph above quoted, and concludes: "As to whether the use of Form B, in the by-law, is mandatory or not, I am inclined to think it, but I do not decide that. What I do decide is that the license must be either in that form or to that effect, and cannot be withheld until conditions such as are imposed by this by-law are complied with by the trader. The appeal will be dismissed."

Mr. Justice Martin said he had come to the same conclusions for other reasons which he would later give in writing.

Master and Servant—Contract of Hiring.

The plaintiff was engaged by the defendants as a surveyor's assistant, the terms of hiring being, as he expressed it, "on a monthly basis." He was discharged without notice, and without any cause which would entitle the defendants to discharge him without notice. In an action in a County Court, the plaintiff claimed one month's wages in lieu of notice, $75, and the amount paid by him for one month's board and lodging, $30. In making up the account between the parties the County Court Judge made certain deductions from the amount claimed ($105), and judgement was entered for plaintiff for $98 and costs. Upon an appeal to the Court of Appeal, it was held by Chief Justice Macdonald and Mr. Justice Galliher that, assuming that a contract on a monthly basis could, in the absence of agreement or custom, be terminated only on reasonable notice, a custom or usage, alleged by the defendants to exist among surveyors and engineers and persons employed by them, that employment may be terminated on either side without notice, was well proved being practically uncontradicted. It was held, on the other hand, by Mr. Justice Irving and Mr. Justice Martin, that there was no satisfactory proof of the alleged usage or custom, and, no reason-

able notice having been given, the plaintiff was entitled to damages. The Court being equally divided, the judgement of the County Court judge in favour of the plaintiff was not disturbed.

(Andrews v. Pacific Coast Coal Mines, Limited, 13 Western L. R. 306.)

UNITED STATES CASE.

Hours of Railway Employés.

Announcement was made by the Interstate Commerce Commission that United States District Judge Page Morris, holding court in Iowa, had decided that the federal law regulating the hours of service of train crews on interstate railroads was constitutional.

The attorneys for the defendant—the Illinois Central Railroad—attacked the constitutionality of the law on thirteen different grounds. Their principal reliance, however, was upon the decision of the United States Supreme Court in the employers' liability cases. In its statement the Commission says:

"In the interpretation of the hours of service act, which limits the service of the train crew to sixteen hours in any twenty-four hour peroid, the court held that the performance by the engineer of duties required by the rules of the Company in preparation for a trip during the half hour previous to the scheduled time for the departure of a train from an initial terminal, made such engineer on duty during such half hour, and that this time must be included in the time of permitted service."

The case was a test case, the statement concludes. It was the first decision by any court upon the constitutionality of the law and the first judicial interpretation of its provisions.

THE

LABOUR GAZETTE

AUGUST, 1910.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF JULY, 1910.

I.—GENERAL SUMMARY.

UNCERTAINTY with regard to the western crop yield, following reports of damage by drought in the southern sections of the North-west Provinces, caused some cessation in the upward trend of trade and industry which has been marked throughout Canada since the beginning of the present season. Some retrenchments in manufacturing were made. Another result was to render a larger supply of workmen available in Western Canada for the railway construction camps, which have been seriously handicapped for some time by scarcity of labour, especially in British Columbia. In Ontario and Eastern Canada, however, the crops promise exceptionally well, and the general outlook is favourable. The lumbering and mining industries had a good month, but fishing was quiet. In transportation circles, an unfavourable incident of the month was the strike of conductors and trainmen on the Grand Trunk Railway system, which seriously hampered the movement of freight, and was felt injuriously by general industry over a wide area in Ontario and Quebec. Otherwise, transportation employés were busy, and traffic, both freight and passenger, was heavy. The immigration movement continued very large. For general labour the month has been a very active one, and the outlook is for a continuance of similar conditions during the rest of the season.

Changes in Wages and Hours of Labour.

The following is a statement by industries and groups of trades of the more important changes in wages and hours of labour, information concerning which was received at the Department of Labour during July, 1910.

Building trades.—Carpenters and joiners (100) at St. Catharines obtained an increase from 33 to 35 cents per hour. Plumbers (150) at Ottawa had their minimum scale advanced from 36 to 39 cents per hour; the eight-hour day will prevail during one-half of the year.

Printing trades.—The eight-hour day went into effect at Chatham, Ont., with an allowance of time-and-a-half for overtime. An increase from $24 to $25.50 per week was obtained by job printers at Vancouver, B.C. Printers at London, Ont., received an increase of $1 per week.

Civic employés.—Civic employés and corporation labourers at St. Catharines, Ont., obtained substantial increases.

Street railway employés.—At St. Thomas, Ont., thirty-five street railway employés obtained a rearrangement of schedule, involving an increase of 1 cent per hour for new employés. Employés of the British Columbia Electric Railway Company, to the number of 510, were granted an increase of 5 cents per hour.

Railway employés.—Commercial telegraphers, conductors and trainmen em-

The LABOUR GAZETTE, in its accounts of proceedings, abstracts of reports, legal decisions, quotations or other records of matters of concern to labour, is not to be regarded as necessarily endorsing any of the views or opinions which may be expressed therein.—Ed.

ployed by the Canadian Pacific Railway Company obtained new schedules. On the Toronto, Hamilton and Buffalo Railway, conductors and trainmen were granted similar concessions.(1) Grand Trunk Railway truckers at Brantford, Ont., had their wages increased from 14½ to 15 cents per hour. Certain turners and hustlers of the Canadian Pacific Railway obtained an advance. A new wage schedule affecting miscellaneous employés on the Intercolonial Railway system went into effect. Following the strike of Grand Trunk Railway conductors and trainmen, an agreement granting increases to the men was arrived at. Similar employés on the Père Marquette, Michigan Central and Wabash systems obtained increases.*

Interruptions to Industries.

Among industrial establishments, etc., destroyed by fire or through other causes during July, 1910, as reported in the press of the Dominion, the following may be mentioned:—

Nova Scotia.—Church at Prospect.

New Brunswick.—On July 11–12 a disastrous conflagration swept away the entire town of Campbellton, rendering about 5,000 people homeless. The estimated loss is over $3,000,000, and the insurance slightly over $1,200,000. The Intercolonial Railway lost a railway station, freight house, round house and shop, and seven locomotives. Branches of the Bank of Nova Scotia, Bank of New Brunswick and the Royal Bank of Canada were destroyed, also the, Post office, four mills and much sawn lumber and shingles one sash and door factory, one foundry and machine shop, five churches, one convent, five large hotels, many stores and smaller business stands and several hundred private residences.

Serious fires during July occurred in other parts of New Brunswick, notably: The Scott Lumber Mill at Magagundavic, July 2, loss, $25,000; the Miller Tanning and Extract Factory at Mortimore, July 9, loss2 $0,000; Keith's Rotary Mill at Charles, July 11, loss $14,000;and Windsor's Lodster Factory, at New Mills, July 11, loss $2,500; 1,000,000 feet of lumber, at Booth Station, loss, $20,000.

Quebec.—Outbuildings and contents at Beaupré; large stables at Buckingham, loss, $4,000; sawmill at Bury, loss, $10,000; 1,200 cords of pulp wood, at Dallaire's siding, loss, $6,000; outbuildings and contents at Lachenaie, loss, $2,500; store and residence at Les Eboulements, loss, $12,000; business block at Mansonville, loss, $25,000. At Montreal, sawmill, (partial), loss, $1,000; carpenter shop, loss, $2,000; sawmill, loss, $10,000; gas tank at brewery; boot and shoe store, loss, $20,000. Lower part of village of St. Jacques de l'Achigan, loss, $75,000; stores and residence at St. DoRinique, loss, $15,000; bobbin factory at Sherbrooke, (partial) loss, $1,500; chair factory at Victoriaville, loss, $30,000.

Electric storms in the last week of the month caused much damage in several sections of the Province, barns being destroyed with contents at Bromptonville, Contrecoeur, North Marston, Nicolet Falls and Rouville.

Ontario.—Freight sheds and contents at Allandale; railway station at Amigari; brewery at Brantford, loss, $50,000 (ten hands thrown out of work) furniture factory, at Berlin, loss, $40,000; brick factory at Hamilton; business block at Highgate, loss, $17,000; summer resorts at Keewatin; laundry at London, loss, $5,000; chemical factory at Longford Mills, loss, $1,700; Cochrane (west of) railway camp, loss, $30,000; sawmill and five houses at Norman, loss, $5,000; rag yard at Ottawa, loss, $1,000; public hall at Ottawa, loss, $3,000; business blocks and residences at Owen Sound, loss, $50,000; powder factory at Sand Point, loss, $4,000; business block at Toronto, loss, $15,000; grist mill and elevator at Tupperville, loss, $10,000. At Toronto, wharf, loss, $15,000; stable and contents, loss, $5,000; school at Uxbridge, loss, $15,000; box factory at Waterloo, loss, $25,000. Barn in Chatham township.

Manitoba,—Elevator at Beverley, loss, $25,000; hotel at Brandon, loss, $36,000. Barn at Souris.

Saskatchewan.—Eastern portion of village of Morz, loss, $50,000.

Alberta.—Livery barn at Claresholm, loss, $20,000; elevator and 10,000 bushels of grain at Crossfield; storehouse and contents at Lethbridge, loss, $3,000.

British Columbia.—Powder plant at Departure Bay; 2,000,000 feet of logs at Galen a Bay, loss, $100,000; sawmill and lumber at Golden, loss, $300,000; freight shed at Moyie; church and convent at Nanaimo, loss, $25,000; herring salteries at Nanaimo, loss, $15,000; business block and four residences at Nelson, loss, $40,000; cannery at Steveston; lumber yards at Vancouver, loss, $5,000; the town of Whitewater was destroyed by bush fires, which caused considerable damage through the Kaslo district.[1]*

Conditions in the Industries and Trades.

Conditions of employment during July, in the several industries and groups of trades throughout Canada, as indicated by reports of correspondents of *The Labour Gazette*, and by information received at the Department of Labour from other sources, may be briefly summarized as follows:—

Agriculture.

The outlook for the Western crop yield was less favourable at the close of July than in the earlier weeks of the season. This was due to drought in the closing weeks of June and the first half of the past month. During the second half of the month, abundant and general rainfalls materially improved conditions. The effects of the drought, however, will be severe in the southern portions of the three Prairie Provinces, and the estimates of the total crop yield show a shrinkage, as compared with last year. The yield

[1] A copy of this agreement is published elsewhere in the present issue.

[1] See report of Nelson correspondent.

of wheat is now placed at 90,000,000 bushels. The harvesting season will be earlier, cutting having been begun in a few localities, in the closing days of the month. An official bulletin on the situation in Saskatchewan concludes as follows:—

"In the judgement of practical experts the present outlook is that in no considerable area of the Province this year will less than a fair profitable crop be reaped from land that has received sufficiently timely work, intelligently performed, to justify the farmer in expecting a fair return for his labour."

In Ontario crop reports have been uniformly favorable. Hay has been a heavy crop, and fall wheat an exceptionally good yield, though the harvesting of both was hampered by the prevailing rains. In Quebec and Eastern provinces also, growth has been rapid, and a good hay crop is assured. In the dairying branch, a good flow of milk is reported, and the make of cheese has been heavy as a result of the good pasturage. The yield of small fruits has been abundant, and a fair return from other fruits is expected. The fruit outlook is particularly favourable in British Columbia. Prices for agricultural products were generally firm to upward during July. Wheat advanced and was followed by a rise in flour.

Fishing.

The month was quiet in the Maritime Provinces. Coast fishermen reported small catches. The lobster season closed about the middle of the month, and though the catch was fair in several sections, in others it was light, owing to stormy weather. Prices were good. The month was without incident on the Great Lakes. In British Columbia, the salmon run on the Skeena river has been heavy, but on the Fraser, it has been light. Twenty-five cents per fish was fixed as the price for sock-eyes, on the Fraser and gulf, by the British Columbia Salmon Canners' Association. The whale fisheries off Vancouver Island have had a successful season. An improved market for British Columbia salmon in Australia has been ensured by the action of the Government of the Commonwealth, in allowing the term "sock-eye" to be used on the labels only of salmon imported from British Columbia and the waters of Puget Sound adjacent. The Pacific Whaling Company, with headquarters at Victoria, B.C., will engage with five vessels in deep sea halibut fishing during the coming winter season.

Lumbering.

Mills throughout Canada continued active. The water supply sufficed for sweeping and driving. Market conditions were favourable, and the volume of trade satisfactory. The closing of J. R. Booth's mills at Ottawa for some days during the strike of Grand Trunk Railway Company conductors and trainmen, threw about 2,000 men temporarily out of employment. In British Columbia, the output was large, and the demand steady.

Two parties of engineers have begun the work of surveying the forest reserve which the Dominion Government has set aside on the eastern slope of the Rocky mountains.

At the annual meeting of the Province of Quebec Lumber Limit Holders' Association several resolutions were submitted for the consideration of the Provincial Government.

Mining.

Employment was active, and outputs large throughout Canada. The Nova Scotia collieries were producing steadily, though with some broken time on account of holidays. Throughout New Brunswick, Quebec and Ontario metalliferous production was on a heavy scale. In British Columbia, active conditions prevailed in the metalliferous camps of the interior. It has been decided to close down the LeRoi mine. The Crow's Nest Pass and adjacent collieries were producing steadily, and employment was active in the Vancouver Island collieries.

A new scale of contribution to the relief societies, following the consolidation of the relief societies of employés of the Dominion Coal Company, came into effect on July 1. The members' monthly contribution is 50 cents, and the coal Company will contribute equally with its employés. The weekly benefit for disability through sickness or accidents, is $6.

TABLE SHOWING STATE OF EMPLOYMENT IN

This table is based largely on the reports of the correspondents of *The Gazette* as published in the present issue several trades and industries throughout the Dominion. The table has reference only to the amount of employment headings in *The Gazette*. In tabulating the information in question, the terms employed are divided into two groups, the very active, (2) quiet and very quiet.

The annual report for the year ended May 31, 1910, of the Amalgamated Asbestos Corporation, Limited, shows profits of $517,969.

Manufacturing.

Conditions were generally unchanged from last month, though there was a slackening in certain lines following upon unfavourable crop reports. In most branches and localities, however, industrial establishments continued to operate with full staffs, and many reports of overtime and additions were received.

A feature of the past few months has been the extent to which new manufacturing concerns have been established. At Montreal alone, it is estimated that over forty new companies, representing a capitalization of over $40,000,000, have been projected this year.

Railway Construction.

The month was very busy throughout Canada, and good progress was reported on the several contracts under way. The supply of labour was somewhat more abundant in the Prairie Provinces, but in several other districts men were in active demand.

The output of cars from Canadian car shops this year is expected to exceed largely that of any previous season. The three plants of the Canadian Car Company alone, have orders for 12,000 cars, and are giving employment to 3,500 men.

General Transport.

Railway and steamboat traffic, except to the extent in which the strike conditions on the Grand Trunk Railway system interfered with operations, was very heavy, and earnings of transportations companies were generally in excess of the corresponding period of 1909. Electric railways were very active, street railway earnings in most of the larger centres showing heavy increases, compared with last year. Canal traffic has been very heavy. A summary of the July traffic through the Sault Ste. Marie Canals, is as follows:—

	U. S. Canal.	Canadian Canal.	Total.
Vessel passages No....	2,180	1,062	3,242
Register'd Tonnge, Net	4,503,715	3,372,743	7,876,458
Freight—			
East Bound Net tons	2,570,230	4,940,006	7,510,236
West Bound Net tons	1,852,703	612,234	2,464,937
Total freight Net tons	4,422,933	5,552,240	9,975,173

The Trades.

Building.—Building continued with unabated activity in most of the large centres, and with only local exceptions, the various branches of the building trades were well employed. It was estimated that the number of permits issued during the first six months of 1910, and the value of buildings represented therein, exceeded the record of the corresponding period in any previous year.

Metal and woodworking.—The metal, engineering, shipbuilding, woodworking and furnishing trades had a good month, The activity of industrial establishments. noted in the earlier months of the season, has been well maintained.

Printing.—Reports received were uniformly of a favourable nature, employment being for the most part active, and in some localities very active.

Clothing.—Journeymen tailors were somewhat quiet, but garment workers were active, and boot and shoe workers increased in activity. There was a demand for female labour in whitewear establishments.

Leather.—The volume of trade continued steady. Tanners, curriers and leather workers had a fair month.

Textile trades.—Conditions showed little change from those of the preceding month. Woollen workers were active. Cotton mills continued fairly busy.

Food and tobacco preparation.—Business was steady among bakers and confectioners. The new bread law of Ontario came into effect on July 1, and was the subject of considerable discussion. The summer confectionery trade has been of good proportions. Tobacco workers and cigarmakers had an active month.

Miscellaneous.—Retail clerks, barbers, hotel and restaurant employés, &c., had a good month's employment. The tourist

trade has been heavy, though late in opening. There was a general and very active demand for domestic servants.

Unskilled labour.—Workmen in this class had a very busy month, and were in demand in many sections, though the supply was larger in Western Canada than during June.

Canadian Trade and Revenue.

Foreign trade.—During June, 1910, the total value of imports into Canada entered for consumption was $39,705,237, compared with $31,341,542 in June, 1909. For the first three months of the present fiscal year ending June 30, 1910, the total value of imports entered for consumption was $109,384,187, compared with $82,102,190, in the corresponding period of the last fiscal year. The total value of domestic exports during June, 1910, was $24,793,824, compared with $21,654,000 in June, 1909. The domestic exports during the three months ending June 30, 1910, were $57,648,937, compared with $49,327,004 in the corresponding months last year. During June, there were increases in exports of the mine, the fisheries, the forest, agriculture and manufactures, and decreases in exports of animals and their produce. The grand total of Canadian trade for June, 1910, was $66,011,824, compared with $55,657,201, in June, 1909, and for the three months ending June 30, 1910, $171,173,690, as against $135,567,791 for the corresponding months of 1909.

According to reports of Trade Commissioners received at the Department of Trade and Commerce, Canada, there is a market for Canadian salmon, steel, sulphate of ammonia and crude oil in Japan, and for Canadian potatoes in Cuba.

Imperial trade.—In Great Britain and the different Dominions of the Empire openings for Canadian products were reported as follows: For Canadian bacon in Great Britain; for Canadian oiled cloth and soap making ingredients in Newfoundland; for Canadian fish in Jamaica; for stoves in Barbadoes; for glass bottles in South Africa; and for butter-box lumber, carbide of calcium and motor cars in Australasia.

Domestic trade.—Summer holidays had some effect upon trade, but the movement of goods to country points was generally satisfactory, and large shipments were sent to the western and eastern Provinces. A fair sorting trade in drygoods was reported. Close attention was paid to crop reports, and some retrenchment was noted following the decline in prospects in the West. Country trade was quiet, after the commencement of haying and harvesting, and the strike of the Grand Trunk Railway trainmen had an injurious effect, but the general tone was favourable. Bank clearings continued to show increases, as compared with 1909. The general bank statement showed an increase in deposits over May; call and short loans, current loans and circulation also increased during the month.

Canadian revenue.—Canadian revenue for the month of June, 1910, amounted to $9,612,677.38, compared with $7,978,898.42 in June, 1909. The total revenue to June 30, 1910, amounted to $26,334,853.34, compared with $21,592,872.97 to June 30, 1909. The total expenditure on capital account during June, 1910, was $1,652,339.09, as against $2,913,284.65 in June, 1909. The total expenditure to June 30, 1910, was $3,150,035.46, compared with $4,014,298.63 to June 30, 1909. The leading items of expenditure during June, 1910, were: Public works, railways and canals, $1,485,633.53; bounties, $118,019.01; and railway subsidies, $48,819.20.

Notes.

The Western Canadian Irrigation Association will meet in Kamloops, B.C., August 3–5.

Mr. Raoul Bolté has been appointed Municipal Fair Wage Officer for the city of Montreal.

The annual convention of the Maritime Wholesale Grocers' Guild was held at Halifax, N.S., July 21–22.

The twentieth annual convention of the Canadian Electric Association was held at the Royal Muskoka Hotel, Lake Rosseau, July 6–8, 1910, A number of technical papers were read.

The Provincial School of Forestry recently established by the Government of Quebec in affiliation with Laval University, will open for work during the coming autumn. The schools will have four professors, two in Forestry, one in Mathematics and one in Forest law. The course will cover two years.

In an article by Mr. T. M. Donaldson, published in *The Monetary Times*, of July 30, it is stated that during the past five years there have been recorded in Canada, thirty-three collapses of sprinkler tanks, resulting in the loss of three lives and the injury of fifty-one persons, with an estimated property loss in fourteen cases, of $247,814. Many of the tanks fell on Sundays, holidays or when the buildings were deserted.

The twenty-sixth annual convention call of the Trades and Labour Congress of Canada was issued under date of July 11. The Congress will meet at Fort William, on September 12, 1910. Among other subjects mentioned as worthy of consideration by the Congress were the following ing:—

1. The immigration laws.
2. The Belcourt Bill, to destroy international trade unionism, which may be brought forward again next Session.
3. The Eight-hour Bill and its present position. Determined opposition has been made to this Bill and Labour must keep alive to secure its passage.
4. The Act respecting co-operation.
5. Effect of the amendments to the Industrial Disputes and Investigation Act.
6. The Technical Education Commission.
7. The Anti-Combines Bill in its relation to the trades-union movement.
8. Proposed Amendments to the Elections' Act, to make election day a public holiday, &c.
9. Payments of wages on railways fortnightly, and many other features.

In the matter of the accident on January 15, 1910, on the line of the Canadian Pacific Railway Company, at snow shed number eighteen, 1¾ miles west of Rogers' Pass Station, in the Province of British Columbia, (File 13648) it has been ordered by the Board of Railway Commissioners that all railway companies subject to the legislative authority of the Parliament of Canada, operating a railway by steam power, be directed and required to erect tell tales at a distance not less than 100 feet from all bridges, tunnels, or other structures over, through, or under which any railway on their lines of railway passes, in which the space between the rail level and such bridges, tunnels, or other structures is less than 22 feet 6 inches, as required under the provisions of the Railway Act.

The fourth annual report of the Dominion Steel Workers' Mutual Benefit Society, of Sydney, N. S., for the year ended April 30, 1910, shows that 623 sick-claims were presented, of which 285 were paid, and 319 involved no outlay. Ten members died from natural causes during the year. The total outlay under this head was $6,451. Seventeen hundred and eighty-eight reports of disablement from accidental injury were received, and payments made in 910 cases. Five mem bers died from accident. The amount paid to injured members was $12,740. Expenditures for the services of a surgeon amounted to $6,207, and hospital fees to $2,473. The continued growth of reserve funds was reported. On leaving the employ of the Dominion Iron and Coal Company, Limited, the General Manager, Mr. F. P. Jones, presented the Society with the sum of $2,000 as a contribution to the pension fund.

II.—REPORTS OF LOCAL CORRESPONDENTS.

SYDNEY, N.S., AND DISTRICT.

Mr. John Moffatt, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions continued active during July, and business generally was brisk throughout the districts.

All foundries, factories and railways were busy and had abundance of labour and other essentials to good results.

The weather was favourable to outside labour and to the growth of the crops. Of all the classes, fishermen seemed to be least active.

Sydney Steel Works continued active in every department. Large quantities

of iron ore, limestone and dolomite were placed in the stock bins for winter use. Orders are heavy and the demand for the product of the plant keeps it running to its full capacity. As soon as improvements and additions are made others are found necessary. The new parts of the works are rapidly rising, and within a few months will be in operation and adding to the tonnage. The following is an official statement of progress:

The new construction work at present in progress at these works affords employment for a large number of men and is going on quite rapidly, although from the extent of the undertaking the progress from month to month does not readily appear to people outside.

The foundation for the new blast furnace stack is about completed and commencement has been made on the foundations for its four stoves.

The concrete work is finished for the two mammoth open hearth furnaces, which will each have a capacity of 450 to 500 tons; their 175 feet stacks are about completed and everything is ready to go ahead with the erection of the furnaces themselves, the material for which is reported to be in an advanced state of fabrication. The steel frame of the gas producer is erected and ready to be handed over to the masons.

All the machinery and appliances for the steam turbine plant, which is to utilize the exhaust steam from the rail mill is on the ground and the concrete foundations are being rapidly put down. The steel building which is being manufactured at the McNeil works in New Glasgow, will arrive shortly and will be ready to erect immediately.

At the Coke Ovens the contractors for the four new batteries report that their work is about eighty-five per cent. complete, they complain of the scarcity of labour except for which they would probably have been ready to turn over the plant to the Company.

One of their grievances is that they are unable to bring skilled men from places in the United States where they have been operating previously, on account of the stringency of the immigration laws. The work upon the ovens proper and especially the first two batteries is very well advanced. Three of the four steel stacks serving these batteries have been erected and work is advancing on the support for the 1,000-ton steel coal hopper which will be used for reserve supply.

The Condensing House, where commencement is made for the recovery of by-products, is of much more recent design than the Company's existing Condensing House, and is expected to do very much better work, that is to say, it is expected that a greater percentage of by-products will be recovered. The construction is steel frame work, the brick filling is from the new Sydney Pressed Brick Company and presents a very pleasing appearance. The boiler house, which will be entirely supplied with waste gas from the ovens is of the same construction with a solid round brick stack which is a prominent object on the landscape from almost any point of view.

In conjunction with the new coke ovens there will be a plant for Briquetting waste coal, coke dust, &c. through the operation of which the Company expects to effect considerable economy. The concrete foundations for the main building have been finished and the machinery is on the ground.

Although so much of the work has been completed, there will be continued activity in construction department during the balance of the year at any rate, and if reports of the Company's policy be true for a considerably longer period.

After general repairs, the Sydney Mines Steel Works resumed operations, and succeeded in adding to the daily output by upwards of 100 tons. The furnace while down was remodelled to give a larger output. A record of 416 tons was made in July, the highest day previous to July, being 300 tons.

The coal trade was very active. The Dominion collieries were all busy but the July output owing to holidays did not reach that of June. The new sections under developement are giving fair outputs. The Sydney mines collieries were also affected by holidays and the output will be less than last month. Newcastle colliery, Port Morien, was busy. Toronto mine, Little Bras d'Or was idle a few days awaiting shipping.

The building trades continued busy, but with a plentiful supply of labour. All buildings will be completed before the end of the season. Extensive building is being carried on in the Sydney mines and new colliery districts.

Transportation by water was heavy. Railway freight was light, but passenger traffic was fairly heavy. Wholesale and retail trades were quieter than in June.

There was no labour trouble during the month and the labour supply was equal to the demand.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The weather was ideal for farming and crops of all kinds grew rapidly. The hay crop is heavy and much of it was gathered under good conditions.

Fishing.—Fishing was not up to the average on many parts of our coast. Fair catches of cod and shad were obtained in a few places, but many others report fish of all kinds scarce. Lobsters were plentiful in some districts and scarce in others. Good weather and good prices were favourable factors to the lucky fishermen.

WESTVILLE, N.S., AND DISTRICT.

Mr. T. Hale, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Employment in this town and district continues in general, steady in the va-

rious industries. The mines worked full time. During June, the Drummond colliery shipped about 25,000 tons of coal, being an increase of about 7,000 tons compared with June, 1909. The increase for the Province for the six months ending June 30, was about 140,000 tons. Other industries throughout the district were generally active, all classes being well employed. There was no unrest in labour circles. Business, wholesale and retail, was fair. Brickmakers, bricklayers and carpenters were busily employed throughout the district. The Pictou county Electric Company has built its car line in the centre of Main Street, Westville, from the railway crossing to the Arlington Hotel. The Town Council is making improvements in the above district.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were very busy gathering the hay crop, which is an abundant one. The grain and root crops are also in very promising condition. Small fruits will be somewhat short, owing to early frosts.

Lumbering.—Conditions in this industry were fair.

Manufacturing.—Steady employment was reported in all branches.

Mining.—This industry was brisk. The Acadia Mine, which had a few days off, is at present working full time. Arrangements were being made to employ additional help.

CONDITION OF PARTICULAR TRADES.

Busy conditions prevailed in the building trades. Blacksmiths had a fair month horseshoers were steadily employed and the other metal trades were generally active. Fair conditions were reported by printers and pressmen, also by journeymen tailors and boot and shoe workers. Food and tobacco preparation workers had a good month. Barbers had a fair month; hotel, restaurant, theatre and laundry workers were well employed. The transport trades were active.

HALIFAX, N.S., AND DISTRICT.

Mr. A. J. Smith, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

As indicated by the smaller number of contracts for new buildings and repairing operations placed, the industrial market for the past month has been duller than during the corresponding months of 1908 or 1909. While there are new structures contemplated such as the new St. Edwards' Church, a new home for the Guardian Angel, and possibly a new market building, the contracts have not been placed, and this accounts to a considerable extent, for so large a percentage of idle men in the building trades. There are some new residences going up, as well as finishing work being done on some of the older contracts, but these are not sufficient to cause the desired activity.

During the month the preliminary steps were taken by which the Union Bank of Halifax will be taken over by the Royal Bank of Canada. The transfer will not be finally completed until ratified at a meeting of the shareholders of the Union Bank, which is to be held at Halifax, on September 7. If the shareholders vote for the transfer the change comes into effect on November 1, 1910.

The barbers of Halifax (Local Union 258, I. U. of A.) notified all employing barbers on July 18, as follows: "At the last meeting of the Union it was decided that on and after August 1, 1910, the journeymen barbers will stop work at 8 o'clock p.m., providing no customer is in the shop at that hour; also, that no journeyman barber will work on Sundays. Saturday evenings and evenings preceding holidays to remain as at present."

The Royal Commission on Industrial Training and Technical Education arrived in Halifax, July 17, and began a three days' session on Monday, July 19.

The contract has been signed for the construction of a railway from Dartmouth to Guysboro and a branch line from

New Glasgow to Country Harbour. The lines are all in Nova Scotia, and the contract is to be completed in 1913. The contract was signed by Hon. C. P. Chisholm, commissioner of Public Works and Mines, on behalf of the Nova Scotia Government, and J. B. Bertram, President, and George E. Boak, secretary, for the Company. The Company have purchased the Dickie timber limits, which aggregate some 464,600 acres, for something over $3 per acre. The Company is to forfeit $50,000 if the railway is not completed within the time required. The Provincial Government will pay a subsidy of $6,400 per mile and the Dominion Government has promised an equal sum, making a joint subsidy of $2,560,000 for the 200 miles of railroad. All materials, tools, etc., must be purchased if possible) in Canada, and the fair wage clauses of the Government of Canada contracts shall be enforced, and the rates of the line must be approved of by the Government. Engineers are now engaged in surveying and it is understood construction work will begin in August. There are three companies involved in the enterprise—the Halifax and Eastern Railway Company, capital, $3,000,000; The Eastern Canada Lumber Company, capital $3,000,000; and a holding corporation, the Halifax and Eastern Railway Corporation, capital, $6,000,000. The road will be constructed by an English company. The intention of the promoters is to overhaul the lumber mills now in operation on the lands they have purchased and to install new machinery for the purpose of utilizing the lumber for the building of the railroad and other purposes.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Reports differ as to the state of the various crops, but indications point to a fair average on all lines. Butter was cheaper in July than for some time. Some mid-month quotations (wholesale):—

Butter, creamery, boxes, 25–26 cents, per lb.
Butter, creamery, tubs, 27 cents, per lb.
Butter, dairy, tubs, 22–23 cents, per ".
Butter, dairy, ordinary, 19–20 cents, per lb.
Cheese, large, 12½–13 cents, per lb.
Cheese, twins, 13 cents, per lb.
Eggs, fresh, 18–19 cents, per odzen.

Meat and poultry—
Beef, forequarter, 9½ cents per lb.
Beef, hindquarter, 12 cents per lb.
Lambs, $3–$5, each.
Mutton, 7–9 cents, per lb.
Veal, 7–8½ cents, per lb.
Pork, 10–11½ cents per lb.
Bacon, 20 cents, per lb.
Turkey, 17 cents, per lb.
Fowl, 15 cents, per ".
Geese, 20 cents, per lb.
Hams, fresh, 16 cents, per lb.
Hams, smoked, 18 cents, per lb.

Fishing was quiet, local fishermen not taking usual July quantities.

Manufacturing was brisk.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, plumbers and stonecutters were dull. Painters were fair, but trade is falling off. Boilermakers were fairly active. Electrical workers were dull. Plasterers were brisker than usual for July. Builders' labourers were not as active as usual. Printers, pressmen and bookbinders had a fair month, but trade was slowing down. Tailors had a fair month. Butchers and meat cutters were busy. Ice cutters and drivers were well employed. Barbers, delivery employés, hotel, restaurant and theatre employés were busy. Railroad employés were fairly well employed. Longshoremen had a fair month. Unskilled labour was about up to midsummer average.

DISTRICT NOTES.

Shelburne.—Joseph McGill has completed another vessel at his shipyard here, for the Summerville Towboat and Ferry Company, N. S. Her length is 90 feet, 20 foot beam, seven foot hold. She will be propelled by steam, the machinery for which was supplied by W. D. A. Moir, Halifax. The same firm is constructing another fishing schooner for the Maritime Fish Corporation of Montreal, and also a large schooner for Captain Hummehuan, Riverport. Both will be of the knock-about type.

AMHERST, N.S., AND DISTRICT.

Mr. A. D. Ross, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour throughout the month has been well employed. At some of the industries, indeed, there was a considerable demand for additional help, and it can be safely said that every man desiring work could secure it. Just now the haying season is at hand and farmers are clamouring for assistance. No great steps forward have been taken during the months, the existing industries have added more men to their pay roll and work has been steady and abundant throughout the month. Builders have been better employed than was expected during the early months of the year, but on the whole operations in this line are quiet.

No material change has been made in wages. The Springhill strike still continues, with no settlement in sight. There is no doubt that the Company at present has a large force of men at work and that the output of the mine is steadily increasing. The first repair for the year was done this month and when this is completed the Company will be able to put more men in the pit. The pay roll at date, numbers 450 men, nearly 200 of whom are coal cutters. The output of the mine for July, will aggregate about 9,000 tons of coal. Considering the long term of the strike the order in the town has been excellent, but in the early part of the month troops were called to the town and are now stationed there.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Wet weather has seriously handicapped the haying for the past ten days but the crop is reported above the average. The fruit crop will show a yield of less than fifty per cent. as compared with last year, but in field crops the outlook is favourable.

Fishing.—The lobster season closed the middle of this month. Prices were good, but on some sections of the coast the catch was small.

Lumbering.—Lumber dealers are now actively engaged in shipping the cut of the previous winter to the European and American markets. Prices are good and will thus compensate somewhat for the marked reduction in the cut.

Manufacturing.—All manufacturing establishments are actively employed, work ing full time with a larger than usual complement of men at work.

Mining.—The collieries are all actively at work, the same as last month. In Springhill, the men are still out but the Company is now operating the mine with some degree of success.

CONDITION OF PARTICULAR TRADES.

The building trades have been fairly well employed during the month. Carpenters and joiners were fairly active, and plumbers and paper hangers exceptionally busy. There has been but little work for stonecutters. In the metal and engineering trades, moulders, machinists and engineers report a busy month. Electrical workers had a more than unusually active period. Boiler makers were busy. Woodworkers have generally had steady work. Upholsterers report business dull. Car builders are busy. Printers were busy, but journeymen tailors were only fairly well employed, garment workers had a holiday for two weeks in several industries but are at work again. Boot and shoe makers were very busy. Bakers and confectioners had a more than usually busy month. Ice cutters and drivers well employed. Trunk and bag makers report a busy month, with steady employment. Furriers are not working actively. Unskilled labour has been well employed and it looks as if there would be ample work to keep all in the market steady at work for the remaining fall months.

CHARLOTTETOWN, P.E.I., AND DISTRICT.

Mr. F. J. Nash, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during the month of July, was

practically the same as in June, excepting for the closing down of the lobster season in the middle of the month. Supply and demand were well balanced and more farm labourers could have received employment had they been available.

A number of public works were in course of construction throughout the Province, the principal being the Elmira Branch Railway. Good progress was made in the city at the Heartz Memorial Hall and the Methodist Parsonage, and other structures under erection.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The end of the month finds hay making in full progress throughout the Province, the crop being one of the best in the history of the Province. A bulletin issued at the Department of Agriculture says "Farm labour is not so scarce as it was last year. Two correspondents report it sufficient, for one who reports it scarce. There is an advance of five per cent. in the cost of labour over 1909." On the whole, however, the supply is not quite equal to the demand. The crop bulletin shows that the crop will be about the average. There willl be an increase of about twenty-five per cent. in the output.

Fishing.—The lobster season closed about the twelfth of the month. There was about seventy-five per cent. of an average catch. Operations are quiet in other lines, but some men are engaged in cod and mackerel fishing.

Manufacturing.—The new factories on the Island were carried on under the usual conditions, the supply of labour equalling the demand for the same. A new departure is the erection of a factory intended to manufacture surplus potato starch into glucose, dextrin, and other products. This factory is in the course of construction at Dundas and will be ready in the autumn.

Railroad construction and employment.—The building of the Elmira Branch Railway is now well under way, and various buildings are in course of erection.

CONDITION OF PARTICULAR TRADES.

General activity prevailed in the skilled trades. The demand for unskilled labour was equal to the supply.

MONCTON, N.B., AND DISTRICT.

Mr. J. C. Graves, correspondent, reported as follows:

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions throughout July showed no marked difference from those reported in June, supply and demand being well balanced. Few unemployed were noticed, and with the possible exception of agriculturists no new opportunities of employment presented. Labour bureaus here find but few candidates for jobs in other parts of the Province. All local factories, machine shops, etc., are steadily working, with full complements of operatives. The Abrams' machine shop, New Brunswick Wire Fence Company and Marwin Biscuit Factory report especially active conditions. The stave and head factory, owing to the consumption of raw material on hand are slackening and will probably close for a time. At the *Evangeline* office a new press has been installed and other improvements made. Work upon the public wharf is being actively prosecuted and is in an advanced stage. Considerable building is in progress both about the city and in the suburbs, but is so far confined to the erection of cottages, general repair work and remodelling. Wholesale business is active, and of good class, about on a par with other years. Retail trade, owing to the departure of citizens to country resorts for vacation is slacker than usual. The steamer *Wilfrid C.* is handling a good transfer and passenger business between this city and ports at the mouth of the river. The dearth of houses existing during the past three years appears somewhat relieved and there is at present a larger list of houses to select from. Rents, however, still remain firm, also real estate. The Saturday half-holiday for employés has so far not been adopted this season by commercial firms. It is however, in operation in the Intercolonial Railway shops. cotton factory, barrel factory and Merwin

Biscuit works. At the Record Foundry and Machine shop the operatives are paid on the piece work system and the half-holiday has not come into operation. No increase in rates of wages, no further changes in hours of labour and no unrest of employés was noted.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The excessively humid weather has been productive of an abundant hay crop everywhere throughout the country, especially on upland farms, while marshes also promise well. Haying began about the twentieth instant, being a little later than usual. A serious handicap is the scarcity of help in rural sections. The call of the West and the drift to large centres during the past few years has virtually absorbed all the surplus stock of labour. Haymakers receive $1.50 and board. Grain and vegetables look well. Fruit will be light.

Mining.—The Maritime Oil Fields Company, Limited, is actively at work developing its property at Lower Coverdale. Well No. 9, bored to a depth of 2060 feet was shot and 80 pounds of oil was pumped, the result of a week's accumulating, while a very strong gas pressure was also exhibited. Well No. 10 is now ready for shooting and well No. 11 is under way. The oil and gas area by wells drilled has already been proven to be one mile wide. A new 250-barrel tank has been erected.

Railroad construction and employment.—The estimates for the Transcontinental Railway construction in this Province for June, upon the six contracts totalled $346,547. Work upon the Chatham division is being rapidly carried on. Other railway work is confined to the putting of road bed in shape and repair of stations and yards.

CONDITION OF PARTICULAR TRADES.

Bricklayers were quiet, but carpenters, joiners and plasterers were busy. Painters and decorators were active; plumbers busy; stonecutters quiet; and builders' labourers in demand. In the metal engineering and shipbuilding trades employment was active. In the woodworking and furnishing trades fairly active conditions prevailed. Printers, pressmen and bookbinders were active, with photographers busy. Journeymen tailors, garment workers, bakers, and butchers were active. Leather workers have been busy. Barbers were active and clerks, hotel, restaurant, theatre employés and laundry workers busy. Railway crews carters and expressmen were active. For unskilled labour the local supply about equals the demand. Wages are $1.40 to $1.75 per diem.

DISTRICT NOTES.

Sussex.—The Sussex Manufacturing Company has entered into a merger with other Ontario woodworking concerns and will hereafter be conducted as a branch business. A combined opera and club house 75 feet by 90 feet, of concrete is being erected by the Sussex Institute. A large concrete block for a general store by Mills, Eveleigh & Company and a number of residences are also in course of construction.

Sackville.—Building operations are brisk. The contract for new wharf has been let and work is soon to commence. The Sackville Board of Trade has addressed a circular to all employés of labour in the Maritime Provinces with respect to the effect of the drink habit upon business and of the locality generally. The information thus obtained is to be used in the discussion of the subject by the Maritime Board of Trade at Chatham, August 7.

ST. JOHN, N.B., AND DISTRICT.

Mr. W. H. Coates, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market remained brisk during July, especially among carpenters. Several new buildings for the Dominion Exhibition are being erected, giving employment to a large number of men.

The report of the building inspector for the first five months of the year showed that during that period sixty-nine building permits had been issued, the total estimated cost being $175,000. Tenders are being asked for building a new school house on Wentworth Street. The new structure will be of brick and stone, 78 x 91 feet, and three storeys high, with basement. Work has been commenced on the Hassam pavement on Main Street, and Water street is being got ready for a new pavement, giving employment to a number of labourers. Cushing's lumber mill, which is being operated by the Union Bank of Halifax, will close down shortly for an indefinite period, owing to the fact that market conditions make it unprofitable at present to saw lumber. Bank clearings for the four weeks ending July 28, were $6,614,711, and for the corresponding period last year, $6,244,369, being $170,542 greater in 1910, than in 1909, and $699,866 in excess of the four weeks ending June 23, of the current year. The deposits at the Dominion Savings Bank during June, were $54,889.26, and the withdrawals $70,618.22. The Inland Revenue receipts for the month of June were $18,623.02, and for the same period last year $15,947.43, showing an increase of $2,675.59. The nineteenth annual meeting of the Maritime Medical Association opened on the twenty-fifth July, and continued two days.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The hay crop in King's county promised to be a good one, but it is feared that the wet weather will interfere with the curing of it. Men are scarce at $40 per month.

Lumbering.—This season 8,000,000 feet of bank logs were rafted at Springhill. This did not include about 650,000 feet which came out of the Keswick and Nashwaaksis streams.

Railroad construction and employment.—The formal opening of the Aroostook Valley Railroad, the first electric railroad in Aroostook County, Maine, took place July 1. The power is furnished from Aroostook Falls, N.B.

CONDITION OF PARTICULAR TRADES.

Skilled workmen were generally active and unskilled labour well employed.

DISTRICT NOTES.

St. Stephen.—The contract for the erection of a new bank building for the Bank of Nova Scotia branch has been awarded to Joseph McVay and Sons.

Woodstock.—Work on the new Canadian Pacific Railway station has been started. The building will be of pressed brick, with concrete and stone foundation, and will cost in the vicinity of $25,000.

NEWCASTLE, N.B., AND DISTRICT.

Mr. James Falconer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market was active in July, in almost every line. The lumber mills are all running full time and some of them day and night. The factories are busy also, with orders ahead for some time. Every man who wants to work can have employment. Building operations are active. Buildings in course of erection will all be finished before the fall. Good wages are paid.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers are busy hay making. The crop is above the average, the best in this section for a long while. A great deal of it will cut from 1½ to 3 tons to the acre. So far the weather has been unfavourable Wheat is not very good, but oats are a fine crop. Turnips are looking well, with potatoes not so good, the first of the season being wet and cold.

Fishing.—Fishing has been good this season in all lines. Salmon have been plentiful.

Lumbering.—Prices are satisfactory. Some of the lumbermen are now buying horses for the next winter's operations. The big fire in Campbellton which des-

troyed the mills of that town as well as nearly every building in the town will make lumber scarce.

CONDITION OF PARTICULAR TRADES.

All mechanics are busy working, full time at good wages in every branch of trade. Canoe and wagon makers are busier than for several summers, which is a good indication of prosperity.

QUEBEC, QUE., AND DISTRICT.

Messrs. P. J. Jobin and *E. Little, correspondents,* reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of July has been a good one for nearly all classes of labour. The final arrangements for the site of the railway terminal were about completed and a further demand for labour is expected. The contract for the dredging of a channel 300 feet wide by 15 feet in depth from the mouth of the St. Charles river to Dorchester bridge has been awarded to Mr. Dussault, of Levis. The Department of Public Works at Ottawa has accepted the tender of Mr. Horace Dussault for the construction of a wharf at Levis to cost approximatively $283,064.50. The sinking of the new caisson on the Quebec side of the Quebec bridge, for the foundations of the stone piers, built by Messrs. P. and J. Davis, was successfully carried out at Sillery Cove on July 7. The work of completing the road bed from the bridge site to the terminals was also commenced.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy hay making; the crop this year promises to be a very heavy one in this district and will be saved in good condition. The root crop will be a good one.

Railroad construction.—In addition to the work being prosecuted on the Transcontinental Railway, construction upon the HaHa Bay branch, on the road from Ste. Flavie to Mantane, and on the construction by the Quebec Railway Light and Power Company of its line from Quebec to Sillery was being pushed as rapidly as possible.

CONDITION OF PARTICULAR TRADES.

With the exception of lathers, plasterers and plumbers, the building trades were from busy to active. Electrical workers and linemen were quiet; the other metal trades were busy. Woodworkers were busy, but carriage makers and coopers were quiet. Activity was reported in the printing trades. Glove makers and boot and shoe workers were quiet; the other clothing trades were busy. Quiet conditions prevailed in the leather trades. Delivery employés, hotel restaurant, theatre and laundry workers were busy; furriers were quiet. Railway and steamboat employés were busy, as well as street railway employés, but ship labourers were dull, with longshoremen, cab drivers, hackmen, teamsters and expressmen active. The supply of unskilled labour was in excess of the demand.

SHERBROOKE, QUE., AND DISTRICT.

Mr. H. Logie, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

All classes of labour were well employed during July. There has been a big demand for men to work on the the new power plant building for the Sherbrooke Power and Railway Company. A day and night shift is in operation. Work on the extension of the railway system is about to be started; this will give employment to a large number of men. The various machine shops and all industries located here have been running full time, and there are orders ahead that will keep the staffs going for some time. The building trade is busy, and several large business blocks are going up, and there is also considerable activity with regard to private residences.

Transportation of freight over the Grand Trunk Railway was somewhat

light during the latter part of the month owing to the strike. Sherbrooke was not affected by the strike other than by the want of freight, but goods that had not started by this road came in by Canadian Pacific Railway. There were few if any, Sherbrooke men affected, as the none of the men on strike reside here. Wholesalers and retailers report business good. There was no change of hours. and no unrest among employers.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The wet weather had the effect or retarding the gathering of the hay crop. The crop this year, is above the average both in quality and quantity. It will give the farmers an opportunity of feeding more stock. The other grain and root crops are good. A severe hail storm did much damage to corn in the western section of the townships.

Lumbering.—There is little activity in lumbering. The pulpwood business is at a standstill and thousands of cords are lying in the woods or on the railway sidings. While there is a little more activity in lumber, that business is also quiet.

Manufacturing.—All concerns are busy.

Mining.—The mining industry is very active, both in the central Quebec asbestos district as well as in the copper properties around Sherbrooke. The cry at the large mine at Eustis is that sufficient help cannot be secured.

Railroad construction and employment.—Work on the street railway extension will be started as soon as the rails arrive.

CONDITION OF PARTICULAR TRADES.

All branches of the building trades are busy. Machinists, moulders and iron workers are fully employed, running full time. Electrical workers, linemen and blacksmiths are busy. The woodworking trade has been active during the month. Printers, pressmen and bookbinders were active. Journeymen tailors and garment workers were fully employed Bakers and confectioners and cigar makers were active, with ice cutters and drivers busy. Miscellaneous trades were active during the month. Street railway employés, cabdrivers, etc., were busy. Employés in the Canadian Pacific Railway shops were busy. Unskilled labour was in good demand.

DISTRICT NOTES.

Mansonville.—This village was visited by the most disastrous fire in its history, this morning, when eleven buildings were swept away.

Fire did damage to the amount of $10,000 at Bury, Que., on July 4, when the mills and lumber yards were destroyed.

THREE RIVERS, QUE., AND DISTRICT.

Mr. Joseph J. Ryan, corespondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There was little change in the labour market in July, compared with June, and labour generally was active.

The erection of a new factory for the Diamond Whitewear Company, was started early this month. Messrs. Hern, Roy & McLeod, who were awarded the contract from the Corporation of this city for the erection of a boulevard in reinforced concrete, have begun work. Nearly all lumber mills are working day and night, and the pulp-wood sawing mills are also very active. Wholesalers and retailers both report a good month. Rates of wages and hours of labour remain the same, and the best of understanding prevails between employers and employés.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy harvesting. The hay crop was extra good. Pasture is excellent, and fruit promises well.

Fishing was rather dull.

Lumbering.—Activity was the rule.

Manufacturing was very active compared with the same month of last year.

Mining.—Dullness prevailed.

Railroad construction and employment was quiet. The chief work consisted in repairing.

CONDITION OF PARTICULAR TRADES.

All branches of the building trades were fairly active, but not as active as during the same month last year.

Iron moulders, machinists, electrical workers, brass workers, blacksmiths, boilermakers and horseshoers had an active month. Bicycle workers were fairly active. Woodworkers, polishers, carriage and wagon makers, and pattern makers were all active, establishments working full time.

Printers, both newspaper and job, as well as machine operators, were all employed full time. Bookbinders were also busy. Journeymen tailors, garment workers and glove makers were very active, and boot and shoe workers were fairly employed. Bakers and confectioners, butchers and meat cutters, ice cutters and drivers, cigar makers and tobacco workers all report a good month. In the leather trades, dullness prevailed. Barbers, clerks, stenographers, delivery employés, hotel, restaurant and theatre employés and laundry workers were fairly active. Railroad men, freight handlers, steamboat men ship labourers, longshoremen, cab drivers, hackmen, carters, teamsters and expressmen were rather busy. Unskilled labour had a fairly active month.

DISTRICT NOTES.

The district will have one of the best hay crops on record. The grain crop also is looking exceptionally well. Cheese and butter factories are in full operation, and are obtaining fair prices. General stores and places of industry are all doing an active business.

SOREL, QUE., AND DISTRICT.

Mr. J. A. Chênevert, correspondent reported as follows-

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market in general, has been fairly active. Building operations were less active than in July, 1909, but a number of buildings are in course of erection, and bricklayers, joiners, painters and plumbers had a good month. There are plenty of orders in the machine shops and implement factories, and the staff is being increased. The building of new dredges, scows, tugs and other craft at the Government yard gives employment to a great number of workmen. Over 800 men are employed there at the present time.

Duhamel & Frère's shoe factory is crowded with orders, and the plant is to be enlarged if a sufficient number of workmen can be secured.

Business in the dry goods, grocery trades, &c., has been very active, and July has been a profitable month for labour, trade and industry.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Crops in the Richelieu district are in excellent condition, and dairy industry is very flourishing. Hay cutting is well advanced, it is of a fine quality and the yield will be almost double that of last year.

Manufacturing.—The Grand Trunk Railway Company strike has somewhat paralysed the coal trade, and manufactures are suffering in consequence.

CONDITION OF PARTICULAR TRADES.

Longshoremen were rather quiet this month, but may resume activity any day, several steamers being expected. Hotel and restaurant employés, laundry workers, railway employés, cab drivers, &c., had a good month. Iron moulders, machinists, blacksmiths, electrical workers, bakers, confectioners, ice handlers, butchers, &c., were very active.

DISTRICT NOTES.

Berthierville.—There are here several manufactures employing about 100 men at fair wages. Great activity prevails. The Melchers' Gin Distillery is working night and day, with plenty of orders.

St. Ours.—This locality is progressing rapidly. Three plants for the manufacture of combs, &c., are doing a good

business. There is also a sawmill working almost all the year round.

ST. HYACINTHE, QUE., AND DISTRICT.

Mr. Victor Phaneuf, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market during July was fairly active. Building operations were more active than during the same month last year, and for certain work the demand exceeded the supply. Sash and door factories were very active, working with a full staff. The leather industry was fair. The boot and shoe industry was quiet, but a very active season in the fall is anticipated. The manufacture of musical instruments is active. Repair work on the cathedral is proceeding rapidly, a large number of men being employed. On July 12, a by-law to borrow $60,000 to improve the water works system and put in machines to supply lighting power for the city, was adopted by a large majority. Retail trade was fairly active, and wholesalers report a good business. Banks report a good month and easy collections. There was no change in the rate of wages or hours of labour.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Crops throughout the district look well. Farmers receive good prices for their cattle and dairy products. Farm hands are in great demand and receive high wages, the demand being in excess of the supply.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters and joiners, lathers and plasterers, painters and decorators, paper hangers, plumbers, gas and steam fitters, stonecutters and builders' labourers had a good month. Iron workers and helpers, iron moulders, machinists, engineers, electrical workers, blacksmiths, boilermakers and horseshoers had a fairly active month. Woodworkers, upholsterers, varnishers, polishers, wood carvers, carriage makers and pattern makers were fairly active. Printers and pressmen and the allied trades had a good month. Journeymen tailors and garment workers were well employed. Boot and shoe workers had a rather quiet month. Bakers and confectioners, butchers and ice drivers had a good month. Tanners, curriers and leather workers were very busy. Barbers, clerks, delivery employés, hotel and restaurant employés and laundry workers had plenty of work. The month was a quiet one for railway employés on account of the strike of the conductors and brakemen on the Grand Trunk Railway. Draymen, cab drivers and expressmen had a good month. Unskilled labourers were well employed.

ST. JOHNS AND IBERVILLE, QUE., AND DISTRICT.

Mr. A. D. Pepin, correspondent reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of labour continues active. There is plenty of employment for all those who want to work, and it is hard to get men in some branches. Farmers are looking for men, and are not without anxiety about the hay and other crops; $2.50 to $3 a day, with board, are offered for cutting hay. The hay and grain crop is plentiful.

It is found difficult to keep up the work on the new bridge between St. Johns and Iberville, as farm work and the manufactures absorb all the available men. Manufactures are running full time. The general report is to the effect that business is good and prospects bright. Wholesale and retail dealers are busy.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are very busy cutting hay. The hay crop is twice as big as last year, and the grain and vegetable crop promises to be excellent. Cheese making is very active, pastures being in a very good condition.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters and joiners report an active month. Lathers and plasterers, painters and decorators, plumbers and steamfitters are rather quiet. Stonecutters and builders' labourers are very active. Iron moulders, iron workers and helpers all report a good month, and are in good demand. Nut makers, machinists, engineers, are well employed. Electrical workers and linemen report a good month. Blacksmiths, shipbuilders, shipwrights and caulkers are rather quiet at this time of year. Sheet metal workers, tool sharpeners, horseshoers and jewellers had a quiet month for the season. Woodworkers, upholsterers, varnishers, polishers, wood carvers, carriage and wagon makers, report an active month. Printers and the allied trades are all well employed and in good demand. Journeymen tailors, garment workers, hatters and glove makers had their usual quiet time at this season. Bakers, confectioners, butchers and meat cutters, ice cutters and handlers report an active month. Tanners and curriers, leather workers and saddlers report a fair month. Barbers, clerks, stenographers and delivery employés all report an active month. Hotel, restaurant and theatre employés and laundry workers are all active. Railway conductors, engineers, firemen, telegraph operators and trainmen are all very active, with the exception of the Grand Trunk men, who are on a strike. Switchmen, trackmen, freight handlers and steamboat men are active. Carters and draymen are active. Unskilled labourers are in great demand and hard to find.

MONTREAL, QUE., AND DISTRICT.

Mr. G. Audet, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Building operations during June, were somewhat less extensive than in May, and the value of new buildings was much lower than during April, but June, 1910, beats the record of June, 1909, as follows: June, 1909, 156 permits, valued at $1,103,855; June, 1910, 263 permits, valued at $1,430,028, or an increase of $236,173 for June, of the present year. The total value of new buildings during the first six months of the year was $5,607,237.

Clearing house figures for the first five months of the year show a total of $824,000,000, and are expected to reach two billion dollars this year.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were quiet during the first part of the month, but became active in the latter part, the strike being about over. The other building trades were active. All the trades were from active to busy, with the exception of railway conductors, who, on the Grand Trunk Railway System, were on strike.

MAISONNEUVE, QUE., AND DISTRICT.

Mr. J. F. Girard, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

July was as active as June, in spite of the bricklayers and masons' strike. Very few of the men engaged in these trades are now idle, although the strike has not yet been declared off, about 150 contractors having signed an agreement with their employés. Building operations are active, and there is general activity in business and industry in Maisonneuve, with the exception of the textile industry, which is rather quiet, and is the only branch not increasing its staff. One hundred and thirty permits were taken in the county of Maisonneuve alone, during the months of June and July, representing a value of $679,800 in new buildings, and sixty permits for repair work, representing a value of $48,260. There is no sign of any trouble in the district.

CONDITION OF PARTICULAR TRADES.

All the buildings trades were active. Builders' labourers are in active demand. The metal trades are from active to busy, iron moulders, blacksmiths and tinsmiths being in demand. In the woodworking trades, varnishers, polishers and carriage makers are very busy, the others being fair. The printing and clothing trades were active. Confectioners were rather quiet. The leather trades were well employed. Barbers and delivery clerks were in demand. Clerks and stenographers were active. Hotel and restaurant employés were active, and laundry workers fairly so. Railway employés were active, except on the Grand Trunk. All the other transportation trades were active and in demand. Unskilled labourers were in demand.

HULL, QUE., AND DISTRICT.

Mr. E. E. Cinq-Mars, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market for July has been active. Last May several labourers went West and this helped every one here to secure work easily in local industries. Industrial activity suffered a setback owing to Mr. J. R. Booth closing his large sawmill and lumber yard at Chaudiere Falls, on the 19th of July, immediately after the declaration of the strike of the Grand Trunk trainmen. Some 350 labourers from Hull city were effected. The average pay of these men was $2.50 per day, thus representing a daily loss of $875.00 in cash for some two hundred families. In every other industrial establishment, business is carried on on much the same lines as last year, with perhaps this difference, that the number of hands employed has slightly increased. The various branches of the E. B. Eddy Co., which employs the majority of our workmen, are busy, some of them day and night. There is little construction under way in the city, but several cottages are being erected in the vicinity.

Farming is reported to be active. The hay crop is heavy and it is nearly all cut. Grains and vegetables are plentiful.

OTTAWA, ONT., AND DISTRICT.

Mr. W. Gilchrist, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The feature of the labour market in the Ottawa district during July was the enforced idleness of 2,000 mill hands employed by J. R. Booth, during the first eight days of the strike of Grand Trunk Railway conductors and trainmen. The daily output of the mill, estimated at nearly 500,000 feet of lumber, has to be removed to piling grounds, from 2 to 5 miles distant, by cars, and with promptness, in order to keep the mill platforms clear. The tracks are owned by the Grand Trunk Railway Company, and when the strike occurred on that line the lumber movement stopped. Through the intervention of the Department of Labour, Mr. Booth finally secured train crews from the ranks of the strikers, and the mill immediately resumed operations. Shipping was suspended a few days longer so that some 200 men lost, in all, about two weeks. About 1,500 of the mill men reside in Ottawa, and the remainder in Hull. The loss in wages was estimated at $5,000 a day.

Another indirect result of the Grand Trunk Railway strike in Ottawa was the closing, for five days, of the Company's car shops, thus throwing 125 men out of employment. The Grand Trunk Railway Company claimed that at the end of five days the trains were running in sufficient numbers to warrant the repair shops operating. Twenty freight handlers were deprived of work for the same period and for the same cause.

The number of men directly affected by the strike in Ottawa was fifteen conductors, fifteen baggage men and thirty brakemen.

One hundred engineers and six turners and hostlers in Ottawa benefit by the increase of ten per cent. in wages granted by

the Canadian Pacific Railway Company. The former earned from $120 to $160 per month, and the latter were receiving $2.75 for a ten-hour day. The $5 per month increase to Canadian Pacific Railway commercial telegraph operators affects fifteen in Ottawa. Three chief operators get $10 advances.

A new schedule of wages signed by the master plumbers and journeymen increases the minimum wage 3 cents per hour, making it 39 cents. Eight-hour days will be in force from November 1 to May 1, with four hours on Saturday. During the remaining six months, the day will be nine hours with five hours on Saturdays. The agreement is for eighteen months, and affects 150 employés.

A demand of the plasterers for an increase from 40 to 45 cents an hour, commencing August 1, has not been granted. In all other branches of labour harmony reigns. The building trades are so brisk that several contractors are looking for skilled help. Business in retail trade was quieter than the previous month, presumably due to many families leaving the city for summer resorts. Money was plentiful, one evidence being an increase of $39,000 in the tax collections for the first half of the year, compared with the corresponding period last year.

The hardware merchants of the city, to the number of twenty-five, mutually agreed to close at six o'clock Saturday evenings, instead of nine, during the months of July and August. One hundred clerks benefit. The authorities undertook a rigid enforcement of the by-law requiring shops to close at nine o'clock on Saturday nights, with the result that many who had been allowed to ignore the regulation for the last three years were fined. Dealers most affected made a protest, and on July 29, the City Council amended the by-law, thus permitting druggists, confectioners and fruit dealers to continue business till eleven o'clock. The Allied Trades and Labour Council, and Clerks' Association, had made formal objection to changing the by-law.

The Beaver Company, of Buffalo, is in negotiation with Ottawa pulp manufacturers with a view to erecting a large factory in Ottawa for the manufacture of beaver board, a substitute for plaster and other interior house finishing.

The International Steel and Copper Plate Printers' Union held a convention in Ottawa, attended by some twenty-five delegates from various cities of the United States.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Crops were suffering for rain until the latter part of the month. The rainfalls which came then helped many parts of the Ottawa district. Dairy produce is plentiful, and meat is scarce and high priced.

Lumbering.—Lumber manufacture and shipping is threatened by low water. Shipping is quiet, and prices showed a downward tendency at the end of the month. All local lines of manufacturing were brisk.

CONDITION OF PARTICULAR TRADES.

The printing and allied trades are steadily employed. Garment workers (women) are in much demand. Butchers, bakers and ice dealers had a busy month. Harness makers were busy, and other branches of the leather industry well occupied. Barbers were in demand. Clerks were not much in demand. Passenger traffic was brisk on all lines of travel. Freight handlers were not quite so busy as during the previous month. The building trades were very actively employed Machinists, stove makers, linemen and electrical workers were busy. Other metal trades were employed to an average extent. The woodworking trades were busy. Unskilled labour was in demand for outside employment, and never became plentiful in the city.

KINGSTON, ONT., AND DISTRICT.

Mr. William Kelly, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Marked improvement characterized the labour market in Kingston, during the month of July, as compared with the

previous month, although conditions were not up to the corresponding period last year. The resumption of building operations, increased tourist traffic and large demands for manufactures contributed to this end. Building construction in Kingston for the six months ending June 30, amounted to $100,143, as compared with $174,860 in the same six months of 1909. This is in a large measure attributable to the recent strike of carpenters. For June the permits taken out called for $11,545, as compared with $40,875, in June, 1909. The returns for July show marked improvement. As the result of the tenders for the erection of the new metallurgy building at Queen's University being greater than the funds available, it has been decided to call for new tenders for a smaller building, so as to bring them within the $40,000 available. During the month, the Kingston Shipbuilding Company had its contract for a Grosse Isle quarantine steamer confirmed, and is getting ready for a busy time. The Orphans' Home is calling for tenders for the erection of an extension to cost $15,000. While other cities are complaining of a decreased tourist traffic, Kingston hotel men say that business is brisk, with the outlook for the next two months very bright. During the quarter ending June 30, the exports from the Kingston district to the United States amounted to $84,895.46, an increase over the same quarter last year. The present quarter is expected to be still larger, and the year's exports to constitute a record. The local street railway wage list during the summer months amounts to about $600 a week. During the past month it totalled over $2,400. Nothing of special interest developed at Kingston in connection with the Grand Trunk Railway strike. Passenger trains ran on fairly good time. Not much freight was handled until Monday, July 25. The local police are patrolling the outer junction. There have not been any disturbances. A rush of freight is inevitable at the conclusion of the strike.

On Monday, July 4, the early closing of the dry goods stores at 5 P.M., was resumed. Last year this movement prevailed during July and August. This year the time will be extended throughout September. About the middle of the month, Kingston grocers agreed to close their places of business at 1 P.M. of every Wednesday, and to take a half-holiday. The arrangement is working satisfactorily.

There were no other changes in hours of labour or rates of wages reported, and no strikes or lockouts.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are rushed. The hay crop is said not only to be large, but also of the best quality. One farm drew in over ninety loads in one day. A number of women are noticed working in the hayfields in this district.

Fishing was brisk.

Lumbering, manufacturing and mining were active.

Railroad construction and employment was active in this district. During the month a number of new switches were put in, and considerable ballasting, &c., carried on.

CONDITION OF PARTICULAR TRADES.

The building, metal, engineering, woodworking and furnishing trades reported an active month in all departments. Printers, clothiers, bakers, butchers, ice men, cigar makers, tanners and curriers, barbers, broommakers, hotel, restaurant, theatre and laundry employés had an active month. On account of the Grand Trunk Railway strike, some branches of the transportation business were dull; other lines reported a very active month. Unskilled labour was in good demand.

BELLEVILLE, ONT., AND DISTRICT.

Mr. H. C. MacDiarmid, correspondent reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Both skilled and unskilled labour was active during the month, the supply not being equal to the demand. There are no necessarily idle men in the city or district. The cement plant here cannot secure enough labourers, and is working night

and day. The local rolling mills and horseshoe factory are very active, as well as the lock works and brass factory. The building of new permanent pavements gave employment to a large number of skilled and other kind of labour. Work on the Trent Valley Canal is being pushed forward rapidly, and work will soon proceed on large additions to the hospital, as well as on a new $40,000 Young Men's Christian Association building. The Rock Drill Company had an active month. A large addition has been added to the Deacon Shirt Company's plant, and many more hands will be employed. Many men, women and girls were busy in the local canning factories, canning peas and berries, of which there was a good crop. Transportation was active by both rail and water, but the strike of the trainmen caused many of the railway men to be idle. The strike seriously affected the merchants, owing to the shutting down of the local shops. The banks reported money plentiful. There were no changes in hours of labour or in rates of wages. The only unrest in the labour market was the strike of the Grand Trunk Railway trainmen.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers report all grain and root crops in good condition. Hay is a large crop. The output of cheese is larger.

Fishing was active in some localities.

Lumbering was active in the northern part of the county.

Manufacturing was very active in all branches.

Mining.—A large number of men were employed at mining, a couple of new mines being opened up.

Railroad construction.—Many skilled men were engaged in erecting a new railway bridge, over the Trent river.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, painters and decorators, plumbers, stonecutters and builders' labourers were fairly active. Iron moulders and helpers, iron workers, blacksmiths, electrical workers, metal polishers, platers and brass workers had an active month. Boiler makers and horseshoers were fairly active. All branches of the woodworking trades had a busy month, especially coopers.

Printers, both job and machine operators, pressmen and bookbinders were all employed. Journeymen tailors report an active month. Bakers and confectioners, butchers and meat cutters, ice men and drivers and cigar makers had a very active month. Harness makers were all engaged. Barbers, clerks, stenographers, delivery employés, hotel, restaurant and theatre employés were all active. Laundry employés were busy. Railroad conductors, engineers, firemen, telegraphers, trainmen, switchmen and freight handlers were very active, up till the time of the strike of the trainmen. Steamboat men of all branches had a very active month. Longshoremen were busy. Cab drivers and hackmen were very busy, especially during the Masonic convention, and the Old Boys' Reunion week. Teamsters and expressmen were also busy. Unskilled labour was in active demand, at good wages.

PETERBOROUGH, ONT., AND DISTRICT.

Mr. J. Arthur Sharp, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market was very active throughout July, all branches of industry working full time, with complete staffs. There was marked activity in the building trades. Peterborough, like other places on the Grand Trunk System, was affected by the strike of conductors and brakemen, but the firms mostly affected expect to keep going for some time yet. Messrs. Adam Hall & Sons are advertising for tenders, and will erect a brick foundry and machine shop, and will employ about fifty hands. B. F. Ackerman & Company are building an $8,000 addition to their factory, and will employ from fifty to seventy-five additional hands; they will be given a fixed assessment of $15,000 for ten years. The George

Matthews Company is increasing the capital stock from the sum of $500,000 to the sum of $1,000,000. The increased capital will be used in extensions to the Company's branches. At the last fortnightly meeting of the Cheese Board, 3,763 cheese were boarded, but three factories refused to sell owing to the inconvenience in shipping through the strike on the Grand Trunk Railway. They were offered 10⅞ cents, but refused to sell. The season so far, has been a very successful one. The contract for the construction of sewers in the city was awarded, and will be built by day labour.

CONDITION OF LOCAL INDUSTRIES.

The farmers are very busy. The wheat crop in the best sections of Peterborough county will average from 35 to 40 bushels per acre. The farmers expect to have a good year, and the crops generally will be excellent. Haying is now about completed, and although in some instances the crop is light, it is on the whole, a fair average. Tomatoes and potatoes are coming along nicely, and there should be a plentiful supply.

Manufacturing.—Industrial establishments were all busy.

Railroad construction.—The construction work on the Canadian Northern Railway is progressing rapidly. The road is finished with rails laid and fences up from the Grand Trunk Railway Whitby branch to the Oshawa viaduct.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters and joiners, lathers and plasterers, were very busy. Painters have all they can do. Plumbers are busy. They held a meeting on the 26th of the month to consider the raising of prices to take place on the 1st of August. Activity prevailed in the metal trades. Electric workers were active. Woodworkers were well employed. Painters were active. Tailors had a good month. Bakers and confectioners, butchers and meat cutters were well employed. Leather workers were busy. There was a good demand for unskilled labour.

DISTRICT NOTES.

Lindsay.—Busy conditions prevail at the Baker Lumber Company's mills. They have a good supply of logs and plenty of orders.

TORONTO, ONT., AND DISTRICT.

Mr. Phillips Thompson, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

All classes of labour were well employed during July, excepting those affected by the Grand Trunk strike. So far as Toronto is concerned, the general industrial situation has not been much disturbed from this cause. The building trade continued very active, and a large number of civic undertakings were in progress, especially the construction of roadways and sidewalks. Work at the filtration plant at the Island has been delayed owing to the need of labourers for cement mixing, the contractors stating that they cannot obtain them. The number of building permits issued during June, was 1,200, representing an approximate value of $2,302,550, as against 860 for June, 1909, representing a value of $2,001,545. For the six months ending June 30th, the total number of permits issued was 3,032, representing a value of $9,840,648, as against 2,427 permits, representing a value of $8,829,375 for the first six months of 1909.

A test case under the new bread law fixing the size of loaves at 24 and 48 ounces, was decided by Police Magistrate Kingsford on the 29th. Since the law came into force some bakers have been selling "small bread," consisting of several small loaves unseparated, claiming the right to do so under the provision of the law that small bread not exceeding 12 ounces in weight may be sold. The Magistrate decided that small bread must not be sold except as detached loaves, as to permit of its being sold undivided would simply give dishonest bakers an opportunity of evading the law. A fine of $5 was imposed, the defendants, the

Nasmith Baking Co., appealing the case to a higher court.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were actively engaged in harvesting and haying. The crops were much benefitted by heavy rains, and fall wheat, nearly all of which was harvested by the end of the month, was an exceptionally good crop. Barley also yielded well. Hay turned out much better than was expected. Oats, peas and buckwheat were looking well, but potatoes were likely to be a short crop.

Manufacturing.—Manufacturing plants continued busy, though hardly as much so as earlier in the season, with orders in hand sufficient to ensure activity for some time. Shipments in some directions have been delayed by the Grand Trunk strike. The Canada Foundry Company has lately increased its working force, and reports a heavy demand for output. Structural steel was in active demand.

The Toronto Structural Steel Company is erecting a one-storey steel frame and metal building to cost $10,000.

The Pure Gold Manufacturing Company is putting up a two-storey factory and warehouse to cost $20,000.

The Wm. Neilson Company, Limited, ice cream manufacturers, are erecting a two-storey brick factory on Gladstone Avenue, to cost $35,000.

Railroad construction. — Preliminary arrangements are in progress for the depression of the Grand Trunk Railway tracks from Bathurst Street west to Sunnyside crossing, entailing an expenditure of $500,000.

The survey of the route of the projected Toronto & Eastern Railway has been begun, and it is expected that the line will be completed to Bowmanville this fall. The charter provides for a line from Toronto to Cobourg, with a branch from Oshawa to Lindsay, and an extension down to Oshawa harbour.

The first bridge on the Toronto-Ottawa line of the Canadian Northern Railway to Lindsay is being placed over the Don. It will have a total length of 200 feet.

CONDITION OF PARTICULAR TRADES.

The men engaged in the different branches of the building trade had plenty of work. The builders' labourers strike was called off on the 26th, nearly all the men having gone back at the wages demanded, 28c. per hour, the others being permitted to return to work without insisting on the employers signing an agreement to pay the increase. Blacksmiths, boiler makers, machinists, moulders, sheet metal workers, structural steel workers, brass workers, and other metal trades, were active. Jewellers and silversmiths had a good month. Woodworkers, upholsterers and piano makers had continuous employment. Printers were fairly well employed. Bookbinders had steady work. Custom tailors were quiet. Garment workers, hat and cap workers, and boot and shoe workers were active. The provision trades were steadily employed. Cigar makers had an active month. Leather workers were well employed. Hotel and restaurant employés, barbers and laundry workers were active. Clerks, salesmen and warehousemen had plenty of employment. Railroad employés on other lines than the Grand Trunk were very busy. Street railwaymen, expressmen and teamsters were active. The Conciliation Board appointed to consider the claims of the employés of the Toronto Railway for higher wages, and a new schedule of hours of labour, had held several sittings. Sailors, longshoremen, and all engaged in navigation, were very busy during the latter part of the month, owing to heavy freight shipments by water, on account of the Grand Trunk strike. Unskilled labour was well employed.

DISTRICT NOTES.

North Toronto.—A general strike of town labourers took place on the 28th, the men employed on road work demanding an increase in wages from 22c. to 25c. per hour.

NIAGARA FALLS, ONT., AND DISTRICT.

Mr. Hewlett Green, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

While the month of July was a period of great industrial activity, disturbing occurrences during the last ten days of the month made uncertain the conditions which may prevail during the ensuing months. The general strike of trainmen and yardmen of the Grand Trunk and Wabash Railways was participated in by a large number of employés of both roads resident here. A large number of other railway men, notably enginemen, shop and roundhouse men and freight handlers, were temporarily laid off because of the strike. The Ontario Power Company completed its new conduit and laid off over 900 men, about half of the total number employed by its construction department. These men were carpenters, concrete men and labourers. A considerable number were re-engaged after a few days for other work. Extension of the power house will employ several hundred men for months to come.

The strike and other reductions in the number of wage earners in and around the city affected local trade very seriously and rendered general industrial and commercial conditions uncertain. The city awarded further contracts for permanent sidewalk and sewer construction. A considerable number of men were employed in painting the cantilever bridge, and in replacing the steel trestle under the elevated tracks approaching the bridge with concrete walls and earth and rock filling. The price of natural gas was advanced 10 cents per 1,000 feet during August, but will be reduced to the old rate of 30 cents in the autumn.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The crops of hay and wheat were heavier than for several years previous. Harvesting was somewhat interfered with by frequent showers. Berry crops were all bountiful, but the late fruits will not give a full crop. Plums are particularly scarce. General farm and garden produce has been plentiful.

Manufacturing.—Manufacturing concerns were all well supplied with orders and the demand for female labour for factories was renewed.

Mining.—Companies engaged in handling natural gas were drilling a number of new wells in the Welland field.

CONDITION OF PARTICULAR TRADES.

The building trades were generally active, but the reduction in the number of skilled men employed on the power development works made future conditions uncertain. There was not enough building under way to employ a large number of additional men. The metal working and engineering trades were all active, particularly the electrical workers and linemen. The shirt, tie, suspender and corset factories were running full time with full staffs. Bakers and butchers were generally busy. The shredded wheat factory was running to full capacity. Fruit and vegetable canneries were preparing for the busy season when they handle the heavier fruits and vegetables. Hotels and restaurants had a very busy month and employment was good. The Grand Trunk-Wabash strike disturbed transportation arrangements, many men being idle as a direct or indirect result of the strike, while on other lines, both steam and electric, traffic was very heavy. Steamboat business was good. Teamsters and carters were still busy. Several hundred unskilled labourers having been discharged by the Ontario Power Company, employment for that class of men was scarce for a time at least.

DISTRICT NOTES.

Welland.—Ratepayers of the town defeated by-laws to expend $60,000 on waterworks extensions and $5,000 on new fire alarm system, but approved by-laws to aid a clothing factory, to build $13,000 worth of new sewers and to grant a franchise to an electric street railway. The clothing factory will be erected at once

and engineers for the street railway have laid out the lines for tracks. The town was greatly inconvenienced by the Grand Trunk strike, traffic of all sorts over the Welland division of the road being entirely suspended for some time.

ST. CATHARINES, ONT., AND DISTRICT.

Mr. Jas. A. Wiley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

General activity prevailed in the labour market during July, all branches of industry being well employed, and the supply of and demand for labour were well balanced. The building trades with few exceptions were all busy. Notwithstanding the large number of houses erected during the last two or three years, there is still a scarcity of houses for renting to the labouring class, and with the continual growth of the city provision for this demand will need to be increased. Sewer, curbing and sidewalk work was an important factor in employment during the month. The ratepayers will be asked to vote on two by-laws; the one to grant forty years' franchise of the use of the streets to the Ontario Power Company, to supply power and lighting; the other for right of way over Niagara Street, North street, a portion of Church street, and along King Street to the Buffalo, Niagara and Toronto Railroad Company, for an electric line from Niagara-on-the-Lake to and through the city to the West. The Grand Trunk Railway Company is asking for 1¼ miles of siding along Carlington street to serve the McKinnon Sash and Metal Works and the Welland Vale factory in the shipping of freight. The by-law granting the same has been given two readings. The Welland Vale Company has previously purchased the property known as the old race course of nearly 100 acres for the consolidation of its works, and will proceed with the work as soon as shipping facilities are assured. The N.C. & T.R.R. Company has constructed the line from Junction of Port Dalhousie line on Ontario street along Ontario street to Carlington street and is busy with a new road bed and trestle through Merritton, which will greatly improve the road when completed. About twenty men are busy straightening and deepening the new Welland canal between locks two and three; the work when completed will greatly facilitate traffic. The Reo Auto works are rushed with orders. All other factories and mills report trade good. The Union Bank has opened up a new branch in this city. A site for a new school for St. James ward has been purchased to supply a much-felt want, owing to the growth of the city in that direction. Business generally, both wholesale and retail, was reported good for the month. The firemen of the permanent staff and the corporation labourers have had an increase in their pay granted them, viz., eight per cent, in the labourers' pay, and a graded scale for the firemen.

The strike of Grand Trunk conductors and trainmen which took place on July 18, does not affect many men in this district, about eighteen all told, but has to some extent hampered transportation, particularly freight. The boat service and N.C. & T.R.R. and other electric lines are giving additional service which relieves the situation.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers were busy harvesting crops. Hay was a good crop. Wheat proved better than for many years. Fruits have done well so far, cherries yielding better than was expected. Raspberries improved with rain in the latter part of the month. Tomatoes were greatly improved by the rains and will be a good crop. Notwithstanding the increased acreage there has been devoted to fruits for several years past, the demand still exceeds the supply, showing the possibilities of expansion. The canning factories are all busy, in some cases working overtime.

CONDITION OF PARTICULAR TRADES.

The building trades were active to busy. The metal and engineering trades were active. The woodworking and furnish-

ing trades were active, with conditions fair for employment.. The printing and allied trades were busy. Journeymen tailors, boot and shoe workers were active. The food and tobacco preparation trades were active. Tanners, curriers, leather workers, saddlers, trunk and bag makers were active. Barbers, clerks, stenographers, delivery employés, hotel and restaurant employés and laundry workers were active. All lines of transportation were busy except on the Welland Division of the Grand Trunk Railway Company, which was affected by the strike of the conductors and trainmen. This division is not a very important one except for the transportation of grain from Port Colborne to Port Dalhousie, for the lightening of shipments through the Welland Canal.

DISTRICT NOTES.

Port Dalhousie.—Labour was well employed.

Merritton.—All mills and factories were running full time.

Thorold.—Satisfactory conditions prevailed in the labour market. Supply and demand were well balanced.

HAMILTON, ONT., AND DISTRICT.

Mr. P. Obermeyer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Factories were all working to their full capacity during July. The strike of conductors and trainmen on the Grand Trunk Railway was beginning to be felt by manufacturers at the end of the month, through the stoppage of the Company's freight service, but none was forced to close down, although the steel plant and smelting works were on the verge of idleness for want of supplies.

The building trades were never in better employment, all departments being full of work. The permits issued during the month aggregated in value $266,400, an increase of $61,000 over July, 1909. Of the total, $96,200 is for additions to factories and new factory buildings.

The Hydro-Electric Commission is building its transmission line through the city, and expects to deliver power to the city about September 1.

Bank clearings continue to show a large increase, those for the month being $8,356,881; the corresponding month, last year, showed $7,923,859.

The Public Library Board accepted the plans of a local architect for the new library building.

The Federal Gas Company, a subsidiary concern of the North West Gas Company, of Toronto, has applied to the city for a franchise to sell natural gas for domestic use at 40 cents per 1000 feet.

The new bread by-law, setting the loaves at 24 and 48 ounces went into effect July 1. This involved an increase in weight of ¼ pound and ½ pound respectively. No increase in price has been made.

About 300 men were affected here by the strike of conductors and trainmen on the Grand Trunk Railway which went into effect July 18. Several engine crews in the freight yard were also idle as a result of the strike.

CONDITION OF PARTICULAR TRADES.

Electrical workers have settled the wage controversy on a basis of 30 cents per hour for this year.

Brewery workers, after being on strike about a week, secured an agreement July 4, providing for an increase of about $1.50 per week, and a fifty-five-hour week in summer, fifty-hour week in winter, and time and one-half for overtime.

A new regulation put in force by the freight departments of the Canadian Pacific Railway, Grand Trunk Railway, and Toronto, Hamilton and Buffalo Railway, making five p.m. the latest hour for receiving freight, has shortened the working hours of their teamsters and freight handlers considerably.

The demand for labourers still keeps in advance of the supply.

Difficulty was experienced in getting sufficient berry-pickers. Canning factories also had trouble securing help. Women and girls were wanted. A shortage of female labour in the wholesale clothing factories was also felt.

A change in the wage schedule of the city fire department was made July 11. It provides for an increase of $5 per month for second-year men. The schedule is: First year, $45; second year, $50; third year, $55; fourth year (maximum) $67. Heretofore firemen received $45 per month the first and second years.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The berry season was short, owing to dry weather, and crops rather below the average. Strawberries brought about 10 cents quart; raspberries, 12½ cents; cherries, 10 cents. A hail storm, July 28, did damage to fruit west and south of the city. The Niagara district escaped.

Manufacturing.—Contracts are being let for the buildings of the Oliver Chilled Plow Works, and the dimensions specified indicate that the plant will be much larger than at first estimated. It is calculated now that the works when completed will represent an outlay of close to $2,000,000.

A mortgage for $10,000,000 was recorded at the registry office in this city, July 8, in connection with the taking over of the properties of subsidiary concerns by the Steel Company of Canada.

Arrangements are under way for the consideration of the four city stove foundries.

Railroad construction.—The promoters of the Hamilton, Waterloo and Guelph Railway deny that the project has been abandoned.

Two pay-as-you-enter cars have been received by the street railway company. The cars are in commission, but fares are collected in the old way, and will be until all the cars ordered have been delivered.

BRANTFORD, ONT., AND DISTRICT.

Mr. J. C. Watt, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour was well employed during the month, conditions comparing favourably with June and being better than July of last year. The iron trades were busy, though in some lines not so busy as last month, but the fall trade in these lines will soon commence. The building trades were especially busy, there being an insufficiency of men to meet the demands. During the six months since January building permits were issued representing $241,430.00, which is eighty-three per cent. more than for the same period of last year. There are 231 men employed by the city on local improvement work, constructing sewers, pavements, walks, street watering, etc., and more would be employed if they were available. During the past six months, Customs receipts increased $60,085.76. Barbers have raised the price of hair cuts from 20 cents to 25 cents. Twenty-four truckers and checkers at the Grand Trunk freight sheds went out on strike on July second for an increase in wages. Tuckers were getting 14½ cents per hour and asked for 16½ cents. Checkers were getting 16½ cents and asked for 18 cents. The Company offered the tuckers 15 cents per hour and the checkers $45 per month. The men were out a week and returned to work at the Company's offer.

The factories were not at first seriously affected by the strike on the Grand Trunk Railway, but at the close of the month several had ceased operations, on account of a lack of material and shipping facilities; about 400 men were affected.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers and market gardeners were very busy. There is a demand for farm labourers.

Manufacturing.—The mills and factories were busy and in some cases very busy. Prospects are very bright.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, joiners, lathers, plasterers, painters and decorators were very busy. Plumbers, gas and steamfitters were busy. Iron moulders, coremakers, machinists, electrical workers, metal polishers, buffers and platers, stove mounters, blacksmiths and boilermakers were busy, and in some

cases very busy. Linemen, sheet metal workers and horseshoers were active. Woodworkers, carriage and wagon makers and pattern makers were busy. Coopers were active. The printing and allied trades were busy. Tailors and tailoresses were active. Shoe workers were busy. Bakers and confectioners were busy. Cigar makers and tobacco workers were active. Leather workers and saddlers were busy. Barbers, clerks, delivery employés, hotel and restaurant employés and laundry workers were steadily employed, the latter were busy. Railroad trackmen were busy. Freight handlers were very busy before the strike. Street railway employés had steady employment. Teamsters and draymen were busy, cab drivers and carters were active. Unskilled labourers were in demand.

DISTRICT NOTES.

Paris.—The mills and factories were all busy. There is still a demand for operatives in the fabric mills.

GUELPH, ONT., AND DISTRICT.

Mr. Wm. Drever, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during July remained about the same as last month. The building trades were actively engaged and all outdoor workers were well employed. Manufacturers also report trade good, with factories running full time and some of them taking on additional men. The strike on the Grand Trunk Railway is causing a certain amount of inconvenience to some firms, partly overcome by shipping on the Canadian Pacific Railway. The Bell Piano and Organ Company has started work on its large new dry kilns. Wholesale and retail merchants reported a fair month.

The People's Radial Railway started work on the roadbed of the line which runs from Guelph to Berlin and a number of men are employed thereon. No settlement has yet been reached in the Guelph brussels carpet weavers' strike.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers had a very busy month. Haying is well advanced and fall wheat is being harvested. They report that the crops are not so heavy as last year, but fully up to the average.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons continued well employed. Carpenters and joiners are active, the supply meeting all requirements. Much the same may be said of lathers, plasterers, painters and plumbers. Builders' labourers were well employed. Iron moulders and helpers had a fair month. Electrical workers and linemen were very active, with stove mounters, blacksmiths and horseshoers busy. Woodworkers were well employed. Piano makers having a very busy month, also sash and door makers. Pattern makers had a good month and coopers a fair one. The printing and allied trades report a good month, no men being unemployed. Garment workers had a very busy month, while tailors report trade slack. Bakers and confectioners were busy, also hotel and restaurant and laundry workers. The demand for female help in hotels and factories was active. Street railway employés had a busy month, also teamsters and expressmen. Unskilled labour was fully employed.

BERLIN, ONT., AND DISTRICT.

Mr. R. F. Gofton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of July was more active in the labour market than the preceding one, all classes of labour being well employed, with an increased demand for skilled labour. There was a demand for cabinet makers, machine hands, female garment workers and boot and shoe workers. Baetz Bros. furniture

factory was destroyed by fire on July 6. Some forty men were thrown out of employment. The loss is estimated at $40,000. Eleven building permits were issued during July, valued at $19,800. Good progress was made with the Weber block and with the offices to be occupied by the Singer Sewing Machine Company's agent. Other buildings were also being constructed as rapidly as possible. Wholesale and retail business remained about stationary. There were no changes in wages or hours of labour.

CONDITION OF LABOUR INDUSTRIES.

Agriculture.—Farmers were busy harvesting their hay, wheat and barley. The hay crop was excellent. Wheat and barley were about an average crop. The oat crop promises to be very good, and the root crop above the average. Cherries and raspberries were scarce, the former being worth $1.35 a basket.

Manufacturing establishments were all busy, with some working overtime.

Railroad construction.—Good progress was reported on the People's Railroad, several miles having been graded on the route between Bridgeport and Little Germania; more men and teams are required.

CONDITION OF PARTICULAR TRADES.

The building trades were active as were also the metal trades. Woodworkers, upholsterers, varnishers and polishers were active, as were also wood carvers, carriage and wagon makers, car builders, pattern makers and coopers. The printing, clothing and food and tobacco workers were active, while saddlers were busy. Active conditions were reported in the miscellaneous and transport trades. Unskilled labour was very active.

DISTRICT NOTES.

Waterloo.—All classes of labour were busy, manufacturing establishments being fully employed, some working overtime. The Dominion Box factory was totally destroyed by fire on July 1; loss about $35,000. Good progress was made on the various buildings in process of construction. Five cabinet makers and two carvers are required at the Globe Furniture works, Waterloo.

Elmira.—Labour was well employed during July. Manufactories were very busy, additional help, both men and boys, being required at the co-operative furniture works. Good progress was made on the new building of the Great Western Felt Company, which is being built of white brick. The building will be 294 feet by 51 feet, two storeys high, with a basement. There will also be an additional boiler and engine room, the whole being estimated to cost $45,000. Twelve dwellings are under construction.

WOODSTOCK, ONT., AND DISTRICT.

Mr. J. Markey, correspondent, reported as follows.—

GENERAL CONDITION OF THE LABOUR MARKET.

The demand here just now is for help rather than for work, although the scarcity of labour is not yet a serious problem. Most of the farmers in this district seem to be fairly well supplied with farm help for the harvest, although there are complaints from some districts where men, hired earlier in the season, have since yielded to the call of the West. Bricklayers are needed in the buildnig trade and are hard to get. Contractors in granolithic sidewalks are also looking for help. Some of the factories want skilled labour, painters, blacksmiths and woodworkers.

All factories are reported fairly busy, although this is not regarded as the busy season for musical instrument manufacturers. A slight falling off is reported by some of the piano and organ factories, due in some measure to the uncertainty about the Western crops; but the foreign trade is keeping up very well, and the factories are all running. The furniture trade is very active. The Canada Furniture Manufacturers report the outlook fully three times as good at the present time as it was this time a year ago. Manufacturers of wagons and sleighs also

report business excellent and prospects very bright. They have some difficulty in securing skilled labour, especially painters, blacksmiths and woodworkers. The stove manufacturers report business very good. The outlook is strongly influenced by harvest conditions in the West. The Oxford Knitting Company reports business very active. The Company is putting up a large addition. One of the problems of this concern is to secure girl help.

Bean and Westlake, confectioners and biscuit manufacturers, have found business so good that they are enlarging and improving their premises.

CONDITION OF PARTICULAR TRADES.

There is considerable work in the building trades, and there is a scarcity of bricklayers, masons and ordinary labourers. Iron moulders and iron workers generally, are busy, and there is some demand from the wagon factories for the blacksmiths. Woodworkers, upholsterers, varnishers and the like are busy. There is a demand for woodworkers from some of the wagon factories. Business in the printing trade is reported satisfactory. There is some demand for compositors and press feeders. Business in the clothing trade is good. Bakers, butchers and confectioners are busy. Cigar makers also are busy. Tanners are active.

STRATFORD, ONT., AND DISTRICT.

Mr. Jos. T. Carlin, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market was very active during the month. The building trades continued active. All branches of industry were busy, excepting the Grand Trunk shops which were closed for five days, commencing on the 19th.

The Grand Trunk Railway trainmen in Stratford are: twenty-five conductors, fifty brakemen and sixteen yardmen. Goderich has four conductors and eight brakemen, and Palmerston has twenty conductors, forty brakemen and four yardmen on strike. Several local factories are having drays to team their goods to St. Mary's, 12 miles distant, the nearest Canadian Pacific Railway station for shipment. Three by-laws will be voted on on the 29th. (1). To guarantee the bonds of Dufton, Limited, to the extent of $12,000. (2). To grant privileges to operate a line of electric railway in the city and neighbourhood. (3). An electric plant by-law whereby the Stratford Gas Company's plant will be purchased by the Light and Heat Commission on a yearly payment of $4,380 for ten years.

The Customs returns at Stratford were $11,208.36, a slight advance over the same month, of 1909. The Excise total was $4,379.59. No changes in rate of wages or hours of labour were reported.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers are through haying, and fall wheat cutting has commenced. Wheat is reported a very good crop, both in grain and straw. Market prices are:—

Butter, 20 cents, per lb;
Eggs, 20 cents a dozen;
Chickens, 60 to 80 cents, each;
New potatoes, 30 cents a peck;
Wheat, $1, per bushel;
Oats, 40 cents, per bushel;
Barley, 45 cents, per bushel;
Peas, 70 cents, per bushel.

Manufacturing.—The industries have continued employing the usual number of men.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, lathers and plasterers were active. Painters and paperhangers, plumbers and stone cutters and builders' labourers were busy. Iron moulders, workers and helpers were active. Machinists, blacksmiths and horseshoers were busy. Woodworkers, upholsterers, varnishers and carriage makers were active. Coopers did a good trade. Printers were busy, especially job hands. Journeymen tailors were steadily employed and factory workers were very busy. Bakers and confectioners and ice cream parlor work-

ers were very busy. Cigar makers report trade very good. Barkers, clerks, stenographers and delivery employés were active. Hotel, restaurant and laundry workers were busy. Railroad conductors, engineers, firemen, trainmen, switchmen and freight handlers were very busy until the nineteenth; since then, owing to the strike, they are quiet. Cab drivers, draymen and teamsters have been very busy. Unskilled labourers were well employed.

DISTRICT NOTES.

Mitchell.—Flax pulling has commenced. Flax is reported a very good crop, giving work to a number of men and boys.

Seaforth.—It is proposed to submit three by-laws, one, to enter into an agreement with the Hydro-Electric Power Commission to furnish the town with 400 horse-power; the second, to provide for the raising of $25,000 for the purpose of erecting a power house and power plant for street lighting; the third provides for the guaranteeing by the town of the bonds of the Bell Engine and Thresher Company to the amount of $50,000, the town to be secured by a mortgage on the plant. The by-laws will be voted on August 8.

LONDON, ONT., AND DISTRICT.

Mr. Alex. Woonton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market has been of the best throughout the entire month. In the factories and foundries business was extra good. In the building trades there was not so much stir, and until the strike of Grand Trunk Railway trainmen, business was very good on the railroads. On the hydro-electric power lines entering the city, and on the local part of the same a scarcity of help was noted, and the city was offering $2.00 for young, able-bodied workers. The strike of the Grand Trunk Railway switchmen and trainmen, did not paralyze shipping here as in some other quarters, this city having four trunk lines entering it, namely, the Grand Trunk Railway, Canadian Pacific Railway, Michigan Central Railway, and Père Marquette, giving shippers ample facilities for getting their freight out. The passenger traffic was not altogether suspended at any time and, with the exception of a few trains cancelled, and the trains running behind time, continued uninterrupted but freight trains were completely at a standstill for a whole week. On account of the strike the Grand Trunk Railway car shops were closed for four and one half days, and the 415 hands were forced to be idle.

At a special meeting of the City Council, held July 15, the following petition was presented.

"*The Mayor and Aldermen, City of London*:

"Sirs,—

Whereas a strike of the trainmen in the employ of the Grand Trunk Railway Company is threatened, and if such be allowed to take place, it will cause the car shops in this city to be closed, and upwards of 500 hands thrown out of employment;

"Now, we, the undersigned employés of the car department of the Grand Trunk Railway Company, hereby petition your honorable body that you will at once request the Minister of Railways and Canals for Canada, or such other authority as may be proper, to cause an inquiry to be made into the differences alleged to exist between the trainmen of the Grand Trunk Railway Company and the said Company, and the cause thereof; and for that purpose, under his hand and seal of office, to establish a committee of conciliation, mediation and investigation, pursuant to Section 12, Chapter 96, of the Revised Statutes of Canada, 1906."

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The harvest outlook for this locality is of the best, all kinds of grain doing well, and a heavy crop of hay having been cut. No kind of farm help can be secured, except recent arrivals from England, who have no experience.

CONDITION OF PARTICULAR TRADES.

Bricklakers and carpenters are all working. Lathers and plasterers are very busy. Painters are slack. Iron moulders, iron workers and machinists are busy. Electrical workers are exceptionally busy, as are linemen and boiler makers. Carriage and wagon workers report trade good. Car builders have a lot of work on hand. Coopers are busy.

The printing trade has been exceptionally good, especially on the newspapers, and linotype operators have been in demand. A new scale of prices went into effect with the typographical Union at the first of the month, which gives a general increase of $1 per week to all printers. Tailors are slack at present, this being their off season. Garment workers are busy. Boot and shoe workers are very busy. Cigar makers are busy. The local biscuit factories report business good, and a shortage of female help. Tanners are very busy. Until the strike of the Grand Trunk Railway business was slow on the Canadian Pacific Railway, but now they are so busy the men can get but little rest. Teamsters are busy. There seems to be plenty of work for unskilled labour.

ST. THOMAS, ONT., AND DISTRICT.

Mr. J. A. Killingsworth, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The peaceful conditions usually prevailing in labour circles in the city were disturbed to some extent when the Wabash trainmen on the Grand Trunk Railway, on the division between Windsor and Fort Erie went on strike, resulting in a tie-up which was complete on this division for three or four days. Practically all train employés, including enginemen and shopmen, were compelled to observe a period of idleness, until such time as negotiations were concluded, which resulted in the Wabash trainmen going to work. While no increase was granted in wages the Wabash men will in future, be classified as Wabash employés and will be permitted to take grievances before the Wabash officials for readjustment. Heretofore this privilege was denied the men by the Wabash officials, and as the Grand Trunk officials also refused to recognize the grievance committees of the trainmen, the men were practically without representation in matters affecting their rights as employés. The men on resuming work were given to understand that they would not be requested to handle Grand Trunk Railway freight and that only Wabash business was to be considered. The men formerly working as joint Wabash-Grand Trunk Railway men will hereafter work as straight Wabash employés. The strike on the Grand Trunk Railway, now that the Wabash employés have resumed work, will not affect this city to any extent, as there are very few Grand Trunk Railway men in service in St. Thomas.

Re-organization of the Trades and Labour Council was brought about at a recent meeting and a charter has been granted the Council permitting affiliation with the Dominion Trades and Labour Congress. All classes of mechanics are now represented, and unusual enthusiasm is manifested in labour circles since the re-organization. Railway traffic men on the Père Marquette and Michigan Central Railways report a busy month. The strike on the Grand Trunk Railway has resulted in a considerable amount of freight being diverted over these lines, and also in a considerable increase in the number of passengers handled. Building continues active in this city although the present supply of houses is greater than the demand. Times are generally good in and around St. Thomas, and the demand for labour is brisk.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The crops in this district are reported to be first class. In some parts of the district it is claimed that the harvest will be the best in seven or eight years. There has been plenty of rain and the weather conditions have been altogether favourable for a bountiful harvest.

The conditions governing local industries are normal; there being little change from the preceding month. All hands appear to be well employed. There is talk of the Nursery Shoe Company extending its plant in the near future.

CONDITION OF PARTICULAR TRADES.

All mechanics employed in the building trades have been well employed during the month of July. Iron moulders, iron workers, machinists and railway

shop employés have been well employed. Other tradesmen have had a normal month, and there are no idle men who are desirous of getting employment. Unskilled labour has been well employed.

CHATHAM, ONT., AND DISTRICT.

Mr. Alex. Gregory, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market showed a decided improvement over the preceding month. In the building trade the demand for skilled labour was very good. A larger number of contracts were awarded, including the Knights of Columbus Hall ($15,000); church ($4,500); Chatham Fruit Growers, Cold Storage plant ($10,000); and several smaller ones. Prospects are for a good fall building trade. The carriage and wagon factories are very busy. The William Gray & Sons Carriage Company had to send out jobs to other factories in order to meet the demand. The Chaplin Wheel Works and the Wolverine Brass Works closed down for stock taking for two weeks. A large number of men were idle the first half of the month, but have resumed work, and both factories are very busy. The Walker Shirt and Pant factory is now running, employing principally girls. The International Harvester Company having purchased the outfit of the Chatham Wagon Works, will proceed at once to enlarge the plant by fully one-third. There were no changes in hours or wages in July.

CONDITION OF PARTICULAR TRADES.

The various skilled trades were busy, with unskilled labour well employed.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were very busy harvesting, but find it hard to secure harvest hands, wages running from $1.50 to $2, with board. It is estimated that the hail storm on the twenty-eighth damaged the crop in the district to the extent of $100,000; corn and sugar beets being the greatest loss, many fields being a total loss. Apples will be the lightest crop in years.

WINDSOR, ONT., AND DISTRICT.

Mr. D. Mitchell, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

General activity prevailed in the labour market during the month. Complaints were frequent of the shortage of labour, both skilled and unskilled. The building trades are very busy with plenty of work ahead, and more coming out every day. The Bell Telephone Company has a large gang of men changing its overhead to an underground system. Wholesale trade is active. The strike of trainmen on the Grand Trunk Railway and Wabash Railway threatens to be serious, as it affects about 200 in this city.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers and market gardeners are busy harvesting their crops, which are turning out better than they expected.

Manufacturing.—All mills and factories were running full time, with plenty of orders ahead.

Railroad construction.—The Michigan Central tunnel is about completed. Only a few men are now employed.

CONDITION OF PARTICULAR TRADES.

The building, metal, engineering and woodworking trades were active, with a demand for men in almost every trade.

The printing trade is very active; there is a demand for printers. Journeymen tailors and garment workers are very busy. Leather workers are busy. Barbers report an active month. There is a demand for clerks, stenographers, delivery employés, hotel and laundry workers. Transportation employés are very busy. Unskilled labour is in demand.

SAULT STE. MARIE, ONT., AND DISTRICT.

Mr. F. A. Denman, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour was well employed during July. In fact there was a shortage in most lines. Taken altogether, the town has never known a more prosperous season. The building trades were very brisk, building operations being on a large scale, but building material, especially brick and cement were hard to procure.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The opening of a farmers' market in town has had a good effect on agriculture and kindred lines in the district.

Fishing.—Normal conditions prevailed.

Manufacturing.—The various manufacturing plants were busy during the month. Construction work in connection with the Lake Superior Corporation's enlargement of plants, docks, &c., was being rapidly advanced.

Railroad construction.—Extensions to the Algoma Central Railway were progressing rapidly.

CONDITION OF PARTICULAR TRADES.

The various skilled trades were busy, and unskilled labour was in good demand.

PORT ARTHUR, FORT WILLIAM, ONT., AND DISTRICT.

Mr. Fred. Urry, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

For the month of July the demand for labour has kept every branch actively employed. The demand for general abourers, owing to so much street improvement, has been great, and wages range from 20 to 25 cents an hour.

While no new industries have been started, buildings for some are in active progress in both cities. The Canadian Stewart Company have day and night shifts of men working at the dry docks, Port Arthur, and great progress is being made in the excavations and dock works.

The building trades are exceptionally busy, and all craftsmen fully employed, with a demand for men. Business in the retail and wholesale trades is good. Wholesale houses report increased business over preceding years. Many new retail stores have been started, and seem to have gained a foothold, while established firms are doing well, some enlarging their premises.

With the exception of the Brotherhood of Railway Carmen, at the Canadian Northern Railway Company sheds, of Port Arthur, there is no unrest.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers in the vicinity of the two cities are yearly becoming an important factor in the life and wealth of the district. This year, the hay crop is very poor, owing to dry weather, but with the advent of wet weather during July the root crops are doing well, many of the farmers plowed up their land and sowed to millet on the advice of the Agricultural Department, and will likely get sufficient feed for their cattle. The agricultural industry of this district is one that should be fostered, the country being rich in mineral wealth. A persistent effort is being made to get better trunk roads for the district.

Fishing.—Arrangements are in a forward state for a fish hatchery on the island at the mouth of Currant river, Port Arthur.

Lumbering.—The sawmills and lumber yards have been kept very busy, owing to active state of building trade. Two new companies have opened up lumber yards in Port Arthur, and this has had the tendency to keep the price of lumber down. Other industries established here have been going at their regular rate. Work at the coal docks, elevators and freight sheds has been active all the month.

CONDITION OF PARTICULAR TRADES.

All the building trades have been kept busy during the month. Every craftsman has been in demand, and all trades unions report all their members fully employed. General labourers are greatly in demand this month. Machinists and engineers, steam enigneers, electric workers, linemen, sheet metal workers have all been actively employed. Printers, pressmen and photo engravers have all been busy, and are looking forward to busier times. Bakers, confectioners, ice men, &c., have had a busy month, as also have clerks, stenographers and delivery employés; also hotel, restaurant and theatre employés. Laundry workers have been active, there is a large tourist traffic in July and August, and the hotels are all busy. Railway men generally, and freight handlers have been active, also steamboat men, steamboat firemen, ship labourers, longshoremen, street railway men, draymen, teamsters and expressmen. Unskilled labour has been in demand.

The Sailors' Mission of the Great Lakes has opened a reading and recreation room for the sailors and longshoremen on the water front, at Port Arthur. This is the first thing of the kind that has been done, and it is a great boon for the men

WINNIPEG, MAN., AND DISTRICT.

Mr. John Appleton, correspondent, reported as follows:——

GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally, has been well employed during July. This is usual in the city of Winnipeg itself. Large numbers of extra hands are required by business houses making exhibits at the annual fair, and a great many workmen are employed in getting the necessary buildings and other equipment into repair.

On the part of employers generally, there has been a tendency to retrench, and employés leaving their work, in many cases, have not been replaced. This policy has been followed because of the uncertainty with regard to the crop.

Trade has shown no sign as yet of declining. In the case of binder twine, it is reported that fully one-third of the orders have been cancelled. Where the crop is fair the straw generally, is light, and will not, in consequence, consume as much twine as the crops of the last few years.

Bank clearings continue to show expansion. For July, the returns for the month are $78,409,478, which is 54.6 per cent. greater than for the same month of last year. Clearings for the first seven months of the present year show a gain of thirty-three per cent.

During the month there have been no general changes in the rates of wages. Some slight advances have been made to permanent officials of the city. The engineer of construction said that in the beginning of the year progress in public works had not proceeded as rapidly as he would like, because of the difficulty in holding experienced men at the rate of wages paid.

On July 7, at 11.30, approximately 500 carmen employed in the Canadian Northern Railway Company shops, at Fort Rouge, went on strike. The men refuse to accept the award of the Conciliation Board appointed at their instance. On July 24, a signed statement was issued by the men to the following effect:—

"The award of the Conciliation Board could not be accepted for the following reasons: Only one demand of the men was awarded, namely, the nine-hour working day, and without any increase of pay, this meant a ten per cent. reduction. After the evidence submitted and the statement made by the Chairman of the Conciliation Board that the cost of living had greatly increased, we cannot conceive how any three sane and intelligent men could sign such an award. They evidently signed a schedule presented to them, prepared in such a manner as to show an increase of 1 cent, and 1½ cents per hour to some men, but in reality a reduction of from $4 to $20 per year to those who receive the same, as the over-time for Sundays and holidays which has been established for eight years is taken away, and the working hours increased in their case to eleven hours per day.

"In the case of carpenters and other

mechanics in 1906, the wages paid by the Canadian Northern Railway Company were the same as they are paying now, and the rate of pay in the city at that time was 35 cents per hour. To-day the rates ruling in the city are 45 cents per hour, and 33 cents per hour is still the amount paid by the Canadian Northern Railway Company.

"A similar state of affairs exists in the other trades, namely, coach painters, tinsmiths, steamfitters and wood machinists.

The men are still on strike, and there does not appear to be any signs of a settlement. The Canadian Northern Railway Company trains are running. By the men it is claimed, that the service is not satisfactory.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Recent rains over the entire West have improved the crop outlook, but it is still the opinion of bankers and others who are in communication with every district throughout the three Prairie Provinces, that the grain crop will be very much below that of last year. The general opinion appears to be that the yield of wheat will be between 85,000,000 and 90,000,000 bushels. The districts which have suffered most generally from the drouth are southern Manitoba and southern Alberta. A serious aspect of the situation in these districts is the shortage of hay and feed for cattle. Some of the southern Manitoba farmers have secured millet seed to sow if the weather is suitable. In southern Alberta, in the Lethbridge district, the Canadian Pacific Railway Company will extend one of its branches, and one of the conditions under which the contract was let was that only teams of farmers should be employed.

Railroad construction.—The railroad contractors state that the supply of men during July, has been very much better than they expected. The cause of this exceptional condition at this season of the year is the failure of the crops in North Dakota, from which point many men are coming in search of work.

CONDITION OF PARTICULAR TRADES.

The final returns of building permits issued for the month of June, showed a very decided increase over the corresponding month of last year, as shown by the following comparative table:—

COMPARATIVE FIGURES.

Period.	Permits.	Buildings.	Cost.
June, 1906	416	501	$1,436,450
" 1907	337	412	1,110,600
" 1908	196	229	802,200
" 1909	418	490	2,042,850
" 1910	373	416	2,406,600
Six months—			
1906	1,835	2,251	$7,058,150
1907	1,606	1,907	4,443,850
1908	714	807	2,238,250
1909	1,305	1,545	5,468,850
1910	1,789	2,201	9,835,500

The permits for July, it is estimated, will exceed $1,250,000. Generally speaking, all workmen in the building trades are fully employed.

All the foundries are busy, and are employing staffs fully as large as in any previous year. The Dominion Bridge Company are extending very materially, their buildings and plant.

NOTES.

The Canada Cement Company announces that a cement mill with a capacity of from 2,000 to 3,000 barrels, will be erected at or in the vicinity of Winnipeg.

The Power Construction Department of the city of Winnipeg will shortly commence the laying of conduits for the transmission and distribution system within the city of Winnipeg. Tenders for this work have already been called for.

Tenders have been awarded by the City Council of Winnipeg for the erection of an overhead bridge between Brown and Brant streets, which will cross the yards of the Canadian Northern Railway Company.

The City Council of Winnipeg has instructed the city engineer to construct two new wells to increase the water supply of the city.

BRANDON, MAN., AND DISTRICT.

Mr. E. Fulcher, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market is not so good at the present time

as during the early summer. This is especially true of the building trades; many of the buildings that were commenced early in the spring have been rushed to completion, and some of the larger buildings are not properly under way yet. The bricklayers are slack, more than two-thirds of their number being idle.

Several large warehouses are being erected this summer. The Cockshutt Plow Company is erecting a four-storey building and the International Harvester Company a six-storey warehouse. The men employed on the Clement block and on the Nation and Shewan addition are working overtime. Messrs. Hanbury are working overtime at their sawmill.

A disastrous fire occurred on the 23rd at the Empire Hotel. Two additional storeys had been put on the building and were nearly completed. The building took fire in the upper flat and the top two storeys were consumed, the north and west walls collapsing, the remainder of the building being severely damaged by water. The damage is estimated at $36,000.

Agriculture.—The crops have suffered severely from drouth. The average yield is not expected to be over 10 bushels to the acre. The Experimental Farm started wheat cutting on the 25th.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were very dull, but carpenters and joiners were busy, and lathers and plasterers, painters, stonecutters and builders' labourers very active. Iron moulders and machinists very busy. Cigar makers, railroad employés and unskilled labour were also busy.

REGINA, SASK., AND DISTRICT.

Mr. W. B. McNeil, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During the month of July, labour in all branches was well employed, there being a supply barely meeting the demand, especially in the case of bricklayers and plasterers. There was a marked improvement over the preceding month, and over the corresponding period of last year. From a commercial standpoint the situation has improved vastly; the staff of freight handlers, etc., having frequently to be increased to cope with the advanced and constantly increasing traffic.

Trade in general, wholesale and retail, is very active, as is marked by the erection of numerous warehouses and more modern stores.

The Dominion Trust Company has decided to locate here, and a seven-storey block is well under construction,

Tenders are being called for the erection of a Public Library at a cost of $40,000, and the foundation of which is to be put in this year.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The recent rains have considerably lessened the anxiety which was prevalent among the farmers of the surrounding districts. The absence of rain for so long a period has already had such an effect on the crops that many acres have been plowed under in certain districts. Generally speaking, farm help is well employed.

Manufacturing.—The output of the Automobile Works is on the increase, as is evidenced by the increased staff of workmen. It is reported by one firm that up to the present, business stands 75 per cent. ahead of that done during the whole of 1909. The soap factory reports trade very active, as a result of which labour to a larger extent has been employed.

Railroad construction.—Very active conditions prevail throughout the Province, especially in the local division, where many new tracks are being laid to cope with the increased freight traffic, also spur tracks which run to various warehouses now in construction.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were very active during the month, the demand

being far in excess of the supply. Carpenters and joiners were well employed, and meeting all demands made upon that branch of the building trade. Lathers were active, and plasterers were much in demand. Painters and paperhangers were well employed, and the demand was somewhat in excess of the preceding month. Plumbers, steamfitters and stonecutters were very active. Builders' labourers were kept busy. Steam engineers were very little in demand, but electrical workers had a good month, as also did the bicycle workers. Upholsterers were much in demand, and the carriage and wagon makers were kept fairly busy. The demand for the various branches in the soap factory for labour, continues to increase, and the prospects for the fall are very bright. Printers and pressmen were active, while electrotypers and bookbinders were in demand. The garment workers reported trade as fair, having fallen off during the month, though comparing very favourably with the corresponding period of last year. Bakers and butchers had a good month, and the cigar makers report a poor month, but this being a new branch of industry in Regina it is anticipated, as time goes trade will improve, as its establishment becomes more popular. Barbers and stenographers were well in demand, and delivery employés were active. An agreement has been entered into between the deliverymen and the storekeepers that on and after July 25th, 1910, no orders will be taken for delivery the same day after 4 p.m. and 8 p.m. on Saturdays until December 31; after that date till May 1, 1911, 6 p.m. on Saturdays. Hitherto it has been 6 p.m. and 10 p.m. on Saturdays. This change enables the delivery men to get through their days' labour at an earlier hour. Hotel and restaurant employés were well employed. Laundry workers in all branches being much in demand. Owing to the recent arrival of an exceptionally large number of Austrian emigrants, many of the unskilled labour class find it difficult to secure employment.

MOOSEJAW, SASK., AND DISTRICT.

Mr. T. Backus, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market during July was very brisk; nearly all departments of industry being well employed. Those engaged in the building trades were in good demand; there was a call also for unskilled labour for street work. A start has been made on street paving. The concern engaged in this work will also undertake the laying of the street railway lines along the paved area. There is every prospect at this time that 5 miles of the electric read will be in operation this year.

Work on city improvements during the month has been above the average. Good progress is being made in the laying of cement sidewalks, and house connections are being made at a fair rate. Altogether the city at this time presents a scene of healthy activity, probably unprecedented in any previous year.

Four money by-laws were approved by the ratepayers during the month, calling for the expenditure of $412,000. Of this, $375,000 was for sewer and water extensions, and the construction of a sewerage disposal plant. The remainder was for sidewalks and road improvements.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The weather during the past month has been unfavourable for the crops, lack of moisture and dry weather with hot winds having worked considerable damage in many quarters. On the whole, however, this district will produce a fair yield. On the well cultivated farms near the city the grain looks promising, and here and there some large crops are expected. It is in the "south country" and in other portions of the district where the land has not yet reached a high state of cultivation that light yields will be experienced. The wheat

is fast heading out and an early harvest is assured. In two weeks' time cutting should be general.

CONDITION OF PARTICULAR TRADES.

Carpenters, bricklayers, stonemasons, painters and plumbers have all been very active during the past month. Builders' labourers were also busy. Machinists and engineers were fairly busy, also electrical workers. Printers and pressmen had a good month, and there were no idle hands in the city. Transportation hands were all well employed. Boiler makers and iron workers generally, were fairly busy. Butchers, meat cutters, confectioners, bakers, barbers, store clerks and delivery employés were all active.

CALGARY, ALTA., AND DISTRICT.

Mr. Edwin Howell, correspondent, reported a follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

All classes of skilled labour were well employed, except masons, stonecutters and carpenters, of which there are a number of unemployed. Trade was quieter than the preceding month, but considerably brighter than the at corresponding month of 1909. A by-law has been recently passed to erect a new power station in Victoria Park, for which tenders are to be called for shortly. By-laws were also passed for water mains and sewer extensions. The Canadian Northern Railway Company is making preparation to build the new depot. Price-Jones, a British firm, has started to erect a new departmental store. A new brick-making plant is in process of organization. It is estimated that the increased value of the grain, with the increased acreage, will almost bring crop returns up to last year, notwithstanding the drought. Dairy farmers are having difficulties, owing to the rise in price of feed, and it is anticipated that dairy produce will rise in price in consequence. John Lineham's and the Eau Claire Company's timber limits have suffered losses owing to bush fires. The Canadian Northern Railway Company is rapidly approaching the city. The Grand Trunk Railway Company is also negotiating for an entrance. Wholesalers and retailers report a decrease, as compared with the preceding month, but much more active conditions than at the corresponding month of last year. Bank clearings for July, were $12,371,753, an increase of $4,104,196 over corresponding period of last year, which was $8,267,557. Building permits were for July, 1909, $182,280, as against $520,098, an increase of 284 per cent. Customs returns are: July, 1910, $81,156.52; July, 1909, $48,800.60; increase, $32,355.83.

CONDITION OF PARTICULAR TRADES.

Bricklaying has been very active and masons were fairly well employed, with a few unemployed. Carpenters and joiners report twenty per cent. unemployed. Lathers were fairly well employed. Plasterers are in demand at present. Painters still continue busy. Plumbers report a few unemployed. Gas and steamfitters were well employed, but stonecutters report fifty per cent. unemployed. Builders' labourers were active. Iron moulders busy. Other iron workers and helpers, machinists and their helpers were fully employed, but electrical workers were very quiet, with linemen busy. Blacksmiths, boiler makers, sheet metal workers, horseshoers, jewellers all report trade very good.

The printing and allied trades report a busy month. Clothing trades also were busy, as were the food and tobacco preparation, leather and miscellaneous trades. Railway hands were well employed. For unskilled labour there was a good demand.

LETHBRIDGE, ALTA., AND DISTRICT.

Mr. J. M. Ritchie, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Both June and July have been dull

months, considering the time of year. The supply of labour has been greater than the demand. The failure of the crop has had much to do with this. Work has been started on the Provincial Court House, giving work to bricklayers and stonecutters. The new jail is giving work to concrete workers, &c. There has been no exceptional activity in any class of work during the last two months. The wholesale trade has been good, but retail trade has been dull. Rates of wages have been inclined to drop for unskilled labour. The labour market has been free from unrest.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Owing to the excessive dryness of the season, there has been little done in breaking up new land. The prospects are not good, even where the straw is long.

Manufacturing.—Work is confined to joinery for buildings and foundry work for repairs.

Mining.—Great activity prevails. The Galt mines are working full time, but no extra men are employed. The Diamond City mine, a small concern in the past, is enlarging its plant, to be able to get out 600 tons daily. The Lethbridge Collieries, situated 7 miles west of Lethbridge, are busy. These mines have produced no coal as yet, but are sinking what is said to be the largest coal shaft in the Dominion. At both the last mentioned places many houses are being built to house the miners and their families.

CONDITION OF PARTICULAR TRADES.

Bricklayers have been but partially employed during the first half of the month. This was mostly owing to lack of structural steel. Stonecutters have been busy on the new Court House. July has been a dull month for carpenters and joiners, many leaving the city, as there has been little work to be had. Lathers and plasterers have been fairly busy. Blacksmiths were fairly busy, owing to some large buildings requiring iron work.

NELSON, B.C., AND DISTRICT.

Mr. A. B. Docksteader, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market throughout Kootenay district, during July, has been active, a slight shortage existing as to skilled miners and experienced lumbermen, though otherwise the demand appears to be fully supplied. Harmonious relations exist between employers and employés. The Canadian Pacific Railway Company is making extensive repairs and improvements throughout this district; several steel bridges are being built, parts of the roadbed being relaid with 85-pound steel rails, wooden bridges being filled in, retaining walls of masonry built, and a cement or concrete round house being erected at Smelter Junction, containing five locomotive stalls. The estimated expenditure for this work during this year is reported to aggregate $1,000,000. About 500 labourers are now employed at the various points.

The "Lucky Jim" mine, situated in Slocan district, has recently struck ore in its lowest level, showing 35 feet in width of ore that exceeds fifty per cent. in zinc. The strike is reported to have doubled the value of the mine.

Five fires have occurred in Nelson, within the past two weeks, the origin of which in each case is unknown, causing a property loss of a little over $40,000.

Continued dry weather has prevailed, and numerous bush fires have occurred at various points throughout the entire district, entailing enormous damage to standing timber, though the most disasterous case occurred in the Slocan-Kaslo district, where, in addition to the financial loss of the entire town of Whitewater, part of the Whitewater Mine buildings and plant, part of the Rambler-Cariboo buildings and plant, the Kootenay & Slocan Railway bridges and trestles, and the "Lucky Jim" mine buildings, five men lost their lives at the "Lucky Jim" mine, on the nineteenth instant, having taken refuge

in some of the tunnels of the mine, they were suffocated by the smoke.

The Canadian Pacific Railway Company has called for tenders for the construction of a tourist hotel at Balfour, on Kootenay Lake, estimated to cost $80,000

The Great Northern Steamer *Kaslo* has been floated, and is now undergoing repairs at the Company's ship-yards, near Kaslo. The tonnage mined by the Crows Nest Pass Coal Company, at Coal Creek and Michel, for the month of June is reported at 116,447 tons, while the pay-roll for the same period amounted to $203,400. The June pay-roll for the three lumber companies adjacent to Fernie, B.C., amounted to approximately $40,000.

NEW WESTMINSTER, B.C., AND DISTRICT.

Mr. J. P. McMurphy, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions have been exceptionally good and there seems to be a general activity in all branches of trade and especially in the building line. A large number of new residences are being erected in this city and vicinity, likewise improvements to some of the business blocks, the demand for which is becoming greater all the time. A new wage schedule has been drawn up between the British Columbia Electric Railway Company and their employés, increasing the wages of said employés and embracing a term of three years. The machinists of this city are on strike for an increase in pay and small reduction in the hours of labour.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—At the present time the farmers are all busy getting in their hay and from appearances have a fairly good crop.

Fishing.—The fishing on the Fraser river for the much-valued sockeye is almost in full progress, although the catch so far has been a light one.

Lumbering.—The lumbering business was never better than now, all the mills running to their fullest capactiy.

CONDITION OF PARTICULAR TRADES.

Activity was the rule, except among iron moulders and machinists.

VANCOUVER, B.C., AND DISTRICT.

Mr. Geo. Bartley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market, was unchanged from the previous month. A year ago there was a surplus of unemployed, owing to large numbers of workmen arriving on their way to Prince Rupert, which place was then closed to the public. The opening of the port and the creation of the new town of Stewart, resulted in an unexpected rush to the north.

Hot weather prevailed which to some extent caused temporary dullness in trade, but trade quotations continued firm.

The machinists' union notified local employers that it would enforce the eight-hour day on July 5. Employers and employed were negotiating up to the time of writing (July 25). The machinists' union opposed the formation of workingmen's clubs, as outlined by the committee of the Trades Council.

The bakers' union has passed a resolution re the Bake Shops Act, which so far has not been enforced.

The price of real estate in workingmen's residential districts continues high. In a large number of instances workmen sub-let part of their house to roomers in order to keep up with their rent.

A committee of the Trades and Labour Council will wait upon Sir Wilfrid Laurier upon his arrival next month, re the Asiatic labour question. The Trades and Labour Council decided to take out a charter from the American Federation of labour, and will also retain affiliation with the Dominion Trades and Labour Congress. The Council went on record as favouring the establishment of a Sunrise Court for juveniles.

The Northwest district convention of the United Association of Journeymen Plumbers and Steamfitters has been in session from the week ending July 16, in Vancouver. Delegates were present from practically every industrial centre in the jurisdiction, including Butte, Portland, Spokane, Bellingham, Seattle and Tacoma.

A $5,000 fire occurred in the lumber yards of the Prudential Investment Company.

The British Columbia Gazette contained 3,070 applications to purchase Government lands in the northern part of the Province.

A Committee of the Board of Trade reported in favour of the public ownership of telephones as follows:—

"That the Province of British Columbia would be quite justified from a business point of view to either buy out the British Columbia Telephone Company, if they would sell at a reasonable price, or failing this to build trunk lines through the Province, thus allowing cities and municipalities, that wished to establish independent systems, to have connection not only throughout this Province and Alberta, but with the United States."

The Western Canada Power Company is to complete its initial development of 20,000 electrical horsepower at Stave Lake by September 1, 1911, and the entire works are to be completed and in operation by September 1, 1915.

A contract for paving Broadway street was let for $49,000.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—The total pack of sockeye salmon along the northern British Columbia coast is estimated as being in the neighbourhood of 160,000 cases to date. At all points large numbers of fish are reported outside and the outlook for a good season's pack in the north is excellent.

Lumbering.—All mills are working to full capacity.

Railroad construction.—The season is the busiest ever recorded.

Mining.—A big strike of gold, silver and copper is reported at Portland Canal.

DISTRICT NOTES.

North Vancouver, B.C.—The ratepayers carried a by-law to borrow $250,000 for the purchase of shares in the capital stock of the Burrard Inlet Tunnel & Bridge Company. This is for the proposed combined railway, vehicle and foot-bridge across the Second Narrows, connecting Vancouver city with the district of North Vancouver. Building operations were very active. Wallace's shipyards worked overtime, likewise the sawmills.

Point Grey.—The ratepayers voted in favour of five by-laws, namely: (1). A train franchise to the British Columbia Electric Railway Company for forty years. (2). Water, $500,000. (3). Sewers, $250,000. (4). Parks, $100,000. (5) Roads, $100,000. These public works will be proceeded with as early as possible.

Prince Rupert.—The Typographical Union has increased its membership, another newspaper having been started. Real estate is reported active.

NANAIMO, B.C., AND DISTRICT.

Mr. A. E. H. Spencer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The conditions of the labour market in this district during the month have been very active. Outside labour has been in good demand and while no scarcity has been reported, anybody wanting work could get something to do. Steps have been taken to start a large brick-making plant in this district, which will employ a number of men. The coal mines have been exceptionally active for the time of year. Business men, wholesale and retail, report business as very good. There have been no changes in rates of wages.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers have been busy during the month, with their hay, and grain cutting is now in full progress.

Fishing.—There is no activity among the fishermen at the present time.

Lumbering.—The sawmills in the district are working steadily, some of them

are working overtime. The logging camps are in active operation all along the coast.

Mining.—The coal mines of the district are working full time and can hardly meet the demand for coal, A few years ago nearly all of the coal mined on the Island was shipped down the coast, but now the demand from the local trade takes nearly all of the coal that is being raised in the mines.

Railroad construction.—Railroad construction on the extension of the E. & N. Railway to Alberni, on the west coast of the Island is being pushed as fast as practicable. Land clearing by the Canadian Pacific Railway is going steadily forward and cleared lands are now placed on the market in several districts of the Island.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons report work as fair. Carpenters and joiners are very active; new buildings of a good class are being erected all over the city. Painters and paperhangers are active. Plumbers are also active. Builders' labourers have been active during the month. Blacksmiths and carriage makers report work as good. Printers report work as active. Teamsters and express men have been well employed. Unskilled labour has been in active demand, as beside gener al work the city has started an extension sewerage system and has a contract let for several miles of cement sidewalk as well as extension of the waterwork system.

THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907. PROCEEDINGS UNDER THE ACT DURING THE MONTH OF JULY, 1910.

DURING the month of July one application for the establishment of a Board of Conciliation and Investigation was received as follows:—

On behalf of the employés of the Toronto Railway Company, of Toronto, Ont., the dispute affecting, it was stated, 1,300 employés.

Reports Received.

During the month of July reports were received in the case of two disputes, as follows:—

I. In the dispute between the Canadian Pacific Railway Company and its commercial telegraphers.

2. In the dispute between the Grand Trunk Railway Company and its brass workers employed in Montreal, Que. In this case a minority report was also received, bearing the signature of Mr. William Aird.

Other Proceedings Under the Act.

In the application of the Toronto Railway employés for the establishment of a Board it was stated that the parties in question had been unable to agree upon a schedule of rules and rates of pay to take the place of the three years' agreement which expired on June 16. The employés affected in this matter were described in the application as members of the Toronto Railway Employés' Union No. 113, and the number of employés directly concerned in the dispute as 1,300.

A Board of Conciliation and Investigation was established by the Minister in this matter on July 11, the same being constituted as follows: Mr. J. P. Mullarkey, of Montreal, Que., appointed on behalf of the Company; Mr. J. G. O'Donoghue, of Toronto, Ont., appointed on behalf of the employés; and His Honour Judge John A. Barron, of Stratford, Ont., Chairman, appointed on the recommendation of the foregoing members of the Board. The Board entered upon its work of conciliation and inquiry later in the month, but had not concluded its work at the end of July.

On August 3, the Department was informed that a settlement had been reached in respect of a dispute between the Toronto, Hamilton and Buffalo Railway Company and its employés in train

and yard service as the result of negotiations between the parties concerned. An application under the Industrial Disputes Investigation Act was received on March 18, for the establishment of a Board in respect of this dispute, a Board being subsequently constituted as follows: Mr. F. H. McGuigan, of Toronto, Ont., appointed on behalf of the Company, Mr. J. G. O'Donoghue, of Toronto, Ont., appointed on behalf of the employés; and Mr. J. E. Atkinson, of Toronto, Ont., Chairman, appointed in the absence of any joint recommendation from the foregoing. A communication was received from the Chairman of the Board on August 3, in which it was stated that an agreement had been effected between the parties without any meeting of the Board having been held. Elsewhere, in the present number of the *Labour Gazette* will be found a separate article dealing with the terms of settlement of this dispute.

Elsewhere, in the present number of the *Labour Gazette* will be found separate articles dealing with the settlement of disputes between the Canadian Pacific Railway Company and its employés in train and yard service, and between the Grand Trunk Railway Company and its employés in train and yard service, in both of which cases Boards had been constituted under the Industrial Disputes' Investigation Act, the reports and findings of the Boards in question being published in the July number of the *Labour Gazette*.

Settlement of Dispute on Canadian Government Railways.

The Department of Labour was informed on July 30, of the settlement of a dispute between the Managing Board of the Canadian Government Railways and the Canadian Brotherhood of Railroad Employés, relating to a schedule of agreement between the Government Railway System and 1,000 of its employés, members of the above mentioned organization. On May 30, application had been made in this matter to the Minister of Labour by the Canadian Brotherhood of Railroad Employés for the establishment of a Board under the Industrial Disputes Investigation Act, to which should be referred for adjustment a complaint on the part of the members of the above named organization relating to the non-enforcement of an agreement between the Brotherhood and the Managing Board of the Canadian Government Railways under date of December 20, 1909.

Whilst this application was before the Minister of Labour for consideration, arrangements were made between the parties concerned for further conference in respect of the schedule in question, which resulted in the signing of a new agreement bearing the signatures of the Chairman of the Managing Board of the Canadian Government Railways and of the Grand President of the Canadian Brotherhood of Railroad employés, respectively. The Department was advised accordingly on July 6, of the withdrawal of the employés' application under the above named statute.

(Correction.)

Referring to the report of the Board of Conciliation and Investigation which dealt with the differences between the Canadian Northern Railway Company and its carmen and steamfitters, which report was published in the *Labour Gazette* for July 1910, at pp. 92-97, a communication has been received from the Chairman of the Board, through the secretary, Mr. P. C. Locke, asking that the report be amended in certain respects. According to this letter, the first sentence of Clause "B" under Article I, page 94 will read: "Ten hours will constitute a day's work." 17 k. being changed to 18 k.; also, Clause "D" under Article I, page 94, will be changed to read as follows: "In round houses ten hours will constitute a day's work."

1.—REPORT OF BOARD IN DISPUTE BETWEEN THE CANADIAN PACIFIC RAILWAY COMPANY AND ITS COMMERCIAL TELEGRAPHERS.

THE Minister of Labour received on July 25, the report of the Board to which was referred for adjustment certain matters in dispute between the Canadian Pacific Railway Company and its commercial telegraphers, arising out of a demand which had been made by the employés in question, for the adoption of a schedule of rules and wages providing for increased rates of pay and for improved working conditions. The number of employés affected in this case was estimated at 600, of whom 450 were males over twenty-one years of age, fifty males under twenty-one years of age, and 100 females.

The report was signed by the three members of the Board, namely: Mr. J. E. Duval, of Montreal, Chairman; Mr. F. H. McGuigan, of Toronto, appointed on behalf of the Company, and Mr. D. Campbell, of Toronto, appointed on behalf of the employés, and was to the effect that a satisfactory settlement of all points at issue was concluded on July 23, a schedule of rules and rates of pay embodying the agreement being signed by representatives of the Company and of the telegraphers, respectively. A copy of the schedule was embodied in the Board's report, the same to be effective from July 1, 1910, and to remain in force for a period of one year and thereafter, subject to thirty days' notice in writing from either party.

The Board expresses, also, in its report its appreciation of the spirit of fairness exhibited by the parties and of the hearty co-operation and assistance rendered by both the officers of the Company and the representatives of the employés in bring about a satisfactory adjustment of all matters in dispute.

The Department was subsequently informed by letter from the parties concerned that the award of the Board was accepted by the Company and the employés respectively, as an adjustment of the matters in dispute. It was understood that the agreement between the Company and its commercial telegraphers provided for substantial increases in salary and for various other improvements in the employés' conditions of employment.

Report of Board.

The text of the findings of the Board of Conciliation and Investigation in this matter is as follows:—

TORONTO, ONT., July, 25, 1910.

To THE HON. W. L. MACKENZIE KING,
Minister of Labour,
Ottawa, Ont.

Dear Sir:

In the matter of the dispute between the Canadian Pacific Railway Company and its Commercial Telegraphers, members of the Commercial Telegraphers' Union of America.

The Board of Conciliation and Investigation appointed under the Act in this matter, have the honour to report as follows: The Board commenced its hearings in the city of Toronto, on July 13, and concluded on July 23. Adjournments were arranged from time to time to enable the parties to negotiate between themselves, and meetings for this purpose were held in the cities of Montreal and Toronto, both parties being attended by their representatives. We are pleased to report that a satisfactory settlement of all points at issue was concluded on July 23, and a schedule of rules and rates of pay embodying the agreement was signed by the representatives of the Company and the Telegraphers, as follows:—

Schedule.

RULES AND WAGES FOR COMMERCIAL TELEGRAPHERS, CANADIAN PACIFIC RAILWAY COMPANY'S TELEGRAPHERS.

EFFECTIVE JULY 1, 1910.

The following rules and schedule of wages shall govern the telegraphers employed by the Canadian Pacific Railway Company's Telegraphs.

1. Employés assigned to regular service as shown in the accompanying schedule of wages will be classed Commercial Telegraphers within the meaning of this schedule.

2. (*a*) Telegrapher's right of promotion will extend over each Telegraph Superintendent's division and will be governed by merit, fitness and ability. Where these are sufficient the senior telegrapher will be given preference.

(*b*) When a vacancy occurs the same will be filled by the appointment of the senior telegrapher who, in the opinion of the proper authority, is capable of filling the position.

(*c*) A complete list of all telegraphers within each Superintendent's division showing their seniority standing and salary will be kept on file in each Superintendent's headquarters, open to the inspection of all telegraphers concerned. The list shall be subject to correction on proper representation from any telegrapher.

(*d*) In case of reduction of staff the junior telegrapher will be dispensed with, and if reduction necessary in higher grades the junior in the higher grade will have the privilege of continuing in the service, but at a reduced salary, and so on through each class until the junior class is reached.

(*e*) Any telegrapher in good standing whose services have been dispensed with on account of reduction of staff will be given preference of re-employment when the staff is increased.

3. A telegrapher declining or being unable to accept promotion does not forfeit his right to the same or any other position he may be entitled to under seniority when a vacancy occurs, but will rank junior to the telegrapher getting the promotion.

A telegrapher, on leave of absence when a vacancy occurs, will not be debarred from claiming position and receiving the appointment on resuming duty if entitled to it.

All vacancies shall be bulletined by the Superintendent within ten days from the time such vacancies occur.

Telegraphers will be given an opportunity to learn the electrical branch of telegraphy provided this is done on their own time.

4. If a telegrapher be taken off his work for any cause he shall be given a hearing at which time, he shall have the right to have a telegrapher of his own selection appear and speak for him, and shall have the right to appeal from the decision of the local to the general officers of the Company. Should no decision be reached within fifteen days, he shall receive his regular pay until the decision is arrived at. The accused party if he desires, shall be allowed to see the evidence produced against him.

If the telegrapher is found blameless in the matter under investigation, he will be paid at regular rates for time lost and necessary extra expenses while attending such investigation (if away from home) and re-instated.

5. Current rules governing holidays to apply. Transportation optional with the Company.

6. At offices where four or more telegraphers are employed except repeater offices the hours for work shall be as follows: Nine hours shall constitute straight day duty beginning between 8 a.m., and 9 a.m., eight and one-half hours shall constitute early morning duty, commencing between 6 and 8 a.m.

Seven and one-half hours shall constitute a split trick or early night duty. Seven hours shall constitute late night duty, and rate at which overtime shall be computed.

At repeater stations nine hours shall constitute day duty, eight hours night duty and seven hours all night duty.

The average minimum performance on all Vancouver-Winnipeg, Montreal-Vancouver, Montreal-Winnipeg and Toronto-Winnipeg circuits shall be thirty messages per hour, and on all other first-class circuits thirty-three messages per hour, allowing thirty words to count as one message in case of press, and twenty words shall be counted as one message in R. S. Business. Chief operators and traffic chiefs shall determine the carrying capacity of the circuit and any loss through interruption shall not be charged against operators' average.

7. A telegrapher leaving the service of the Company will, on request, as soon thereafter as practicable, be furnished with a certificate by the proper official stating term or terms of service, capacities in which employed, and whether discharged or leaving the service on his own accord. If discharged, cause of dismissal will be stated.

If detained more than five days waiting such certificate telegrapher will be paid regular wages for all time in excess of the five days. Unless otherwise requested, this certificate will be mailed to telegrapher at his last place of employment.

Minimum Schedule of Wages.

The Company agrees that all telegraphers now employed in Vancouver, Calgary, Winnipeg, Toronto and Montreal shall receive an increase of not less than $5.00 per month, provided this does not apply to telegraphers who entered the service since June 30, 1910.

This schedule shall remain in effect for one year, and thereafter subject to thirty days' notice in writing from either party.

(*Sgd.*) JAS. KENT.
Manager of Telegraphs.

For the Canadian Pacific Railway Company.

(*Sgd.*) C. E. HILL,
General Chairman.

For the telegraphers.

The Board desires to express its appreciation of the spirit of fairness, and for the hearty co-operation and assistance rendered by both the officers of the Company and the representatives of the employés in bringing about a satisfactory adjustment of all matters in dispute.

All of which is respectfully submitted.

(*Sgd.*) J. E. DUVAL,

II.—REPORT OF BOARD IN DISPUTE BETWEEN GRAND TRUNK RAILWAY COMPANY AND ITS BRASS WORKERS AT MONTREAL.

THE Minister of Labour received, on July 30, the report of a Board, to which was referred for adjustment certain matters in dispute between the Grand Trunk Railway Company and its employés in the brass shop of its motive power department, in Montreal. The dispute in this case arose out of a demand on the part of the employés, for the establishment of a minimum rate of wages of 30 cents per hour for this class of labour. The number of employés affected in the dispute is twenty-four. The report of the Board is signed by Mr. A. G. B. Claxton, K.C., of Montreal, Chairman, and by Mr. Charlemagne Rodier, of Montreal, member appointed on behalf of the employés. A minority report was also presented by Mr. Wm. Aird, of Kingston, member appointed on behalf of the Company.

The Board states that it was agreed by both parties to the dispute that the employés in question were graded from 17 cents to 26 cents an hour, but that under the contract system in force the employés, during the past year, had earned from 26.6 cents to 35 cents an

hour. The Board was informed by the employés that in every instance, they had been able to make more money working on the contract or piece system than on the hour system. The Company declared that the contract system was introduced in order to give the men an incentive to do more and better work, and the Board finds that this is borne out by the fact that the employés under this system earned more wages and made frequent requests for work by contract. The employés advanced as a grievance that some of the demonstrations on which prices were based were made by low priced men, the result being that the better priced men, if they had jobs as demonstrated by low priced men handed to them, could not make good money out of them.

In the course of its inquiry, the Board expressed a desire to both the employer and the employés that some compromise agreement should be arrived at, and as a result the employés withdrew their demand for a minimum rate of 30 cents, per hour, and expressed a willingness to accept instead a minimum rate of 24 cents, the contract system to be still carried on.

The Board in its report observes that the Grand Trunk Railway Company refused to accept this offer. The Board submits that "while the brass workers occupation may be an extra hazardous one in some localities, it has not been proven so at the Grand Trunk Shops, at Point St. Charles," and "considering the market value paid to brass workers in the city of Montreal; considering the pension, sick benefit and accident systems in force in the Grand Trunk Railway Company in Canada; considering that brass workers should be paid not less than 25 cents per hour; considering in as much as it has not been proven that the flat rate system will bring as good results to the employés as the contract system; considering the wages that are paid throughout the Grand Trunk Railway System; considering the employés are earning far more than 25 cents an hour which would be an ordinary flat rate; your Board recommends that the employés be graded from 20 cents to 28 cents; that the present contract system be continued; that all demonstrations be made by men who are earning not less than 23 cents an hour; that as far as possible the shop arrive at a tariff price on all contracts within the next six months; that the present Montreal Brass Workers be re-graded by the 1st September, 1910; and that each man's grade be raised 2 cents an hour."

Mr. Wm. Aird appended to the report a note stating that whilst he agreed with the findings of the Board, he dissented from the recommendations, and recommends that the existing contract and grading systems should be continued. In his minority report, Mr. Aird submits that "the men have not shown that they are entitled to a minimum flat rate of 30 cents per hour and that if such a rate were granted, it would in some cases mean a decrease in their wages, and that in view of the fact that the brass workers should be able with the prices in vogue, to earn over 30 cents per hour; as has been done in some cases, I do not feel that any change should be made in either the present rates or the contract system."

Report of Board.

The text of the findings of the Board of Conciliation and Investigation in this matter is as follows:—

REPORT OF THE BOARD OF CONCILIATION AND INVESTIGATION APPOINTED BY THE GOVERNMENT TO INQUIRE INTO A DISPUTE BETWEEN THE GRAND TRUNK RAILWAY COMPANY AND ITS BRASS WORKERS AT MONTREAL.

Present, A. G. B. Claxton, K.C., in the Chair, and Messrs. Charlemagne Rodier and William Aird.

The Board sat on July 25, 26, 27, 28 and 29.

It listened to the evidence on behalf of the brass workers, at Montreal, of Messrs. W. Hudson, T. Lochead, R. Dancey, D. Grey, E. Rodgers, S. Stark, E. Wright, A. Bottombley, and James Black.

The Grand Trunk Railway Company submitted statements regarding the

wages, time and length of service of each of its brass workers engaged by the Company at Montreal, together with data explaining the contract system and how the prices on various jobs were arrived at.

Both parties agreed that the employés were graded from 17 cents to 26 cents an hour, but that under the contract system the employés during the past year had earned from 26.6 cents to 35 cents an hour.

During the past year the foreman of the shop has endeavoured to arrive at a fair price upon various contracts or jobs, and had selected different men to "demonstrate" these prices, i.e., the employé would have to demonstrate what would be the average length of time which it would take to complete the contract or job. The parties agreed that the employé demonstrating was instructed to put a fair average amount of labour and time and that while no time was to be needlessly lost, the employé was not to rush the job or contract. The cost of the job is shown by the time sheet and the employés declared that the Company added forty per cent. to the cost as demonstrated.

The employés stated that in every instance they have been able to make more money working on the contract or piece system than on working on the hour system. The Company declared that this contract system was introduced in order to give the men some incentive to do more and better work, and this is borne out by the fact that the employés, under this system have earned more wages and make frequent requests for work by contract.

The employés advanced as a grievance that some of these demonstrations were made by low priced men, the result being that the better priced men, if they had jobs as demonstrated by low-priced men handed to them, could not make good money out of them.

The sworn statement of the Company shows that eighty-five percent. of the Company's tariff prices have been made on demonstrations by men who are graded at 23 cents an hour, i.e., by the more experienced and highest paid class of brass workers.

The employés had no real complaint against the foreman.

The employés stated that the shop was of a superior kind, well heated, well lighted and well ventilated. Mr. Rodgers advanced the theory that the brass workers' occupation was an extra hazardous one, but was unable to show any deaths due either to tuberculosis or any accidents of any importance during the many years he has been employed by the Grand Trunk Railway Company.

The employés declared that they understood that the Canadian Pacific Railway Company classified their men as specialists, brass workers and labourers and that the brass workers were earning 30 cents an hour.

The Company submitted a statement from the books of the Garth Company showing the men were graded from 18 cents to 32 cents per hour and a statement from the Robert Mitchell Company showing that the men were graded from 20 cents to 30 cents an hour. The average rate in the Mitchell establishment is 25 cents and in the Garth establishment 24.72 cents.

The employés submitted that they felt that they were entitled to a flat rate of 30 cents that if this was granted they would not have to work so hard and that the Company would receive just as much honest work as it does at the present time.

Some of the employés submitted that if the Company agreed to the minimum rate of 30 cents, it would be possible to classify the men whose market value was 30 cents as brass workers and to call the others labourers and classify them at what they were worth.

The Board expressed the desire to both employer and employé that some compromise agreement should be arrived at, and did its utmost to conciliate both parties.

The employés withdrew their demand for a minimum of 30 cents and asked as a compromise a minimum rate of 24 cents, the contract system to be still carried on.

The Grand Trunk Railway Company refused to accept this offer.

Your Board humbly submits that while the brass workers occupation may be an extra hazardous one in some localities, it has not been proven so at the Grand Trunk Shops at Point St. Charles.

CONSIDERING the market value paid to brass workers in the city of Montreal;

CONSIDERING the pension, sick benefit and accident systems in force in the Grand Trunk Railway Company at Canada;

CONSIDERING that brass workers should be paid not less than 25 cents an hour;

CONSIDERING inasmuch as it has not been proven that the flat rate system will bring as good results to the employés as the contract system;

CONSIDERING the wages that are paid throughout the Grand Trunk Railway system;

CONSIDERING the employés are earning far more than 25 cents an hour which would be an ordinary flat rate;

YOUR BOARD RECOMMENDS that the employés be graded from 20 cents to 28 cents; that the present contract system be continued; that all demonstrations be made by men who are earning not less than 23 cents an hour; that as far as possible the shop arrive at a tariff price on all contracts within the next six months; that the present Montreal Brass workers be re-graded by the 1st September, 1910; and that each man's grade be raised 2 cents an hour."

Signed at the city of Montreal, this 29th day of July, 1910.

(*Sgd.*) A. G. B. CLAXTON,
Chairman.

(*Sgd.*) CHARLEMAGNE RODIER.

Mr. Aird agrees with the findings of the report, but dissents from the recommendations and recommends that the existing contract and grading systems should be continued.

(*Sgd.*) WILLIAM AIRD.

Minority Report.

The text of the minority report of Mr. William Aird is as follows:—

MINORITY REPORT, BY MR. WM. AIRD, MEMBER OF BOARD OF CONCILIATION AND INVESTIGATION APPOINTED BY THE GOVERNMENT TO INQUIRE INTO A DISPUTE BETWEEN THE GRAND TRUNK RAILWAY COMPANY OF CANADA AND ITS BRASS WORKERS AT MONTREAL.

Present, A. G. B. Claxton, K.C., in the Chair and Messrs Charlemagne Rodier and William Aird;

The Board sat on July 25, 26, 27, 28 and 29.

It listened to the evidence on behalf of the Brass Workers at Montreal, of Messrs. W. Hudson, T. Lochead, R. Dancey, D. Grey, E. Rogers, S. Stark, E. Wright, A. Bottombley and James Black.

The Grand Trunk Railway Company submitted statements regarding the wages, time and length of service of each of its brass workers engaged by the Company at Montreal, together with data explaining the contract system and how the prices on the various jobs were arrived at.

Both parties agreed that the employés were graded from 17 cents to 26 cents an hour, but that under the contract system the employés during the past year had earned from 26.6 cents to 35 cents an hour.

While demonstrating the work in order to arrive at a price for same, the foreman of the shop has endeavoured to arrive at a fair price for the various articles made and repaired in the brass shop, and had selected different men to "demonstrate" these pieces, i.e., the employés would have to demonstrate what would be the average length of time which it would take to complete the piece of work being demonstrated. The parties agreed that the employé demonstrating was instructed to put on it a fair average amount of labour and time and that while no time was to be needlessly lost, the employé was not to be hurried or harrassed while the demonstrating was in progress. The cost of the job is shown by the time sheet and the employé declared that the Company added forty per cent. in money to the cost as demonstrated, e.g., if the cost as demon-

strated amounted to $1, the Company added forty per cent. to same, making the price of the labour on article so demonstrated $1.40, and this price applies on all similar articles.

The employés stated that in every instance they have been able to make more money working on the contract or piece system than on working on the hour system. The Company showed that the contract system had been in vogue for over thirty years, and that the recent demonstrations were occasioned by the changed conditions and style of work in order to revise and adjust the same with a view to giving the men a greater incentive to turn out more work, and therefore make more money, and that they do this is borne out in the fact that they have earned higher wages, and that frequent requests have been received from the workmen to be placed on the contract system, and the brass workers have made from 39.7 per cent. to 46.8 per cent. over and above their earnings at their rate per hour.

The employés advanced as a grievance that some of these demonstrations were made by low priced men, the result being that the better priced men, if they had jobs as demonstrated by low priced men handed to them, could not make good money out of them.

The sworn statement of the Company shows that eighty-five per cent of the Company's tariff prices have been made on demonstrations by men who are graded at 23 cents an hour, i.e., by the more experienced and highest paid class of brass workers.

The employés have no complaint against the foreman.

The employés stated that the shop was of a superior kind, well heated, well lighted and well ventilated, Mr. Rogers advanced the theory that the brass workers occupation was an extra hazardous one, but was unable to show any deaths due either to tuberculosis or any accidents of any importance during the many years he has been employed by the Grand Trunk Railway Company.

The employés declared that they understood that the Canadian Pacific Railway Company classified their men as specialists, brass workers and labourers and that the brass workers were earning 30 cents an hour, but this was not substantiated.

The Company submitted a statement from the books of the Garth Company, showing the men were graded from 18 cents to 32 cents per hour, and a statement from the Robert Mitchell Company, showing the men were graded from 20 cents to 30 cents an hour. The average rate in the Mitchell establishment is 25 cents and in the Garth establishment 24.72 cents.

The employés submitted that they felt that they were entitled to a flat rate of 30 cents, and that if this were granted they would not have to work so hard, and that the Company would receive just as much honest work as it does at the present time.

Some of the employés submitted that if the Company agreed to the minimum rate of 30 cents it would be possible to classify the men whose market value was 30 cents as brass workers, and to call the others, labourers and specialists, and classify them at what they were worth.

I humbly submit that the brass worker's occupation is not a hazardous one, as alleged by the brass workers, as I have never known of an accident of a serious nature occuring during the past thirty years in the Grand Trunk Brass Shops; considering the market value paid to brass workers in the city of Montreal.

Considering the pension, sick benefits and accident systems, the privileges accorded employés in the way of free transportation for themselves and families over the Grand Trunk and Foreign Railways, and of reduced railway and ocean rates;

Considering inasmuch as it has not been proven that the flat rate system will bring as good results to the employés as the contract system;

I take exception to the recommendation of the Board that the employés be graded from 20 cents to 28 cents, as it has not been shown that this would increase their earnings, but on the other hand it would materially decrease the output for the Company, and because such gradings would be a de-

parture from the gradings as decided by the Board which arbitrated the differences between the Grand Trunk Railway Company and their machinists (of which the brass workers form a part) in 1907, affecting all such employés in Canada, the grading at the shops at Montreal being fixed at from 17 cents to 26 cents per hour, also because it would be unjust to the other employés of the Company at Montreal, of which the brass workers form only about one and a half per cent. of the total.

I take exception also to the recommendation of the Board, that all demonstrations be made by men who are earning not less than 23 cents per hour, and that as far as possible the shop arrive at a tariff price on all contracts within the next six months.

It was not necessary, in order to be fair to the interests of both the Company and the men to demonstrate by men earning 23 cents an hour, because the men by whom the demonstrations were made will be constantly employed on the class of work demonstrated, and the fact that the demonstrators were not hurried and were allowed a fair time in which to demonstrate and that the forty per cent. added by the Company in money to the value of the time demonstration ensures a margin sufficient to enable the men to earn fair wages, is proved by the percentages of increased earnings over and above the hourly rates shown by the statement of earnings during the past six months submitted by the Company to the Board; and with regard to completing the tariff prices within the time recommended; it would be an utter impossibility to have all the prices satisfactorily adjusted, owing to the variety of the work which is done in a railway shop, within the time specified.

My conclusions are that the men have not shown that they are entitled to a minimum flat rate of 30 cents per hour, and that if such a rate were granted, it would in some cases mean a decrease in their wages, and in view of the fact that the brass workers should be able with the prices in vogue, to earn over 30 cents per hour, as has been done in some cases. I do not feel that any change should be made in either the present rates or the contract system.

Respectfully submitted,

(*Sgd.*) WILLIAM AIRD,
Montreal.

July 29, 1910.

STRIKE OF GRAND TRUNK RAILWAY EMPLOYÉS IN TRAIN AND YARD SERVICE—SUBSEQUENT SETTLEMENT THROUGH GOVERNMENT INTERVENTION.

A strike of the employés of the Grand Trunk Railway System in train and yard services occurred on the evening of July 18, at 9.30 o'clock, as the result of a failure on the part of the employés concerned to agree with the Company upon the rates of wages and rules which should govern their employment. The strike in question continued from the date above mentioned until the evening of August 2, at 7.00 o'clock, when it was announced that through Government intervention, terms of settlement had been agreed upon, as a result of which the strike was at once declared off and the employés again reported for duty.

In the July *Labour Gazette*, reference was made to the investigation of this dispute which was made by a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act, and to the efforts which were put forth by the Board to bring about an adjustment of the differences. The text of the Board's report and findings on this dispute were also published for the information of all concerned, as well as the text of a minority report signed by Mr. Wallace Nesbitt, K.C., one of the members of the Board.

From the reports in question it appeared that the demand which was presented to the Grand Trunk Railway Company in January, 1910, for a new schedule of

agreement with the employés in train and yard services, was part of a general move by the railway conductors, baggagemen, brakemen and yardmen to secure the adoption of standard rates of pay and rules of employment obtaining on the principal railway systems of the Eastern States, and of Eastern Canada. In the award of the Board it was recommended that the rules should be standardized forthwith also that wages on the Grand Trunk Railway should be brought up to the standard paid by the Canadian Pacific Railway and other companies by two steps, the first of which would give the men at once about five-eighths of the difference between the existing scale and the standard, the remaining three-eighths to be given later on. The date of this second step was a matter on which the Board had been unable to agree, and was accordingly left blank, with the understanding that it should form the subject of subsequent negotiations between the parties directly concerned.

The terms of the report and minority report of the Board established under the Industrial Disputes Investigation Act, in respect of this dispute were transmitted on June 22, to the respective parties concerned. On June 25, a communication was received from Mr. E. W. Fitzhugh, First Vice-President of the Grand Trunk Railway Company, acknowledging the receipt of the report and minority report of the Board. On the same date a communication was received from Messrs. S. N. Berry, Vice-President of the Order of Railroad Conductors, and James Murdock, Vice-President of the Brotherhood of Railroad Trainmen, on behalf of the employés, in which it was stated that "the general committees are compelled to respectfully decline to accept the award handed down in this matter as a settlement of the questions at issue."

Following the publication of the Board's report, negotiations in regard to terms of settlement were carried on in Montreal between Mr. E. H. Fitzhugh, First Vice-President of the Grand Trunk Railway Company, and the representatives of the employés.

In a letter addressed to the Acting Deputy Minister of Labour on July 13, by Messrs. S. N. Berry and James Murdock, on behalf of the employés, it was stated that "Mr. Fitzhugh, representing the Grand Trunk Railway System, had been offered arbitration by the undersigned many days before Mr. Hays came into the conferences. We had offered to Mr. Fitzhugh that the entire matter should be left to the arbitrators who had been named as acceptable to the railroad companies and the employés, and had disposed of identically the same questions on the following named railroads: New York Central & Hudson River Railroad; Boston & Albany Railroad; Michigan Central Railroad (including lines in Canada); Lake Shore & Michigan Southern Railroad; Lake Erie & Western Railroad; Cleveland, Cincinnatti, Chicago & St. Louis Railroad; Delaware, Lackawanna & Western Railroad; Delaware & Hudson Company; Chicago, Indiana & Southern Railroad; New York, Chicago & St. Louis Railroad, and other lines."

On the arrival in Montreal early in July, of Mr. C. M. Hays, President of the Company, from Western Canada, negotiations were continued with Mr. Hays and other officials of the road up to the day of the strike.

In a communication addressed by Mr. Hays to the employés' representatives on July 8, certain propositions were made for the settlement of the dispute. Mr. Hays, in this letter, contended that "if there is standardization of wages there must be standardization of earnings," and asserted that upon this basis it was impossible for the Grand Trunk Railway Company out of its present earnings to pay the same rates of wages as had been granted on the most prosperous railway systems of the Eastern States. "We propose," Mr. Hays declared, "an increase in rates of pay the equivalent of that recommended by the majority report brought in by Chairman Atkinson and your representative, Mr. O'Donoghue." * * * * "The Management will pay the same standard of wages as the Canadian Pacific Railway Company as soon as the Grand Trunk Railway Company, through its relation with the Grand Trunk Pacific Railway Company, is in a position to participate in the higher rates obtaining

on traffic in the North-west, by reason of the completion of that road and the obtaining of through rail connections between the Grand Trunk Railway Company and the Grand Trunk Pacific Railway Company, which should be accomplished within two years.

"The foregoing constitutes the extent to which the Management is prepared to go in meeting the desires of its employés in train and yard service. It is earnestly hoped that the relations with our employés are such that they will accept in good faith the proposition made, and that the officers of those orders with which they are affiliated will advise them to this effect.

"If, however, this proposition is unsatisfactory and the Management is considered unfair, since your organizations have always stood for the principles of arbitration, we, then, are willing to submit the whole question at issue to a Board of Arbitrators, composed of experienced railway men, with the obligation on our part to abide by the result of such arbitration, conditional only upon the employés in question agreeing to do the same."

A reply to the foregoing proposal of Mr. Hays was made on behalf of the employés, in which it was stated that the General Committee "are not willing to assume the responsibility of disposing of the questions at issue on the basis proposed in your letter without securing a further expression of desire from the employés on the line.

"This the Committee will undertake to do as soon as possible, and will then advise you further if your proposition can or cannot be accepted.

"The committee have also carefully considered the suggestion contained in your letter in reference to arbitration, and they desire us to advise you that in their opinion the questions referred to (being the contentions of men employed in train and yard service in the eastern territory for standardization of wages and general conditions), have been very fully arbitrated already. First, for some eight days on the Baltimore & Ohio Railroad under the provisions of the so-called Erdman Act; later in the case of some ten or more properties by a submission of the entire question to two gentlemen experienced in these matters, to dispose of.

"The Committee are not inclined to believe that further arbitration should be necessary or that arbitration would bring out anything in the way of contentions upon either side that has not already been fully considered and passed upon."

It was understood that in the course of subsequent negotiations extending up to Monday, July 18, further proposals were made on behalf of both the Company and the employés concerned, none of which were acceptable to both parties. In the meantime, a strike vote had beeen taken of the employés in train and yard service on the Grand Trunk Railway lines both in the United States and Canada, and on the Central Vermont Railway, an allied system, which was understood to have shown that the men were almost unanimously in favour of the declaration of a strike in case their terms were not met by these Companies, and an order had been sent out by the General Committe in Montreal which authorized the declaration of a strike on Monday, July 18, at 9.30 P.M., unless a satisfactory settlement was brought about before that time.

No such settlement was reached, and the strike became effective accordingly from the date and hour above mentioned. In addition to the 2,500 conductors, trainmen and yardmen of the Grand Trunk Railway System in Canada affected by the strike, the strike was declared effective also on the lines of the Grand Trunk Railway in the United States and the Central Vermont Railway. The number of conductors, trainmen, and yardmen who responded to the strike call on the lines of the Grand Trunk and Central Vermont in the United States was estimated at 1,500. The strike affected also 250 employés of the Wabash Railroad Company in Canada in train and yard service. Altogether some 4,250 employés were directly affected.

Upon the occurrence of the strike an effort was at once made by the Company to obtain new hands to take the strikers'

places in the operation of the Company's train and yard services, and statements were issued from day to day on behalf of the Company and of the employés concerned respecting the extent to which trains were being operated, the Company concentrating its attention at the outset upon the maintenance of its passenger service.

Disturbances, etc., during the Strike.

It was understood that a considerable number of detectives and special police were employed by the Company to safeguard its properties against possible damage, and for the protection of those who took the strikers' places as well as in some cases to assist in the operating of trains. It was stated by the officials of the unions concerned that special steps were taken to enjoin upon strikers the desirability of their abstaining from all acts of violence and of interfering with the Company's property, and responsibility for such disturbances and breaches of the peace as actually occurred during the strike, was disclaimed by the strikers and their unions.

As a result of a disturbance at the Grand Trunk Railway station in Brockville, Ont., on the evening of July 22, in which several doors and windows were smashed, and seven of the Company's employés more or less seriously hurt, a detachment of sixty-five officers and men of the 41st Regiment of Infantry was called out, and was replaced on July 27, by thirty-four men of the Royal Canadian Regiment, Toronto, who remained on duty up till the close of the strike. On July 28, in the Brockville police court, a fine of $50 and costs, or two months imprisonment, was imposed on two men arrested in connection with the disturbances of July 22. At the request of the Company, and at the instance of the local authorities, detachments of regular troops from Stanley Barracks, Toronto, and Wolseley Barracks, London, were also sent on July 31, to guard the Company's properties at that point, and remained on duty until the close of the strike.

During the two weeks' continuance of the strike minor disturbances were also reported from Belleville, Montreal, Sherbrooke, North Bay, and other points. It was generally conceded however, that considering the nature and extent of the strike it was remarkably free from disorderly acts or improper conduct on the part of those immediately concerned.

Alleged Violations of Immigration Act.

Shortly after the occurrence of the strike, complaint was made to the Dominion Government that strike-breakers were being brought into Canada in contravention of the provisions of the Immigration Act, and on July 25, a message was addressed to the Minister of the Interior and to the Minister of Labour by Mr. S. N. Berry, on behalf of the striking conductors, trainmen and yardmen of the Grand Trunk Railway Company, in which the Government was asked to prohibit the entry of strike-breakers. Mr. Berry was advised that the immigration inspectors had been instructed to rigidly enforce the immigration regulations, and had also been notified to guard against persons gaining entry into Canada by travelling on tickets reading from one United States point to another. A message was also addressed by the Department of the Interior to its travelling inspector at Sarnia, on July 27, as follows:—

> "Telegraphed instructions of the nineteenth to make no alteration in method of dealing with train crews, were sent on the distinct understanding that crews bringing trains across international boundary would return as crews to the States, and not remain in Canada to work wholly within the Dominion. If Grand Trunk Railway Company crews are not acting according to this arrangement examine all incoming crews and admit or reject according to Immigration laws, and regulations. Give these instructions to our officers at Niagara, Bridgeburg, Windsor and any other points necessary."

It was understood from press reports that complaints were subsequently lodged against the Grand Trunk Railway Company at Sarnia, for violation of the Immigration Act, in a number of different cases, and it was stated in dispatches from Sarnia, Ont., under date of August 8, that a verdict had been

rendered on August 6, imposing a fine of $50 and costs in each of thirteen cases of this nature; also that the evidence showed the men had been supplied with the money necessary to enable them to show $25 to the immigration officers at Sarnia, and gave receipts at Port Huron tunnel station, the money being handed back by the men at the Sarnia Station, after they had passed the immigration inspector. Out of fourteen who were entered in this manner, the inspector secured the arrest of thirteen. In view of the fact that the men had been under arrest for three days, they were allowed to go on suspended sentence, and were escorted out of the country by the immigration officer.

Effects of Strike on Trade and Industry.

As to the economic effects of the strike on the Grand Trunk Railway Company it is dfficult to present authoritative statistics. It is estimated that through loss of earnings, as well as in other ways, the strike cost the Company in the neighborhood of $500,000 a week, or approximately $1,000,000 for the fortnight during which it continued. The loss of wages to the conductors, baggagemen, brakemen and yardmen directly concerned in the dispute and to Brotherhoods through payments of strike benefits was considerable. Through the closing down of car and motive power shops all over the Company's system it was estimated that about 4,800 employés were thrown out of employment for a period of one week, which involved a considerable loss to these classes of the Company's employés. Through the reduction, moreover, of the Company's train operations, consequent upon the strike, a large number of engineers, firemen and other employés were also temporarily idle, with a loss of wages.

In addition to the foregoing, the loss incurred by the general business of the country through the strike can scarcely be estimated, but must have amounted, in the aggregate, to a very large figure. In the case of one industrial establishment alone, the J. R. Booth sawmills, in Ottawa, employing approximately 2,000 hands, it was alleged that it was impossible to operate the plant in question on account of non-delivery of the sawn lumber from the mill platforms to the piling grounds. The mills in question were accordingly closed down on the day following the strike, and remained closed for a period of seven days. It was subsequently announced that Mr. J. R. Booth, the proprietor of the mills in question, had decided to allow the men their regular pay for the time during which the mill was shut down, the amount so involved being about $14,000. In the press, during the continuance of the strike statements were published from day to day showing the serious effects of the disturbance on commerce and industry, in the districts served by the Grand Trunk Railway system. In a number of cases it would appear that the mills and factories were compelled to temporarily close down or reduce their working staffs whilst many others were stated to have suffered inconvenience and loss. In the reports of the correspondents of *The Labour Gazette*, throughout the Provinces of Ontario and Quebec, appearing in the earlier portion of this publication, reference has been made to the conditions above mentioned.

Messages to the Minister of Labour.

During the continuance of the strike, telegrams and letters were received by the Minister of Labour from municipalities and Boards of Trade in almost all parts of Ontario, urging the settlement of the dispute, and in many cases referring to the extent to which business and industry were being affected thereby. In a number of cases, similar communications were addressed by these bodies to the parties to the dispute. The following comments in regard to the effects of the strike were noted in messages and letters from various municipalities:—

Gravenhurst, Ont.—Our trade under present conditions is paralyzed.

Berlin, Ont.—The results of this strike may be extremely disastrous to this Province.

Stratford.—Continued suspense injurious to many interests outside of disputants.

Peterboro.—Trouble having serious effect.

Dresden.—Business being greatly injured in this district.

Niagara Falls.—Interests of city seriously affected.

The following comments in regard to the effects of the strike were noted in messages and letters from various Boards of Trade:—

Southampton.—Freight not moving here since July 18. Men being laid off in factories, and if no relief given in immediate future factories will be forced to close. Loss serious to factories and employés.

Lindsay.—Manufacturers and business men greatly hampered and suffering serious less.

Brockville.—Business interests suffering through strike. Traffic facilities not at all adequate.

Oshawa.—Business interests in our town in a deplorable condition. Manufacturers will be compelled to close down if strike is not settled at once.

Goderich.—Interests of Province require settlement of Grand Trunk Railway Company trainmen's strike.

Barrie.—Owing to cessation of freight traffic on Grand Trunk Railway, business is badly hampered here.

On July 27, telegrams were received from Collectors of Customs throughout Ontario, in reply to a request which had been made of them by the Government for information as to the extent to which business in various parts of the Province was being affected by the strike. The conditions existing in some of the principal centres of the Province were described in these messages as follows:—

Belleville.—No freight moving here.

Berlin.—All business affected, especially building trade, for want of material. No freight being moved. First way-freight yesterday.

Brantford.—No local freight moving on Grand Trunk Railway.

Collingwood.—No freight received or dispatched since strike. Business tied up, and factories closing. Lake freight, none.

Cornwall.—Business materially affected by present strike.

Galt.—No freight moving since strike began, in or out of Galt or out ports.

Guelph.—No Grand Trunk Railway bonded freight since July 19.

Hamilton.—No freight *via* Grand Trunk Railway, free or bonded, is received since strike commenced. Canadian Pacific Railway Company freight congested. Business seriously affected.

Kingston.—Business materially interfered with by strike. No freight received by Grand Trunk Railway since July 18.

Lindsay.—No freight moving on Grand Trunk Railway here. Business stagnant.

London.—No manifest freight Grand Trunk Railway for five days.

Midland.—No freight moving since strike. Business completely paralyzed.

Morrisburg.—Sheet Steel Corporation will shut down tomorrow, as supplies cannot be brought in.

North Bay.—No freight moving by Grand Trunk Railway since strike commenced.

Orillia.—No freight has been moved here since July 18.

Oshawa.—No freight received or dispatched at Oshawa since strike commenced.

Owen Sound.—No Grand Trunk Railway freight trains moving. Business badly affected.

Port Hope.—Practically doing no business.

Prescott.—Manufacturers badly affected. No local freight accepted. Merchants have goods tied up on railway.

Stratford.—Customs and other business almost at standstill. Scarcely any freight moving. Manufacturers and merchants seriously hampered.

Toronto.—Many importers complain goods held up, account of strike.

Whitby.—Strike on Grand Trunk Railway has affected business very much.

Minister of Labour Urges Arbitration.

On July 20, letters were addressed by the Minister of Labour to Mr. Charles M. Hays, President of the Grand Trunk Railway Company, and to Messrs. S. N. Berry, Vice-President of the Order of Railway Conductors, and James Murdock, Vice-President of the Brotherhood of Railroad Trainmen, on behalf of the employés, in which the Minister asked whether the respective parties to the dispute were willing to refer the existing differences to arbitration, and to agree to abide by the award given, provided a Board of Arbitrators mutually acceptable

could be secured, all the necessary expenditures incidental thereto to be met by the Government. The terms of the Minister's letter, above mentioned, as well as the replies of the respective parties and further correspondence on the same subject are shown in the communications following:—

OTTAWA, JULY 20, 1910.

DEAR SIR,

The situation created by the cessation in large part of operations over the transportation system of the Grand Trunk Railway Company, consequent upon the present strike of employés in train and yard service, has become such as to render it imperative in the public interest that some means be found to effect a settlement of existing differences and a speedy resumption of work in all branches of the Company's service. In the compliance by the parties with the provisions of the Industrial Disputes Investigation Act, the requirements of existing legislation as to the investigation of differences prior to a cessation of employment have been fully met. Such further assistance as it may be possible for the Government to render in the adjustment of the present differences would appear to depend on the co-operation and mutual consent of the parties who, not less than the Government, will doubtless recognize in the present interruption to industry and commerce a moral responsibility, greater perhaps than any legal obligation, towards the citizens of the Dominion, none of whom are likely to wholly escape the evil effects of a prolonged railway dispute, and some of whom are likely to suffer heavy financial, if not, also, more serious forms of loss.

In a communication received from Mr. Hays, the President of the Railway Company, of date the 13th instant, it is stated that the Company has proposed "the submission of the questions at issue to a board of arbitrators composed of experienced railway men, agreeing to abide by their determination, conditional only upon the men agreeing to do the same." In a communication from Mr. S. N. Berry, the Vice-President of the Order of Railway Conductors, and Mr. James Murdock, the Vice-President of the Brotherhood of Railroad Trainmen, of the 15th instant, it is stated that, Mr. Fitzhugh, representing the Grand Trunk Railway system, had been offered arbitartion by the undersigned many days before Mr. Hays came into the conference. We had offered to Mr. Fitzhugh that the entire matter should be left to arbitrators who had been named as acceptable to the railroad companies and employés and had disposed of identically the same questions on the following named railroads:—

New York Central and Hudson River Railroad.

Boston & Albany Railroad.

Michigan Central Railroad (including lines in Canada.)

Lake Shore and Michigan Southern Railroad.

Lake Erie and Western Railroad.

Cleveland, Cincinnatti, Chicago and St. Louis Railroad.

Delaware, Lackawanna & Western Railroad.

Delaware & Hudson Company.

Chicago, Indiana and Southern Railroad.

New York, Chicago & St. Louis Railroad.

"and other lines;" and elsewhere,—"We have not advised Mr. Hays that the men would not accept his offer of the application of the Board's award or arbitration."

From these communications it would seem that to each of the parties a reference to arbitration has appeared a fair and proper method of procedure for the adjustment of the differences between them, and the only inference it is possible to draw as to why one or other of the respective offers of arbitration has not been accepted it that each has been accompanied by a restriction not wholly acceptable to the other party.

The fairness of the principle of arbitration and its applicability to the present dispute having thus been admitted by the respective parties, I am writing to ask if each of the parties will now be willing to refer the existing differences to arbitration, and to agree to abide by the award given, provided a Board of arbitrators mutually acceptable can be secured; also to say that, if such a reference to

arbitration is agreed upon, all the necessary expenses incidental thereto will be met by the Government.

Will you, as representing one of the parties to the present dispute, please give to this communication the careful consideration which the great responsibility it imposes demands, and inform me at your earliest possible convenience of the attitude those whom you represent are prepared to take towards the proposal of arbitration it contains, and which is made by the Government on behalf of the people of this country.

Yours faithfully,

(Sgd.) W. L. MACKENZIE KING
Minister of Labour.

Telegram of Mr. Murdock, in reply to Minister of Labour's letter of July 20.

Montreal, July 21, 1910.

Hon. W. L. Mackenzie King,
Minister of Labour,
Ottawa, Ont.

Your communication of yesterday addressed to the undersigned, is received, and is considered of such vital importance to the community at large as to warrant my reply by telegraph. The organizations engaged in this struggle are irrevocably committed to the principles of arbitration, but we submit that the present situation is such that uncertain delays and differences of opinion in reference to the composition of any board of arbitrators, should not be permitted to interfere with the almost unanimously expressed desire of the men on the Grand Trunk Railway and Central Vermont Railway to standardize their wage rates and conditions. As you have been advised, before we offered sometime ago to leave the disposition of this entire matter to decision of Honourable E. E. Clark, of the United States Interstate Commerce Commission, and to Mr. P. H. Morrisey, President of the Railway Employés and Investors' Association. These two gentlemen were considered eminently qualified to pass upon identically the same questions on behalf of the railroad officials and employés of some fourteen roads in the teritory, and should be equally well qualified to dispose of this situation. Our offer was not accepted, but instead we found the officials of the Grand Trunk Railway Company making a pretence of conceding eighteen per cent. of an increase, which we stand prepared to prove means an actual increase very much less than eighteen per cent. We are still willing to permit of a recognition of our former offer in reference to arbitration, even although the time appears to have passed when arbitration should be considered. If the officials of the Grand Trunk Railway Company are disposed to accept the proposed plan of arbitration that has been placed before them for some time, as cited above, arrangements can be made for the calling off of the strike after satisfactory agreement has been reached on the arrangement to arbitrate. We do not believe that any other plan of arbitration of the questions in dispute could be or should be seriously considered, at this time, as our experience has been that the gentlemen connected with the operation of the Grand Trunk Railway Company have not heretofore been disposed to adopt and carry out decisions reached or awards filed by Boards of Arbitration. Our conviction in this respect is confirmed by the Grand Trunk Railway Company's attitude in our own case, wherein we find the President, in his letter of July 8, desiring to convey the impression to his employés and the Committee, that the Grand Trunk Railway Company were ready to accept the award of the Board, and later we find the same gentlemen, on the evening that the strike went into effect, laying a proposition before the Committee that presumed to do everything else but equalize rates and conditions on his lines. We cannot too strongly express our sincere regret for the great inconvenience that the public have been and will be called upon to suffer during the continuance of this unfortunate strike, but the interests of the men involved and their organizations are of such vital importance that it would appear entirely contrary to the unwritten principles of self-preservation to relinquish in any particular, the contentions of the men.

Signed on behalf of the General Committee, Grand Trunk Railway and Central Vermont Railroad.

(*Sgd.*) James Murdock.

Letter of Mr. Hays, in reply to Minister of Labour's letter of July 20.

MONTREAL, QUE., July 21, 1910.

HON. W. L. MACKENZIE KING,
Minister of Labour,
Ottawa, Ont.

Dear Sir,—

I have your letter of July 20, suggesting arbitration. What you propose is what I offered Messrs. Berry and Murdock, in my letter of July 8. It is also what I proposed in my letter to you, of July 13, to which, in yours of July 15, you replied, "I regret that it does not seem to me that I have the requisite authority to take either of the courses you suggest, nor do I believe it would be in the public interests to do so." While your attitude appears to have changed, I infer from the reported statement of the views of Messrs. Murdock and Berry, as contained in the morning papers, that they maintain the same position they have taken from the beginning.

Yours truly,

(*Sgd.*) CHAS. M. HAYS,
President.

Telegram of Minister of Labour to Mr. Hays, and Mr. James Murdock.

OTTAWA, July 22, 1910.

Referring to my letter of the twentieth instant, and the replies received, I would respectfully point out that neither the reply from the President of the Company, nor the reply from the representatives of the General Committee of the employés, answers the question it asks, and which is, whether, as representing one of the parties to the present dispute, you will now be willing to refer the existing differences to arbitration, provided a Board of arbitrators mutually acceptable can be secured, and the necessary expenses incidental to such a Board met by the Government. This is a question to which the people of Canada, who, at the present are being more largely affected by the existing dispute than either of the parties, have a right to expect a definite reply, and which, as a Minister responsible to them, I feel it my duty to ask on their behalf. Will you kindly give a direct answer to this question, at your earliest convenience, that the public may be able to judge for itself of the present position and attitude of the parties, in a matter which so vitally affects its interests.

(*Sgd.*) W. L. MACKENZIE KING.
Minister of Labour.

CHAS. M. HAYS,
President,
Grand Trunk Railway System,
Montreal, Que.

JAMES MURDOCK,
Representing Committee Grand Trunk and Central Vermont.

Grand Union Hotel,
Montreal.

Despatch of foregoing telegram confirmed by letter.

Letter of Minister of Labour in further reply to Mr. Hays' letter of July 21.

OTTAWA, July 22, 1910.

Dear Sir:

With reference to that part of your letter of July 21, just received, in which you say that the suggestion of arbitration contained in my letter of July 20, is what you proposed in your letter to me of July 13, I would respectfully say that I am unable to so construe your letter of the thirteenth instant, which, as pointed out in my reply, relates exclusively to the establishment of a Board of Investigation under the provisions respecting railway disputes in the Conciliation and Labour Act, and not to a binding arbitration based on mutual consent, which is the suggestion in my letter of July 20.

As already explained, both the language of the Statute and the Debates at the time make it abundantly clear that it was never intended the Government should compel an investigation of a dispute under one Act, and, forthwith, a second investigation under the provisions of another, the object in each case being the same, and this was my

reason for stating that it did not seem to me I had the requisite authority to take the course you suggested, and, as the dispute had already been the subject of reference under one Act for purposes of investigation, I did not believe it would be in the public interest to take the same course for the same reason under the provisions of another Act, even supposing I had had the requisite authority to so refer it. I am still of the same opinion and my attitude has not, therefore, changed in any particular, as your letter intimates would appear to be the case.

As stated in the communication sent to you by wire to-day, your present reply does not answer the question asked in my letter of July 20, and which is, are you now willing to refer the existing differences to arbitration, provided a Board of arbitrators mutually acceptable can be secured. I hope it may be possible for you to give a definite answer to this question.

Yours faithfully,

(*Sgd.*) W. L. Mackenzie King,
Minister of Labour.

Chas. M. Hays, Esq.,
President,
Grand Trunk Railway System,
Montreal, Que.

Telegram of Mr. S. N. Berry, in reply to Minister of Labour's letter, of July 20.

Detroit, Mich., July 22, 1910.

Hon. W. L. Mackenzie King,
Minister of Labour,
Ottawa, Ont.

Your favour of the twentieth received. I regard it as unfortunate that inflictions are very often forced upon innocent people in an industrial war. It is the case in all disputes of a serious nature. The men cannot be held accountable I am sure. They negotiated for six months before the Company placed before them any proposition wherein we could understand what they proposed to do in the matter. The proposition presented on the last day of negotiations by the Company disregarded entirely the award of the Board as well as the men's consistent request, this the Company's proposition will prove for itself. I have a copy of Mr. Murdock's message to you and to properly conserve the rights of the men I represent, I concur in what he has said relative to arbitration. I wish to assure you that I feel very grateful on behalf of the men for the interest you have taken in the matter, but cannot see wherein I would be justified in submitting the matter to arbitration unless to the two gentlemen who have already arbitrated it on several roads in the eastern territory.

(*Sgd.*) S. N. Berry,
Vice-President Order of Railroad Conductors.

Telegram of Mr. James Murdock, in reply to Minister of Labour's telegram of July 22.

Montreal, Que., July 22, 1910.

Hon. W. L. Mackenzie King,
Minister of Labour,
Ottawa, Ont.

Dear Sir:

Replying to your telegram of even date wherein you ask if we will now be willing to refer existing differences to arbitration provided a Board of arbitrators mutually satisfactory, can be secured. I answer yes, and believe that our position in that connection had been fully outlined in previous correspondence. It should be understood, however, that the two words "mutually satisfactory", from our point of view, would mean the arbitration offered by us previously, and now offered would only appear to be satisfactory to the employés.

The General Committee before leaving for their respective homes on Saturday last to order a strike on Monday evening, unless satisfactory settlement had been previously arranged, definitely passed

upon this phase of the situation and instructed their representatives.

Without further instructions from the General Committee men who pass judgement on and instruct in these matters, we would not be prepared to go further than outlined in previous statements to you.

We do not think the Government should be called upon to bear any part of the necessary expense incidental to the convening of a Board, the Government has already expended considerable money in this regard for little or no purpose. The organizations to which these men, who are on strike, belong are well able to pay all or part of the expense incident to the convening of a Board to dispose of these matters.

We regret exceedingly for the sake of the public and your Government the extraordinary, unusual and inconsiderate attitude of the other party to this dispute that caused the employés engaged in this strike to leave the service of the Company and thereby make effective the largest strike in train and yard service that these organizations have ever been called upon to participate in.

We will undertake to promptly assist you in bringing about normal conditions on the Grand Trunk Railway just as soon as we can be advised that our offer of arbitration repeated heretofore, has been accepted.

(*Sgd.*) JAMES MURDOCK.

Telegram of Mr. Hays, in reply to Minister of Labour's telegram of July 22.

MONTREAL, QUE., July 23, 1910

HON. W. L. MACKENZIE KING,
Ottawa, Ont.

Replying to yours of twenty-second. I have nothing to add to my letter of July 21.

(*Sgd.*) CHAS. M. HAYS.

Telegram of Minister of Labour, to Mr. James Murdock.

OTTAWA, July 23, 1910.

JAMES MURDOCK,
Representative of the General Committee,

Grand Trunk and Central Vermont,
Grand Union Hotel,
Montreal, Que.

With reference to your telegram in reply to mine of yesterday, I note that instructions from the General Committee do not permit of your accepting any offer of arbitration beyond that made by the Committee to the Company prior to the commencement of the strike, and that without further instructions from the General Committee men, who pass judgement on and instruct in these matters, you are not prepared to go further than outlined in previous statements. It may be that in view of the very serious situation created by the cessation of operations in large part over the whole of the Grand Trunk Railway Company in consequence of the strike, the Committee will recognize a special obligation to the public to find, if at all possible, some amicable means of terminating the present dispute. Would you, kindly, therefore, inform the General Committee of the desire of the Government to know whether as a Committee, acting with final authority on behalf of one of the parties to the present dispute, they will now be willing to refer the existing differences to arbitration, provided a Board of Arbitrators mutually acceptable, can be secured, it being understood that by "mutually acceptable" is meant a Board acceptable to each of the parties. As time is an all-important consideration, I hope it may be possible for you to obtain the views of the Committee, by wire, if necessary.

(*Sgd.*) W. L. MACKENZIE KING,
Minister of Labour.

Dispatch of foregoing telegram confirmed by letter.

Telegram of Mr. James Murdock, in reply to Minister of Labour's telegram of July 23.

Montreal, Que., July 23, 1910

Hon. W. L. Mackenzie King,
Minister of Labour,
Ottawa, Ont.

Dear Sir:

In reply to your telegram of even date, we desire to advise that it was the intention in previous communications to convey to you the information that the General Committee men had definitely passed upon the proposed question of arbitration, and that their estimate of that question was prejudiced favourably toward a certain plan of arbitration that had been considered acceptable to the general committees on a number of other roads where the same controversies existed. In telegram of yesterday, referring to that plan of arbitration, we said "we would not be prepared to go further" and we had in mind the definite action and instructions of the committee as to arbtration, also the almost unanimously expressed vote over personal signature of the men on the line. We believed it would be assuming entirely too much to undertake to set aside the expressions of the Committee and the men on the line.

If, however, there appears to be reasonable doubt in the minds of any parties interested in this controversy suggestive of the fact that the same plan of arbitration that successfully settled the same questions on a number of other lines, would be unfair and inconsiderate of the rights of either party to the dispute in this case, that is a matter that should be given consideration, and arrangements should be made to conserve the interests of the party whose rights were likely to suffer by an acceptance of the plan of arbitration used repeatedly heretofore.

We recognize the special obligation to the public and regret exceedingly the inconvenience and loss to which public and private interests are being subjected, and with that recognition desire to advise you that we will be willing to refer the existing differences to arbitration, provided a Board of arbitrators mutually acceptable, can be secured.

We would respectfully suggest that if you, on behalf of the Government, should be desirous of taking further action in this matter that parties to the differences should be more closely in touch with you for personal conference, and we await your suggestions in this connection.

(*Sgd.*) James Murdock.

Telegram of Minister of Labour, to Mr. James Murdock.

Ottawa, July 23, 1910.

James Murdock,
Representative of the General Committee, Grand Trunk and Central Vermont Railways
Grand Union Hotel,
Montreal.

I thank you for your wire just received, stating, as a representative of one of the parties to the present dispute, that those whom you represent recognize the special obligation to the public, and regret exceedingly the inconvenience and loss to which public and private interests are being subjected, and that you are willing to refer the existing differences to arbitration, provided a Board of arbitrators mutually acceptable can be secured. I have wired Mr. Hays, asking if, as representing the other party to the dispute, he will be willing to do the same. In the event of a favourable reply being received from Mr. Hays, I shall, if agreeable to the parties, be glad to lend the good offices of the Government towards the establishment of a Board of Arbitration, and, to this end, will, if desired, go down to Montreal, believing this course to be in the public interest, as most likely to best suit the convenience of the parties, and obviate delays.

(*Sgd.*) W. L. Mackenzie King,
Minister of Labour.

Dispatch of foregoing telegram confirmed by letter.

Telegram of Minister of Labour to Mr. Hays.

OTTAWA, July 23, 1910.

CHAS. M. HAYS,
President,
Grand Trunk Railway System,
Montreal, Que.

I received this morning your wire, in which you say, replying to mine of the twenty-second, you have nothing to add to your letter of July 21. I have just received a wire from Mr. James Murdock, representing one of the parties to the present dispute, in which Mr. Murdock says: "We recognize the special obligation to the public and regret exceedingly the inconvenience and loss to which public and private interests are being subjected, and, with that recognition desire to advise you that we will be willing to refer the existing differences to arbitration, provided a Board of Arbitrators mutually acceptable, can be secured." Will you kindly advise me at your earliest convenience, if, as representing the other party to the dispute, you also are willing to refer the existing differences to arbitration, provided a Board of Arbitrators mutually acceptable, can be secured.

(*Sgd.*) W. L. MACKENZIE KING.
Minister of Labour.

Dispatch of foregoing telegram confirmed by letter.

Telegram of Mr. Hays, in reply to Minister of Labour's telegram of July 23.

MONTREAL, July 24, 1910.

HON. W. L. MACKENZIE KING,
Ottawa.

Your telegram of the twenty-third received. While, as you know from the many conferences urging your action before the strike took place, and from our offer, repeated and urged upon the Committee, we were desirous of arbitration and so avoiding the existing trouble, the time for such action has now passed, and it is only necessary that we should have the protection to which we are entitled to enable us to resume the full operation of the road.

(*Sgd.*) CHAS. M. HAYS.

What the Settlement Means.

Under the terms of the settlement of July 31, it will be observed that the Company undertook that on January 1, 1912, it would "make effective in train and yard service on the Grand Trunk Railway the rates of pay and the rules contained in the schedule or agreement on that date in effect on the lines of the Canadian Pacific Railway east of Fort William." On July 21, two days after the occurrence of the strike on the Grand Trunk Railway System, an agreement was reached between the Canadian Pacific Railway and its employés in train and yard service, the text of which will be found elsewhere in the present issue of *The Labour Gazette*.

In the award of the Board of Conciliation and Investigation which was appointed under the Industrial Disputes Investigation Act to inquire into the matters in dispute between the Grand Trunk Railway Company and its employés in train and other service, it was proposed that,

1. The rates of pay on the Grand Trunk Railway governing train and yard service should be brought up to the standards of the other roads in the same territory;

2. That this standardization should be accomplished by two steps, the first increase to approximate, it was understood, about five-eighths of the difference between existing rates on the Grand Trunk Railway System and the standard wages on other roads.

3. The remaining three-eighths to be given at a subsequent date to be arranged between the Company and its employés concerned;

4. That the Grand Trunk Railway System should extend the adoption of the mileage basis of pay to cover not only its through freight service, as in the past, but also all other branches of its train service;

5. That in order to equalize wages on the Grand Trunk Railway System with those on standardized lines the conditions of service should likewise be standardized, the employés thus receiving in future payment for overtime for the same number of hours' service as well as standard allowances for detention, &c.

From a comparison of the terms of the

award above referred to, with the terms of the settlement of July 31, it would appear that the latter constitutes a virtual acceptance by both parties to the dispute of the award of the Board of Conciliation and Investigation, with the exception that the standardization of rules in train and yard service on the Grand Trunk Railway System, instead of becoming operative at once, is deferred until January 1, 1912; also that the extension of the mileage basis of pay to the employés in substitution of a monthly basis of pay to all branches of the Company's train service is deferred until January 1, 1912, instead of becoming operative immediately.

Employés Invite Government Intervention.

On July 27 a telegram was received by the Minister of Labour from Mr. James Murdock, representative of the General Committee of the Grand Trunk Railway and Central Vermont Railway employés, in Montreal, in the following terms:—

"Montreal, July 27, 1910.

"Hon. W. L. Mackenzie King,
"*Minister of Labour,*
"Ottawa.

"Messrs. Garretson and Lee held conference to-day with Mr. Hays without result. May I be permitted, on behalf of the men on strike, to request that, as a Minister of the Crown and representative of the people, you come to Montreal, and by further efforts try and arrange an honourable settlement either by arbitration or negotiation.

"James Murdock."

In compliance with the request contained in this message, the Minister of Labour left for Montreal the day following, July 28, for the purpose of lending the good offices of the Government to bring about a settlement of the strike, and was joined there by the Honourable Sir Frederick Borden, Minister of Militia and Defence. On the same evening, the Ministers met the respective parties to the dispute. On July 29, 30 and 31, the Ministers continued their efforts to effect if possible, an agreement, the Minister of Militia leaving for Nova Scotia on the evening of July 31. The Minister of Labour continued on the day following in conference with the parties concerned, and upon his return to Ottawa, on August 2, announced the terms of a settlement, which had been arrived at on all points at issue, and which was signed by Mr. Chas. M. Hays, President, on behalf of the Grand Trunk Railway System, and by various officers and committeemen of the Order of Railway Conductors and the Brotherhood of Railroad Trainmen, on behalf of the employés concerned.

The Terms of Settlement.

The terms of the settlement are as follows:—

Montreal, July 31, 1910.

Re dispute between Grand Trunk Railway Company and its employés in train and yard service.

By way of settlement of the existing difficulties:—

1. The Company will put back as soon as possible the men, other than those who have been or may be found guilty of acts of violence or disorderly conduct, the understanding being that there is to be no coercion or intimidation used towards the new men.

2. The Company will put into effect from May 1, 1910, the rates named in schedule of rates dated July 18, 1910, those rates to be embodied in the present schedules now in effect on this line, it being understood that those rates shall in no instance effect a reduction in any existing rate.

3. The Company will, on January 1, 1912, make effective in train and yard service on the Grand Trunk Railway the rates of pay and the rules contained in the schedule or agreement on that date in effect on the lines of the Canadian Pacific Railway east of Fort William.

The three above propositions shall apply also to the Central Vermont Railroad Company, the said Railroad Company to be substituted for the Grand Trunk Railway Company, and the Rutland Railroad Company to be substituted

for the Canadian Pacific Railway Company wherever the same are used or understood in the above. (In the case of the Central Vermont, by the "schedule of rates dated July 18, 1910" is meant the schedule issued by the management of that Company since July 1.)

CHAS. M. HAYS,
President,
Grand Trunk Railway System.

For the Order of Railway Conductors:
ROBERT KELLEY.
N. FOY.
ED. Z. SINCLAIR.
J. E. MANN.

Approved by
S. N. BERRY,
Vice-President.

For the Brotherhood of Railroad Trainmen:
JOHN MALONEY.
J. A. CONNER.
W. E. BERRY.
P. A. HEBERT.

Approved by
JAMES MURDOCK,
Vice-President.

Attest:
A. B. GARRETSON,
President,
Order Railway Conductors.

W. G. LEE,
President,
Brotherhood of Railroad Trainmen.

Schedule of Rates of Pay.

In the foregoing terms of settlement reference has been made to the schedule of rates dated July 18, issued by the Grand Trunk Railway Company. The schedule in question, which, under the terms of the agreement of July 31, has been made effective from May 1, 1910, has been communicated to the Department of Labour by the Grand Trunk Railway Company, and is as follows:—

EMPLOYÉS IN TRAIN SERVICE.

The rates of pay governing employés of the Grand Trunk Railway Company in train service, as promulgated in the Company's circular of July 18, are as follows:—

PASSENGER TRAIN SERVICE.

BETWEEN	CONDUCTORS.		BAGGAGEMAN.		BRAKEMEN.	
	Old Rate.	New Rate.	Old Rate.	New Rate.	Old Rate.	New Rate.

Rules Governing Train Service Employés.

The rules governing employés of the Grand Trunk Railway Company in train service, as promulgated in the Company's circular of July 18, are as follows:—

Snow Plow and Wreck Train Service

shall be paid at the rate of 10 miles per hour, through freight rates. Trainmen

shall be paid actual mileage to and from wreck, and 10 miles per hour while work at wreck.

Work trains.—Conductors, $4.00. and brakemen, $2.70 per day of twelve hours, six hours or less, half day; over six hours, full day. Overtime to be allowed at 33 cents, and 23 cents per hour for conductors and brakemen respectively. Ballast train crews shall be paid regular freight rates when the haul is more than 50 miles in one direction. These rates to include the ordinary work in connection with such service.

Miscellaneous service and rates:—

1. On special passenger or excursion trains, conductors shall be paid $2.46, baggagemen, $1.41, on northern, eastern and Ottawa Divisions, and $1.46 on middle and southern divisions; brakemen, $1.36 per 100 miles. When necessary to lay over for return trip, and the distance is less than 150 miles, conductors shall be paid $3.70, baggagemen, $2.10, and brakemen, $2, for the round trip.

2. When trainmen are called and train cancelled, 25 miles shall be allowed for two and a half hours or less. All time on duty after two and a half hours, to be paid *pro rata*, according to service. When trains are annulled for which monthly salaries are paid, trainmen shall be allowed full pay, and shall be subject to call at their regular monthly rates.

3. Crews running light, with engine and caboose, conductors shall receive 2½ cents, and brakemen, 1½ cents per mile. Crews deadheading shall be paid half freight rates. Short turn-around trips, 50 miles or less in each direction, shall be paid at through freight rates.

4. Short return trips, 25 miles or less, to be rated as 25 miles, and paid at regular rates for class of service performed. Short return trips, continuations of regular trips, shall be paid actual mileage or time at the rates in effect for the class of service performed.

5. When a trainmen in regular service is called on to perform duties other than his own, he shall receive not less than his own rate of pay; this not to apply to extra men.

6. Freight crews paid on mileage basis, when obliged to double grades on account of train tonnage exceeding rated capacity of locomotive, shall be paid for such mileage at rate for class of service performed, and time so made shall be deducted from detention; in other words, men shall not be paid twice for the same service.

7. Crews assigned to specified runs shall be paid extra for work done outside of regular run, at rates for class of service performed and failing to make full month shall be paid *pro rata* for services performed.

8. Trainmen attending court, coroner's inquest, or other legal cases for the Company, shall receive one day's pay for each twenty-four hours, and, if away from home, reasonable expenses in addition. The court, witness and mileage fees shall be assigned to the Company.

9. At terminals where car inspectors are employed, they shall couple and uncouple hose and test air brakes, but this does not relieve train crews from seeing that their train is in proper condition.

10. Freight crews to be called, as nearly as possible, two hours before trains are ordered to leave. Trainmen to sign book showing time called.

11. If a trainman be taken off his run for any cause, he shall be given a hearing, at which time he shall have the right to have another trainman of his own selection appear and speak for him, and shall have the right to appeal from the decision of the local to the general officers of the Company. Should no decision be rendered within fifteen days, he shall receive his regular pay until the decision is arrived at. The accused party, if he so desires, shall be allowed to see all evidence produced against him.

12. Trainmen, after continuous service of sixteen hours or more, may have eight hours' rest before they are called for service, except in case of emergency.

13. When the business of the Company requires temporary transfer of men from one district or division to another, the competent junior men in the service shall be transferred, and hold their seniority on the districts to which they belong.

14. The number of crews shall be, so far as possible, adjusted in order that un-

assigned through freight crews in the service three years or more shall have an opportunity to make at least 2,600 miles per month.

15. The oldest qualified freight conductor at each principal terminal shall be given a passenger uniform, and shall have the preference for extra passenger work.

16. Conductors or brakemen piloting trains or engines shall be paid through freight conductor's rate.

17. Trainmen required to coal engines shall be allowed extra compensation at overtime rates, with a minimum of one hour; such time to be deducted from overtime made on the trip.

18. If there are any changes in the mileage of specified trains shown in the schedule, or additional service of the same class established, the monthly salaries of men on such runs shall be adjusted on the basis of the mileage, conditions and salaries paid on runs of alike character.

19. Employés leaving the service of the Company for any cause will be given a service letter stating time of service.

Detention.

20. On all passenger trains, not otherwise specified, detention shall be paid for the time used in making the trip in excess of the time necessary to complete the trip, at an average speed of 15 miles per hour.

21. On all mixed, freight and snow plow runs, not otherwise specified, detention shall be paid for the time used in making the trip in excess of the time necessary to complete the trip at an average speed of 10 miles per hour.

22. On all way freight runs, not otherwise specified, detention shall be paid for the time used in making the trip in excess of the time necessary to complete the trip at an average speed of 8 miles per hour.

23. On specified runs, the monthly rate includes detention and all work in connection with the run.

24. Detention shall be computed from the time a train is ordered to leave the point of departure until it is registered in at the arriving terminal.

25. Fractions of an hour less than thirty-five minutes shall not be counted. Fractions of an hour thirty-five minutes or over shall be counted as one hour.

On the Ottawa Division rule number eleven reads as follows:—

11. If a trainman be taken off his run for any cause, he shall be given a hearing, at which time he shall have the right to have another trainman of his own selection appear and speak for him, and shall have the right to appeal from the decision of the local to the general officers of the Company.

The rules governing promotion of employés of the Grand Trunk Railway Company in train service are as follows:—

NORTHERN DIVISION.

26. When vacancies for conductors, baggagemen and brakemen occur on preference runs, promotion shall be as follows: The oldest qualified man in the service shall be offered the run; should he decline it, he shall for all time waive his right to the run and it shall be offered to the next man in line of seniority, with proper qualifications. No change to be made in the system of promotion of conductors in passenger service. District promotion to prevail on Northern Division. Passenger brakemen to be promoted from freight service as follows: First, to local and then to through passenger runs, next to local and then to through baggage runs. Baggagemen and brakemen entering or at present in passenger service, may be transferred to freight service, but shall not be eligible for promotion to conductor until they have been in freight service two years, and one year, at least, immediately preceding promotion.

EASTERN DIVISION.

26. When vacancies for conductors, baggagemen and brakemen occur on preference runs, promotion shall be as follows: The oldest qualified man in the service shall be offered the run; should he decline it, he shall for all time waive his right to the run, and it shall be offered to the next man in line of seniority with proper qualifications. No change to be made in the system of promotion of conductors in passenger service. District promotion to prevail on Eastern Division;

Sixth District men to have one-third work on through passenger service between Montreal and Toronto. Passenger brakemen to be promoted from freight service, as follows: First, to local, and then to through passenger runs, next, to local and then to through baggage runs. Baggagemen and brakemen entering or at present in passenger service may be transferred to freight service, but shall not be eligible for promotion to conductor, until they have been in freight service two years, and one year, at least, immediately preceding promotion.

MIDDLE AND SOUTHERN DIVISIONS.

26. When vacancies for conductors, baggagemen and brakemen occur on preference runs, promotion shall be as follows: The oldest qualified man in the service shall be offered the run; should he decline it, he shall for all time waive his right to the run, and it shall be offered to the next man in line of seniority with proper qualifications. No change to be made in the system of promotion of conductors in passenger service. Universal promotion in passenger and mixed service, and station promotion in other service, on Middle Division. Passenger brakemen to be promoted from freight service as follows: First, to local, and then to through passenger runs, next, to local, and then to through baggage runs. Baggagemen and brakemen entering or at present in passenger service may be transferred to freight service, but shall not be eligible for promotion to conductor until they have been in freight service two years, and one year, at least, immediately preceding promotion.

OTTAWA DIVISION.

26. When vacancies for conductors, baggagemen and brakemen occur on preference runs, promotion shall be as follows: The oldest qualified man in the service shall be offered the run; should he decline it, he shall for all time waive his right to the run, and it shall be offered to the next man in seniority with proper qualifications. Universal promotion to prevail. Passenger brakemen to be promoted from freight service as follows: First, to local, and then to through passenger runs; next, to local, and then to through baggage runs. Baggagemen and brakemen entering or at present in the passenger service may be transferred to freight service, but shall not be eligible for promotion to conductor until they have been in freight service two years, and one year, at least, immediately preceding promotion.

Rules Governing Employés In Yard Service.

The rules governing employés of the Grand Trunk Railway Company in yard service, on all divisions, are as follows:—

1. Ten hours will constitute a day's work; five hours or less, a half-day; over five hours, a full day. After ten hours, overtime will be paid at schedule rates per hour; less than thirty-five minutes will not be counted; for thirty-five minutes or over, one hour will be allowed.

2. Crews will be allowed one hour in which to take their meals between the hours of eleven and two o'clock. Should it be impossible to give a crew a meal hour within the time specified, they will be given thirty minutes, which will expire at two o'clock. If only thirty minutes are given, the men will be paid for the meal hour.

3. Yardmen required to do other than their regular work during their regular working hours will be paid regular yard rates; and if required to attend Court will be allowed reasonable expenses.

4. When a yardman is suspended or discharged for what he considers an unjust cause he will be given a hearing within fifteen days, and if the investigation proves him blameless, he will be reinstated and paid for the time lost.

5. When vacancies occur, the men senior in the service will be given preference, qualifications and other things being equal, the Superintendent to be the judge of qualifications.

6. Engines in yard service to be equipped with foot-boards and hand railings on front and rear, also head-lights on front and rear. Engines not to be worked more than twenty-four hours unless properly equipped.

7. The use of intoxicating liquors or the visiting of saloons will be sufficient cause for dismissal. Any employé will be dismissed immediately in case of intoxication or insubordination.

AGREEMENT BETWEEN THE CANADIAN PACIFIC RAILWAY COMPANY AND ITS EMPLOYÉS IN TRAIN AND YARD SERVICE.

AS reported on an earlier page of the present issue of the *Labour Gazette*, an agreement was reached in Montreal, after protracted negotiations, of a dispute between the Canadian Pacific Railway Company and its employés in train and yard service to the number of 4,360. The differences in question had been the subject of a reference on March 17, to a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act, the report of the Board and a minor report by Mr. J. G. O'Donoghue being published in the July number of the *Labour Gazette*. Following the communication of the award to the parties concerned, a series of meetings were held in Montreal between the management of the Company and the committees of employés, which resulted in the signing of an agreement which was understood to be in some respects similar to, but in other respects different from, the terms of settlement proposed by the Board of Conciliation and Investigation, and which would appear to correspond pretty closely both in respect of rates of wages and of rules, to the "standard" rates and rules already adopted during the past few months on a number of the principal railway systems in the Eastern States.

The agreement between the Canadian Pacific Railway Company and its employés in train and yard service was made effective from May 1, 1910, and is in the following terms:—

Rates of Pay.

Article "A".—The rates of pay in passenger train service on steam and electric trains shall be

Conductors	2.68	cents per mile.
Baggagemen	1.55	" "
Brakemen	1.50	" "

Article "B".—The minimum allowances for passenger trainmen in both steam and electric train service for each day used shall be:—

Conductors	157	miles or	$4.20	per day.
Baggagemen	177	" "	2.75	"
Brakemen	170	" "	2.55	"

Exclusive of overtime.

Regularly assigned passenger trainmen who are ready for service the entire month and who do not lay off on their own accord, shall receive the following minimum sums, including overtime earned, if any, for the calendar month:—

Conductors	$125.00
Baggagemen	75.00
Brakemen	70.00

Article "C".—Passenger trainmen on short turn-around runs, no single trip of which exceeds 80 miles, including suburban and branch lines service, and the work incident to such service, shall be paid overtime for all time actually on duty, or held for duty, in excess of eight hours, (computed on each run from the time required to report for duty to end of that run) within twelve consecutive hours, and also for all time in excess of twelve consecutive hours computed continuously from time first required to report until final release at end of last run. All other passenger trainmen shall be paid for overtime on the basis of 20 miles per hour, computed from the time required to report for duty until released, and separately for each part of a round trip.

Overtime shall be computed for each employé on the basis of actual overtime worked, or held for duty, at the following rates:—

Conductors	42	cents per hour.
Baggagemen	25	" "
Brakemen	24	" "

Example: On the St. Thomas-Woodstock passenger run, the work incident to such service would include turning, getting away and making up their train, but would not include station switching, or work not in connection with their train.

Exceptions to Articles "B" and "C".

On the Montreal-Newport and the Montreal-Ottawa (Montreal & Ottawa Section) runs trainmen will be paid the

flat mileage rate for the actual mileage made in the calendar month, irrespective of days used, but not less than the minimum monthly guarantee as provided in Article "B".

For any overtime made in addition (as per Article "C") to the amount necessary to make up the minimum monthly guarantee trainmen will be paid for at the overtime rates.

Extra mileage made outside of assigned service is not to be considered as overtime.

Article "E".—Reductions in crews, or increases in mileage, in passenger train service from assignments in effect November 1, 1909, shall not be made for the purpose of offsetting the above increases in wages. This, however, is not to be understood as preventing readjustment of runs in short turn-around, branch or suburban service that are paid under the minimum rules for the purpose of avoiding payment of excess mileage or overtime that would accrue under these rules, without reducing the number of crews.

Article "F".—The pay in through and irregular freight train service shall be:—

Conductors	3.63 cents per mile.
Brakemen	2.42 " "

Runs of 100 miles or less, either straight away or turn around, shall be paid as 100 miles.

Article "G".—The pay in way freight shall be:—

Conductors	3.975 cents per mile.
Brakemen	2.70 " "

Runs of 100 miles or less, either straight away or turn-around, to be paid as 100 miles.

Article "H".—In all freight and mixed train service, including pusher or helper service, 100 miles or less or ten hours or less, shall constitute a day's work.

On runs of 100 miles or less, overtime shall be paid for time in excess of ten hours and on runs of over 100 miles, overtime shall be paid for that time used in excess of the time necessary to complete the trip at an average speed of 10 miles per hour. The working time of trainmen shall begin at the time they are required for duty, and do so report, and shall continue until they are relieved from duty at end of run. Overtime shall be computed for each employé on the basis of actual overtime worked, or held for duty, and be paid for at the rate of 10 miles per hour for the class of service performed.

Article "I".—In work, construction, snowplow or wrecking train service trainmen shall be paid through freight rates, 100 miles or less, ten hours or less, shall constitute a day's work. Overtime computed for each employé on the basis of actual overtime worked, or held for duty, pro rata.

Trainmen while assigned to work train service will be paid a minimum of 100 miles for each working day exclusive of overtime previously earned.

Rules.

Rule 1.—Constructive mileage will be allowed for freight trains as follows:—

Between Outremont and Newport, 120 miles.

Rule 2.—Crews assigned to mixed train runs, or to runs a portion of which is passenger, and the balance mixed, or freight, or both, will be paid mileage, or time, at through freight rates, with a minimum of 3,000 miles per month.

Rates for mixed trains on branch lines of less than 100 miles in length include handling way freight.

Passenger train crews when handling freight cars (not express) en route will be paid through freight rates for the actual mileage with such cars.

Rule 3.—Freight trainmen running passenger trains will be paid through freight rates, except when relieving regular passenger trainmen, when they will be paid the passenger rates of the man relieved

Rule 4.—Passenger trainmen making extra mileage on other than their assigned runs will be paid through freight rates except when turned between sud-divisional terminal points, in which case they will be paid their passenger rates.

Passenger trainmen will not be compelled to make extra mileage outside of their assigned trips on their assigned runs if possible to avoid it.

Rule 5.—Mileage or overtime will be paid for when trainmen are run more than 1 mile off main line.

Track mileage will be paid for plowing or flanging sidetracks.

Rule 6.—When work trains run 40 miles or more to and from loading or unloading point they will be paid time or mileage, whichever amounts to the most, in addition to actual time loading or unloading.

Rule 7.—Trainmen on wrecking trains will be paid mileage to and from place of wreck, and work train rates per hour while working at wreck, with a minimum of 100 miles for the combined service.

Rule 8.—Trainmen will be paid for work or wreck train service en route when time occupied exceeds one hour, and time so paid for will not be included in computing overtime.

Rule 9.—Trainmen deadheading, or travelling passenger, will be paid same mileage and rate as the corresponding men on train on which they travel.

Trainmen running with light engine or with engine and caboose, will be paid full through freight rates.

Rule 10.—(a) Through freight trainmen or mixed trainmen (not otherwise specified in Rule 2) required to load or unload way freight will be paid overtime at way freight rates for time so occupied, but not in excess of way freight rates for full trip.

(b) Through freight or mixed train crews (not otherwise specified in Rule 2) making more than five stops to take on or set out (a car or cars) or that make more than (10) ten switches en route, or a combination of such service, will be paid way freight rates for the trip.

Rule 11.—Trainmen acting as pilots will be paid conductors' through freight rate.

When a pilot, as defined in Operating rules, is required, a competent man will be supplied in addition to the regular crew. A man unfamiliar with the physical characteristics of the road will not be required to go.

Rule 12.—Through freight rates per hour will be paid for time occupied in switching at terminals and turn-around points, not less than three of the train crews being used, except that in all freight and mixed train runs of less than 100 miles, when the combined actual mileage including overtime made and the time occupied in terminal switching at 10 miles per hour exceeds the total time on duty, trainmen will only be paid for such excess time occupied in terminal switching at one-tenth of the daily rate per hour.

Rule 13.—When trainmen come on duty and are not required they will be paid through freight rates, with a minimum of 30 miles, and will stand first out. Trainmen held for duty and not used, and their vans have been sent out, will be paid 100 miles for each twenty-four hours while waiting return of the van.

Rule 14.—When unassigned crews are available and are run around at terminals they will be paid 50 miles for each run around, and hold their turn out.

Rule 15.—Trainmen held for train service after arrival of train at final terminal, or end of run, will be paid for time so held, provided minimum daily mileage, or time, has been exceeded.

Rule 16.—For freight train service performed in or between yards at terminals trainmen will be paid overtime rates per hour.

Rule 17.—Time or mileage made doubbling or assisting other trains will be paid for at through freight rates.

Rule 18.—Trainmen while shovelling coal for tenders en route will be paid 30 cents per hour, and this time will not be deducted in computing overtime.

Trainmen will not be required to do this work when sectionmen are available.

Rule 19.—Trainmen held off on Company's business, or on Company's order, will be paid scheduled mileage rates for mileage lost, and reasonable expenses if away from home.

Rule 20.—Trainmen relieving yardmen will be paid yardmen's rates.

Rule 21.—Trainmen will not be compelled to ride on snowplows or flangers but will be supplied with van or other suitable car, properly equipped.

Rule 22.—Trainmen assigned to work train service will not be considered absent from time work is through Saturday

night until starting hour Monday, unless notified before laid up Saturday that they will be required.

Trainmen will be allowed to go home Sundays if train service permits, and absence will not interfere with work service.

Rule 23.—Unless senior trainmen desire otherwise junior trainmen, if competent, will be assigned to work trains.

Rule 24.—When a deadhead crew is required the first crew out will be called to deadhead, and will hold its turn out at the distant terminal.

Rule 25.—The Company will arrange their way freight service to avoid the handling of shed freight at night and on Sundays. Trains leaving terminals between 4.00 a. m. and noon will not be considered night trains.

Rule 26.—Way freight trains will not be double-headed, except where there is but one freight train each way daily.

Rule 27.—Trainmen will be advised with reason, and without unreasonable delay, if mileage or time claimed is not allowed.

Rule 28.—Trainmen assigned to regular runs will not be considered absent from duty after arrival at final terminal at end of day's run, but if called for service will be given their turn out with unassigned crews.

Trainmen employed on regular runs will be allowed to go home Sunday, provided regular service permits.

Rule 29.—Through freight crews will be run first in first out of the terminals on their respective sub-divisions.

Points on current time-table where one or more trains end are terminal points for such trains. The meaning of terminal in the foregoing article is understood to be the regular points between which crews regularly run; for instance, the terminal from which a branch line projects would be the terminal for the branch, but not necessarily for the section from which the branch line springs.

Rule 30.—Except in cases of wrecks, washouts, snow blockades preventing crews being returned to their home terminals, unassigned crews laid up at other than their own terminal longer than eighteen hours (exclusive of Sunday) without being called for duty will be paid 10 miles per hour for the first ten hours in each subsequent twenty-four hours thereafter, time to be computed from the time crews go off duty until one hour before the departure of the train on which they resume duty. When the men book rest of their own accord the time so booked will not be included.

Rule 31.—Crews while en route between terminals will not be compelled to abandon their vans for the purpose of travelling passenger, or when being moved from one to the next terminal for freight service, or when handling Colonist or Continental (European) immigrant trains.

Rule 32.—Trainmen will not be disciplined or dismissed until after investigation. They may, however, be held off for investigation not exceeding three days, and may have the assistance of a fellow employé in stating their case, and the evidence against them will be stated to them. Employés concerned to be notified to be present. If not satisfied with decision, they may appeal either personally or through their representatives to the General Superintendent, within thirty days after having been advised of such decision, and if not satisfied with General Superintendent's decision, they may appeal to the higher officials.

Rule 33.—When a trainman is discharged or resigns he will as soon as possible be paid and given a certificate stating the term of service and capacity employed.

Rule 34.—Freight trainmen living within 1 mile of yard office, and passenger trainmen within 1 mile of passenger station, will be called as nearly as possible in time to be on duty thirty minutes before leaving time of train. This rule, except on the Lake Superior Division, will not apply to schedule passenger and mixed trainmen assigned to regular runs leaving between 7.30 a.m. and 10.30 p.m., but in cases where such trains are more than one hour late they will be advised of probable time of departure.

Rule 35.—All passenger and mixed trains will have at least one train baggageman and one brakeman, but passenger trains of eight or more cars will have two brakemen and one baggagemen, if there is a local baggage car on the train,

one or two baggage or refrigerator cars to count as one car, and three or four as two cars.

Rule 36.—One brakeman or baggageman on each train must have at least six months' experience, and the same or another man be acquainted with the run. A conductor will not be required to take out an incompetent brakeman unless the alleged incompetency is disproved.

Rule 37.—Trainmen who have been on duty twelve hours or more will not be called again if they have booked rest on arrival, the men to be judges of their own condition, and not less than six hours rest to be booked at any terminal.

Rule 38.—Trainmen in through freight service, who do not lay off of their own accord, will be paid for not less than equivalent to 2,600 miles in any one month. This will not apply to spare men. This will not prevent crews making as many miles as they are consistently able to make provided they take the proper rest.

Rule 39.—Trainmen will not be transferred from one promotion district to another, or be run on other than their own district, except in case of shortage of men on that district, when the junior men will be sent unless the senior men wish to go.

Shortage of men will not be considered to exist when there are men available that could be moved to point required.

Men to be notified of transfer at home terminal.

Rule 40.—Superintendents will prepare separate seniority lists for each promotion district or territory, and will have them posted on the first day of January, in each year. Said list will be posted in conspicuous places at all terminal registering points, and employés whose standing is incorrectly shown must protest in writing within ninety days there after or not action will thereafter be taken.

Rule 41.—Promotion on each promotion district or territory will be made according to seniority of men on that district or territory, and will be governed by merits, fitness and ability. Men not promoted in their turn will be advised the reason. The promotion of conductors will be to any run in either freight, mixed or passenger service to which their seniority as conductor entitles them, and in the event of a conductor refusing to accept any particular run to which he is entitled, he will lose his rights to that run until it again becomes vacant, but will otherwise retain his seniority standing. Permanent vacancies or new runs created will be bulletined for ten days and given to the senior qualified men applying therefor. In the event of a reduction of crews the junior men will be reduced.

Senior freight brakemen will be required to pass their examination for conductor in turn. Brakemen refusing promotion to conductor, or failing to qualify for same within thirty days of date set for their examination, will thereafter rank junior as conductor to the men in their stead.

The promotion of passenger brakemen shall be to passenger baggagemen, or to any run in passenger service to which their seniority as brakemen or baggage men entitled them.

Promotion for freight brakemen will be to any run in either freight or mixed train service to which their seniority as brakemen entitled them, but in the event of a brakemen refusing to accept any particular run that his seniority entitled him to, he will lose his rights to that run until it again becomes vacant, but will otherwise retain his seniority standing. Permanent vacancies or new runs created will be bulletined for ten days, and given to the senior qualified man applying therefore. In the event of a reduction in staff the junior men will be reduced. Where the promotion to any mixed train run has been made from the passenger service previous to the 1906 promotion rules, the men may remain on such runs and take their promotion to passenger service, retaining their original seniority standing, but in the event of any vacancy occurring on mixed train runs in future, it will be filled by men taken from freight service.

(a) Men on Eganville Branch will now be returned to passenger service and that run manned from freight service.

(b) Men who have lost their promotion rights under former promotion rules will not be considered as regaining any rights by the adoption of this rule.

Freight brakemen are not eligible for promotion to passenger train service, except that when there is a vacancy for regular passenger brakemen, it will be bulletined for ten days, and preference will be given to the senior suitable freight brakeman or yardman applying for it.

Brakemen have no seniority standing during the first six months service, but will then rank as brakemen from date entering service.

Promotions to runs extending over more than one division will be divided and assigned between such divisions as nearly as possible on the mileage basis.

In the event of the transfer of existing lines from one General Superintendent's division to another, trainmen affected will have the choice of being transferred according to senoirity. The men transferred will rank with those on the promotion district to which they transfer according to the dates from which they rank as conductor, baggageman or brakeman respectively, but no man will be reduced unless the number of crews employed is reduced.

Rule 42.—Preference in manning new lines or extensions will be given trainmen on promotion district from which new line diverts. In future when a new line connects two promotion districts it will be manned by men taken equally from those districts, provided they are competent, having regard to the men's seniority, dating from time of entering the service, and these men will then rank with the men on the promotion district to which they have been transferred, according to the dates from which they rank in the service, as conductor, baggageman or brakeman respectively. This will not apply to diversions reducing grades or distances on existing lines.

Rule 43.—Trainmen will not be compelled to clean cars, light lamps, couple or uncouple hose-bags on passenger trains where car repairers are on duty, but will be expected, where train porters are not employed, to remove rubbish from the coaches while en route so as to give them a tidy appearance.

Rule 44.—(Applicable to service in United States only.)

(a) Employés in train service will not be tied up unless it is apparent the trip cannot be completed within the lawful time, and not then until after the expiration of fourteen hours on duty under the Federal Law, or within two hours of the time limit provided by State Laws, if State Laws govern.

(b) If employés in train service are tied up in a less number of hours than provided in the preceding paragraph, they shall not be regarded as having been tied up under the law, and their service will be paid for under the provisions of this schedule.

(c) When employés in train service are tied up between terminals under the law, they shall again be considered on duty and under pay immediately upon the expiration of the legal period off duty applicable to any member of the road crew, providing the longest period of rest required by any member of the crew, either eight or ten hours, shall be the period of rest for the entire crew.

(d) Continuous trip will cover the movement straight-away or turn-around, from initial point to the destination train is making when required to tie up. If any change is made in the destination after the crew is released for rest, a new trip will commence when the crew resumes duty.

(e) Employés in train service tied up under the law will be paid continuous time or mileage of their schedules from initial point to tie up point. When they resume duty on a continuous trip, they will be paid miles or hours, whichever is the greater, from the tie up point to the next tie up point or to the terminal. It is understood this article does not permit conductors and trainmen to run through terminals unless such practice is permitted under the schedule.

(f) Employés in train service tied up for rest under the law, and then towed or deadheaded into terminal, with or without engine or caboose, will be paid

therefor as per section (e) the same as if they had run the train to such terminal.

(g) Employés in train service tied up in obedience to law will not be required to watch or care for engine or perform other duties during the time tied up.

(h) Yardmen required to work sixteen hours will resume work when their rest period is up under the Federal Law, and then be permitted to work ten hours, or paid therefor.

Rule 45.—The Company will join in arrangements for and in representation at a conference with other Railways in the territory to dispose of the doubleheader question.

Rule 46.—Conductors, trainmen, yardmen, or their representatives, will call the attention of their Superintendents to any violation of the Articles in this schedule, and, if necessary, refer the matter to the General Superintendent, in order to have the same remedied.

Rule 47.—Trainmen will not be compelled to handle cars in train the draft gear of which is defective and requires to be chained, further than to take a car of perishable freight or live stock that may become disabled en route, to the first terminal. Under no circumstances will trainmen be compelled to handle cars behind van other than official cars or flangers.

Rule 48.—Any question of interpretation which may arise will be adjusted by the General Chairman with the General Superintendent, and then, if necessary, with the General Manager.

Rule 49.—This schedule of rates and rules for trainmen will continue in effect until terminated by thirty days' notice in writing.

A. McGOVERN,
For Brotherhood of Railway Trainmen
Approved:

J. W. LEONARD,
General Manager.

Yard Service.

Rules 9, 13, 19, 27, 32, 33, 37, 38 and 40 will apply to yardmen.

Rule A.—When day and night crews are employed on same engine, the hours for each crew to commence work will be at or between 6.45 A.M. and 8.00 A.M., and at or between 5.45 P.M. and 7.15 P.M., respectively.

Rule B.—Yardmen working four hours or more between the hours of 6.00 P.M. and 6.00 A.M. will be paid night rates for the shift.

Rule C.—The working time of yardmen will commence at the time required to report for duty, and do so report, and will continue until they are relieved from duty at the end of the day's work, excepting the time taken for meals. Yardmen will be relieved at the yard in which they commence work.

Rule D.—Yardmen will be allowed one hour for meals between the fifth and seventh hours from time beginning work; if required to work any part of the meal hour they will be allowed thirty minutes for the meal, as soon as possible, and paid for one hour.

Rule E.—Yardmen will not be required to go outside of yard terminals except for switching or transfer service, and yard crews whose work takes them outside of the switching terminal will receive yardmen's rates.

Rule F.—This agreement for trainmen and yardmen is not to operate to reduce any rates that may be now higher than those agreed upon. This not to enforce rearrangement of present method of operating day and night shift in yards.

Rule G.—Yardmen (not spare) relieving switchmen will be paid yardmen's rates.

Rule H.—Yardmen will not be compelled to couple or uncouple hosebags on passenger cars in yards where car men are on duty.

Rule I.—Yard crews in transfer service will be provided with a van or other car suitably equipped.

Rule J.—West St. John, Montreal Ottawa and Toronto terminals, McAdam, Farnham, Smith's Falls, London, Windsor and North North Bay:—

Foreman	day	37	cents	per hour.
Foreman	night	39	"	"
Yardman	Day	34	"	"
Yardman	Night	36	"	"

Megantic, Quebec, Owen Sound, Prescott and yards west of North Bay:—

Foreman	day	36	cents per hour.
Foreman	night	38	" "
Yardman	day	33	" "
Yardman	night	35	" "

All other yards:—

Foreman	day	35	cenes per hour.
Foreman	night	37	" "
Yardman	day	32	" "
Yardman	night	34	" "

Ten hours or less shall constitute a day's work. Overtime computed for each employé on the basis of actual overtime time worked or held for duty *pro rata*.

Rule K.—The promotion of yardmen in their respective yards will be according to seniority of the men in that yard, and will be governed by merit, fitness and ability. Men not promoted in their turn will be advised of the reason. Any yardmen failing to qualify for or refusing promotion will thereafter rank junior to the men promoted for that position only. Permanent vacancies, or new jobs created, will be advertised for ten days, and given to the senior qualified man applying therefor.

In the event of a yard being abolished, the men in such yard will be assimilated with the men in other yards on the Superintendent's district, ranking according to seniority from the time of entering the service as yardmen. When a new yard is created yardmen on the Superintendent's district will be given preference to the positions in that yard, in accordance with seniority in their respective classes.

Rule L.—A yard crew shall consist of not less than one foreman and two yardmen, except following yards, where crew will consist of not less than foreman and one yardman: Megantic (during summer season), Quebec (during winter season), Three Rivers, Chalk River, Muskoka, Cartier, Chapleau, White River, Schreiber, Woodstock, N.B., St. Stephen (during winter season), Brownville Junction (during summer season), Owen Sound, (during winter season) Goderich, Orangeville. Winter season covers period November 1 to April 15. Summer season covers period April 15 to November 1.

Rule M.—This schedule of rates and rules for yardmen will continue in effect until terminated by thirty days' notice in writing.

For yardmen:

A. McGOVERN.

Premium	6.55
	$125.00

If overtime (on speed basis of 20 miles per hour) is earned on any single trip, such overtime to the extent of $6.55

goes towards making up minimum; additional overtime, if any, is added to the $125.

Exceptions to B. and C.—Crews on run will be paid for the actual mileage made during month (same principle as at present) at the new rate, and will be allowed overtime made on any single trip on speed basis of 20 miles per hour, but monthly earnings will not be less than monthly minimum rate, provided they do not lay off of their own accord.

Article E.—For instance, Toronto-Hamilton run:—

The running of the crews on this run may be changed to avoid paying excessive overtime; the Company to say where and when the day's work starts, but the number of crews paid must remain as now, and each man receive not less than the minimum monthly rate, provided of course he does not lay off of his own accord.

Article H.—On turn-around runs, crew will be paid time at 10 miles per hour, or mileage made, whichever amounts to the most, from time reporting for duty until relieved from duty at starting point, but the Company may elect instead to pay not less than 100 miles for each single trip.

Article I.—A crew earning equivalent to 125 miles on Monday, and through stress of weather, or otherwise, are not turned out for Tuesday, will be allowed 100 miles for Tuesday.

Rule 2.—Clause 1. The allowance for any one day must not be less than equivalent to 100 miles at through freight rates.

Clause 2. Mixed train crews handling way freight on branches exceeding 100 miles in length will be governed by rule ten.

Clause 3. A passenger train running from, say, Teeswater to Toronto, picks up freight cars at Cataract, and sets them out at West Toronto, will be paid passenger rates for the mileage Teeswater to Cataract, and West Toronto to Toronto, and through freight rates for mileage Cataract to West Toronto.

A mixed train is a time-table train composed of freight cars, passenger coach or coaches and a baggage or a combination car, and does not include a freight train with only a passenger car attached.

Rule 6.—If from the shovel to the drop is 40 miles, and, say, three trips are made and actual running time not exceed twelve hours, and in addition one hour was used in loading, and one hour in unloading, crews would be entitled to 120 miles at through freight rate and 20 miles additional *pro rata.*

If from the shovel to the drop is less than 40 miles, crews will be paid equivalent to 10 miles per hour from time reporting for duty until laid up.

Rule 7.—A crew runs 40 miles to a wreck, works two hours at the wreck, and then returns to starting point, will only be entitled to 100 miles if all done inside of ten hours, but if worked four hours at wreck would be entitled to 120 miles for the combined service.

Rule 10.—*Examples of Combination.*—(Picking up or setting off cars at two stations, and making five switches *en route.*)

(Handling way freight at two stations, and making five switches.)

(Handling way freight at three stations, and picking up or setting off cars at four stations.)

Rule 12.—Crew comes on duty at 6.00 A.M., runs, say, 28 miles to turn-around point, switches four hours, and returns to original point, and is relieved from duty at 4.00 P.M., has earned:

Mileage	56 miles.
Switching	40 "

and will be paid for 100 miles. If on same run, the time occupied in switching was six hours, the crew has earned:—

Mileage	56 miles.
Switching	60 "
	or 116 "

If one single trip was 82 miles, and it were made in less than eight hours and twelve minutes, the Company would be entitled to receive service before starting or after arrival of train, equivalent to 18 miles, or one hour and forty-eight minutes, if run occupied ten hours or more their day's work is completed on arrival.

Rule 15.—Passenger men on flat rate would be paid overtime for handling drafts between Glen and Windsor streets, but in case of runs like the Perth local, these men would not receive pay for the

service unless time was taken in excess of equivalent to 17 miles for the conductor, 37 miles for the baggageman, and 30 miles for the brakeman, in which case they would be allowed the difference between these figures and the equivalent of actual time used.

If a crew is not relieved from duty in connection with the train on which he arrives within thirty minutes after the arrival of such train within yard limits, the rule becomes operative, and will apply from the time train arrived within such yard limits.

Article 16.—A crew running from Smith's Falls to Outremont *via* South Switch, (Sortin) setting out part of train at Sortin, would be paid actual mileage, Smith's Falls to Outremont (*via* Sortin), but if required on arrival at Outremont to take his train or part thereof to Hochelaga, he would be paid in addition, mileage or time, Outremont to Hochelaga and return.

Or, a crew called at West Toronto, to go to Simcoe street for a train destined London, would be paid for time or mileage West Toronto to Simcoe street and return, and straight time or mileage, West Toronto to London.

Or, for instance, a train leaving Fort William, picking up cars placed on adjacent side tracks at Port Arthur, would not be paid, but if required to switch out cars in order to get them together to take into train, they would be paid for time so occupied.

Mixed train runs:—

4 single trips, each 28 miles.	112	miles.
Elapsed time, 12 hrs. 20 mins.		"
Allowance for day, 12¾ at 10 .	123	"
2 single trips, each 50 miles...	100	"
Elapsed time, 9 hours, 30 minutes, at 10.....	95	"
Allowance for day.....	100	"
2 single trips, each 65 miles..	130	"
Elapsed time, 13 hours, at 10.	130	"
Allowance for day.....	130	"
If train reaches final destination for the day, say, one hour late, then the allowance for the day would be 14 at 10.....	140	"

Example Rule 38.—Under this rule regularly set up crews running only a part of a month, will be paid for such mileage at the rate of 100 miles for each working day.

Rest booked will not be considered as a lay-off.

July 21, 1910.

W. S. STOUT, ESQ.,
President and General Manager,
Dominion Express Company,
Toronto, Ont.

Dear Sir,—

In making settlement with the Trainmens' Committee to-day it was understood in connection with trainmen handling express in addition to their other duties on trains on which no messenger was employed that the Chairman of the conductors and of the trainmen would meet you, and endeavour to come to an arrangement for compensation for such service. In the event of failure to agree with you the matter was then to be referred to the Vice-President, as sole arbitrator.

Yours truly,

J. W. LEONARD.

July 21, 1910.

GENERAL SUPERINTENDENT,—

Dear Sir,—

In connection with new schedule for trainmen. While this is dated to take effect May 1, it is understood that the rules governing overtime contained therein do not become effective until July 1, and in order to avoid the necessity of going over the pay-rolls and each individual trip ticket covering the months of May and June, these pay-rolls having been already made up and paid, employés in train and yard service on July 1, will receive in addition with their July pay, the following percentages of the money drawn by them for the months of May and June, as compensation for the back time prior to July 1, under the new schedule:—

Passenger trainmen.....	10	per cent.
Through freight and mixed trainmen	17	" "
Way freight trainmen....	13	" "
Yardmen.....	25	" "

Yours truly,

J. W. LEONARD.

Effective July 1, Switchmen.

AGREEMENT BETWEEN THE TORONTO, HAMILTON AND BUFFALO RAILWAY COMPANY AND EMPLOYÉS IN TRAIN AND YARD SERVICES.

THE following is the text of an agreement effected between the Toronto, Hamilton & Buffalo Raiway Company, and its employés in train and yard services. The agreement, as stated in a previous article of the present issue, was arrived at by negotiations between the parties, and is understood to correspond closely to the terms of an agreement between the Canadian Pacific Railway Company and its employés in train and yard services, which appears elsewhere in the present issue of the *Labour Gazette*. The adjustment was effected as a result of proceedings before a Board of Conciliation and Investigation established under the Industrial Disputes Investigation Act, 1907.

The following schedule of wages of conductors and trainmen is agreed upon in conference ending June 29, 1910:—

Section A.

1. The compensation for train crews in the regular passenger service between Hamilton and Buffalo shall be as follows, these rates cover the mileage required under the present assignment:

Conductors	$125.00	per month.
Baggagemen	75.00	"
Brakemen	70.00	"

Overtime will be allowed for the time actually on duty or held for duty in excess of eight hours (computed on each run from the time required to report for duty to the end of that run), within twelve consecutive hours, and also for all time in excess of twelve consecutive hours computed continuously from the time first required to report to final release at the end of last run.

2. The compensation for train crews in the regular passenger service between Hamilton and Waterford shall be as follows: These rates cover the mileage and hours required under the present time table (No. 41):

Conductors	$115.00	per month.
Baggagemen	71.50	"
Brakemen	66.30	"

Overtime will be allowed when the arrival at the end of the last trip for the day is more than thirty minutes late, such overtime to be in accordance with article three, and to be computed from the scheduled time of arrival. In determining the compensation for a broken month in this service, the monthly rate will be divided by the number of days the crew is expected to work. This crew and the men relieving them will be paid at this daily rate for each day in service, except that a regular man performing part of a day's work will be paid only for such part of a day, and it is understood that regular crews must arrange lay-off in such a way as not to necessitate relief for part of a day.

3. Overtime in passenger service shall be paid at the following rates, computed as elsewhere provided:

Conductors	42	cents per hour.
Baggagemen	25	" "
Brakemen	24	" "

4. The Company agrees not to make reductions in crews or increases in mileage in passenger train service for the purpose of offsetting the increases of wages herein provided for. This, however, shall not be understood as preventing adjustment of runs for the purpose of avoiding payment of excess mileage or overtime that would accrue under these rules without reducing the number of crews.

5. The following rates per mile will be paid for through freight service:

Conductors	3.63	cents per mile.
Brakeman	2.42	" "

Special passenger trains, work trains, snow plows, construction trains, wrecking trains, circus trains, will be paid at through freight rates.

6. The following rates per day will be paid for way freight service:

Conductors	$3.97½
Brakemen	2.70

Mileage in excess of 100 miles in any day shall be paid for in addition, *pro rata*.

7. In all freight, work, construction,

wrecking, circus, and mixed train service, unless otherwise specified, 100 miles or less, ten hours or less shall constitute a day's work. On runs of 100 miles or less overtime shall be paid for time in excess of ten hours. On runs of 100 miles or over, overtime shall be paid for the time in excess of the time necessary to complete the trip at an average speed of 10 miles per hour. The working time shall begin at the time men are required to report for duty and do so report, and shall continue until they are released from duty at the end of the run. Overtime shall be computed for each employé on basis of actual time worked or held for duty, and to be paid for at the rate of 10 miles per hour for the class of service performed.

8. Conductors and trainmen deadheading under orders will receive full time. Class of train for which they are deadheading will determine the pay which they will receive for such deadheading. It is to be understood that no more pay will be received for a deadhead than would be received for running a train or braking on same for the same distance, and that conductors and trainmen running light with engine or with engine and caboose, shall be paid through freight rates. Examples: A trainman is sent deadhead from Hamilton to Welland for the purpose of returning in service on a passenger train. The allowance would not exceed what would be allowed for a trip in service Hamilton to Welland and return.

A trainman runs deadhead Hamilton to Brantford, and Brantford to Waterford and Waterford to Hamilton in service on passenger trains, the allowance would be at passenger rates for the round trip, Hamilton to Waterford and return.

9. The following rates per hour will be paid yardmen at Aberdeen, Hamilton, Kinnear and Brantford:

Day conductor	36	cents per hour.
Night conductor	38	" "
Day brakeman	33	" "
Night brakeman	35	" "

on basis of ten hours or less for a day's work. Overtime computed for each employé on the basis of actual overtime worked or held for duty *pro rata*.

Section B.

(*Applying to train service.*)

1. Trainmen assigned to regular passenger service will not be required to do work other than their regular service on assigned runs when other competent crews are available.

2. In cases where crews are assigned to runs a portion of which is passenger and the balance mixed or freight, through freight mileage rates will apply for the entire service.

3. When through freight trains are required to stop at three or more stations to do way freight work, either loading or unloading freight, picking up or setting off cars, or station switching, way freight rates will be allowed for the round trip. This provision does not have application to setting off cars on account of crippled condition, setting off cars to lighten train, or other work incidental to through freight service. One stop to pick up cars so set off to fill out train tonnage will not count. Subsequent stops for the same purpose will count as stops to handle local cars.

In making this allowance no account will be taken of stations at which any allowance is made under rule sixteen.

4. Freight trainmen running passenger trains will be paid through freight rates except when relieving regular passenger trainmen, in which case they will be paid the regular rates of the men relieved.

5. Compensation for turn-around runs in way freight and through freight service, Hamilton to Welland or Waterford and return to Hamilton, is to be the actual mileage with overtime on the basis of 10 miles per hour for the time engaged between Hamilton and Welland or between Hamilton and Waterford in both directions. Compensation for the time at Welland or Waterford shall be allowed at through freight rates, 10 miles per hour. When the total compensation for the trip is less than 100 miles, 100 miles and overtime shall be allowed.

Compensation for turn-around runs in through freight, Hamilton to Brantford and return, shall be paid in the same way as above, except that the allowances

for time occupied at Brantford shall be paid for at yard rates.

In other service not otherwise provided for, the actual earnings while continuously employed shall be added for the total and not less than 100 miles' pay shall be allowed for the day's work. Where service is performed in different grades, overtime shall be separately computed for the work in each grade. Examples: Crew goes on duty at Hamilton 2.00 A.M., arrives at Welland 4.00 A.M., switches at Welland until 9.00 A.M., and is relieved at Hamilton 11.00 A.M. Compensation, 80 miles and five hours at miles per hour, total 130 miles.

Crew goes on duty at Hamilton 2.00 A.M., arrives at Welland 4.00 A.M., switches in Welland until 9.00 a.m., is relieved at Hamilton at 5 p.m. Allowance, 80 miles and two hours or 20 miles overtime, five hours or 50 miles switching, total allowance, 150 miles.

6. A separate allowance of 10 miles with overtime after one hour will be allowed for a trip from Chantler Junction to Ridgeville and return.

7. When unassigned crews are held at other than their home terminals longer than eighteen hours, without being called for duty, they will be paid schedule through freight rates for each hour thereafter, time to be computed from the time crews go off duty until one hour before the departure of the train on which they resume duty. When men book rest of their own accord, the time booked will not be included.

8. Trainmen delayed two hours or more at terminals before starting on a trip will be paid for all time delayed at schedule rates for class of train, time to be computed from the time when men are required to report for duty and do so report, until thirty minutes prior to the actual departure of the train. Overtime will then be computed from thirty minutes prior to the actual departure of the train.

9. Trainmen called for duty and not required, will be paid through freight rates with a minimum of 30 miles, and will stand first out. Trainmen held for duty and not used will be paid for all time or mileage lost.

10. For train service performed between one yard and another at Hamilton, trainmen will be paid yard rates per hour for the time occupied and the minimum shall be one hour.

The application of this article is limited to the movement of rush cars within the terminals after arrival of the crew at Hamilton.

11. Unassigned through freight crews will be run first in first out at Hamilton. When such a crew is run around they will be paid for the time which elapses between the time when they should have gotten out and the time when they do get out and will hold their turn. No such allowance shall exceed one day's pay.

12. Time or mileage made in doubling or assisting other trains will be paid for at schedule rates for class of train and such time will be deducted when computing overtime.

Example: If a trip is 80 miles and is made in seven hours, of which two hours were used in helping another train the allowance is 80 miles and two hours, or 100 miles. If a trip is 80 miles and the time used is ten hours, of which one hour was used in helping another train, the allowance is 80 miles and two hours, or 100 miles.

13. Trainmen acting as pilots will be paid conductor's through freight rate. Trainmen will not be required to pilot engineers if engineers are available.

14. Crews engaged in work train service will be paid for not less than ten hours at through freight rates for each calendar working day; the time to be computed from the time crew is required to be on duty until laid up at the end of a day's work. When a crew runs 46 miles or more to or from the point of loading or unloading they will be paid time or mileage, whichever amounts to the most, in addition to the time occupied in loading or unloading.

15. Unless senior conductors desire otherwise, junior conductors will be assigned to work train service.

16. Trainmen on wrecking trains will be paid mileage to and from the working point, and work train rates per mile while at work, not less than 100 miles to be allowed for combined service.

17. Trainmen will be paid for switching or work or wreck train service en route when the time occupied at such work exceeds one hour and the time so paid for will not be included in computing overtime.

18. Trainmen in through freight service will be paid not less than the equivalent of 2,600 miles at through freight rates in any one month. This will not apply to spare men. When necessary to reduce the number of crews it will be done in the order of seniority, commencing with the junior men. This will not prevent crews from making as many miles as they are consistently able to make, provided they take the proper rest. The spare brakemen's list will be so regulated that the men can make reasonable average monthly pay.

19. Trainmen assigned to regular runs will not be considered absent from duty after arrival at terminals, but if called for service will be given their turn out with unassigned crews.

20. If a man is taken from his work to attend court or other business for the Company, he will be paid time lost and necessary expenses.

21. When for any reason the time claimed on time slip is not allowed, or if the time slips are not made out correctly, they will be promptly returned and the reason given therefor.

22. Trainmen will not be required to ride on snow plows or flangers, and crew will be supplied with a suitable car properly equipped.

23. Trainmen will be allowed 25 cents per ton and not less than 4 tons for shovelling coals on to tenders.

24. Trainmen who have been on duty twelve hours or more will be given such rest as they feel they require, if they book rest on arrival. Less than six hours rest will not be booked at any terminal.

25. A seniority list will be posted in January and June of each year. These lists will be posted on the bulletin boards in the telegraph office at James street, Aberdeen and Brantford. Any employé who considers that his standing is incorrectly shown must protest in writing within thirty days or no action will be taken, but due allowance may be made for an employé who is off duty during the thirty days following the posting of the list.

26. In case a man is relieved from duty for any violation of the Company's rules, he shall be entitled to a fair and impartial hearing before the proper officer within a reasonable time, not exceeding ten days, and may have such witnesses as he desires, and will be informed if he be guilty or not, and if guilty in what respect. If found blameless he will be paid for all time lost. Any appeal from the decision must be handed in at once and no allowance will be made for time lost between the date of such decision and the date on which appeal for re-hearing is made.

27. When a trainman is discharged or resigns, a certificate stating time of service, and in what capacity he was employed will be promptly furnished on application.

28. The Railway Company will pay one-half the cost of uniforms not exceeding two suits for any man in a year, if the order for the clothing is submitted to the trainmaster and approved by him.

29. This schedule of rates and rules for trainmen will take effect April 1, 1910, except as to overtime, which takes effect June 1, 1910, and continue in effect until terminated by sixty days' notice in writing from the employer or the employés.

Section C.

(*Applying to Yard Service.*)

1. Yardmen deadheading on freight or passenger trains will be paid for such service at full rates for the class in which they are regularly engaged.

2. Where conditions will permit, the established time for regular day and night yardmen to start work shall be 7 A.M. and 7 P.M. respectively. Engines started at other times than between 6 A.M. and 8 A.M., will be paid night rates. This, however, does not mean that a crew which starts later than 8 A.M. shall receive night rates unless the day's work runs into the night. For example: Crew called for 9 A.M. will receive day rates if their relief is called for 7 P.M., even if the day crew may be late in reaching the change-off point. A crew starting after

8 A.M., and notified to work until 7 P.M. will be paid at day rates.

3. Yardmen working between Vinemount and Summit will be paid yard rates. This includes belt line and Dundas crews.

4. Regular yardmen or brakemen required to act as switchmen or switch-tenders will be paid yard rates.

The switchmen employed to facilitate movement of trains and engines between James street station and Garth street, will be paid $104.00 per month, and will be allowed overtime at yard rates for such time as they are held on duty after the expiration of thirteen hours from the time they report for work.

5. Unassigned yardmen called for duty and not used will be paid for three hours and stand first out.

6. The compensation of yardmen in regularly assigned yard service shall not be less in any month than the number of calendar working days in the month. Overtime will not be included in making up this aggregate amount. This provision will not apply to spare yard men.

7. Yardmen will be allowed one hour for meals when practicable, and in all cases at least thirty minutes between 11.30 and 1.30. When not allowed the full hour they will receive one hour's pay for the meal hour. Yardmen will not be required to work longer than six hours without being allowed thirty minutes for lunch.

8. Yardmen will be allowed such rest as they feel that they need before being required to accept a second assignment.

9. If a man is taken from his work to attend court or on other business for the Company, he will be paid time lost and necessary expenses.

10. Men assigned to regular yard crews will not be assigned to other service until after the completion of a day's work if other men are available.

11. Yardmen will not be required to work with engines not properly equipped with automatic couplers, grab irons, and will not be required to work longer than one day with engines not equipped with foot boards, nor with engines from which the steam is leaking so that it interferes with hand signals.

12. When for any reason the time claimed on time slip is not allowed, or if the time slips are not made out correctly, they will be promptly returned and the reason given therefor.

13. A seniority list will be posted in Aberdeen in January and June of each year. An employé who considers that his standing is incorrectly shown must enter protest in writing within thirty days. Otherwise no action will be taken, but reasonable allowance may be made for an employé who is out of service within the thirty days following the posting of the list.

14. In case a man is relieved from duty for any violation of the Company's rules, he shall be entitled to a fair and impartial hearing before the proper officer within a reasonable time, not exceeding ten days, and may have such witnesses as he desires, and will be informed if he be guilty or not, and if guilty, in what respect. If found blameless he will be paid for all time lost.

15. When a yardman is discharged or resigns, a certificate stating time of service and in what capacity he was employed will be promptly furnished on application.

16. This schedule of rates and rules for yard service will take effect April 1, 1910, except as to overtime, which takes effect June 1, 1910, and continue in effect until terminated on sixty days' notice in writing from either party.

General Superintendent.

AGREEMENT BETWEEN THE WABASH RAILROAD COMPANY AND EMPLOYÉS IN TRAIN AND YARD SERVICE IN CANADA.

ON the same day that a strike was declared of the Grand Trunk Railway employés in train and yard service, namely July 18, a strike occurred also of the trainmen employed by the Wabash Railroad Company in Canada, for the purpose of enforcing a demand for increased wage rates and improved conditions of employment, corresponding to the standard rates and rules on other railroads in the eastern territory. The strike in question continued for a period of four days, and was understood to have affected seventy conductors, 140 brakemen and baggagemen, and forty yardmen, a total of 250 employés. On July 22, an agreement was signed between Mr. S. E. Cotter, General Superintendent of the Wabash Railroad Company, and Messrs. S. N. Berry and E. P. Curtis, Vice-Presidents of the Order of Railroad Conductors, and Mr. T. M. Dodge, Assistant President of the Brotherhood of Railway Trainmen, as a result of which the strike of employés of the Wabash Railroad Company, in train service, in Canada, was at once declared off. The agreement was in the following terms:—

July 22, 1910.

COPY.

Memorandum of Agreement between the Wabash Railroad Company, S. B. Cotter, General Superintendent; and Mr. Berry and Mr. Curtis, representing the Order of Railway Conductors; and T. R. Dodge, representing the Brotherhood of Railway Trainmen.

It is understood:—

1. The Wabash Railroad Company is willing to give its employés running between Detroit and Buffalo, representation on Wabash System general committees, subject only to the limitations of operating contract with Grand Trunk Railway Company, provided they want such representation, and it further agrees to take up at once the subject of revision of wages scale.

2. The Wabash Railroad Company will not require its employés to perform any service that they have not heretofore performed in the handling of Wabash traffic, that is to say, they will not be required to handle any Grand Trunk Railway Company work, or Grand Trunk Railway Company traffic. It is understood that the Wabash Railroad Company crews will not be required to handle joint local freight trains pending settlement of the controversy between the Grand Trunk Railway Company and the Organizations.

3. The Wabash Railroad Company agrees to restore all of its former employés without prejudice, to the runs held by them at the time they left the service, July 18, 1910.

4. The Organizations agree that as soon as the men can be reached, to instruct them to resume duty, and to remain in service pending negotiations with the Wabash Railroad Company committee.

(*Signed*) S. E. Cotter,
General Superintendent,
Wabash Railroad Company.

(*Signed*) S. N. Berry,
Vice-President,
Order Railroad Conductors.

(*Signed*) E. P. Curtis,
Vice-President,
Order Railroad Conductors.

(*Signed*) T. R. Dodge,
Assistant President,
Brotherhood of Railway Trainmen.

AGREEMENT BETWEEN THE MICHIGAN CENTRAL RAILROAD COMPANY AND EMPLOYÉS IN TRAIN AND YARD SERVICE.

AT the time that a demand was made upon the principal railways in the Eastern States, and in Eastern Canada, for the adoption of standard rates of pay and rules to govern the employment of men engaged in train and yard services, an agreement was reached, on April 22, between Mr. C. E. Schaff, Vice-President of the Michigan Central Railroad Company, and Messrs. A. B. Garretson, President of the Order of Railroad Conductors, and W. G. Lee, President of the Brotherhood of Railway Trainmen, by which the determination of the rates of pay and conditions of employment of all passenger and freight conductors, train baggagemen, passenger trainmen, freight conductors, train baggagemen, passenger trainmen, freight brakemen and flagmen, yard conductors and yard brakemen, in certain yards, and also conductors and trainmen in mixed train, mine run, and pusher or helper service, &c., in the employ of the Michigan Central Railroad Company, was submitted to a board of arbitrators, composed of Messrs. E. E. Clark and P. H. Morrissey, with an understanding that the award should be effective as of April 1, 1910.

As the award of the Board of Arbitrators in question applied to a considerable number of the employés of this Company in the Province of Ontario, the award is published herewith, as delivered in Washington, D.C., under date of May 14, last:

MICHIGAN CENTRAL RAILROAD COMPANY.

Decision of Arbitrators.

Decision of Arbitrators governing rates of pay and certain conditions of employment of passenger and freight conductors, train baggagemen, passenger trainmen, freight brakemen, and flagmen, yard conductors and yard brakemen in certain yards, and also conductors and trainmen in mixed train, mine run and pusher or helper service, &c., in the employ of the Michigan Central Railroad Company.

Under an agreement made April 22, 1910, between Mr. C. E. Schaff, Vice-President of the Michigan Central Railroad Company, and Mr. A. B. Garretson, President of the Order of Railroad Conductors, and Mr. W. G. Lee, President of the Brotherhood of Railroad trainmen, the determination of the rates of pay and certain conditions of employment of the above named classes of employés of the Michigan Central Railroad Company was submitted to the undersigned arbitrators, with an agreement that the award should be effective as of April 1, 1910.

The scope of the arbitration was stipulated to be between the schedule of pay in effect January 1, 1910, and proposals of the employés hereinafter stated and discussed *seriatim*.

After presentation of proposal from the employés, conferences between officials of the Company and representatives of the employés were held, in which it was conceded by the officers of the Company that some increases in pay should be made, and increases less than those requested by the men were offered.

Under this agreement for arbitration, we have just handed down an award affecting the same classes of employés in the employ of the Lake Shore & Michigan Southern Railway Company, and we have discussed briefly therein the history of the movement leading up to this arbitration, and have quoted from our recent award as arbitrators of questions affecting the same classes of employés in the service of the New York Central and Boston & Albany Railroad Companies which discussion and quotations we will not here repeat.

On account of the local conditions on the Micihgan Central Railroad, which we think fully justify such action, we specify herein certain exceptions from the standards awarded.

Proposed by Employés.

Article A.—On runs of 155 miles per day or over, the pay of passenger con-

ductors on steam or electric trains to be 2.75 cents (2¾ cents) per mile; baggagemen, 1.75 cents (1¾ cents) per mile; flagmen and brakemen, 1.65 cents (1-651-100 cents) per mile.

It is adjudged and awarded that in all passenger train service, not otherwise specified herein, the standard rates of pay shall be:—

Conductors	2.68 cents per mile
Baggagemen	1.55 cents per mile.
Brakemen	1.50 cents per mile.

Exceptions:—

(*a*) On the Battle Creek-Goshen run, passenger conductors, baggagemen and brakemen shall be paid the following rates per day for each day used, which are the rates awarded to the Lake Shore Railroad Company men, on this joint run:—

Conductors	$4.20 per day.
Baggagemen	2.75 per day.
Brakemen	2.55 per day.

(*b*) On the following short main-line and branch passenger runs: Joliet, South Haven, Air Line and South Bend, Benton Harbor and St. Joseph, East Division trains 25 and 26, Welland and Niagara Falls, S.B. & N.W. Division, men shall be paid the following rates for the calendar working days of the month:—

Conductors	$115 per month.
Baggagemen	70 per month.
Brakemen	65 per month.

Present rate of $66.60 per month for brakemen on Benton Harbor and St. Joseph runs to be continued.

On S.B. & N.W. Division conductors and brakemen shall be paid at rates of 36.3 cents, and 24.2 cents per hour, respectively, for actual time used in switching at Pinconning and Gladwyn.

(*c*) On the following passenger train runs: Bridge Division, St. Clair Division, Niagara Division, Michigan Midland Division, men shall be paid the following rates for the calendar working days of the month:—

Conductors	$100 per month.
Baggagemen	65 per month.
Brakemen	60 per month.

On the Niagara Division run, if men make three round trips in one day they shall be paid one and one-half pay days.

(*d*) On the North Midland Division, passenger men shall be paid the following rates:—

Conductors	$100 per month.
Baggageman	67.75 per month.
Brakeman	60 per month.

and shall be paid at rates of 36.3 cents, and 24.2 cents per hour for conductors and trainmen, respectively, for actual time used in switching at Midland, and shall be allowed one day off each week, exclusive of Sundays.

(*e*) On the Caro branch, the following rates shall be paid:—

Conductors	$100 per month.
Baggageman	65 per month.
Brakeman	60 per month.

with one day off each week, exclusive of Sundays.

(*f*) On the London Division men shall be paid following rates for the calendar working days of the month:—

Conductors	$100 per month.
Baggageman	65 per month.
Brakeman	60 per month.

and shall be paid at the rate of 36.3cents, and 24.2 cents per hour, respectively, for conductors and trainmen, for actual time used in switching at London.

(*g*) On trains 156, 157, 158, 159 and 160, on Mackinaw Division, four crews, men shall be paid following rates for the calendar working month:—

Conductors	$125 per month.
Baggagemen	75 per month.
Brakemen	70 per month.

(*h*) On Welland and Niagara Falls mixed train run, men shall be paid the following rates for the calendar month:—

Conductor	$115 per month.
Baggageman	75 per month.

Overtime allowances on all of the above excepted runs are left to negotiations between officers of the Company and committees of employés.

Proposed by Employés.

Article B.—On runs of less than 155 miles per day the pay of passenger conductors on steam or electric trains to be $4.25 per day; baggagemen, $2.75 per day; flagmen and brakemen, $2.55 per day.

It is adjudged and awarded that in all

passenger train service, except on runs named in the exceptions to Article A, regularly assigned employés who are ready for service the entire month, and who do not lay off of their own accord, shall receive the following minimum sums, exclusive of overtime, for the calendar month:—

Conductors	$125
Baggagemen	75
Brakemen	70

Article C.—Ten hours or less, 155 miles or less, will constitute a day's work in passenger service. All over ten hours to be paid for as overtime, and be computed from the time men are required to report for duty and to continue until they are relieved from duty, at the end of run, and will be paid for at the following rates: Conductors, 42 cents, baggagemen, 27 cents, flagmen, and brakemen 25 cents per hour. Less than thirty minutes not to be counted, thirty minutes or over to be paid for as one hour.

All regularly assigned passenger crews will be guaranteed not less than 155 miles per day for the calendar working days of the month.

It is adjudged and awarded that, except as otherwise specified herein, passenger train employés on short turn-around runs, no single trip of which exceeds 80 miles, shall be paid overtime for all time actually on duty or held for duty in excess of eight hours (computed on each run from the time required to report for duty, to end of that run) within twelve consecutive hours; and also for all time in excess of twelve consecutive hours computed continuously from time first required to report to final release at end of last run. All other passenger train employés shall be paid for overtime on the basis of 20 miles per hour, computed from the time required to report for duty, until released, and separately for each part of a round-trip run.

Overtime in passenger train service shall be computed for each employé on the basis of actual overtime worked or held for duty, and at the following rates:—

Conductors	42 cents per hour.
Baggagemen	25 cents per hour.
Brakemen	24 cents per hour.

Exception.—The award of overtime on short turn-around passenger runs, no single trip of which exceeds 80 miles, inaugurates a new basis for overtime on such runs, and it is deemed advisable and fair to make that particular part of this award effective June 1, 1910, until which date the present method of computing overtime on such runs will be continued in connection with the hourly rates above stated.

Proposed by Employés.

Article D.—Milk trains will be given the same rate of pay which applies to the branch of service in which they are classed on any line November 1, 1909. If not classed in either freight or passenger service, not a lesser rate of increase will be given than is given in freight service.

We find no provision for milk train runs in Michigan Central Railroad Company pay schedule.

Proposed by Employés.

Article E.—Reductions in crews or increases of mileage in passenger service, from assignments in effect November 1, 1909, will not be made for the purpose of offsetting these increases in wages.

It is adjudged and awarded that reductions in crews or increases of mileage in passenger train service shall not be made for the purpose of offsetting these increases in wages. This, however, is not to be understood as preventing readjustment of runs in short turn-around service that are paid under minimum rules, for the purpose of avoiding payment of excess mileage or overtime that would accrue under these rules, without reducing the number of crews.

Proposed by Employés.

Article F.—Through and irregular freight service to be paid as follows: Conductors, 3.8 cents (3–8-10 cents) per mile; flagmen, 2.63 cents (2-63-100 cents) per mile; brakemen, 2.53 cents (2-53-100 cents) per mile; runs of 100 miles or less, either straight-away or turn-around, to be paid for as 100 miles.

It is adjudged and awarded that in through freight train service the standard rates of pay shall be:—

Conductors.....3.63 cents per mile.
Brakemen.....2.42 cents per mile.

Runs of less than 100 miles shall be paid as 100 miles; but the representatives of the Company and of the employés may agree upon certain instances in which an individual employé or a crew, not having made 100 miles, may make two or more short runs, in continuous service, without being entitled to 100 miles allowance for each such trip.

Exceptions:—

(*a*) On through freight runs between Detroit and Jackson, 100 miles shall be allowed in each direction. In consideration of this extra mileage allowance those parts of rules thirty-four and thirty-five, of the pay schedule, of October 1, 1909, which refer to the East Division, are hereby eliminated.

(*b*) Through freight runs on the West and Joliet Divisions shall be paid as follows:—

Trips between Michigan City and Chappell shall be allowed a minimum of 100 miles in either direction.

A crew leaving Michigan City, Kensington or Chicago, and going into Union Stock Yards district shall be allowed a minimum of 100 miles.

Straight-away trips between Michigan City and Kensington, or Michigan City and Chicago, shall be allowed 75 miles in either direction, and overtime after seven and a half hours.

A trip from Kensington to Chicago, direct, and thence to Michigan City shall, be paid a minimum of 100 miles.

In consideration of these extra mileage allowances, that part of rule forty-seven of the pay schedule which provides for pay on hourly basis for all freight work done between Kensington and Chicago, and Chappell in Union Stock Yards district, is eliminated. That part of rule forty-seven which provides that road crews called for switching service in Union Stock Yards district shall be paid therefor at same rates paid men regularly employed in that service, is continued.

(*c*) Through freight runs between Michigan City and Joliet shall be turn-around runs with Michigan City as home terminal. A crew released at Joliet shall be paid a minimum of 100 miles in each direction. Crews shall not be run around each other at Joliet. Crews shall be notified on or before arrival at Joliet if they are to be released.

(*d*) On through freight runs between Detroit and Toledo, conductors shall be paid $2.20, and brakemen, $1.54 per trip, in either direction, and overtime for all time used in excess of 5.2 hours on any single trip, at 42 cents per hour for conductors, and 30 cents per hour for brakemen.

(*e*) On the Mackinaw Division the present rates of pay for conductors and brakemen in through freight service, *to wit*: Conductors, 3.95 cents, and brakemen, 2.77 cents per mile, shall be continued, with overtime at 36.3 cents per hour for conductors, and 24.2 cents per hour for brakemen.

(*f*) The present rates of pay and allowances of overtime on through freight runs between Bay City and Grayling, *to wit*: Conductors, $3.64, and brakemen, $2.55 per trip, with overtime after 9.2 hours; and between Grayling and Mackinaw, conductors, $3.55, and brakemen, $2.49 per trip, with overtime after nine hours, are hereby continued, with overtime at 36.3 cents per hour for conductors, and 24.2 cents per hour for brakemen.

(*g*) The present trip rates, conductors, $4.20, and brakemen, $2.94, between Jackson and Bay City, or Wenona Yard, and the present rate of pay for brakemen in through freight service on the Saginaw Division, *to wit*: 2.50 cents per mile, shall be continued.

(*h*) On Toledo Division, road mileage shall begin and end at Junction Avenue, West Detroit, and crews required to take cars to or from points beyond that point shall be paid overtime rates for that service with a minimum of one hour.

(*i*) On Bay City Division, road mileage shall begin and end at North Yards, and crews required to take cars to or from points beyond that point shall be paid overtime for that service, with a minimum of one hour.

The present allowances of 105 miles between Detroit, Bay City or Wenona

Yard, *via* Reese, and 116 miles between Detroit, Bay City or Wenona Yard, *via* Saginaw, shall be continued.

Proposed by Employés.

Article G.—Local or pick-up service to be paid as follows: Conductors, 4.05 cents (4 1-20 cents) per mile; flagmen, 2.8 cents (2 8-10 cents) per mile; brakemen, 2.7 cents (2 7-10 cents) per mile; 100 miles or less to be paid for as 100 miles. Where regularly assigned local crews working less than the calendar working days of the month are employed, they will be guaranteed not less than 100 miles for each calendar working day.

It is adjudged and awarded that, except as otherwise specified herein, men in way freight, local extra and pick-up and drop service shall be paid as follows:—

Conductors	$3.975	per day.
Brakemen	$2.70	per day.

Mileage in excess of 100 miles in any day shall be paid for in addition, *pro rata*.

Exceptions:—

(*a*) On regularly assigned way freight and local extra runs, crews that are ready for service and not used shall be paid for the full calendar working days of the month, and if used on Sundays will be paid extra according to the class of service performed.

(*b*) Train designated in rule forty-six of pay schedule as "Joliet pick-up eastbound" shall be paid a full day at local rates, if run as a single trip; but if run as a part of a Joliet turn-around, provided for under article F shall be allowed 80 miles at local rates, and when so paid 80 miles shall also be paid overtime after eight hours, at hourly rates for locals.

(*c*) The provisions of rule fifty of the pay schedule, applying to , and the allowances therein, for men on the Amherstburg, Petrolia and Leamington Divisions, shall be continued. The minimum monthly rates of pay on those divisions, exclusive of the special allowances, shall be as follows:—

Conductors	$90.00	per month.
Baggagemen on Amherstburg and Petrolia Divisions	65.00	per month.
Baggagemen on Leamington Div.	67.50	per month.
Brakemen	60.00	per month.

The question of overtime on these divisions is left for adjustment between the officers of the company and committees of employés.

The allowance for switching at Courtright shall be continued.

(*d*) On the Allegeny Division way freight conductors will be paid $95, and brakeman $65 for the calendar working days of the month, and overtime at local rates after ten hours.

Proposed by Employés.

Article H.—In all freight service 100 miles or less, ten hours or less, to constitute a day's work; overtime after ten hours. On runs of over 100 miles, overtime will be paid on a basis of speed of 10 miles per hour. The working time of men to begin at time required to report for duty, and to continue until released from duty at end of run. Overtime to be paid for at the rate of 10 miles per hour for class of service performed. Less than thirty minutes not to count, thirty minutes or over to be paid for as one hour.

It is adjudged and awarded that in all freight and mixed train service, not otherwise specified, including mine run, stone and sand run, switching runs, wrecking train, circus train, pusher or helper service, &c., 100 miles or less, or ten hours or less, shall constitute a day's work; that on runs of 100 miles or less, overtime shall be paid in excess of ten hours, and on runs of over 100 miles overtime shall be paid for the time used in excess of the time necessary to complete the trip at an averaage speed of 10 miles per hour. The working time of the men shall begin at the time they are required to report for duty, and do so report, and shall continue until they are relieved from duty at end of run.

Overtime shall be computed for each employé on the basis of actual overtime worked or held for duty, and be paid for at the rate of 10 miles per hour for the class of service performed.

Exceptions:—

(*a*) The present pay schedule provides overtime for men in through freight service on the Middle and Air Line Divisions, after twelve hours, and these allowances are continued for the through runs be-

tween Jackson and Michigan City, because the 10-miles-per-hour basis and new rates would result in reductions in pay on every trip upon which overtime would accrue.

(*b*) On three-crew way freight or local extra runs, overtime shall be paid on the basis of twelve hours at local overtime rates.

Proposed by Employés.

Article I.—Work, construction or wrecking trains to be paid through freight rates; 100 miles or less, ten hours or less, to constitute a day's work; overtime *pro rata*.

It is adjudged and awarded that in work or construction train service, including ballast and filling service, conductors and brakemen shall be paid through freight rates and overtime.

Proposed by Employés.

Article J.—The same increases as given in freight service, to be also given in mixed, mine and all other freight service. In all classes of freight, mixed, helper and other freight service not over ten hours will be required for a day's work. Overtime after ten hours at *pro rata* rates.

It is adjudged and awarded that runs or service, not otherwise specified herein, in local extra, horse train, mixed train, mine run, stone train, sand run, circus train, wreck train, pusher or helper service, &c., shall be continued in the present classifications, and conductors and trainmen employed thereon shall be given the same increases in pay are given to those respective classifications.

Exceptions:—

(*a*) Caro and Ypsilanti crews shall be paid:—

Conductors.....37 cents per hour.
Brakemen.....34 cents per hour.

ten hours or less to constitute a day, overtime *pro rata*. Extra pay if required to work noon hour.

(*b*) The conditions surrounding the Swan Creek coal run render it appropriate and necessary to leave the adjustment of same to the officers of the Company and committees, with the understanding that these men will be accorded increases in pay corresponding to those awarded others in similar service, effective as of April 1, 1910.

(*c*) The provisions of rule forty-four of the pay schedule are hereby continued, except that the rates of pay on trains specified therein as numbers ninety-three and ninety-four shall be the standard main line way freight or local extra rates herein awarded.

Proposed by Employés.

Article K.—The increases herein requested to apply to all rates for special or incidental services, as specified in the individual schedules.

Local conditions necessitate more or less incidental service on certain divisions of the road for which special regulations must be provided, according to the local requirements of the Company and of the men.

It is adjudged and awarded that rules governing such service not provided for herein, shall be arranged between the officers of the Company and representatives of the employés, upon bases consistent and in harmony with the rates and rules herein awarded.

Proposed by Employés.

Article L.—Deadheading in freight or passenger service to be paid for at full rates for the class of service in which regularly engaged. Trainmen running with light engine, or engine and caboose, will be paid full through freight rates.

It is adjudged and awarded that conductors and trainmen deadheading under orders will receive full time. The class of train for which they are deadheading shall determine the pay they will receive for such deadheading, it to be understood that no more pay will be received for a headhead than would be received for running a train or braking on same for the same distance; and that conductors and trainmen running light with engine or with engine and caboose shall be paid through freight rates.

Proposed by Employés.

Article M.—With trains of over thirty cars, exclusive of caboose, the practice of

doubleheading is to be discontinued, except as hereinafter provided. Doubleheaders may be run on any district, when necessary on account of inclement weather, or to avoid running the engine light, or in moving engine to and from shops, provided the rating of the heaviest engine handling train is not exceeded. In case of an accident to any engine, consolidation may be affected with another train, and the consolidated train brought into terminal if practicable.

Following the settlement made on the Baltimore & Ohio, New York, New Haven & Hartford and Boston & Maine systems, and the recent award on the New York Central:—

It is adjudged and awarded that the Michigan Central Railroad Company shall join in arrangements for and in representation at a joint conference for consideration of this subject for all of the roads in the territory.

Proposed by Employés.

Article N.—The Chicago standard rates of pay to govern in all yards; ten hours or less to constitute a day's work. Overtime *pro rata*.

Windsor, Victoria, Montrose, Niagara Falls, St. Thomas:—

It is adjudged and awarded that in the yards east of the Detroit river the rates of pay of yard employés shall be as follows:—

Day Conductors	37	cents	per hour.
Day Brakemen, and so-called riders	34	cents	per hour.
Night Conductors	39	cents	per hour.
Night Brakeman, and so-called riders	36	cents	per hour.

on the basis of ten hours or less for a day's work, overtime, computed for each employé on the basis of actual overtime worked or held for duty, *pro rata*.

Proposed by Employés.

Article O.—Upon roads having a better basis for a day's work or for payment of overtime, or other rates or allowances in passenger, freight, yard, mixed, work train service, or other services, the adoption of the foregoing rates and rules not to operate as a reduction thereof.

Pursuant to provision in agreement for arbitration.

It is adjudged and awarded that neither this award nor any minor adjustment made thereunder shall operate to reduce the compensation now paid for any service under the pay schedule.

Rules six, sixteen, fifty-five fifty-seven and fifty-eight of the pay schedule are continued.

The present pay schedule provides for certain baggage men who also handle express business. Their compensation is paid in part by the Express Company. The conditions of their service and compensation vary on different parts of the road and on different lines. Details of the adjustment of the compensation of this class of employés are hereby left to negotiations between the officers of the Company and committees of employés, with the understanding that they shall be accorded increases in pay proportionate and harmonious with those herein awarded to other baggagemen.

The present pay schedule contains certain rules affecting compensation of employés for special or incidental service, based upon present standards of pay. In so far as such rules are in conflict with or are absorbed by this award, they are abrogated. Aside from such conflict or absorption, those rules, and other rules affecting the service and compensation of these employés, are subject to adjustment between the management and the employés, consistent with the new standard of compensation here awarded.

Proposed by Employés.

Article P.—Application of sixteen-hour law.

It is adjudged and awarded that:—

(*a*) Under the laws limiting the hours on duty, crews in road service shall not be tied up unless it is apparent that the trip cannot be completed within the lawful time; and not then, until after the expiration of fourteen hours on duty, under the Federal law, or within two hours of the time limit provided by State laws, if State laws govern.

(*b*) If road crews are tied up in a less number of hours than provided in the preceding paragraph, they shall not be regarded as having been tied up under the

law, and their services shall be paid for under the pay schedule of the road.

(*c*) When road crews are tied up between terminals, under the law, they shall again be considered on duty and under pay immediately upon the expiration of the minimum legal period off duty applicable to the crew, provided, the longest period of rest required by any member of the crew, either eight or ten hours, shall be the period of rest for the entire crew.

(*d*) A continuous trip shall cover movement straight-away or turn-around from initial point to the destination train is making when required to tie up. If any change is made in the destination, after the crew is released for rest, a new trip shall commence when the crew resumes duty.

(*e*) Road crews tied up under the law, shall be paid the time or mileage of their schedule, from initial point to tie-up point. When such crews resume duty on a continuous trip, they shall be paid miles or hours, whichever is greater, from the tie-up point to the next tie-up point, or to the terminal. This does not permit crews to be run through terminals, unless such practice is permitted under the pay schedule.

(*f*) Road crews tied up for rest under the law, and then deadheaded into terminal, with or without caboose, shall be paid therefor as per paragraph (*e*), the same as if they had run the train to such terminal.

(*g*) Train employés tied up in obedience to law shall not be required to watch or care for engines, or perform other duties while so tied up.

(*h*) Yard employés who are relieved for rest, in compliance with law, shall be permitted to resume work when the lawful rest period is up, and to work ten hours or be paid for ten hours.

SYNOPSIS OF AGREEMENT BETWEEN THE PERE MARQUETTE RAILROAD COMPANY AND EMPLOYÉS IN TRAIN AND YARD SERVICE.

ONE of the United States railway systems upon which a demand was made during the past spring for the adoption of standard rates of pay and rules governing employés in train and yard service, was the Pere Marquette Railroad Company, which controls and operates also certain lines in Western Ontario. The following was communicated to the Department of Labour as a condensed synopsis of the terms of settlement arrived at between representatives of the train service organizations and officials of the Pere Marquette Railroad in reference to the adoption by that line, of the standard rates of pay contended for:—

PERE MARQUETTE RAILROAD COMPANY
PASSENGER SERVICE.

Article 1.

July 1, 1910, to July 1, 1911:

Conductors, ...0240 cents per mile
Baggagemen. .....0135 cents per mile
Brakemen and flagmen. .....0130 cents per mile.

January 1, 1911, to January 1, 1912:

Conductors. .....0250 cents per mile.
Baggagemen. .....0145 cents per mile.
Brakemen and flagmen. .....0140 cents per mile.

After January 1, 1912:

Conductors. .....0268 cents per mile.
Baggagemen. .....0155 cents per mile.
Brakemen and flagmen. .....0150 cents per mile.

THROUGH FREIGHT SERVICE.

Standard from July 1, 1910, as follows:

Conductors. .....0363 cents per mile.
Brakemen. .....0242 cents per mile.

LOCAL FREIGHT SERVICE.

July 1, 1910, to January 1, 1911:

Conductors	$3.75 per day.
Head Brakemen	2.60 per day.
Rear Brakeman	2.50 per day.

January 1, 1911, to January 1, 1912:

Conductors	$3.85 per day.
Head Brakemen	2.70 per day.
Rear Brakemen	2.70 per day.

After January 1, 1912:

Conductors	$3.97½ per day.
Head Brakemen	2.80 per day.
Rear Brakemen	2.70 per day.

Minimum Monthly Allowances in Passenger Train Service:

	July 1, 1910 to Jan. 1, 1911.	Jan. 1, 1911. to Jan. 1, 1912.	After January 1, 1912.
Conductors	$110	$115	$125
Baggagemen	65	70	75
Brakemen	60	65	70

The above rates governing train service on the Pere Marquette Railroad Company are understood to be the most important modifications of the application of standards made on the line, although there are said to have been a number of other considerations given to the Company by the employés in making this settlement.

PERMANENT BOARD OF CONCILIATION TO ADJUST ALL MATTERS IN DISPUTE BETWEEN MONTREAL SHIPPING COMPANIES AND LONGSHOREMEN.

THE Department of Labour is in receipt of the terms of the first award of the Permanent Board of Conciliation, which was appointed pursuant to the recommendation of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act, which conducted an inquiry in the month of April last, into certain matters in dispute between the Montreal shipping companies and the longshoremen of that port. In the report of the Board in question, the terms of which were published in the May number of *The Labour Gazette*, it was proposed that an agreement to govern the wages and conditions of employment of longshoremen should be entered into between the shipping companies and the Syndicated Longshoremen of Montreal, effective for a period of five years, and that the parties thereto should each deposit with the Royal Trust Company of Montreal as trustees, the sum of $2,000 as a guarantee for the due observance of the same. Owing to the importance of the shipping interests of Montreal, and the nature of the work to be performed by the longshoremen, the Board urged upon the parties concerned the establishment of a permanent Board of Conciliation to settle such difficulties as might from time to time arise. The Board in question was subsequently constituted as follows: Mr. Farquhar Robertson, ex-President of the Board of Trade of Montreal; Mr. John H. Lauer, Secretary and Treasurer of the Builders' Exchange of Montreal, representing the shipping companies; and Mr. G. R. Brunet, of the Typographical Union of Montreal, representing the longshoremen.

The first award of the Board of Conciliation is as follows:

"Award of the Permanent Board of Conciliation, in accordance with the terms of the agreement entered into under date of 13 May, 1910, pursuant to the report and findings of the Board of Conciliation and Investigation, dated 19 April, 1910, established under the Industrial Disputes Investigation Act, 1907, recommending the appointment of a Permanent Board of Concilation to consider all grievances that may arise between the Companies and the longshoremen, the decision of the majority of such Board to be binding on both parties, the following report is now submitted by these presents:—

1. The Companies appointed Mr. John H. Lauer, Secretary and Treasurer of the Builders' Exchange, as their representative.

2. The Longshoremen appointed Mr.

G. R. Brunet, of the Typographical Union, as their representative.

The parties met during the second week of June, 1910, to appoint a third member of the Board as Chairman, and correspondence submitting the names of the various parties, dating between fourteenth and twentieth of June, 1910, finally resulted in the unanimous selection of,

3. Mr. Farquhar Robertson, ex-President of the Board of Trade, as Chairman.

"The Board so constituted duly met at the Board of Trade, Montreal, at 2 p.m., Tuesday, July 5, where Mr. George Poliquin, Business Agent of the Longshoremen's Union, was present, and made a number of verbal complaints. The Chairman requested Mr. Poliquin to submit written statement in triplicate to the members of the Board, which would then meet with careful consideration at the meeting to be held at 11 a.m., Wednesday, July 6. First session then adjourned.

"Second session, Wednesday, sixth July, 1910, 11 a.m. A written statement of alleged grievances was handed to the members of the Board by Mr. G. R. Brunet, as follows:—

" 'Montreal, July 5, 1910.

" 'Sirs,—

According to your demand for particulars in support of our accusations against the Canadian Pacific Railway Company, the White Star Dominion Company, and the Bristol Dominion Company, I have the honour to submit to your consideration the following specific complaints:—

" '1. If you read the agreement passed between these Companies and the Longshoremen Union, you will find on page two, that the said Companies must stop the running of their pipes in grain working 'while the men go down in the hole to work.' Since the enforcement of the agreement the above Companies never complied with the above clause.

" '2. According to clause two paragraph (*e*), the Companies must supply with the best respirators the men working in the grain. We accuse the above Companies to refuse to comply with the said paragraph.

" '3. You will find also at the end of paragraph (*b*), clause two, that the Companies must give good meals to the men at night. We accuse the said Companies to refuse to comply to the said clause or part of paragraph (*b*).

" '4. We must add that the Companies above mentioned instead of paying 35 cents per hour to the coal shovelers, they pay 30 cents. It had been agreed that these men would receive the same pay as last year, when they received 32½ cents per hour and the bonus, making altogether 35 cents per hour.

" 'By giving consideration to the above complaints, you will oblige,

" 'Yours truly,

" '(*Signed*) George Poliquin.

" '*For the Longshoremen Union.*

" 'N.B.—As to the Canadian Pacific Railway Company, we must say that they prevent the undersigned to go on board of their ships, and make his duty in respect with the agreement passed between the said Company and the Longshoremen.

" 'We hope your Board will take into consideration all our complaints and order the said Canadian Pacific Railway Company to let the undersigned go on board of their ships as often as he likes in the performance of his duties.

" 'G. P.'

"The complaints above enumerated were taken up clause by clause, and after prolonged discussion and a personal investigation by the Board during the afternoon, of actual conditions existing at the harbour front and in the vessels of the Companies complained of, the Board is pleased to report the following conclusion unanimously, at the final meeting held on Thursday, seventh of July, at twelve o'clock noon:—

"1. That the interpretation of clause (*b*) of the agreement referring to grain trimming, is that the running of grain in the pipes shall be stopped only during the time occupied by men *going down into the hold* and *not* while the men are in the hold trimming the grain, proper care to be taken by those loading the grain to see that the pipe is directed away from the

men while at work to prevent any danger of being submerged.

"2. That none of the Companies interviewed refused to supply respirators, the report being that few if any of the men asked for or wanted them. Respirators must be furnished if requested.

"3. That the majority of the men were supplied night meal tickets valid at any of the restaurants on the harbour front, the exception being in the case of the Canadian Pacific Railway Company, whose tickets were good at one particular shop. The inconvenience of the latter arrangement was pointed out to Capt. Elliott, in charge of the Canadian Pacific Railway Company marine department, who promised that in future the tickets would be made valid at any of the river front restaurants. As it appears some of the Companies offer the cash value of the meal, instead of the ticket, this Board strongly recommended the exclusive use of the ticket system.

"4. That the demand for a special schedule for coal shovellers was not in accordance with the terms of the award of the Conciliation Board, which expressly specified a special tariff on certain classes of merchandise, and which having carefully considered the whole question of rates, had placed all other articles under the general schedule of 30 cents and 35 cents per hour per day and night work respectively.

"5. Regarding the claim of Mr. Poliquin to board the Canadian Pacific Railway Company or any other vessels during working hours, this Board cannot allow such claim as a matter of right, except in the course of investigation of any complaint as an act of courtesy on the part of any individual steamship line. No objection is entertained against Mr. Poliquin's interviewing the men when on the wharf, or after working hours, but they must not be interfered with during the progress of the work, except as above.

"6. The Board also directs that the expenses of this investigation according to the schedule of fees allowed under the Industrial Disputes Act, 1910, shall be borne one-half by each of the parties hereto.

"It is also pleasing to add that throughout the discussions the utmost harmony and goodwill has characterised the proceedings. The whole of which is respectfully submitted.

Award dated Thursday, seventh July, 1910.

ROYAL COMMISSION ON INDUSTRIAL TRAINING AND TECHNICAL EDUCATION—COMMISSION ENTERS UPON WORK OF INQUIRY.

THE Royal Commission on Industrial Training and Technical Education, which was appointed by the Government of Canada, for the purpose of conducting an inquiry into the needs and present equipment of the Dominion of Canada as respects industrial training and technical education, and into the systems and methods of technical instruction obtaining in other countries, to which reference has already been made in the June number of *The Labour Gazette*, assembled in Ottawa, on Wednesday, July 6, for purposes of organization, and for the purpose also of outlining, as far as possible, the plan upon which its work of inquiry should be conducted, and of meeting with the Honourable, the Minister of Labour, upon whose recommendation the Commission was appointed.

The first meeting of the Commission was held in the Minister of Labour's office, on July 6, those present being: Mr. James W. Robertson, C.M.G., LL.D., of Montreal, Que., Chairman; Honourable John N. Armstrong, of North Sydney

N.S.; Rev. George Bryce, M.A., D.D., LL.D., F.R.S.C., of Winnipeg, Man.; Mr. Gaspard DeSerres, of Montreal, Que.; Mr. Gilbert M. Murray, B.A., of Toronto, Ont.; Mr. David Forsyth, M.A., of Berlin, Ont.; Mr. James Simpson, of Toronto, Ont.; Mr. Thomas Bengough, C.S.R., Secretary and reporter to the Commission; also Mr. F. A. Acland, Deputy Minister of Labour, and Mr. Gerald H. Brown, Assistant Deputy Minister of Labour.

In the course of a brief address on this occasion the Minister thanked the Commissioners for having arranged to give to the work of the Commission the time and service which it would involve, and also outlined the scope of the Commission, and noting especially the exceptional opportunity for uselfulness which it afforded. There had been, he said, many Commissions appointed by the Federal and Provincial Governments of Canada, but he doubted if there was ever one which had given to its members an opportunity of national service as far-reaching and certain as that afforded the present Commission. It was important, he said, for the Commission to bear in mind that education, as such, was a subject assigned to the Provinces by the British North America Act, and that the Federal Government, therefore, did not intend in the appointment of the present Commission, to, in any way, encroach upon the jurisdiction of the Provinces. Indeed, the consent of the Prime Ministers of the several Provinces to the establishment of this Commission had been obtained before its appointment was decided upon. Canada's industrial greatness, its trade and commerce, were alike dependent upon industrial efficiency, the efficiency, in the first place, of the wage earners, who far outnumbered all other classes in the industrial processes, in the several lines of manufacture and industrial development; and this being the case, the Federal Government felt that in so far as it was possible to co-operate with the Provinces in promoting this efficiency, it was desirable to do so. The gathering of information was a means to this end, and the gathering of information on any subject of national concern was one on which no question as to the Dominion's jurisdiction could be raised. Industrial efficiency should be the Commissioner's watchword, and its aim should be to ascertain from all points of view how this efficiency could be furthered in the interests of capital and of labour alike. It was the Government's desire that the Commission's work should be as comprehensive and thorough as possible, and in this connection, the Minister suggested that before travelling abroad, it would be desirable for the Commission to make an industrial survey of the Dominion of Canada, visiting the several Provinces, and ascertaining the nature and extent of the several industries and trades, as well as their needs in respect of technical education, and some idea of what was being done at the present time through Government or through public or private agencies in the way of promoting industrial efficiency by technical education or otherwise. Having familiarised themselves, in this way, with the industrial methods and equipment of the Dominion, they might afterwards visit Great Britain, France, Germany, the United States, and if necessary, other countries, for the purpose of ascertaining the methods adopted by these several countries for the promotion of industrial efficiency. It was important, he thought, that all those at present engaged in the work of technical education, boards of trade, factory inspectors,, employers' associations, trades unions, and other organizations should be given every opportunity of having their views fully presented before the Commission. In conclusion, the Minister promised that the Government of Canada would do all in its power to facilitate the work of inquiry.

Dr. James W. Robertson, Chairman of the Commission, in reply to the Minister's address, expressed the Commission's thanks to him for the suggestions which he had offered, and promised that the same would be most carefully considered.

Meetings of the Commission were held in Ottawa between July 6 and July 11, when working plans and an itinerary of the Maritime Provinces, Ontario and Quebec were agreed upon. The plans in question were embodied in a circular letter, in the following terms:—

OTTAWA, ONT., July 11, 1910.

Dear Sir,—

I have the honour to intimate to you that the Royal Commission on Industrial Training and Technical Education proposes to visit places according to the itinerary outlined in the sheet which is enclosed herewith. On behalf of the Commission, I am to express our earnest desire and hope that the work of the Commission may be fruitful of benefit to each of the localities which it is able to visit, as well as to the Dominion of Canada as a whole.

Our Commission will give partiuclar attention to the manufacturing industries, to agriculture, to domestic occupations, to mining, to the fisheries, to the lumber interests, to the building trades, to the transportation services, as well as to the technical training required for commercial operations.

I should be grateful for any information or suggestions, or lists of names of institutions or establishments, which you may kindly cause to be furnished for the use of the Commission, and which would doubtless assist it to ascertain the needs and present equipment of your locality respecting industrial training and technical education.

The Commission will also make inquiry into, (*a*) the needs of existing industries in respect of labour; (*b*) the quality of labour which is available; and (*c*) the needs of such labour for industrial training and technical education. The Commission will appreciate your co-operation in any manner which you may consider appropriate regarding any or all of these matters.

A reply to this might be addressed to me, at

I have the honour to be,
Sir,
Your most obedient servant,

JAMES W. ROBERTSON,
Chairman.

On Monday, July 18, the Royal Commission on Industrial Training and Technical Education arrived at Halifax, and called officially on the Government of the Province of Nova Scotia, being received by the Acting Premier. Sessions were held in the Technical College of Nova Scotia, Halifax, when men responsible for the administration of the Educational System of Nova Scotia attended, including the Superintendent of Education, and the Director of Technical Education. A special reception was given to the Commissioners by the Halifax Board of Trade, on the occasion of the opening of their new rooms, the speakers at this gathering including the president of the Board of Trade, Mr. Johnston; Mr. R. L. Borden, M.P.; Dr. R. A. Falconer, President of the University of Toronto; President Hill of the Missouri State University; Honourable A. K. McLean, Acting Prime Minister of Nova Scotia; Mr. McKittrick, of Australasia; and Dr. Jas. W. Robertson, Chairman of the Royal Commission on Industrial Training and Technical Education. The Commission afterwards visited the chief industires of Halifax and Dartmouth. On July 21, the Commission visited Lunenburg, N.S., and investigated the fishing industry. On July 22, the Commission visited Bridgewater, N.S., where an inquiry was made into the lumber trade of that district. On the day following, the Commission visited Liverpool, N.S., during the session of the Summer School of Science, at that place, which was attended by over 200 teachers from Nova Scotia, New Brunswick and Prince Edward Island, the Commission being favoured at this point with the testimony of teachers and of representatives of the local industries. On July 23, the Commission held a sitting at Yarmouth, N.S., visiting also the Marine School, the Cotton Duck mill and other industries in that place. On July 25, the Commission continued its inquiry by visiting Digby, N.S., and at Middleton, on July 26, inspected the MacDonald Consolidated School, and also received evidence. On the following day, a session was held at Acadia University, in Wolfville, N.S., also a session in Kentville, N.S., Dr. Robertson delivering an address at this point to the Canada Club, entitled, "The Call of the Land". At Windsor, N.S., on July 28, the Commission visited King's College, the Edgehill School for girls, as well as a local cotton mill and foundry, and received testimony on local conditions At Truro, on July 29, the Commission assembled in the Provincial Normal College, receiving the testimony of Principal Soloan and others, and visiting the local industries. In the evening a reception was tendered to the Commissioners under the auspices of the Canadian Club of Truro, at which Dr. James W. Robertson also delivered an address. On July 30, the Commission visited the Provincial Agricultural College, Truro, and received the evidence of Principal Cumming and the members of the College staff, in the presence of over 100 teachers in attendance at the Summer School of Rural Science, carrying on its work under the auspices of the Provincial Normal and Agricultural Colleges. The Commissioners inspected also the various departments of the Provincial Experimental Farm.

Mr. F. A. Acland, Deputy Minister of Labour, was present at a number of the meetings of the Commission.

In many of the smaller towns which were visited the Commission found industrial establishments in which work was being done under very favourable conditions, the factories being situated where plenty of light surrounded them, and the housing conditions being also in happy contrast to the confinement of tenement quarters.

During the month of July, the Commission visited in all eleven places, and examined 150 witnesses.

PROVINCIAL OFFICERS FOR THE PROTECTION OF LABOUR, CANADA.

LEGISLATION for the protection of workpeople in mines, factories, &c., is in Canada a matter largely of Provincial jurisdiction. Different Provinces have different enactments in this connection, some having passed much more detailed and extended legislation than others. Prince Edward Island,

however, is the only Province which has no laws with regard to employment in factories, mines or about machinery or boilers, owing primarily to the fact that fishing and agriculture constitute the leading local industries.

An important feature of legislation of this character has to do with the appointment of inspectors whose duty it is to ensure the proper carrying out of the law. With the object of showing the extent to which appointments of this character have been made in the several Provinces, as well as providing a directory of the names of the various officers appointed by Provincial authority and holding office at the present time for the protection of labour in this way throughout Canada, the following list has been compiled from information received during the past month from the proper authorities. The order of the Provinces is from east to west.

Nova Scotia.

Factory Inspector.—Philip Ring, Province Building, Halifax, N.S.

Inspectors of Mines.—John Joseph McNeil, Glace Bay, N.S.; Neil A. Nicholson, Sydney Mines, N.S.; Walter F. Davis, Port Hawkesbury, N.S.; A. V. Cameron, Springhill, N.S.; Thomas Blackwood, Westville, N.S.; H. B. Pickings, Mines Office, Halifax, N.S.

New Brunswick.

Inspector of Factories.—John Kenny, Jr., St. John, N.B.

Quebec.

Inspectors of Factories.—Louis Guyon, chief inspector, 9 St. James street, Montreal, Que.; James Mitchell, 9 St. James street, Montreal, Que.; O. Munday, 9 St. James street, Montreal, Que.; J. E. Deslauriers, 9 St. James street, Montreal, Que.; Mde. Louisa King, 9 St. James street, Montreal, Que.; Mdlle. Clementine Clement, 9 St. James street, Montreal, Que.; R. H. Gooley, Coaticooke, Que.; P. J. Jobin, Parliament Buildings, Quebec, Que.; Felix Marois, Parliament Buildings, Quebec, Que.; Mdme. C. E. Lemieux, Inspectress; Dr. M. T. Lefebvre, Medical Inspector, Valleyfield, Que.;

Factory inspectors are also scaffold inspectors when called upon, but this duty may also be done by any properly accredited architect.

Inspectors of Mines.—Theo. C. Denis, Parliament Buildings, Quebec, Que.; J. H. Valiquette, Parliament Buildings, Quebec, Que.

There are also *boiler inspectors* for stationary and other steam boilers not included in the category of marine boilers. A complete list of these inspectors is hereto annexed:

Board of Examiners.—Messrs. William Laurie; E. O. Champagne; Louis Arpin, Montreal, Que.; Joseph Samson, Levis; and Mr. F. X. Drolet, Quebec, Que.

Names of persons qualified as boiler inspectors, under the Act 57 Victoria, chapter 30, according to the provisions of the Order-in-Council, No. 231, of the 26th April, 1907: Robert McKay, Quebec; E. D. Montgomery, Quebec; Joseph Samson, Levis; J. A. Samson, Levis; Napoleon Samson, Rivere du Loup (en bas); A. E. Pontbriand, Sorel; J. E. Beauchemin, Sorel; Joseph Massé, Granby; Alfred L. Moulton, Coaticooke; Achille Lamothe, St. Bonaventure d'Upton; Ovide Lamothe, St. Bonaventure d'Upton; A. J. Loiselle, Farnham; James Kay, Aylmer; W. H. Monks, Pointe Claire; A. P. Robb, Toronto; Oliver St. John, Toronto; George Davis Fowler, Toronto; E. A. Atkins, Montreal and Toronto; F. F. Donaldson, Montreal and Toronto; O. E. Granberg, Montreal; Charles O. Granberg, Montreal; Joseph Martineau, Montreal; J. E. Huntingdon, Montreal; Richard Marchand, Montreal; F. X. Lavigne, Montreal; H. Denis, Montreal; F. Carroll, Montreal; Louis Arpin, Montreal; Charles Allard, Montreal; A. York, Montreal; D. Morin, Montreal; A. Toutant, Montreal; Lact. Paquin, Montreal; E. Valiquette, Montreal; J. W. Harris, Montreal; W. Leclaire, Montreal; Charles Eids, Montreal; Rosario Drouin, Montreal; J. E. Guillemette, Montreal; William Laurie, Montreal; E. O. Champagne, Montreal; C. E. Goodwin, Montreal G. E. Cham-

pagne, Montreal; G. L. Morrison, Montreal; J. E. Jones, Montreal.

Ontario.

Inspectors of Factories. — James T. Burke, Chief Inspector, Parliament Buildings, Toronto; Henry A. Clark; Arthur W. Homes; Robert Hungerford; Thomas Keilty; Fred Kellond; Stephen J. Mallion; H. J. Tutt; Mrs. A. Brown; Miss M. Carlyle.

Inspectors of Mines.—E. T. Corkill and A. H. A. Robinson, Parliament Buildings, Toronto.

Inspectors of Boilers in Provincial Institutions.—D. M. Medcalf, Parliament Buildings, Toronto.

Boilers, apart from those in Provincial Institutions, may be inspected by any certified engineer or one of at least five years' experience.

Manitoba.

Inspectors of Factories.—D. Smith, Winnipeg; W. H. Head, Brandon.

Inspectors of Boilers.—Geo. McCloy, Winnipeg; A. Campbell, Portage la Prairie; J J. Calladon, Brandon; Wm. Garrett, Morden; T. Robinson, Neepawa; and Robt. Argue, Dauphin.

Saskatchewan.

Sanitary Inspector.—T. Aird Murray, C. E., Toronto.

Coal Mines Inspector. — Frank Smith, Edmonton.

Inspector of Factories.—Thomas Molloy, Regina.

Provincial Health Inspector.—Dr. M. M. Seymour, Regina.

Boiler Inspectors. — Wm. Waller, Whitewood; Wm. Mayhew, Whitewood; Thos. Inglis, 1400 Robinson street, Regina; R. N. Blackburn, Estevan; B. M. Smyth, 2101 Smith street, Regina; J. R. Morrison, North Battleford; Jos. McMillan, Saskatoon; Jno. Merchant, Prince Albert; and J. A. Tripp, Yorkton.

Alberta.

Provincial Health Officer.—Dr. L. E. W. Irving, Edmonton.

Provincial Medical Inspector.—Dr. V. E. Barrow, Edmonton.

Sanitary Engineer.—R. B. Owens, Edmonton.

Provincial Bacteriologist.—Dr. D. G. Revell, Edmonton.

Inspectors of Steamboilers.—N. Marshall, Lethbridge; J. Buxton, Calgary; W. D. Watson, Red Deer: D. Fraser, Strathcona; F. W. Hobson, Edmonton; J. T. Watson, Lethbridge.

Provincial Inspector of Mines.—J. T. Stirling, Edmonton.

District Inspectors of Mines.—E. Heathcote, Calgary; H. R. Wilson, Lethbridge.

British Columbia.

Inspector of Factories.—Chas. H. Gordon.

Inspectors of Steamboilers and Machinery.—John Peck, New Westminster Chief Inspector for Province; Andrew Sutherland, Nelson, (Kootenay); Samuel Baxter, Victoria, (Kootenay); G. O. Madigan, Vancouver, (Kootenay); John Downie, New Westminster, (Kootenay); John D. Kay, Victoria, (Kootenay); George C. McGowan, New Westminster; P. A. Gospel, Nelson, (Kootenay); A. S. Bennett, New Westminster.

Inspectors of Coal and Metalliferous Mines.—Francis H. Sheppard, Nanaimo, Chief Inspector and supervisor of all other inspectors; John Newton, Nanaimo, inspector; Thomas Morgan, Cranbrook, (Kootenay), inspector; James McGregor, Nelson, (Kootenay), inspector; Robert Strachan, Moyie, (Kootenay), inspector; Evan Evans, Corbin, (Kootenay) inspector.

Inspector of Tramways.—William Rae, Vancouver, for Province.

RETAIL PRICES OF STAPLE ARTICLES OF

The accompanying table sets forth the retail prices prevailing on, or about, the fifteenth day of the month pre-
living in the leading centres of industry throughout Canada.

The list of commodities includes twenty-eight varieties of food, with fuel and coal oil. In addition a statement
usually occupied by workingmen.

The exact quality for which the quotation is given is set forth in the case of each commodity, and every care
statistics may be available for purposes of comparison.

The list of localities includes nearly every place having a population of 10,000 people, and is representative of

The quotations contained in the table have been furnished by the correspondents of *The Labour Gazette* in the
the Department.

IMMIGRATION AND COLONIZATION.

The official statements given below with regard to recent immigrant arrivals in Canada, number of homestead entries made, land patents issued, &c., are published, except where otherwise stated, by courtesy of the Department of the Interior, Canada.

DURING the month ended June 30, 1910, the number of passengers leaving the United Kingdom for British North America, according to official returns of the Boards of Trade, was as follows:—

Nationality.	1910	1909.
English	12,038	5,309
Welsh	221	164
Scotch	4,659	2,058
Irish	674	325
British Colonial	248	255
Total British subjects	17,840	8,011
Foreign	4,358	2,489
Total	22,198	10,600

During the six months ended June 30, 1910, the number leaving the United Kingdom, as above, was:—

Nationality.	1910.	1909.
English	59,415	31,111
Welsh	1,346	492
Scotch	20,751	9,491
Irish	3,654	2,122
British Colonial	1,441	714
Total British Subjects	86,607	49,930
Foreign	20,192	13,416
Total	106,799	57,346

RECENT INDUSTRIAL AGREEMENT

THE following agreement went into force in the printing trades, London. Ont., from July 1, 1910:—

Scale of Prices for Newspaper Work.

Hand Composition.

1. Morning Papers.—Composition in agate and in larger type, of regular body and face, 40 cents per 1,000 ems, the office in all cases to prove the matter.

2. Evening Papers.—Composition in agate and all larger type, of regular body and face, 35 cents per 1,000 ems, the office in all cases to prove the matter.

3. Compositors on daily papers shall be allowed at least 1,000 ems per hour for all work done on time during hours of composition.

4. All alterations from copy, other than grammar and style, to be corrected by or at the expense of the office.

5. Tabular work, &c., containing three or four columns, of either figures or words, or words and figures, with or without headings, and without rules, price and a-half; same with rules, double price. Containing five or more columns of figures or words and figures, with or without headings or rules, double price.

6. All advertisements to be measured nonpareil (unless smaller type is used), with exception of reading notices. Matter set in any language other than English, double price.

Machine Composition.

Under this heading is included the product of all kinds of type-setting machines.

1. No person will be allowed to operate a machine who is not a member in good standing of London Typographical Union, No. 133. A probationary member of this Union shall be allowed to learn machine composition during the last six months of apprenticeship; but he shall in no case displace a regular operator. Provided, he has not attained a speed of 4,000 on a Linotype, or 2,800 on Monoline or Typograph per hour, he shall be allowed to continue his apprenticeship until he has attained such speed, the time in no case to exceed four months; the

judges as to competency being the Chapel, and at the rate of wages as laid down in Section 8.

2. An operator shall be considered competent who can set 4,000 ems per hour on the Linotype, or 2,800 ems per hour on the Monoline, Typograph or other type-setting devices.

3. The minimum scale on all type-setting machines shall be $17.00 per week for day work, and $18.00 per week for night work.

4. Operators when compelled to put in turned rules, dashes, &c., shall not be deducted for corrections.

5. All stoppages on the machine, from whatever cause, other than oiling or cleaning Monoline or Typograph, shall be allowed for at the rate of 4,000 ems per hour on Linotype, and 2,800 ems per hour on the Monoline or Typograph.

6. An operator capable of setting 3,500 ems on Linotype, or 2,500 ems on Monoline or Typograph, per hour, shall be entitled to "sub."

7. An employé who desires to lay off shall not be compelled to work when a competent substitute can be had. Men may put on their own substitutes from the floor of the office, but shall give the foreman fair notice of such intention except in case of sickness or emergency.

8. The apprenticeship for journeymen printers on machines shall consist of four months, to be paid for at the rate of $16.00 per week, day work, and $17.00 per week, night work, provided he is not already competent; after which time he shall receive the rate provided for in Section 3. Provided, also that a journeyman who has had experience similar to apprentices, and shall attain competence before the four months' limit, he shall be paid the full scale. Learners on machines, other than apprentices, must comply with following clause: For first month, one hour per day, free; second month, one hour per day, at 10 cents per 100 lines; after that, until becoming competent, one hour per day at 15 cents per 100 lines. In no case shall learners displace regular operators.

9. Overtime, which shall apply to work done before as well as work done after the hours specified, shall be charged for at the rate of one hour and a half for every hour so employed. Overtime on statutory holidays and Sundays shall be paid for at the rate of two hours for every hour employed, but this clause shall not apply to the regular hours of work on newspapers. This section shall apply to all branches of the trade under the jurisdiction of the Union.

10. In offices where both machine composition and hand composition are done there shall be no culling of "phat," such as leaded matter, poetry, matter with a great many quads in it, or "phat" tables. All matter must be given out in a fair manner.

11. In no case can a member working on a type-setting machine receive less than a day's pay.

12. This scale shall apply to operators in all departments in which type-setting machines are used.

Machine Tenders' Scale.

The minimum wage scale for Machine Tenders, shall be as follows:..

13. For day work, $18.00 per week, and $19.00 per week for night work. Assistant machinist, day work, $15.00 per week, and $16.00 per week, night work.

14. Machine tenders shall be required to work but six days, or nights, of the week.

15. Machine tenders employed in any office as regulars shall under no consideration be permitted to attend machines in another establishment.

16. Machine tenders' assistants must become members of the International Typographical Union.

17. Machine tenders shall have jurisdiction over their assistants, but shall have no control over operators.

Floor Men.

18. "Ad" men, make-ups, bank men, heading men, and proofreaders, shall receive not less than $15.00 for day work, and $16.00 for night work. In no case can a member working on floor receive less than a day's pay. From and after July 1, 1911, the scale shall be $16.00 for

day work and $17.00 for night work. Section 9 shall also apply to floor men.

Foremen.

19. Foremen shall receive not less than $19.00 for day work, and $20.00 for night work.

20. Assistant foremen shall receive not less than $17.00 for day work, and $18.00 for night work.

General.

21. The hours of labour for all employés shall be: Day work, eight hours; seven hours per night.

22. The hours of labor shall be between six o'clock P.M. and seven for night work, and between seven o'clock A.M. and six o'clock P.M. for day work.

23. No member of this Union shall act as operator-machinist in an office where three or more Linotype machines are run.

24. It shall be the duty of foremen and members to teach apprentices the printing business, and the duty of the Chairman to see that this is done; and an apprentice may appeal to the Executive Committee if he deems an injustice is done him.

25. That the proportion of apprentices to journeymen employed or regulars, shall be as follows: 1 up to 4; 2 to 8; 3 to 12; 4 to 18; 5 to 24, and in no case shall more than five apprentices be employed in any office.

Book and Job Scale.

1. Foremen shall receive not less than $16.00 per week; assistant foremen not less than $15.00 per week.

2. Composition (in book and job offices), 35 cents per 1,000 ems, or $13.00 per week of 48 hours; after July 1, 1911, the scale shall be $14.00 per week of 48 hours.

3. Overtime, which shall apply to work done before as well as work done after the hours specified, shall be charged for at the rate of one hour and a half for every hour so employed. Overtime on statutory holidays and Sundays shall be paid for at the rate of two hours for every hour employed, but this clause shall not not apply to the regular hours of work on newspapers. This section shall apply to all branches of the trade under the jurisdiction of the Union.

4. When works, or portion of works, are required to be leaded, and the leads are not furnished at the time of composition, such matter shall be afterwards leaded at the expense of the employer, and the compositor to charge such matter the same as if he had originally put in the leads.

5. In case the compositor is required to make up his matter, he shall be entitled to the head and foot lines, and all the blank pages that may occur in the work upon which he may be engaged.

6. When a measure exceeds even ems in width, and is less than an en, nothing to be counted; but if an en or over, an em to be counted.

7. Tabular work, &c., same as on newspaper.

8. All sums of money earned by members of this Union, working by the piece or week, in all offices of this city, shall be paid in cash, weekly, in full; and any evasion of this article by acceptance of store orders or otherwise, as part payment of said wages, shall be considered a breach of good faith and Union principles, and submit any member or members so doing to such penalty or punishment as the Union may direct. The principle of co-operation shall not be considered an evasion of this article.

Section 6 shall also apply to newspaper work.

This scale is in force and effect until July 1, 1913.

FAIR WAGES SCHEDULE IN GOVERNMENT CONTRACTS AWARDED DURING THE MONTH OF JULY, 1910.

The following is a list of contracts awarded by the Department of Public Works, the Department of Railways and Canals, and the Department of Marine and Fisheries, which have received the signatures of both parties, together with the fair wages' schedule inserted in each contract, setting forth the minimum rate of wages to be paid to the labourers engaged upon the works. A statement of orders for supplies given by the Post Office Department is added.

Departement of Public Work.

ADDITION TO EAST BLOCK, OTTAWA.

ADDITION to East Block, Ottawa, Ont; name of contractors, Doran and Devlin, Ottawa, Ont.; date of contract, July 7, 1910; amount of contract, $222,800.

Driver, 2 horses and wagon	.45 " 10 "

WHARF AT MISCOU, N.B.

Wharf at Miscou, N.B.; name of contractor, E. N. Reid, St. John, N.B.; date of contract, July 12, 1910; amount of contract, $16,800.

Trade or Class of Labour.	Rate of Wages, Per Day of 10 Hours, Not less than:
Foreman carpenter	$2.25
Carpenter	1.75
Blacksmiths	2.00
Blacksmiths' helpers	1.50
Ordinary labourers	1.25
Driver 1 horse and cart	2.00
Driver, 2 horses and wagon	3.00

REPAIRS TO WHARF, ST. ALEXIS, QUE.

Extension and repairs to wharf at St. Alexis, Que.; name of contractor, Johnny Girard, Chicoutimi, Que.; date of contract, July 14, 1910; amount of contract, $15,395.96.

Trade or Class of Labour.	Rate of Wages, Per Day of 10 Hours, Not less than:
Foreman carpenter	$2.25
Carpenters	1.75
Blacksmiths	2.00
Blacksmiths' helpers	1.50
Ordinary labourers	1.35
Driver with 1 horse and cart	2.00
Driver, 2 horses and wagon	3.00

ADDITION TO GOVERNMENT WHARF AT SAULT STE. MARIE, ONT.

Extension to Government wharf at Sault Ste. Marie, Ont.; name of contractor, John F. Boyd, Sault Ste. Marie, Ont.; date of contract, July 16, 1910; amount of contract, $16,400.

Trade or Class of Labour.	Rate of Wages, Per Day of 10 Hours, Not less than:
Foreman carpenter	$3.25
Foreman mixing concrete	2.50
Foreman laying concrete	2.50
Foreman stone crusher	2.50
Carpenters	2.75
Blacksmiths	2.75
Blacksmiths' helpers	2.00
Ordinary labourers	1.75
Driver with 1 horse and cart	3.00
Driver, 2 horses and wagon	4.50

WHARF AT TADOUSAC HARBOUR, QUE.

Wharf and approach at Tadousac Harbour, Que.; name of contractor, Nap. Warren, Chicoutimi, Que.; date of contract, July 18, 1910; amount of contract, $31,795.

Trade or Class of Labour.	Rate of Wages Per Day of 10 Hours, Not less than:
Foreman carpenter	$2.25
Foreman laying concrete	2.25
Foreman mixing concrete	2.25
Foreman stone crusher	2.25
Carpenters	1.75
Blacksmiths	2.00
Blacksmiths' helpers	1.50
Ordinary labourers	1.35
Driver with 1 horse and cart	2.00
Driver, 2 horses and wagon	3.00

ARMOURY AT FRASERVILLE, QUE.

Armoury building at Fraserville, Que.; name of contractor, Philippe Dumont, Rivière du Loup Station, Que.; date of contract, July 23, 1910; amount of contract, $8,435.

Trade or Class of Labour.	Rate of Wages, Per Day of 10 Hours, Not less than:
Stone cutters	$3.00
Bricklayers	3.50
Masons	2.50
Carpenters	2.00
Joiners	2.00
Plasterers	2.50
Painters and glaziers	2.00
Plumbers	2.00
Steamfitters	2.00
Sheet metal workers	1.50
Ordinary labourers	1.25
Driver with 1 horse and cart	2.00
Driver, 2 horses and wagon	3.00

Department of Railways and Canals.

KETTLE RIVER VALLEY RAILWAY.

From a point at or near Grand Forks to point 50 miles up the North Fork, and East or West Fork of the North Fork, of Kettle river; not exceeding 50 miles. Date of subsidy agreement, July 5, 1910. Amount of subsidy, $3,200 per mile, not exceeding $6,400 per mile. Railway company, The Kettle River Valley Railway Company.

RATE OF WAGES.

All mechanics, labourers or other persons who perform labour in the construction of the work hereby contracted for, shall be paid such wages as are generally accepted as current for competent workmen in the district in which the work is being performed, and if, there is no current rate in such district, then a fair and reasonable rate, and shall not be required to work for longer hours than those fixed by the custom of the trade in the district where the work is carried on, except for the protection of life or property or in case of other emergencies. In the event of a dispute arising as to what is the current or a fair and reasonable rate of wages, or what are the current hours fixed by the custom of the trade, it shall be determined by the Minister of Labour, whose decision shall be final.

These conditions shall extend and apply to moneys payable for the use or hire of horses or teams and the persons entitled to payment for the use or hire of horses or teams shall have the like right in respect of moneys so owing to them as if such moneys were payable to them in respect of wages.

In the event of default being made in payment of any money owing in respect of wages of any mechanic, labourer or other person employed on the said work, and if a claim, therefore, is filed in the office of the Minister of

.....

and proof thereof satisfactory to the Minister is furnished, the Minister may pay such claim out of any moneys at any time payable by His Majesty under such contract, and the amounts so paid shall be deemed payments to the contractors.

Department of Marine and Fisheries.

WOODEN LIGHTHOUSE TOWER ON QUACO EASTERN BREAKWATER PIER, ST. JOHN COUNTY, N.B.

The construction of a wooden lighthouse tower on Quaco Eastern Breakwater Pier, St. John County, N.B.; name of contractor, Lawrence Mury, West Arichat, N.S.; amount of contract, $650.00; date of contract, July 7, 1910.

Trade or Class of Labour.	Rate of Wages, Per Day of 10 Hours, Not less than:
Carpenters	$2.00
Painters	2.00
Bricklayers	3.50
Labourers	1.50

FAIR WAGES SCHEDULES PREPARED BY DEPARTMENT OF LABOUR.

Fair Wages

DURING the month of July, the Department of Labour prepared, at the request of the departments concerned, Fair Wages Schedules for insertion in contracts for various public works, as follows:—

Construction of a wall across the foot of North street, Halifax, N.S., on the Intercolonial Railway.

Construction of a line of railway from Paspebiac to Gaspe.

Construction and erection of single track railway bridge, with cantilevered track, on line of Hudson Bay Railway, over the Saskatchewan River, at Le Pas.

Construction of a public building at Wolfville, N.S.

Construction of a public building at Fairville, N.B.

Construction of a public building at Grand Falls, N.B.

Construction of a public building at Hartland, N.B.

Construction of a public building at Hillsborough, N.B.

Construction of an armoury at Levis, Que.

Construction of a Custom house at Quebec, Que.

Construction of a public building at Humboldt, Sask.

Construction of a public building at Weyburn, Sask.

Construction of a public building at Wetaskiwin, Alta.

Construction of a public building at Grand Forks, B.C.

Construction of a public building at Nelson, B.C.

Construction of a public building at Nanaimo, B.C.

Construction of a public building at Essex, Ont.

Construction of a public building at Mitchell, Ont.

Construction of a public building at Dundas, Ont.

Construction of a public building at Listowel, Ont.

Construction of a public building at Harriston, Ont.

Construction of a public building at Mount Forest, Ont.

Construction of a public building at Portage la Prairie, Man.

Construction of a public building at Parrsboro, N.S.

Construction of a public building at St. Jacques de l'Achigan, Que.

Construction of a public building at Strathcona, Alta.

Construction of a crib and concrete breakwater at Bare Point, Port Arthur Harbour, Ont.

Construction of a cribwork wharf at Burke's Head, Ingonish, N.S.

Construction of a concrete dam in Richelieu river, at Fryer's Farm, Chambly Vercheres and Rouville counties, Que.

Construction of crib and span wharf at Lakeport, Ont.

Construction of pile and concrete ice pier at Riviere Ouareau, Joliette county, Que.

Construction of re-enforced concrete breakwater at Goderich, Ont.

Construction of an addition to Postal Station "E," St. Louis de Mile End, Montreal, Que.

Construction of a public building at St. Henri, Que.

Construction of a breakwater extension at Dipper Harbour, St. John, N.B.

Construction of a breakwater and jetty, and removal of west jetty and building superstructure, east jetty.

Construction of wooden lighthouse and pier on Southeast Bar, Sydney Harbour, C.B.

Construction of a wooden fog alarm building at Cross Island, N.S.

INDUSTRIAL ACCIDENTS DURING THE MONTH OF JULY, 1910.

Under this heading, account is taken of such accidents only, as were sustained by workmen in the course of their employment, and resulted in loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the Department through the press of the country or correspondents of *The Labour Gazette*. The Department is also indebted to the Bureau of Mines of Ontario and British Columbia, to the office of the factories' inspector of the Province of Ontario, the Ontario Railway and Municipal Board, and to the Department of Railways and Canals, for their kind assistance in furnishing the Department with the statement of returns of accidents reported to them.

INDUSTRIAL accidents occurring to 354 individual work people in Canada during the month of July, 1910, were reported to the Department of Labour. Of these, 116 were fatal and 238 resulted in serious injuries. In addition, three fatal accidents were reported as having taken place prior to the beginning of the month, information not having been received by the Department before July, 1910.

In the preceding month there were 168 fatal, and 247 non-fatal accidents reported, a total of 415, and in July 1909, there were 100 fatal and 258 non-fatal accidents, a total of 358. The number of fatal accidents reported in July, 1910 was, therefore, fifty-two less than in the preceding month, and sixteen more

than in July, 1909. The number of non-fatal accidents reported in July, 1910 was nine less than in the preceding month and twenty less than in July, 1909. Altogether there were sixty-one less industrial accidents reported in July, 1910 than in the preceding month and four less than in the same month of the preceding year.

Of 338 returns received during the month giving the ages of the victims of industrial accidents, twenty-nine referred to persons under twenty-one years of age; 101 to persons between twenty-one and forty-five, and nineteen to persons over forty-five. Eighty-nine persons were over twenty-one years of age, but their exact ages were not specified.

The following is a record of the accidents of the month by industries and trades:—

STATEMENT OF ACCIDENTS DURING JULY, 1910, BY INDUSTRIES AND TRADES.

Trade or Industry.	Killed.	Injured.	Total
Agriculture	18	30	48
Fishing and hunting	1	.....	.....
Lumbering	8	3	11
Mining	17	9	26
Building trades	2	28	30
Metal trades	11	43	54
Woodworking trades	2	14	16
Printing trades	.....	4	4
Clothing trades	.....	2	2
Textile trades	.....	3	3
Food and tobacco preparation	2	9	11
Leather trades	.....	1	1
Railway service	25	26	51
Navigation	6	10	16
General transport	10	13	23
Public employés	.....	2	2
Miscellaneous	9	21	30
Unskilled labour	5	20	25
Total	116	238	354

Nature of Fatalities and Accidents.

The chief disasters of the month, causing the death of more than one workman, were: an explosion of dynamite and powder on the line of the National Transcontinental Railway, 100 miles west of LaTuque, Que., which fatally injured nine workmen and seriously injured five others; the asphyxiation of five mine workers near Kaslo, B.C., a powder explosion at Sand Point, Ont., in which three workers were instantly killed and four others seriously injured; an explosion of dynamite at Trout Lake, Ont., which caused the death of two workmen; and the death of two trainmen in a collision at Beaverton, Ont.

Disastrous Dynamite Explosion at La Tuque, Que.

On July 25, an explosion of 7,500 pounds of powder and 400 pounds of dynamite at Cut No. 1,086, on the line of the National Transcontinental Railway, 100 miles west of LaTuque, Que., caused the death of nine workmen and the serious injury of five others. It was stated that the cause of the accident was the attempt of a workman to open a can of powder with an axe when it exploded and set off a train of powder and dynamite.

Asphyxiation of Five Mine Workers Near Kaslo, B. C.

On July 16, while a party of mining men (five) were going over the "Lucky Jim" mine near Kaslo, B.C., while in, pursuit of this a forest fire that for some time had been raging in the vicinity became very dangerous and in order to avoid its effects they took refuge in what is known as No. 4 tunnel. Here they were asphyxiated by smoke and their lifeless bodies were afterwards discovered.

Disastrous Powder Explosion at Sand Point, Ont.

On July 11, by the blowing up of a powder factory at Sand Point, Ont., three workers were instantly killed and four seriously injured.

Explosion of Dynamite at Trout Lake, Ont.

A premature explosion of dynamite occurred on July 13, on the construction works of the Transcontinental Railway near Trout Lake, Ont., and instantly killed two workmen.

Accidental Death of two Trainmen at Beaverton, Ont.

On July 23, two trainmen in the employ of the Canadian Northern Railway

were riding on the tender of an engine that was backing from a gravel pit to couple to an excursion train at Beaverton. The brake and steam lever of the engine failing to work, it crashed into the excursion train instantly killing the two employés.

Record by Trades and Industries.

Agriculture.—In this industry there were, during July, 1910, eighteen fatal and thirty non-fatal accidents, compared with thirty killed and twenty-eight injured in June last, and twenty-two killed and thirty-three injured in July, 1909. Four farmers were killed by being run over, three each by machinery and by falls, two each by live stock and by runaways and one each by falling material, by flying material, by electric shock and by being burned to death. Of the serious accidents thirteen were caused by falls, eight by machinery, three each by live stock and by runaways, two by falling material and one by being run over.

Fishing and hunting.—During July, 1910, a fisherman was drowned off Alberton P.E.I., while lobster fishing. In the month previous there was also one fatality. There were no accidents in July, 1909.

Lumbering.—Eight workmen met death by accident in July and three were injured. The record for the preceding month was eleven killed and ten injured and in July, of last year, five killed and thirteen injured. Four of the fatalities were due to flying material, three to drowning and one to machinery. Two of the non-fatal accidents were due to machinery and one to falling material.

Mining.—Seventeen mine workers were killed and nine were injured during July, 1910, as against twenty-one killed and fifteen injured in the month before and six killed and twenty-three injured in July, 1909. Six each of the deaths were caused by being run over and by falling material, four by asphyxiation and one by an explosion of dynamite. Of the serious injuries four were caused by falling material, three by explosion of dynamite and one each by live stock and by being run over.

Building trades.—In this group two workers were killed and twenty-eight injured during July, 1910, compared with six killed and sixteen injured in June last and six killed and twenty-four injured in July, 1909. One each of the deaths were due to blood poisoning and to falling material. Of the other accidents fifteen were due to falling material, eight to falls, three to explosions of dynamite and one each to flying material and to an explosion of gasoline.

Metal, engineering and shipbuilding trades.—In July, 1910, eleven of these workers met accidental death and forty-three were injured, compared with eight killed and fifty-four injured in the previous month and six killed and sixty-four injured in July, 1909. Five of the deaths were caused by machinery and two each by electric shock, by falls and by falling material. Seventeen of the minor accidents were caused by machinery, ten by falling material, eight by falls, four by flying material and two each by elevators and by explosions.

Woodworking trades.—Two woodworkers were killed, one by flying material and the other by a fall, and fourteen were injured, all by machinery, in July, 1910. The record of the month before was nine injured and of July, 1909, two killed and ten injured.

Printing trades.—Four workmen were injured by machinery in July, 1910, against one injury in the preceding month and three injuries in July of last year.

Clothing trades.—Machinery injured two of these workmen. In the month before, six were injured; one was injured in July, 1909.

Textile trades.—Machinery was responsible for one injury and a fall another in July, as against one injury in June last, and one injury in July, 1909.

Food and tobacco preparation.—There were two fatalities and nine injuries in July, 1910, compared with three killed and seven injured in the month before, and nine injuries in July, 1909. An explosion of gas and being run over were each accountable for a fatality, while three each were injured by an explosion of gas and by machinery, and one each by a fall, by falling material and by an elevator.

DEPARTMENT OF LABOUR, CANADA,
STATISTICAL TABLE SERIES, F. No. 81.

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF JULY, 1910.

Trade or Industry.	Locality.	Date.	No.	Cause of Fatality.
Agriculture—				
Farmer	St. Remi, Que	July 6	1	Gored by a bull.
"	Carluke, Ont	" 6	1	In a runaway.
"	Pilot Mound, Man	" 6	1	Caught in belting.
"	Danville, Que	" 8	1	Run over by train.
"	Gavan, Sask	" 7	1	Run over by train.
"	Loch Lomond, N.S	" 8	1	Gored by a bull.
"	Belwood, Ont	" 9	1	Cave-in of earth.
"	Highgate, Ont	" 15	1	Caught in belting.
"	St. Alexandre, Que	" 11	1	In a runaway.
"	Brockville, Ont	" 20	1	Struck by flying whiffletree.
"	Murray Harbour, P.E.I	" 9	1	Fell from roof of barn.
"	Beauport, Que	" 20	1	Run over by loaded vehicle.
"	St. Casimir, Que	" 26	1	Struck by mechanical hay-fork in back.
"	Laurierville, Que	" 26	1	Struck by lightning.
"	Laurierville, Que	" 26	1	Burned to death while trying to save compnaion.
"	Kingston, Ont	" 26	1	Fell from vehicle.
Farm hand	Estevan, Sask	" 7	1	Run over by steam plough.
Tree trimmer	Toronto, Ont	" 2	1	Fell from tree.
Fishing and hunting—				
Fisherman	Alberton, P.E.I	" 26	1	Drowned, while lobster fishing.
Lumbering—				
Logger	Norway House, Ont	" 4	1	Drowned, canoe upset.
"	Winlaw, B.C	" 15	1	Drowned, fell off boom.
"	Near North Bay, Ont	" 26	1	Drowned, fell off logs.
Sawmill hand	Newcastle, N.B	" 20	1	Struck by flying "Peavey"
"	Buckingham, Que	" 23	1	Fell on circular saw.
"	Three Rivers, Que	" 23	1	Struck by flying belting.
"	Fernie, B.C	" 16	1	Struck by flying slab.
"	Ardoch, Ont	" 16	1	Struck by flying slab.
Mining—				
Miner	Fernie, B.C	" 4	1	Run over by coal cars.
"	Glace Bay, N.S	" 5	1	By fall of stone.
"	Michel, B.C	" 6	1	Between cars.
"	Coal Creek, B.C	" 8	1	Run over by cars.
"	North Sydney, N.B	" 10	1	By fall of coal.
"	Frank, Alta	" 18	1	By fall of rock.
"	Kaslo, B.C	" 16	4	Suffocated by smoke in mine shaft.
"	Fernie, B.C	" 22	1	Run over by trip.
"	Fernie, B.C	" 16	1	Crushed between cars and chute.
"	Hillcrest, B.C	" 23	1	By fall of rock.
"	Coal Creek, B.C	" 4	1	Fall of rock.
"	Corbin, B.C	" 4	1	Fall of rock.
" (motorman)	Coal Creek, B.C	" 22	1	Run over by locomotive.
Quarryman	Sherbrooke, Que	" 28	1	Explosion of dynamite.
Building trades—				
Mason	Manilla, Ont	" 20	1	Struck thumb with hammer, paralysis succeeded.
Builder's labourer	Montreal, Que	" 26	1	By falling cement roof.
Metal, engineering and shipbuilding trades—				
Stationary engineer	Vancouver, B.C	" 7	1	Struck by portion of donkey engine.
"	Amherst, N.S	" 21	1	Fell into rolling machine.
Lineman	St. Laurent, Que	" 8	1	Electrocuted.
"	Peterborough, Ont	" 11	1	Fell from pole.
"	Montreal, Que	" 30	1	Electrocuted.
Metal worker	Montreal, Que	" 15	1	Derrick boom fell on him.
"	Sault Ste. Marie, Ont	" 20	1	Struck in back by crane.
Structural iron worker	Toronto, Ont	" 28	1	Fell 125 feet.
Foundryman	Sydney, N.S	" 27	1	Half ton casting fell on him.
Steel worker	Sault Ste. Marie, Ont	" 11	1	Killed while making a coupling.
Electrician	Toronto, Ont	" 11	1	Leg taken off in an elevator; died July 13.

Yardman	Hochelaga, Que.	" 25	1	By falling timber.
"	Windsor, Ont.	" 9	1	Caught between cars.
Navigation—				
Deck hand	Arrow Lakes, B.C.	" 1	1	Drowned, fell overboard.
"	Windsor, Ont.	" 27	1	Drowned, fell overboard.
Cook on vessel	St. John, N.B.	" 7	1	Drowned, fell through trestle.
Captain	Vancouver, B.C.	" 11	1	Drowned, fell from gangway.
Pantryman on vessel	Toronto, Ont.	" 11	1	Drowned, fell overboard.
Lockman	Cornwall, Ont.	" 19	1	Drowned, fell into canal.
General transport—				
Delivery employé	Dorval, Que.	" 9	1	Run over by an automobile.
"	London, Ont.	" 6	1	Run over by loaded vehicle.
"	Portage la Prairie, Man.	" 25	1	Run over by train at crossing.
Carter	Longueuil Que.	" 11	1	In a runaway.
Street railway employé	Toronto, Ont.	" 14	1	Run over by car.
"	Maisonneuve, Que.	" 8	1	Fell from car.
Messenger boy	Winnipeg, Man.	" 19	1	Run over by automobile.
Teamster	Toronto, Ont.	" 5	1	Run over by loaded wagon.
Public employés—				
Axeman Gov. survey	Fisher River, Ont.	" 20	1	Severed artery with axe.
Fireman	Perth, Ont.	" 8	1	Fell from telegraph pole.
Miscellaneous—				
Clerk	Stratford, Ont.	" 20	1	Elevator fell on him.
Cement works hand	Humberstone, Ont.	" 15	1	Run over by freight car.
Waiter	Winnipeg, Man.	" 18	1	Electrocuted.
Hotel employé	Sussex, N.B.	" 6	1	Explosion of soda water cylinder.
Employé in explosive factory	Sand Point, Ont.	" 11	3	Explosion of powder.
Chemical worker	Longford Mills, Ont.	" 7	1	Explosion of chemicals.
Well digger	Fergus, Ont.	" 9	1	Cave-in of earth.
Unskilled labour—				
Labourer	Owen Sound, Ont.	" 6	1	Cave-in of sand.
"	Welland, Ont.	" 20	1	Ruptured artery while at work.
"	Calgary, Alta.	" 24	1	Run over by train.
"	Sherbrooke, Que.	" 28	1	By fall of derrick.
"	Quebec, Que.	" 29	1	Steam shovel fell on him.

FATAL ACCIDENTS HAPPENING IN THE PREVIOUS MONTH, BUT ONLY REPORTED TO THE DEPARTMENT IN JULY, 1910.

Trapper	Abuscong Lake, Ont.	June 21	1	Found dead in bush.
Miners	Squamish Valley, B.C.	" 29	2	Explosion of powder.

Leather trades.—Machinery injured one workman in this group. There were no accidents in the previous month and one injury in July, 1909.

Railway service.—Twenty-five railway employés were accidentally killed and twenty-six injured during July, 1909. In the preceding month the numbers were twenty-three killed and nineteen injured and in July, 1909, twenty-nine killed and twenty-five injured. Thirteen of the fatalities were due to explosions of dynamite, six to being run over, two each to being caught between cars and to collisions and one each to drowning, and to falling material. Of the non-fatal accidents eleven were due to collisions, five to explosions of dynamite, four to falls, three to machinery, two to falling material and one to being run over.

Navigation.—Drowning caused six deaths in this group and ten others were injured, four each by falling material, and by falls and one each by flying material and by being run over. In June, 1910, the record was three killed and nine injured, and in July, 1909, five killed and eight injured.

General transport.—Ten of these workers met death by accident during July, and thirteen were injured, compared with nine killed and nineteen injured in the month before and three killed and nineteen injured in July, a year ago. To being run over were due six of the fatalities; to falls, two; and to a runaway and to tools one each. Five of the injuries were due to falls, two each to being run over and to collisions and one each to a runaway, to live stock, to falling material and to being caught between cars.

Public employés.—In July, 1910, two public employés were injured, one by falling material and one by a collision, compared with three killed and six injured in June, last, and two killed and one injured in July, 1909.

Miscellaneous.—In this group the record for July, 1910, was nine killed and twenty-one injured, as against five killed and twelve injured in the month preceding and five killed and ten injured in July, 1909. Five of the deaths were due to explosions, two to falling material and one each to electricity and to being run over. Of the injuries, eleven were due to explosions, three each to elevators and to falls, two to machinery and one each to live stock and to electricity.

Unskilled labour.—Five labourers were killed and twenty injured in July, 1910, compared with thirteen killed and twenty injured in June last, and nine killed and ten injured in July, 1909. Three of the fatalities were caused by falling material, and one each by being run over and one by the rupture of an artery while at work. Five each of the non-fatal accidents were caused by asphyxiation by gas and by falling material, three by being run over, two each by explosions of dynamite, by falls and one each by being caught between cars, by being burned and by an elevator.

TRADE DISPUTES DURING THE MONTH OF JULY, 1910.

THE principal trade disputes of the month of July were a strike of conductors and trainmen of the Grand Trunk Railway Company, which was severely felt by a large number of industries throughout the country, and a general strike of bricklayers and masons at Montreal, which impeded building operations during the greater part of the month. A strike of coal miners at Springhill, N.S., which began in August, 1909, was still in force, the mines being only in partial operation.

Number and magnitude. — The total number of trade disputes reported to have been in existence in Canada during July was twenty, one more than in the previous month, and four more than in July, 1909. About 212 firms and 10,272 employés were affected by these disputes, about 127 firms and 7,302 employés being affected by new disputes.

Loss of time in working days.—The loss of time to employés through trade disputes during July was approximately

100,260 working days, compared with a loss of about 75,700 days in June and 119,500 days in July, 1909.

Trades affected by new disputes.—The following table shows the trades affected by new disputes of the month, and the approximate number of employés involved in each group of trades.

Trades.	No. of disputes	No. of employés
Lumbering	1	.....

Unskilled labour	3	294
Total	11	7,302

Localities affected by new disputes.—The new disputes of the month occurred in the following Provinces of the Dominion:—

Province.	No. of disputes
Quebec	4
Ontario	2
Alberta	1
British Columbia	2
Quebec and Ontario	1
Manitoba, Saskatchewan and Alberta	1
Total	11

Causes of disputes.—The following were the causes of the new disputes of the month.

Cause.	No. of disputes
For increase in wages	7
For increase in wages and shorter hours	1
For increase in wages and other changes	1
For recognition of union and closed shop	1
Against employment of a particular person	1
Total	11

Methods of settlement.—Of the twenty disputes in existence during July, eight were terminated in the course of the month. Three were settled through negotiations between the parties concerned, three by the resumption of work on the part of the strikers, one by the places of the strikers being filled and in one the method of settlement was not reported.

Results of disputes.—Four of the disputes that were terminated ended in favour of the employers, two in favour of the employés, in one case a compromise was reached, and in one the result was not reported.

Disputes which Commenced Prior to the Beginning of the Month.

The trade disputes which began in previous months and which were not reported to have been settled before July 1, comprised strikes of coal miners at Springhill, N.S., builders' labourers at Toronto, Ont., stonemasons, bricklayers and iron moulders at Montreal, Que. cotton mill hands at Hamilton, Ont., carpet weavers at Guelph, Ont., brewery workers at Hamilton, Ont., and sheet metal workers at Vancouver, B.C.

Strike of Coal Miners at Springhill, N.S.

A strike of coal miners of the Cumberland Railway and Coal Company at Springhill, N.S., which began on August 10, 1909, still continued throughout July, with no prospects of a settlement, The Company, however, was gradually adding to its force of men, and the output of the mine was steadily increasing. At the end of the month it was reported that 450 men were at work, most of whom were coal cutters. The output of the mine for July, was estimated at 9,000 tons. Repairs were begun in July, which will enable the Company to employ more men in the pit. Early in the month a force of troops was sent to the town as a precautionary measure, but good order was maintained among the strikers during the month. This dispute arose from a refusal of the Company to recognize the United Mine Workers of America, or to grant an increase in wages and make certain changes in the conditions of employment.

Strike of Builders' Labourers at Toronto, Ont.

A general strike of builders' labourers at Toronto, Ont., which began on June 1, was declared off on July 26, nearly

all the strikers having secured work with employers who had signed an agreement giving them an increase in wages from 25 to 28 cents an hour, a nine-hour day, and payment of time and one-half for overtime. The few strikers who were still out were permitted to return to work for employers who had not signed the agreement. About 300 firms and 1,500 employés were reported to have been originally involved in the dispute, but many employers had signed the agreement and a large number of employés had returned to work before July 1.

Strike of Stonemasons and Bricklayers at Montreal, Que.

Early in June demand was made by the Stonemason's Union of Montreal for an increase in wages and recognition of the Union. The wages paid had been from 35 to 40 cents an hour, and the demand for was a general rate of 45 cents an hour. The Builders' Exchange not having acceded to these demands, thirty masons employed by Messrs. Byers & Anglin stopped work on June 6. On June 20, a strike of bricklayers employed by the firm of P. Lyall & Sons, Limited, took place, the cause alleged being dissatisfaction with the foreman. According to the employers about thirty men were involved in the dispute, but according to the Union there were 45 men directly and 175 men indirectly involved.

These two disputes became merged in a general strike which began on July 4, and affected about fifty firms directly. It was reported by the Builders' Exchange that from 600 to 700 bricklayers and 500 masons were out, but on July 12, half the men claimed to be back at work. It was stated by the Secretary of the Builders' Exchange that no official notification of the cause of the strike had been received by him, but in another report it was stated that the object of the strike was to obtain recognition of the union and "closed shops." While no formal settlement of this dispute took place. nearly all the strikers were reported to have returned to work on the terms demanded before the end of the month and industrial conditions ceased to be affected by the dispute.

Strike of Iron Moulders at Montreal, Que.

On June 30, a strike of twenty-five iron moulders of the Parker Foundry Company took place at Montreal, Que., and continued throughout July. It was alleged by the employers that the strike was called on account of their refusal to accede to demands made by a representative of the Moulders' Union that none but members of the Moulders' Union be employed, that their walking delegates be allowed to enter the shop, and that such matters as the hiring of new help and the amount of production per day be brought before a committee of three union men in the shop. The Company claimed that they were paying as high wages as any foundry in Montreal, if not higher, but that they had always operated an open shop. It was stated by the Moulders' Union that the cause of the dispute was the refusal of the Company to increase the minimum wage from $2.75 to $3 per day of ten hours, and to establish a 'closed shop.' During July the Company secured a number of new hands to replace the strikers, but at the close of the month it was still affected by the dispute.

Strike of Cotton Mill Hands at Hamilton, Ont.

No particulars were received with reference to a strike of cotton mill hands at Hamilton, Ont., which began on May 5, but conditions ceased to be affected by the dispute. The cause of the strike, which involved about 125 male and 150 female employés, was the refusal of the employers to grant a demand for an increase of ten per cent. in wages.

Strike of Carpet Weavers at Guelph, Ont.

A strike of brussels carpet weavers which took place at Guelph, Ont., on December 11, continued throughout July, no settlement being reached. The dispute arose from a demand for extra pay for overtime and general dissatisfaction with the conditions of employment. About twenty-eight men were directly involved in the dispute, and twelve indi-

rectly, but many of the strikers had sought work elsewhere, and some of their places had been filled.

Strike of Brewery Workers at Hamilton, Ont.

On June 30, a strike of brewery workers took place at Hamilton, Ont., on account of the refusal of the employers to sign a new agreement providing for an increase of from $1 to $2 per week in wages, with time and one-half for overtime and a reduction in hours to fifty-five per week in the summer and fifty in the winter. Under the old schedule the hours ranged from ten to fourteen per day, some employés being required to work seven days in the week. Two firms and about sixty-five men were affected by the dispute. The employers at first offered a compromise of an advance of 50 cents per week, with no overtime pay, but this was rejected. On July 2, the demands of the strikers were conceded and work was resumed.

New Disputes.

The new disputes of the month comprised strikes of conductors and trainmen of the Grand Trunk Railway Company, bricklayers and masons at Montreal, railway carmen of the Canadian Northern Railway, machinists and engineers at Vancouver and New Westminster, B.C., moulders at Montreal, Que., lumber mill hands at Megantic, Que., and unskilled labourers at Vancouver, B.C., Macleod, Alta., and North Toronto. Ont.

Strike of Employés of the Grand Trunk Railway Company.

On July 18, a strike was declared affecting conductors and trainmen of the Grand Trunk Railway Company and subsidiary lines. The cause of the dispute was the failure to reach an agreement with reference to wages and general conditions of employment. The matter had been referred to a Board under the Industrial Disputes Investigation Act, without, however, securing in this way an adjustment. It was reported that 2,500 men were involved in the dispute in Canada, and 1,500 in the United Sates. No settlement of the strike took place during the month, but efforts were made to reach an agreement through the friendly mediation of the Honourable the Minister of Labour, which were finally successful on August 2, when the strike was declared off.* The settlement was closely on the lines recommended by the Board.

Strike of Carmen and Steamfitters of the Canadian Northern Railway.

On July 7, a strike was declared by about 600 carmen and steamfitters of the Canadian Northern Railway Company from Port Arthur to Edmonton, on account of the refusal of the Company to grant a demand for an increase in wages. It was alleged by the men that they were working for the same wage as in 1906, and that living expenses had since then increased fifty per cent. The dispute was referred to a Board under the Industrial Disputes Investigation Act, which presented a unanimous report on June 24. The finding of the Board was not accepted by the men, who alleged that in many instances it would reduce their earning capacity by ten per cent., would increase the working hours of the relay men from ten per day with overtime for Sundays and holidays to eleven hours per day and straight time for Sundays and holidays. No settlement of the dispute was effected during the month but it was stated that a large number of the steamfitters who went on strike obtained employment elsewhere.

Strike of Machinists and Engineers in British Columbia.

On July 5, a strike of machinists and engineers took place on the Pacific Coast principally at Vancouver and New Westminster, B.C., on account of the refusal of the employers to grant a demand for a reduction in working hours from nine to eight per day, and an increase in wages from 40 to 45 cents an hour. The dispute affected about fifteen firms and 160 men, of whom 140 were machin-

*A further account of this dispute is given in a special article on another page of the present issue.

TABLE OF TRADE DISPUTES DURING THE MONTH OF JULY, 1920.

Occupation.	Locality.	Alleged Cause or Object.	No. of Firms or Establishments affected.		Approximate No. of Employés affected.				Date of commencement.	Date of termination.	Result.
					Directly.		Indirectly.				
			Directly.	Indirectly.	Males.	Females.	Males.	Females.			
DISPUTES WHICH COMMENCED PRIOR TO THE BEGINNING OF THE MONTH.											
Mining—											
Coal miners	Springhill, N.S.	For recognition of union, increase in wages and against conditions of employment	1		1,000				Aug 10 '9		No settlement reported, but places of many strikers were filled.
Building trades—											
Stone masons	Montreal, Que.	For increase in wages and recognition of union	1		30				June 6		No settlement reported at end of month. (See general strike on July 4.)
Bricklayers	Montreal, Que.	Against employment of a foreman	1		45		175		June 20		No settlement reported at end of month.
Builders' labourers	Toronto, Ont.	For increase in wages from 25 to 28 cents an hour, a 9-hour day, and time and one half for overtime	75		400				June 1	July 26	Strike declared off, nearly all strikers having secured work at increased rate.
Metal trades—											
Sheet Metal Workers	Vancouver, B.C.	Against declaration of employers for "open-shop"			20				April 8		No settlement reported at end of month.
Iron moulders	Montreal, Que.	For recognition of union and closed shop	1		25				June 30		No settlement reported, but places of some strikers were filled.

Textile trades—													
Carpet weavers	Guelph, Ont.	Demand of men for extra pay for overtime, and general dissatisfaction with conditions	1		28		12		Dec.	11		No settlement reported at end of month.
Cotton mill hands	Hamilton, Ont.	Demand for ten per cent. increase in wages	1		125	150			May	5		No settlement reported at end of month, but conditions ceased to affected.
Food and tobacco preparation—													
Brewery workers	Hamilton, Ont.	For increase in wages of $1.50 per week, extra pay for overtime and shorter hours	2		75				June	30	July 2	Demands of men granted in full.

DISPUTES WHICH BEGAN DURING THE MONTH.

Lumbering—												
Mill hands	Megantic, Que.	Increase of 20% in wages	1						July	9	July 26	Men returned to work at old rates.
Building trades—												
Masons and bricklayers	Montreal, Que.	For recognition of union, and closed shops	50	52	1,200	2,500			July	4		No settlement reported, but nearly all strikers returned to work on terms demanded, and conditions ceased to be affected.
Metal trades—												
Machinists and engineers	Vancouver and New Westminster, B.C.	For increase in wages from 40 to 45 cents per hour and diminution of hours from 9 to 8	15		160				July	5		No settlement reported at end of month, but two firms employing fifteen men granted requests.
Moulders	Montreal, Que.	For increase of wages from $2.75 to $3 per 10-hour day	1		23				July	23		No settlement reported at end of month.
Food and tobacco preparation												
Cigar makers	Montreal, Que.	Against employment of an alleged strike-breaker	1						July	22	July 25	Places of strikers were filled.
Railway service:—												
Conductors and trainmen	Grand Trunk Railway system east of Chicago	For standardization of wages and general conditions of employment	1		2,500				July	18		Strike settled August 3. See special article elsewhere in the present issue.

TABLE OF TRADE DISPUTES DURING THE MONTH OF JULY, 1910.

Occupation.	Locality.	Alleged Cause or Object.	No. of Firms or Establishments affected.		Approximate No. of Employés affected.				Date of commencement.		Date of termination.		Result.
					Directly.		Indirectly.						
			Directly.	Indirectly.	Males.	Females.	Males.	Females.					
Checkers and truckers	Brantford, Ont.	For increase of wages, checkers 16 to 18 cents per hour; truckers from 14½ to 16½ cents per hour	1		25				July	2	July	7	Checkers' wages increased from $42 to $45 per month. Truckers' wages increased ½ cent per hour.
Railway carmen and steamfitters	Canadian Northern Railway System from Winnipeg to Edmonton	For increase in wages	1		600				July	1			No settlement reported at end of month.
Unskilled labour— Labourers	Vancouver, B.C.	For increase of wages from $2.50 to $2.70 per day	2		250		24		July	18	July	25	Majority of strikers returned to work, others obtained work elsewhere.
Labourers	Macleod, Alta	Increase in wages from $2.50 to $2.75 per day	1		20				July	9	July	23	Work resumed by some strikers, places of others were filled.
Civic labourers	North Toronto	For increase in wages from 22 to 25 cents per hour	1						July	28			No settlement reported at end of month.

*Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where after the declaration of a strike, some of the original strikers have returned to work or had their places filled with new hands, or where establishments affected have found that for either of these reasons, or both, or for the other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table therefore, includes mention only of such disputes as during the month or at its termination affected, to an appreciable degree, the carrying on of the industrial or business operations of the firm or establishments concerned. Mention moreover, is not made of disputes involving less than six employés, or of less duration than twenty-four hours.

ists and twenty were engineers. No settlement of the dispute took place during the month, but two firms employing fifteen men granted the demands.

Strike of Iron Moulders at Montreal, Que.

On July 23, a strike of twenty-five iron moulders of the Caledonia Iron Works took place at Montreal, Que., on account of the refusal of the employers to grant a demand for an increase in the minimum wages from $2.75 to $3 per day of ten hours and a closed shop. No settlement of the dispute took place during the month, but it was reported that the firm had seven men employed, and that its work was being done in other foundries.

Strike of Lumber Mill Hands at Megantic, Que.

A strike of lumber mill hands was reported in the press to have taken place at Megantic, Que., on July 9, on account of the refusal of the Lake Megantic Pulp and Lumber Company to grant a demand for an increase of twenty per cent. in wages. It was further reported that the men returned to work on July 26, at the old rate. No particulars as to the number of men involved were received.

Strike of Cigar Makers at Montreal, Que.

On July 22, a strike of Cuban cigar makers of the firm of Messrs. Davis & Sons, took place at Montreal, Que., on account of the refusal of the employers to dismiss a workman who was alleged by the others to be a strike-breaker. It was claimed by the firm that only a small number of men were affected by the dispute, and that two days later their places were filled.

Strike of Checkers at Brantford, Ont.

On July 2, a strike of twenty-five checkers and truckers of the Grand Trunk Railway Company took place at Brantford, Ont., on account of the refusal of the Company to grant an increase in wages, the checkers demanding an advance from 16 to 18 cents per hour, and the truckers from 14½ cents to 16½ cents per hour. Work was resumed on July 7, a settlement being reached by which the wages of the checkers were increased from $42 to $45 per month, and the wages of the truckers from 14½ to 15 cents per hour.

Strike of Labourers at Vancouver, B.C.

On July 18, about 250 labourers at Vancouver, B.C., stopped work on account of the refusal of two firms to grant their demand for an increase in wages from $2.50 to $2.70 per day. By July 25, the strike was over, most of the strikers having returned to work at the old rate, while the others had obtained employment elsewhere.

Strike of Labourers at Macleod, Alta.

On July 9, a strike of twenty labourers occurred at Macleod, Alta., on account of the refusal of the employers to grant a demand for an increase in wages from $2.50 to $2.75 per day. Conditions ceased to be affected on July 23, work having been resumed by some of the strikers, and the places of others being filled.

Strike of Civic Labourers at North Toronto, Ont.

On July 28, a strike of civic labourers took place at North Toronto, Ont., on account of the refusal of the corporation to grant a demand for an increase in wages from 22 to 25 cents an hour. No settlement of the dispute was reported at the end of the month.

The table which is published herewith is a compilation of the trade disputes of the Dominion of Canada, which began or were in continuance during the month of July, and which have been reported to the Department.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopses of recent cases affecting labour are based upon the latest reports of legal proceedings and other legal records of the different Provinces of Canada.

NOVA SCOTIA CASES.

Fisheries Act—Alleged Violation—Damages for Confiscation of Net.

IN an action brought to recover damages from the defendant, a fisheries' officer of the Dominion Government, acting under the provisions of Chapter forty-five, of the Revised Statutes of Canada, 1906, the following were the facts: The plaintiff set his net in the waters off the foreshore of Nova Scotia, but attached thereto by an anchor fastened in the land above high water mark; the land was the plaintiff's land; the net was set in a circular or heart shape with a leader or net running to the shore. The net was set off Fox Point in St. Margaret's Bay, off the shore of Lunenburg County. The defendant, believing the net to be a trap-net, and the plaintiff having no license as required by section seven, of Chapter forty-five, of the Revised Statutes of Canada, 1906, went, in company with the captain and two boat's crews of the Dominion Fisheries' Cruiser *Osprey*, and formally seized the net of the plaintiff, the buoys, headropes, lines and leaders attached, and confiscated them for an alleged violation of the law. The action was brought to test the right of the Dominion Government to give exclusive rights of fishing in waters within the 3-mile limit of the Province of Nova Scotia.

The action was tried by Judge Forbes, a judge of the County Court. In his judgement he said, in substance, that the law had been settled by certain decisions, which he named, that the Dominion Government has no exclusive jurisdiction or proprietary rights in relation to fisheries where these rights were vested in any Province of the Dominion, and also that section ninety-one of the British North America Act did not convey to the Dominion any proprietary rights in the fisheries of the Province. Section four, of Chapter forty-five is a new section intended to comply with the judicial decisions referred to, which made sub-section seven of section forty-seven of Chapter forty-five beyond the power of the Dominion Parliament to enact; "but, in my opinion section four does not add anything to or strengthen the legislative powers of the Dominion, and does not make that good which was before declared bad. The question is now one of fact. Does the license, which the Government required of the plaintiff, give him exclusive rights in Provincial waters?" The defendant himself was called as a witness. The judge held it was evident the defendant improperly exercised exclusive fishing rights on Provincial property, claiming to do so under sub-section seven, of section forty-seven, Chapter forty-five, Revised Statutes; that such section was not a mere "regulation," and so within the powers of the Dominion Parliament, and, therefore, he found that the plaintiff was damaged by the defendant taking up his net and carrying it away, and that defendant had no justification for doing so, as sub-section seven of section forty-seven of Chapter forty-five is still beyond the powers of the Dominion Parliament. It was not necessary to decide whether plaintiff's net was a trap-net, because he held that defendant took up plaintiff's net because he had not a license as required by the Act, and not because it was a trap-net only. Judgement was given for plaintiff for $25 damages and costs.

(Chandler v. Webber, 8 Eastern L.R., 241.)

A Picketing Case.

The Cumberland Railway and Coal Company, a short time ago, obtained an injunction against a number of strikers at Springhill, forbidding them to picket workmen employed by the Company. A motion was made shortly afterwards by the Company before Mr. Justice Drysdale to commit one of the men, Jules

Lavergne, for contempt of court, alleging that he had violated the restraining order. The application was refused on an affidavit by Lavergne that he had not committed the violations alleged.

QUEBEC CASES.

Damages to Workman for Electric Shock.

In the jury trial, at Montreal, in the case of Lucien Roy vs. the Shawinigan Water and Power Company, and the Laval Electric Company, the plaintiff sued both companies jointly to recover $10,000 damages for an accident in which his left arm and leg were burned and withered by an electric shock while he was working in a power house belonging to the Shawinigan Water and Power Company, but used to transform the current of the Laval Electric Company. The jury found that the negligence of both Companies in not having the proper appliances in view of the dangerous work that was to be done and the insufficient precautions on the part of the management were the causes of the accident, and they awarded $4,000 damages.

Important Water Rights Case.

An important judgement affecting water powers in the Province of Quebec, was given a short time ago by Mr. Justice L. N. Champagne in Superior Court at Hull. By the judgement the property owners along the Gatineau river are the rightful and legal proprietors of the bed of the river. The importance of it is due to the fact that there are very valuable water powers on the Gatineau, and the judgement affect not only the rights of property owners on that river but also of every river of a similar character in the Province of Quebec. The direct issue was a case by David Marshall and others against Hanson Brothers, brokers of Montreal, with the Attorney-General of Quebec intervening. By the judgement the Province loses principally for it precludes it from selling innumerable water powers along such rivers to companies and others endeavouring to secure possession of these valuable assets, either for immediate development or for speculative purposes.

Damages in Quebec Bridge Case.

A verdict in favour of granting the plaintiff $20,000 damages on account of the injuries which he received when the Quebec bridge collapsed, was brought in by a jury in the city of Quebec, in the case of Daniel Haley against the Phoenix Bridge Company. The case engaged the attention of the Superior Court for several days. The plaintiff, who was one of the victims who went down in the fatal collapse of the bridge in 1907, sued for $25,000. The following verdict was rendered by the jury:—

"The fall of the Quebec bridge was due to a fault on the part of the defence. The fault consisted in an error of the plans.

"The defendants were notified that defects existed in certain chords of the bridge.

"The present condition of the plaintiff is due to the fall of the Quebec bridge.

"The plaintiff has suffered damages to the extent of $20,000."

The verdict was unanimous.

A Case Affecting Sellers and Buyers of Milk.

Charles Quenneville, former milkman, sued in the Superior Court at Montreal, to recover damages from the *Star* Publishing Company, on the ground that statements and illustrations, published in the *Star*, regarding his cow barns on Mullin street, Point St. Charles, were libellous and untrue. In reply, the *Star* pleaded that the statements were true in substance and in fact, and that their publication was justified in the public interest.

After reviewing the various phases of the action, Mr. Justice Guerin said: "The evidence is hopelessly contradictory. The plaintiff has examined a number of his neighbours and friends who testified that his cattle, his stables, his yard, and all his surroundings were scrupulously clean. They are no doubt

honestly convinced of the truth of their statements, and from their standpoint of what they would constitute cleanliness in a milkman's stable and dairy, they have given expression to what they really believed to be true. The weight of evidence, however, is not to be judged per capita of the witnesses. The education, experience, personality and professional culture must be weighed with the number. The testimony of such citizens as Milk Inspector Emard, Chief Food Inspector Dr. McCarry Dr. Paterson, Dr. Latherge, Dr. Dube and Dr. Cormler, following one after the other, makes a very strong presentment against the methods followed by plaintiff, and proves substantially, and in the main, the charges laid at plaintiff's door by defendant's newspaper."

Quenneville had suffered damages by the publication, His Lordship added, "but besides the private interest which Quenneville invokes and which he asks this Court to vindicate by a money condemnation against the defendant, there is another interest, the public interest, which is invoked by the defendant. This public interest is superior to the interest of the individual, and if it be invoked under the restrictions which the law imposes, it justifies the publication and sets at nought the plaintiff's action for damages. To succeed, defendant must prove that the defamatory articles and illustrations are true and that they were published not with malice (that is, with the intention of injuring the individual) but in the public interest.

"The public of Montreal, and of the whole Province are surely interested in securing a pure supply of milk for all the citizens. It is a commodity in daily use by poor and rich, young and old. It has become a necessity for all manner of persons; it is the sole food which will sustain the lives of individuals deprived of their mother's breast. It is of such a delicate nature that it readily absorbs the bacilli of tuberculosis, typhoid and other dangerous infections. If thus tainted instead of being life-sustaining, it carries lurking within it diseases and often-times death to those who assimilate it in their systems by drinking it.

"To obtain pure milk, the cows must be kept clean, the cow barns must be kept clean, and the laws of hygiene must be respected and obeyed. It is only sophistry to argue that a great number of milkmen in Montreal and in other parts of the Province are careless of hygienic methods in handling their milk supply. If they do not obey the laws of hygiene, they should do so.

"In order to obtain a public reform, it is often necessary to point out, to the consideration of the public, concrete cases which demonstrate strikingly the necessity of reform. It is painful to see an individual suffer, but abuses must be eradicated, and the public health promoted; and the public press is justified by the law when it points out cases where individuals, by their methods, are a menace to the public interest.

"In the present case, defendant has proved that the articles and the illustrations complained of, are true in substance and in fact. The evidence disclosed that the publication was not made in malice against the defendant, but was made in public interest. By law, therefore, the publication was justified, and it is not a libel. The action is dismissed with costs."

Workman Fails to Get Damages.

The plaintiff, Dennis J. McLaughlin, while in the employ of the Canadian Pacific Railway Company, as apprentice machinist in the Angus shops, had one of his hands caught in a planer and the fingers badly injured. He brought suit against the Company for $5,000, alleging negligence and carelessness. In the Superior Court, at Montreal, the defendant pleaded that the plaintiff knew and had been told that it was dangerous to gauge the work while the machine was in motion. The jury, after three hours' deliberation, finally brought in their verdict to the effect that the accident was due solely to the plaintiff's fault.

In his remarks after the rendering of the verdict, Mr. Justice Archibald sug-

gested that something should be done by the Company for the boy. It was not in the power of the Company's attorneys, however, to say what it was intended to be done, but they knew that prior to the action the boy was offered work, but he preferred to sue. Mr. Justice Archibald, although not doubting the rightness of the verdict, said he was sorry the boy did not get any compensation, as he had to suffer very much from the accident. He was of opinion, however, that such occasions would become less frequent under the new Compensation Act which provides for the victim of an accident even if the victim is at fault.

Street Railway Case—Responsibilities of Motormen.

It has been decided by a Montreal jury that a motorman on a street car must exercise exact supervision over the course of his car, and that it is not sufficient for him to ring his bell in case of apparent danger, but that he must be ready at any time, to stop his car. That is, the onus for getting out of the way of an approaching car is not necessarily with the pedestrian, but that the man in charge of the mechanism on a car must be ready at all times to stop before damage is caused. In the argument it was shown that this was particularly necessary, since it was always possible that children, lunatics or drunkards might get in the way of street cars, and in such event it was the duty of the motorman to avert an accident. Incidentally it cost the Montreal Street Railway Company a verdict of $5,000 to have this point as to the responsibility of a motorman and of the Company which employs him, decided.

The action in which this point came up was a claim of Mr. Louis Girard, an engineer in the employ of the Public Works Department of the Dominion Government, at Montreal, against the Montreal Street Railway for damages for injuries caused to his infant son. In the evidence it was shown that on a certain afternoon some visitors called at the house of Mr. Girard, on St. Denis street. The door of the house was left open, and Mr. Girard's little son, two years old, ran out. He was noticed by a passer-by near the car tracks, and the alarm was given, when the little boy's mother rushed out. A car was then approaching about 150 feet away, and, according to the evidence, the signal was given for the car to stop. The brakes, however, were apparently not applied, and although the motorman rang his alarm bell, the car continued, and ran down the infant, who was crushed under the fender, the front wheels passing over him and completely severing one of his legs, which was picked up later, quite separate from his body, although the child has since recovered.

The action for damages was brought on the ground that the motorman was the natural pilot, or lookout for a car, since the street in front of him must necessarily be within his view, and he should be prepared to stop in case of emergency. In such case it was contended that it was not sufficient to sound his gong, as it was admitted he did, but that he must be ready to stop his car at any time to prevent injury to those who were not responsible for their actions, such as infants, lunatics or drunkards, just as an engineer on a railway train.

The case was tried by Mr. Justice Archibald and a mixed jury, when some twenty-two witnesses were examined as to the facts, while a lot of expert evidence as to the time in which a car could be stopped was heard, considerable difference of opinion as to this developing. The motorman in his evidence, however, stated that he had only seen the child when it was 15 feet away from the approaching car, when he immediately applied the brakes, bringing the car to a standstill so speedily that only the front wheels passed over the infant.

After hearing the evidence and arguments of counsel, the jury found that the total damages suffered by Mr. Girard amounted to $7,500. They, however, found that the Company was only responsible for $5,000 damages, holding that the parents of the child were responsibe to a certain extent, in negligently allowing the child to stray on the

street. The verdict against the Company was given on the ground that the motorman was negligent in that he might have seen the child in time to stop the car had he been attending to his duty properly.

ONTARIO CASES.

Damages for Loss of Finger.

A verdict for $100 damages was recently awarded Francesca Danno, an Italian labourer, against the Orpen Construction Company, by a jury in the County Court, of the County of York, at Toronto. Danno sued for $300 damages for the loss of a finger, which he sustained while working on sewers. He was operating a pulley and bucket, when, without signal, the latter began to rise, his finger being caught in the pulley, and so badly damaged as to necessitate amputation.

Changes in Dominion Railway Rules.

Four of the nine rules governing Dominion railways were recently discussed and some modifications made by the Railway Commission. Superintendent Murphy, of the Canadian Pacific Railway Company, and Superintendent Brownlee, of the Grand Trunk Pacific, appeared for the railways, while the views of the trainmen were presented by their president, Mr. J. H. Murdoch, and by Mr. S. Berry, of the railway conductors.

There was some dispute as to what was meant by the term "double-header." The trainmen complained that some trains were run with one engine in front and another engine five cars back. This practice, they claimed, was dangerous, and the railway company finally promised to abandon the practice as soon as new bridges could be installed at certain points on the line.

Rule No. 1, respecting the equipment of trains with air brakes, was made more definite. Trains may not start now unless seventy-five per cent. of the cars are so equipped, and if there is a breakdown at any point, the train must not proceed beyond the next station.

The rule, as promulgated, with respect to yard engines, permitted an engine to be used for twenty-four hours or in an emergency, even though it were not equipped with certain safety appliances. This rule was rescinded.

The Commission refused to require an additional brakeman where a train contained more than sixty cars and also refused to require a minimum crew of five men upon switching engines. The rule permitting engines "running light" to be without a conductor was limited to 25 miles. This is designed to meet the case of pusher engines required at Scarboro and other points. Some of the demands made by the trainmen were regarded by Judge Mabee as extravagant.

MANITOBA CASES.

Workmen's Compensation Act.—Death of Employé through negligence of Fellow-employé.

In an action brought by the widow of W., on behalf of herself and her two children, to recover damages against the defendant company for the death of her husband, it appeared that W. was killed, while in the service of the defendants, by an explosion of dynamite. The uncontradicted evidence showed that W. knew nothing about the handling of dynamite, and the jury found that A., who was with W., and who was employed by the defendant's roadmaster to do the dynamiting with W., was not a proper person to be so employed. They also found that the roadmaster was aware that he was not, and that the injury causing W.'s death was the result of the roadmaster's negligence in not employing competent men for the work. A. learned from the roadmaster, or from another man working near the dynamiting, that dynamite could be thawed by putting it in a closed pail, and putting the pail in heated water. A., in fact, did this, but he did not leave it long enough in the heated water to thaw, and he and W. heated it near a stove for an hour and a half; some of the evidence showed that they heated it over the stove. It did

not appear that the roadmaster or any one else told A. or W. the length of time that it would take dynamite to thaw by the method first employed, or that they should pursue that method until it thawed, or that they were to take no other means of thawing it. It was held, with some hesitation, by Mr. Justice Richards, who tried the action with a jury and on the findings of the jury, that, in the absence of more specific instructions to A. and W., the finding of negligence by the jury was not such as reasonable men could not arrive at. It was also held that the roadmaster was a fellow-servant of W., and, therefore, the plaintiff could not recover at common law; but the negligence of the roadmaster was the negligence of a person in the service of the employer who had superintendence entrusted to him, whilst in the exercise of such superintendence, within the meaning of section three of the Workmen's Compensation for Injuries' Act; and the plaintiff was entitled to recover the damages assessed by the jury as limited by that Act, namely, $1,500.

(White v. Canadian Northern Railway Company, 14 Western, L. R., 49.)

ALBERTA CASES.

Actions by Employés of Coal Companies.

Three suits for damages against coal companies, by employés or relatives of former employés, were heard before Judge Carpenter, at a recent sitting of the District Court, at Coleman.

The first case was Van Duren vs. International Coal & Coke Company, Limited, for $1,800. The plaintiffs were the wife and five children of Felix Van Duren, who was killed in the respondent's mine, February, by being crushed between cars. Eighteen hundred dollars was paid into court, and the Judge instructed one-half of it to be paid to the widow and the other half invested by the clerk of the court for the children, with leave to apply to the court for further directions in regard to the children's share.

The next case was Carota vs. Hillcrest Coal & Coke Company, the plaintiff, who resides in Italy, being the father of a man fatally injured in an accident at the mine, and sued for $1,800. The court ordered the evidence of applicant in Italy to be taken by commission.

The third was Michael vs. Hillcrest Coal & Coke Company, Plaintiff had his fingers crushed while working in the mine. He continued to work for some time when blood poisoning set in and he was, incapacitated from work from November 29, last, until December 29. The defendants set up that the blood poisoning was not contracted in the course of their employment. The court ordered written arguments to be filed within one week by the solicitors for the respective parties.

BRITISH COLUMBIA CASES.

Damages for Death of Electric Railway Company Employé.

A verdict for heavy damages against the British Columbia Electric Railway Company has been returned by a Supreme Court jury at Vancouver, when Mrs. Thomas Farmer, the widow of a Company employé, killed in the Lakeview accident, was awarded $9,000. The Company set up the defence that Mr. Farmer had used a pass and that, therefore, his widow was not entitled to recover damages. Counsel for the plaintiff produced evidence to show that although Mr. Farmer was travelling on a pass, he had not signed his name to the contract printed on the reverse thereof, and was, therefore, not a party to the agreement. Mrs. Farmer has no children.

Another Similar Case.

A verdict for $12,000 was also rendered by a special jury in favour of the widow and two children of Walter S. Lyon, who was killed in the same accident. The jury awarded $6,000 to Mrs. Lyon and $3,000 to each of the children.

Counsel for the defendant Company, argued that the Company was freed from

its liability in this case, as the deceased had travelled on a pass on the back of which were printed conditions that absolved the Company from liability.

Mrs. Lyon, in her evidence, stated that her husband had his fare with him when he left the house that morning. The pass he carried only entitled him to ride within the city of New Westminster, and, moreover, it had never been signed by her husband.

Mr. Justice Murphy pointed out that since the pass was only for New Westminster it could not be held to be operative on the interurban line. If the deceased had carried such a pass, while it might not entirely free the Company from all liability, it would hardly be just under such circumstances to render a verdict against them. In this instance, there was no evidence that the deceased had travelled free, and they must take all the circumstances into consideration.

Enforcements of the New Immigration Act.

Persons once rejected by an immigration officer and who later enter Canada without official permission, are subject to arrest and on conviction to two years' imprisonment, and to be deported at the expiration of that term. For the alleged violation of this clause in the new Canadian Immigration Act, which came into force May 4, Minnie Haskins and Rose Parks, *alias* Mrs. Ewing, of Seattle, were placed under arrest, at Vancouver. The women attempted to board the vessel at Seattle for Vancouver, but were rejected by the Canadian immigration inspector there. The next day they succeeded in crossing the border by some other route and arriving in Vancouver took the steamer for Prince Rupert. But a telegram to Dr. Reddie, the federal officer at that point, prevented them from landing, their arrest following on their return here. These were the first arrests under the new Act.

The present Act is a great advance on the previous legislation, its chief feature being the two years' penalty and deportation in all cases in which undesirables secretly enter Canadian territory after having been refused admission. The definition of "undesirables" is extremely broad, including even persons who come in the assisted immigrant class, while any Canadian port or ports can be completely closed to any race of people deemed unsuitable to the climate or requirements of the Dominion, or closed to any special class or character of immigrants whom the authorities may think fit to exclude.

THE

LABOUR GAZETTE

SEPTEMBER, 1910.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF AUGUST, 1910.

I.—GENERAL SUMMARY.

LABOUR generally had a very active month during August. Harvesting operations were in full progress and gave employment to many thousands of men. The latest reports received from the North-west Provinces are that yields will be larger than estimated at the close of July. Railway construction progressed rapidly, the demand for labour exceeding the supply in several sections of Western Canada. All branches of transportation had an active month, traffic, freight and passenger, both by rail and water, being heavy. In the fishing industry, the leading incident of the month was the announcement that the salmon catch of British Columbia will exceed earlier estimates and compare favourably with corresponding seasons in previous years. The lumber trade was somewhat quiet, but production was well maintained; recruiting for the winter camps had already begun in the Eastern Provinces, and the outlook is for an active autumn and winter season. Large outputs were reported from the collieries, and reports from the metalliferrous camps were for the most part favourable. Manufacturing establishments in nearly all branches and localities were working to full capacity and with full staffs. Building continued very active, operations being on a considerably larger scale than at the same time last year, a statement which applies also to civic improvement work and other outside employments. The general tone of trade and industry was steady, and although less buoyant than in May or June, owing to the falling off in the western crop estimates, promises to remain favourable for the rest of the season of activity.

Changes in Wages and Hours of Labour.

The following is a statement by industries and groups of trades of the more important changes in wages and hours of labour, information concerning which was received at the Department of Labour during August, 1910.

Lumbering.—The rates of wages offered for skilled workmen for the lumber camps in the Ottawa valley were $4 per month higher than last year.[1]

Building trades.—Plasterers at Ottawa, Ont., had their wages increased from 42 to 42½ cents per hour.

Street railway employés.—Street railway employés at Toronto, Ont., were increased as follows:—

Class.	No.	Old Rate Per hour.	New Rate per hour.
		cents.	cents.
First year men.	200	20	21
Second year men.	300	22	23
Third year men and upw.	800	23½	25

The increase was granted after a reference to a Board under the Industrial Disputes Investigation Act.[2]

[1]See report of Ottawa correspondent.
[2]The full text of the report of the Board is published elsewhere in the present issue.

The LABOUR GAZETTE, in its accounts of proceedings, abstracts of reports, legal decisions, quotations or other records of matters of concern to labour, is not to be regarded as necessarily endorsing any of the views or opinions which may be expressed therein.—Ed.

Interruptions to Industries.

Among industrial establishments, &c., destroyed by fire or through other causes, during August, 1910, as reported in the press of the Dominion, the following may be mentioned:—

Nova Scotia.—Machine shop at Londonderry, loss, $15 000.

Barn at Darling Lake.

New Brunswick.—Saw mill at Blackville; store at Leger Corners, loss, $8 000; saw-mill at Hunters' Ferry.

Quebec.—Saw-mill at Aylmer, loss, $10,000; tenement house at Maisonneuve, loss, $2,500; flour mill at Masson, loss, $40,000. At Montreal, grain warehouse, loss $12,000; ice house, loss, $5,000; tenement house, loss, $10,000. Shed and residences at Quebec, loss, $10,000; tenement house at Quebec, loss, $1,500, outbuildings at St. Alexis des Monts, loss, $1,500; church at Ste. Croix, loss, $25,000; outbuildings at St. Hyacinthe, loss, $2,500; church and presbytery at St. Jacques l'Achigan.

Barns at Milan and Stanstead.

Ontario.—Outbuildings and residence at Brantford loss, $1,200; grand stand, Mohawk Park at Brantford, loss, $4,00 ; business block at Brockville, loss, $100,00; saw-mill at Clavering; nineteen stores and houses at Cochrane, loss, $150,000; saw-mill and lumber at Fort Frances, loss, $60,000; engine works (partial) at Huntsville, loss, $1,500; business section of Lindsay; out buildings and two residences at March township, loss, $5,000; town hall at Morrisburg, loss $2,000; dwelling at Niagara Falls, loss, $2,000; incline railway and flour mills at Niagara Falls, loss, $70,000; livery stable and five dwellings at Osgoode, loss, $25,000; tenement house at Ottawa oss, $4,000; stables at Peterborough, loss, $1,000; outbuildings at Port Elgin, loss, $2,000; business section of village of Fournier; saw-mill and lumber at Rainy River, oss, $100,000; boat house and three motor boats at St. Catharines, loss, $1,800; outbuildings and contents at Sandwich East, loss, $3,000; planing mill at St. Thomas. At Toronto, laundry, loss, $1,000; business block (partial), loss, $10,000; wall paper warehouse, loss, $1,800. Shed and contents at Trenton, loss, $1,000; machine shop at Welland; business section of town of Wellandport, loss, $30,000. Barns at Asphodel, Berlin, Hullett, Goderich and Leamington.

Saskatchewan.—Restaurant and store at Kimberley; flour mill at Qu'Appelle, loss, $20,000; printing office at Qu'Appelle, loss, $15,000.

Alberta.—Livery barn and ten horses at Viking, loss, $7,000.

British Columbia.—One million feet of lumber at Fernie; mining plant at Nelson; business section of Phoenix; oil refinery at Port Moody, loss, $50,000. On August 6 the Canadian Pacific Railway Steamer *Princess May* was wrecked off the coast of British Columbia.

Forest fires in the first week of the month caused heavy damages in certain portions of British Columbia.

Conditions in the Industries and Trades.

Conditions of employment during August, in the several industries and groups of trades, throughout Canada, as indicated by reports of correspondents of the *Labour Gazette*, and by information received at the Department of Labour from other sources, may be briefly summarized as follows:—

Agriculture.

Harvesting was in full progress throughout the Dominion, and the demand for labour was correspondingly active. Threshing had been begun in many localities. The supply of labour was generally sufficient, though in some sections a considerable scarcity was complained of. In the North-west Provinces there were fewer complaints in connection with the distribution of harvesters than in 1909.

Interest centered throughout the month on the reports received from the more important agricultural districts with respect to probable yields. A brief summary of the more important estimates received during the month is as follows:—

With regard to the North-west Provinces, crop conditions were reported very variable. It was stated at the close of the month that the yields would be larger than the July estimates. Twelve crop inspectors, sent out by the *Manitoba Free Press*, place the total yield of wheat in the three provinces, at 101,236,413 bushels; of oats, 108,301,090 bushels; of barley, 7,130,770 bushels; and of flax, 7,729,150 bushels. The Saskatchewan Department of Agriculture issued on August 23, the following estimate of the grain yield of the Province:—

Wheat	68,416,000	bushels.
Oats	83,500,000	"
Barley	6,199,200	"
Flax	3,797,590	"
Total Crop	161,912,790	"

Returns from correspondents of the Ontario Departmnt of Agriculture, under date of August 15, indicated that fall wheat was a good crop; winter wheat, an average crop; barley, variable; oats, damaged by rain; peas, light; and hay and clover, best crop of the season. Corn and roots benefitted by recent rains. Pastures and live stock were in excellent condition, but the fruit yield will be poor, especially in the case of apples.

In Quebec and the Maritime Provinces crops were on the whole, a good average. Hay has been an exceptionally heavy crop, though weather conditions were unfavourable for curing, a large quantity was saved in good condition. Pastures have

been in good condition and the flow of milk large.

The crop report issued by the Department of Agriculture of Nova Scotia gives the following estimates:—

Hay—Estimated Yield.

Compared with 1909	123	112	120
Compared with average crop	121	110	118

Oats and Other Grains.

Compared with 1909	107%
Compared with average	105%

Potatoes.

Compared with 1909	95%
Compared with average	100%

Turnips and Other Roots.

Compared with 1909	104%
Compared with average	110%

Indian Corn and Other Forage Crops.

There is about the same acreage. Yield will be about 10 per cent. higher than last year.

Pastures are excellent. There is about 5 per cent. increase in dairy cattle. Beef cattle reduced 1 per cent. Sheep have decreased this year about 3 per cent.

Dairy Produce.

Everything points to a record year for butter and cheese. Pirvate dairying is growing, and figures at present to hand in regard to factory dairying are most encouraging. The Scotsburn Creamery is producing nearly three times as much butter as in 1909, which was double that of 1908. One new factory has been established near Berwick, King's County, and several localities are considering the erecting of factories.

Fruit.

We have finished the optimistic part of our report, and now have to consider the most signal failure of the fruit crop since it became commercially established in Nova Scotia. The most promising variety is the Baldwin, followed by Spys, Kings and Ben Davis. There are odd sections where Gravensteins and other varieties are quite good, but for the most part, they are almost a complete failure. The quality too, promises to be poor.

The above statistics have been based upon the estimate of 150 correspondents, representing every county n the province.

Fishing.

The usual period of inactivity prevailed in the Maritime Provinces, following the close of the lobster season and prior to the beginning of the herring and haddock season. Weather conditions were favourable for coastwise operations. The second trip of the Lunenburg banking fleet has been successful, and many of the vessels left on their third voyage.

The sock-eye season closed in British Columbia on August 24. The total pack was in the neighbourhood of 549,000 cases, which is larger than was expected at the beginning of the season.[2] Salmon prices were firm to upward.

Lumbering.

Conditions in the lumber trade showed little change from July, in Ontario and the Eastern Provinces. Though the general tone of trade has been quiet, prices have been firm, and the volume of shipments steady. In hardwoods the demand was active and trade brisk. The mills were generally very busy, and the supply of logs adequate, though recent reports of rafting operations in the St. John valley indicate that a large number of logs will be hung up until next year. A number of camps have already been opened, and the outlook is for an active winter season. In British Columbia, logging and sawing operations were active and good market conditions prevailed, with prices generally firm.

The wood pulp market was very active, with prices rising.

Mining.

The month was very active in nearly all branches of the industry. The Nova Scotia collieries worked steadily, and large outputs were obtained, though the holiday season somewhat interfered with production. Gold mining was also very active in Nova Scotia. In Quebec, the asbestos and copper mines were very busy, additional employés were required in certain of the copper properties in the Eastern Townships. The Cobalt camp was producing steadily, and was favourably affected by an advance in the price of silver and a reduction in working expenses brought about by cheaper power. The value of the output of the metalliferous mines of Ontario during the first half of the fiscal year, is estimated at $12,620,-781; this includes an increase of nearly one million dollars in the value of silver produced, as compared with that of the corresponding period of last year. The

[2]See report of Vancouver correspondent for details with reference to the catch.

TABLE SHOWING STATE OF EMPLOYMENT

This table is based largely on the reports of the correspondents of the *Labour Gazette* as published in the present in the several trades and industries throughout the Dominion. The table has reference only to the amount of employ- separate headings in the *Labour Gazette*. In tabulating the informations in question, the terms employed are divided as follows: (1) active, very active, (2) quiet and very quiet.

City and district of correspondent.	Agri-cultural opera-tions.	Fishing.	Lumbering (including saw-milling.)	Mining.	Manufac-turing.	Railway construc-tion.	Building trades.

collieries of Alberta and the Crow's Nest Pass were producing steadily, most of the mines working full time, and several new mines being opened. On Vancouver Island the collieries have been producing steadily. Conditions in the metalliferous camps of the interior of British Columbia have been adversely affected by the shutting down of the Le Roi mine, and a curtailment of operations by the Canadian Consolidated Mining & Smelting Company.

The Canadian Peat Society was organized at Ottawa in the closing days of July, during a convention of the American Peat Society, held in that city.

Manufacturing.

The output of manufactured goods concontinued steady in nearly all branches of the industry, little change being noted from conditions during the past three months. Skilled female help was still in demand in clothing and confectionery establishments, the latter of which were very active during August. Flour mills were also very busy. The demand for heavy goods was well maintained, and establishments engaged in these manufactures were working full time and with full staffs. The outlook is for a good autumn trade.

Railway Construction.

The various large contracts under way were proceeded with during August as rapidly as the supply of labour and material permitted. In the Western Provinces a scarcity of labour was reported at several points, and some equipment was idle in consequence. Generally speaking, however, the month was a favourable one, and good progress was announced.

With respect to the National Transcontinental Railway, it was stated that the road from Levis, Que., to Moncton, N.B., would be open for traffic in the spring of 1911, only about forty miles of track having to be laid to complete the line between these points. The time for receiving tenders for the super-structure of the Quebec bridge was extended to October 1. The bridge, independent of the approaches, will be carried on two main piers 1,758 feet apart. The cantilever will extend 586 feet on either side of each main pier, the central panel being 586 feet long. From Quebec westerly, the line is now complete for 195 miles. The section from Quebec to Lake Superior Junction will be handed over to the Grand Trunk Pacific Railway Company for operation at an early date. From the Prince Rupert end, 100 miles are ready, and grading on an additional 140 miles nearly completed. Two exploration parties are engaged in connecton with the proposed branch of the main line to Vancouver.

With reference to building operations on the Canadian Pacific Railway during the present year, a large amount of work is being done on the hotels of the Company in Western Canada, large additions being made at Victoria, Vancouver, Lake House, Banff and Sicamous Junction. A new hotel of fifty rooms is under construction at Proctor.

The contract was awarded for the construction of the super-structure of the bridge to be erected over the Saskatchewan river at Le Pas, on the proposed Hudson Bay Railway. Tenders were also called for the rebuilding of the Intercolonial Railway shops at Campbellton, N.B.

General Transport.

The various classes engaged by the transportation companies had a very active month, traffic, both freight and passenger, being heavy. This was reflected in largely increased railway and street railway earnings, and in the increased returns received from canals and seaports. The outlook is for continued activity until the close of the navigation season. An increase of 1 per cent. in the dividend of the Canadian Pacific Railway Company was announced during August.

Returns of the census of Canadian Pacific Railway Company employés resident in Montreal, places the total number at 11,092, representing a total population of probably 40,000 people. It is estimated that the annual distribution of wages by these employés is in the neighbourhood of $12,000,000.

The Trades.

Building.—Building operations continued very active, and a good month was reported by employés in nearly every centre. The latest returns of permits issued in the more important cities show a considerable increase compared with the corresponding period of 1909. Active employment was expected for the rest of the season.

Metal and Woodworking.—Employés in these trades had an active month, nearly all industrial establishments working to full capacity and with full staffs.

Printing.—A good month was reported from the leading centres.

Clothing.—Journeymen tailors were only fairly active, but garment workers had a busy month.

Leather.—Tanners, curriers and leather workers were, on the whole, well employed.

Food and tobacco preparation.—Bakers were active and confectioners very busy. Cigar makers and tobacco workers had a good month.

Miscellaneous.—Barbers, hotel and restaurant employés, &c., had a good month. Tourist traffic was heavy.

Unskilled labour.—This class had a very busy month. The demand for harvesters, railway construction hands, lumber camp employés and workmen on civic improvements were very active, and in some localities greater than the supply.

Canadian Trade and Revenue.

During July, 1910, the total value of imports entered for consumption in the Dominion of Canada, was $36,527,083, compared with $30,046,443 in July, 1909. For the first four months of the present fiscal year ending July 31, 1910, the total value of imports entered for consumption was $145,911,270, compared with $112,148,633 in the corresponding period of the last fiscal year. The total value of domestic exports during July, 1910, was $23,303,641, compared with $24,071,591 in July, 1909. The domestic exports during the four months ending July 31, 1910, were $80,952,578, as against $73,398,595 in the corresponding months of last year. During July, there were increases in exports of the fisheries, animals and their produce and manufactures, and decreases in exports of the mine, the forest and agriculture. The grand total of Canadian trade for July, 1910, was $61,456,570, compared with $56,351,513 in July, 1909, and for the four months ending July 31, 1910, $232,630,260, as against $191,919,304 for the corresponding months of 1909.

According to reports of Trade Commissioners received at the Department of Trade and Commerce, Canada, the total imports of Canadian products into Germany increased from $586,000,000 in 1901, to $796,500,000 in 1908. The principal imports were flour, cattle, food, linseed, apples and fruit, and cheese. An interchange of Canadian coal of Western Canada with Mexican iron, of which large quantities have been discovered, is urged. This, it is stated, would be of benefit to Western Canada in the way of furnishing return cargoes for the boats carrying the Canadian coal south.

Imperial trade.—In Great Britain and the different Dominions of the Empire, openings for Canadian products were reported as follows: For cows hair, British Columbia salmon, dessert pears and apples in Great Britain. The supply of Canadian bacon is not equal to the supply in the British market, in which a large increase in Canadian imports is noted. Complaints have been made of the defective quality of cheese cloths; some consignments have been ripened too rapidly, but on the whole a general improvement has been reported in the make up of Canadian cheese. Nova Scotia cranberries are in demand, if shipped early. In Australia an increase in the imports of Canadian goods is mentioned. In South Africa a large increase of Canadian imports is reported. In 1908, these imports were $2,129,245, and in 1909, $2,397,165, or an increase of $267,920. In Trinidad there were openings for Canadian flour. In the Bahamas, the solicitation of trade by Canadian exporters is urged. The chief articles imported from Canada, are flour, boots, butter and cheese. Only one Canadian

representative has been known to visit Barbadoes, with the result that his firm controls the oats and hay market there. Fish is the leading Canadian import into the West Indies.

Domestic trade.—General business still held a holiday tone. Retail trade was of fair volume for the time of the year and the demand for general lines of wholesale goods was active. Country trade was somewhat quiet during the harvesting, but a good autumn is expected. Money was somewhat easier, and collections fair.

Bank clearings continued to increase; the return for the first six months of the present year show an advance of $434,000,000, or 18 per cent. over the corresponding period of 1909.

The number of failures occurring in the first half of 1910 was smaller than in the corresponding period of 1909, but the liabilities were greater.

At a meeting of the shareholders of the Bank of Nova Scotia authority was given the directors to increase the capital of the Bank from $3,000,000 to $5,000,000.

The July bank statement showed a heavy reduction on call loans abroad, and a moderate credit expansion in Canada, indicating preparations for the crop movement and general confidence in the outlook.

Canadian revenue.—Canadian revenue for the month of July, 1910, amounted to $9,320,586.11, compared with $8,437,438.94 in July, 1909. The total revenue to July 31, 1910, amounted to $35,655,439.45, compared with $30,030,311.91 to July 30, 1909. The total expenditure on capital account during July, 1910, was $2,647,302.47, as against $2,414,922.84. The total expenditure to July 31, 1910, was $5,797,337.93, compared with $6,429,221.47 to July 30, 1909. The leading items of expenditure during July, 1910, were: Public works, railways and canals, $2,471,970.32; railway subsidies, $108,819.20; and bounties, $346,815.38.

Notes.

The building by-law of the City of Toronto has been amended to afford greater protection to workmen employed on scaffolding.[1]

[1] For details of amendment see report of Toronto correspondent.

The Retail Grocers' Association of the Province of British Columbia held its annual convention at Vancouver, B.C.

The wholesale winter rate of milk for Toronto was fixed at $1.30 per eight gallon can; the summer rate was $1.25 for same quantity.

Representatives of daily papers published in the Maritime Provinces organized the Eastern Press Association, at Truro, N.S., on August 24.

Under date of August 1, the previous regulations under the Act respecting the inspection of meats and canned foods were rescinded and a new series of regulations issued.

The Canadian Federation of Labour issued its convention call under date of August 13. In the outline of business to come before the convention it is stated that the chief feature of the session will be to provide for the formation of national organizations of shoe workers and employés in the building and printing trades, and for an extension of the Provincial Workmen's Association to the miners of the rest of the Dominion. The convention will meet at Montreal, on Tuesday, September 13, and following days.

The quarterly statement of the Glace Bay, N.S., Co-operative Society, Limited, announced an increase from 8 to 10 per cent. in purchase dividends. Business for the quarter amounted to $35,498, compared with $23,741 in the preceding quarter. The semi-annual meeting of the Guelph Co-operative Society was held on August 4. Profits were stated to have more than doubled.[2] Favourable reports were received from the New Westminster Co-operative Association for the half-year ended June 30. Sales for the six months were $24,755, an increase of 20 per cent. over the previous term, and 50 per cent. over the corresponding period of the previous year.

[2] See report of Guelph correspondent.

II. REPORTS OF LOCAL CORRESPONDENTS.

SYDNEY, N.S., AND DISTRICT.

Mr. John Moffatt. correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions continued favourable during the month, the only change being a slight falling off in the output of some of the larger collieries, largely due to the holiday season. All public works, railways, factories, foundries, the building trades, and outside labour were active.

The Dominion Collieries worked very steadily, and large outputs were obtained. The prospects are bright, and steady work may continue until the end of the shipping season, after which there may be considerable broken time.

The Nova Scotia Steel & Coal Company had a very fair month, although the output was 10,000 tons below the record month of this season, which was June. The falling off is altogether due to the number of men taking short vacations.

The Steel Departments of the Nova Scotia Steel & Coal Company, were very active, and will continue so, as there are large orders ahead.

The Steel Works at Sydney had a good month, all departments worked steadily, and improvements were rushed along with all possible haste. The prospects of the Company continue bright.

The building trades continued active during the month, and prospects are bright until the end of the fall weather, after which most of the outside work ceases

Transportation by rail was lighter than usual, but water freights continue heavy, shipping being brisk.

The wholesale trade was good, and the retail trade was favourably affected by the large quantities of fall goods being opened.

There is no labour unrest in this district.

Skilled labour was generally well employed, but unskilled workmen were plentiful.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Weather conditions were excellent, and crop reports are the best in years. The hay crop was above the average, and grain will be much above the yield of the last two years. Roots and vegetables are also better than other years.

Fishing.—Fishing has been almost a failure in this district. The lobster catch was very much less than that of last year, and the only success obtained was in cod-fishing, and even this can only be reported as fair.

Railroad construction.—Work on the new railway extending the Intercolonial Railway around Little Bras D'or was rapidly pushed ahead, and gave employment to many of the men in the district through which it passed.

WESTVILLE, N.S., AND DISTRICT.

Mr. T. Hale, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During August, employment was not as brisk as usual at this season. Some of the collieries worked full time, but others had several off days, chiefly at the Vale collieries at Thorburn. Shipments from the Drummond colliery were about 19,000 tons, and from the Acadia collieries, about 20,000 tons, being a reduction of about 7,000 tons, compared with the corresponding period of 1909. Other industries in the district have had a busy month. The Acadia Coal Company has constructed a large number of workmen's houses, and this has increased activity in and around Stellarton. A number of commodious residences and stores were in course of erection at New Glasgow. No changes in wages or hours of labour have occurred.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers were in the midst of their busy season. They have

gathered an abundant crop of hay, and have started the harvesting of the grain crop. Potatoes, turnips and the root crop generally promise well. The small fruit and berry crop was almost a failure in this district, owing to early frosts.

Lumbering was quiet.

Manufacturing.—Busy conditions prevailed throughout the district. The Trenton Steel Works has under construction another large building necessitated by the expansion of trade.

Mining.—This industry was working nearly full time. Prospects for the future are for steady employment. The coke ovens at the Drummond colliery are again in full operation, working to full capacity; the fire-clay mine of the same company has also resumed operations. Some prospecting along the line of outcrops of the Company was being carried on.

CONDITION OF PARTICULAR TRADES.

The building trades were very active, and the metal, printing and transport trades active. Boot and shoe workers were active, and journeymen tailors had a fair month. Barbers were active, as were laundry workers, clerks, stenographers and delivery employés. The supply of unskilled labour was not equal to the demand.

HALIFAX, N.S., AND DISTRICT.

Mr. A. J. Smith, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market for August has been very dull. It is years since such dullness prevailed in the building trade, while the work along the water-front has been very quiet. Up to the twenty-sixth of the month, not a building permit had been issued from the City Engineer's office, for any contract valued as high as $2,000. Figures to hand for the first seven months of 1910 show 324 permits for contracts aggregating $241,600, against 351 for the same period in 1909, with the estimated cost of buildings, $422,395, the balance in favour of 1909, showing $180,795. This dullness has affected other lines, such as tailors and shoe dealers, to quite an extent.

During the month the Barbers' Union secured the concession asked, with the exception of two or three small shops. In most cases the employers readily consented. The request of the barbers, which went into effect on August 1, was that any customer entering the shop before 8 P.M., on week nights, and 11 o'clock on Saturday nights, or on nights preceding holidays, would be served, the men refusing to handle those coming in after the hours mentioned.

The printing pressmen are about successfully completing the establishment of a new scale. The old one was a varied one ranging from $8 upwards. The new one will have a uniform minimum scale of $12 per week, the foremen to receive $18. The scale in its entirety has not as yet been completely agreed upon between employés and employers.

CONDITION OF LOCAL INDUSTRIES.

Agriculture is well advanced, hay being exceptionally plentiful. Quotations (wholesale):—

Butter, creamery (boxes), 25-26 cents.
Butter, Dairy (ordinary), 19-20 cents.
Butter, dairy, (rolls), 20-21 cents.
Cheese, large, 12½-13 cents; twins, 13 cents.
Eggs, fresh, 20-21 cents per dozen.
Beef, fore quarter, 8-8½ cents.
Beef, hind quarter, 10-15 cents.
Lambs, 13 cents.
Mutton, 7-9 cents, (scarce).
Veal, 7-8½-cents.
Pork, 10½-12 cents, bacon, 20 cents.

The July crop report for the Province of Nova Scotia issued by Mr. Cumming, secretary for Agriculture, shows that the "Hay crop, immense; grain, potatoes, roots, excellent; pastures, never better; live stock, flourishing—in fact, a record year for the general farmer; but, fruit, a failure."

Fishing.—Early in the month, mackerel were taken in small quantities, at several points, by local fishermen. At the outset indications pointed to big catches, but they were not realized. Some of the hauls sold in the local market for 12½ cents to 15 cents each. The catch was not at all equal to the demand, and some

importations were received from Ireland. The fishermen have hopes for October and November. Cod, haddock and halibut were more plentiful. Much fish was secured for the local market from Lunenburg and Cape Breton vessels.

Lumbering was quiet.

CONDITION OF PARTICULAR TRADES.

All building trades were dull, with the exception of plumbers, who had a fair month. Electrical workers were dull. Blacksmiths were fairly active. Boilermakers and iron ship builders had a fair month, an improvement over July, owing principally to repairing jobs. Other lines were about up to the season's average.

Printers, pressmen and bookbinders had a good month. Tailors were dull. Boot and shoe workers were quiet. Bakers and confectioners had a good average month. Barbers had a fair month. Theatre employés were not active. Laundry workers were busy. Railroad employés were fair, season considered. Unskilled labour was quiet, as were freight handlers and longshoremen.

AMHERST, N.S., AND DISTRICT.

Mr. A. D. Ross, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Not for three years has there been such an optimistic feeling in industrial circles as at present. Following the depression of 1907 a "working time" period ensured, but during the present year signs of expansion became evident.

The Amherst Boot and Shoe Company, have given a contract to build an extension to their plant of a brick structure 60 by 98 feet. The building will be four stories and will give employment to a large number of additional hands. The Canadian Car Company will also erect a new building 200 by 50 feet, doubling its present size. The Rhodes Curry concern has erected a large warehouse during the month, for the accommodation of the retail trade and many other forward signs can be noted..

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—A record hay crop with indications that the grain and root crops will be equally good is the report from all over the country. The hay crop surpasses all records for years. Fruit crops are a failure but as this is not a fruit district the loss will be light.

Fishing.—The lobster season closed in July and since that time there has been little activity. Herring are reported in abundance.

Lumbering.—Heavy shipments of lumber are being made to European and American market with prices good.

Manufacturing.—Work is very brisk in all lines of industries and a steady demand for labour is reported in many of the factories.

Mining.—The Empire Coal Company at Mascan, has been reorganized and after a long period of idleness will resume operation at once. From all over the country the signs are most reassuring, except at Springhill where the strike still continues and the conditions do not vary much from month to month.

At Chignecto mines there are negotiations going on between the men and management for a new schedule of wages. The two year contract between the two parties interested expired on August 1st. The question will probably be settled without trouble.

CONDITION OF PARTICULAR TRADES.

The building trades have all been steadily employed during the month. There is now a demand for bricklayers and masons; carpenters and joiners are also busy. Painters and decorators report busy month. Iron moulders have been working steadily. All classes indeed, of iron workers have been well employed. Machinists have had steady work. Electrical workers have been busy. Woodworkers have been more than usually busy. Carriage and wagon makers report a good month. Car builders are steadily employed in all departments. Pattern makers have been fairly busy. Printers have found work a little slack, but not more so than usual for the

holiday season. Journeymen tailors are not steadily employed but the garment factories report plenty of orders. Boot and shoe makers exceptionally busy. Ice dealers and drivers are also busy. In the leather trades all lines are actively employed. Clerks report the month dull, due to the holiday season. There is no demand for additional help. Unskilled labour is well employed and more is in demand than the market will supply, but as the time for activity will be short, it would be unwise to go beyond the local market for additional help.

CHARLOTTETOWN, P.E.I., AND DISTRICT.

Mr. F. J. Nash, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during August differed little from that of July, supply and demand being well balanced.

The usual amount of outdoor work was carried on in the building line. In Charlottetown, good progress was made on the construction of the Heartz Memorial Hall and other buildings.

In the railroad department, there was a considerable amount of activity, the construction of the Elmira branch employing a number of men.

The exceptionally large crops this year have given an encouraging tone to business in general. Prospects are very favourable for a brisk trade in the autumn.

The cold storage system installed by the Island Cold Storage Company, who were assisted by the Provincial Government guaranteeing their bonds to the extent of $25,000, on condition that they throw the cold storage open to the public, is now in full working order.

The volume of shipping is about the same as this time last year. The wholesalers and retailers both report conditions satisfactory.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The hay crop was one of the largest in the history of the Island and was all saved in good condition. Harvesting was started the latter part of the month. The grain crop will also be an exceptionally good one. About one hundred men left for the northwest on the usual harvest excursion, about one-eight of the number who went last year.

Fishing.—Operations in this branch were limited, being restricted mainly to cod and hale fishing.

Manufacturing.—The cheese factories had an exceptionally successful month, the output being about twenty-five per cent. more than the best month in the history of the industry.

Railroad construction and employment.—The building of the works above referred to, and usual routine operations were the chief features of the month. The tourist travel was about up to the usual volume.

CONDITION OF PARTICULAR TRADES.

The building, metal and woodworking trades were active, as were other branches of skilled employment. For unskilled labour there was a fair demand.

MONCTON, N.B., AND DISTRICT.

Mr. J. C. Graves, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions were active in all branches represented here, with local supply adequate in most cases to meet demand. Labour bureaus find difficulty in supplying recruits to other parts of the Province. Building was active but confined to the erection of cottages and general repair work. City corporation work was extensive on sewer extensions, macadamizing and permanent sidewalks, employing a large staff of operatives. Wages were $1.75 per diem. Work upon the public wharf is in an advanced state. All local manufacturing concerns, machine shops, etc., are in active operations and with their usual complement of employés. With the re-opening of schools, the compulsory education act goes into effect. New school permits so-

far issued are 250, an excess over last year's. The Royal Commission on Industrial Training and Technical Education held sessions at Moncton, St. John and Fredericton and much evidence from well known educationists, prominent business men and large employers of labour was taken. The sixteenth annual session of the Maritime Board of Trades was held at Chatham, August 17-18, and matters affecting transportation, immigration, and municipal matters discussed. The Maritime Press Association held their annual sessions at Truro, N.S. Retail trade has been good and wholesale trade average. Real estate was quiet but firm. Rents were steady with limited choice. The Wednesday half-holiday was adopted by the J. D. Creghan Co. Ltd., during August and September. No other change in hours of labour was noted. No changes in wages and no cases of friction between employers and employés, were reported.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were very active. Upland haying is about completed, the crop being a record one. Marsh haying was commenced and the crop is good. Harvesting has begun with crops very promising. Orchard and small berry fruits are very light. The blueberry crop is a total failure. About 50 from Moncton left on the farm-labourers' excursion to the west, August 26.

Fishing. — Mackerel catches along north shore are reported poor, but cod very good.

Lumbering.—Bureaus advertising for lumbermen offer $26 to $30 per month. The I. C. Prescott limits and mills at Hopewell were sold to an American firm for $75,000 and the G. D. Prescott limits and plant to C. T. White for $80,000.

Mining. — The Maritime Oilfields Company, is still developing its oil and gas fields at Lower Coverdale, two more wells being drilled with satisfactory results. The Albert Mines formerly noted for the production of Albertite have been sold to the Eastern Trust Company for $15,000.

Railroad construction and employment. —The total estimates for July on the National Transcontinental Railway Company in the Province of New Brunswick were $342,949.

CONDITION OF PARTICULAR TRADES.

The printing and allied trades and clothing trades were busy, with bakers and butchers active. Tanners quiet, leather workers busy, barbers active, also hotel, restaurant and theatre employés and laundry workers. Railway crews made good time. Freight handlers were busy and teamsters and express men active. For unskilled labour the demand was good at $1.50 to $1.75 per day. The local supply was about sufficient for requirements.

ST. JOHN, N.B., AND DISTRICT.

Mr. W. H. Coates, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Business in all trades was exceedingly brisk during the month of August. The opening of the Dominion Exhibition created a demand for carpenters and labourers. The Hassan Paving Company, which has the contract to pave some of the streets, has been advertising for labourers. A lot of repairs have been done to private dwellings and stores, and with the erection of a new brick school house on Wentworth street will give an impetus to the building trades.

The Wilson Box Company has secured an option on Crawford's lumber mill at Brundage's Point, and if satisfactory railway rates and other details can be arranged will operate it in connection with their box mill. Silas L. Gates, of Port William, N.S., has leased five large buildings at Old Fort, St. John West, and will make barrels for the potato trade. About twenty coopers will be employed. Good progress is being made with the construction of the new factory at South Bay to be used by the Woodenware Company. The concrete foundation is nearly completed. The Canadian Pacific Railway Company, is negotiating for the purchase of several properties on Mill and

Main Streets, and if it gets control will expend upwards of half a million dollars. The Halls book store business on King Street is to be wound up for the benefit of the creditors. Bank clearings for the four weeks ending August 25th were $6,278,680, and for the corresponding period last year $5,759,754, being $518,928 greater in 1910 than in 1909 and $336,231 less than during the four weeks ending July 28th of the current year. The deposits in the St. John Savings Bank for the month of July were $59,495.65, and withdrawals $72,788.60. The following are the retail prices of green stuffs: Beets, 5 cents a bunch; carrots, 5 cents a bunch; turnips, 3 cents a bunch; celery, 10 cents a bunch; cucumbers, 2 cents each; cauliflower, 8 cents to 12 cents a head; lettuce, 5 cents a head; squash, 4 cents a pound; cream beans, 40 cents a peck; yellow beans, 50 cents a peck; tomatoes, 8 to 10 cents a pound; peas, 30 cents a peck; corn, 15 cents to 20 cents a dozen; potatoes, 30 cents a peck; The city labourers pay-roll for the four weeks ending August 19 amounted to $13,607.03. The Commission on Technical Education opened a two days' session in St. John on August 18.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Reports from the farming districts are that all crops are looking well, and the hay crop is unprecedently large.

Lumbering.—The returns of the St. John River Log Driving Company show that up to August 1st only 72,000,000 or 73,000,000 feet of logs had been rafted, while the lumbermen expected the amount would be upwards of 90,000,000. The amount of lumber stranded up river must be at least 35,000,000, feet. The lumber cut on Crown Lands in the province during the past season will total between 275,000,000 and 280,000,000 feet, and stumpage returns will amount to over $300,000. These figures are larger than for any previous year.

Railroad construction and employment.—There are now only forty miles of rails to be laid on the eastern section comprising District A, of the National Transcontinental Railway Company, and by the fall of 1911 the road will be ready for operation. As the work is nearing completion the estimates are falling off. The total for July was $342,949.73, and for August it will be probably be $100,000 less. The total amount expended to date has been $10,027,478.75, not including steel rails or bridges.

CONDITION OF PARTICULAR TRADES.

The various skilled trades were from active to very active, with unskilled labour in keen demand.

DISTRICT NOTES.

Albert.—The Albert Mines property, purchased a few years ago by John L. Peck, Hillsboro, and J. Nelson Smith, has been sold to the Eastern Trust Company, St. John, for $15,000. The timber areas are not included.

Marysville.—The Gibson Cotton Mill has been sold to the Canadian Colored Cotton Company, of Montreal, the price paid being in the vicinity of $800,000.

St. Stephen.—The depositors and other creditors of the Bank of St. Stephen, received 33 1-3 per cent. on their claims on August 15.

NEWCASTLE, N.B., AND DISTRICT.

Mr. James Falconer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market is active in all lines. The lumber mills are all running full time, and some of them are running day and night. This is the principal industry in this section of the Dominion. There is not as much building going on this season as last year, but mechanics are kept pretty well employed. The Drummond Company has the branch line completed, and the shipping docks ready. They will be shipping iron ore from here about the first of September. The river is being dredged out so that large steamers, such as are used for this work, can come in at all times. The Anderson Furniture Company property

has been sold. Business has been very good this summer, both wholesale and retail. There is no unrest in the labour market.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have about finished harvesting the hay crop, which is the heaviest in several years. The season has been bad for making it. Taking the crops in general, it is a good year for the farmer. Wheat is not very good, but oats, potatoes and turnips are heavy. There will be less hay imported this year than for some four or five years.

Fishing.—Trade was better than last season. The salmon fishing was good. The season for fishing ends August 15.

Lumbering will be brisk this winter. There are a number of men in the woods already, which is earlier than usual.

Railroad construction is active here. Morrison & Clark, who have the contract for the new line from Nelson to Chatham, have a large number of men at work, and are looking for more help.

CONDITION OF PARTICULAR TRADES.

The building trades are all busy, and mechanics of all trades are active and will be until the close of the season. The carriage business, which has been very quiet for two or three years, has been active this summer, and prospects are good for the winter.

QUEBEC, QUE., AND DISTRICT.

Messrs. E. Little and *P. J. Jobin, correspondents,* reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month has been a remarkably good one for labour in this district, especially in the building trades. The Quebec Railway, Light and Power Company has commenced to construct the extension of its electric road to Sillery. Work upon the Quebec bridge was actively pushed forward, some 600 men being employed upon it on the north shore. The transfer of the Champlain market property has been completed, the contract being signed and the purchase price paid. One clause of the contract is to the effect that work on the new station to be erected upon this property must begin not later than November 1, 1910. The dredging of the mouth of the St. Charles river was also started. These works, along with the extensive building operations under way in the outlying and unannexed suburbs of Quebec, have caused an increased demand for labour. Mr. Joseph Ballantyne, plumber of Montreal, has been awarded the contract for lighting, heating, introduction of water and ventilation into the new technical school in St. Roch. The contract price is $53,000.

The large caisson built by Messrs. M. P. Davis and J. T. Davis, contractors, to be used in connection with the construction of the new Quebec bridge, was successfully placed in position on the north side of the St. Lawrence river, on the afternoon of August 1.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Haymaking was completed; the crop was a very heavy one and saved in excellent condition. The harvesting of grain is also well advanced, and the crop will be a good one. The root crop also promises well. If conditions continue favourable, the present year will be an excellent one for the farmers.

Railway construction.—The new road from Ste. Flavie to Matane has been well advanced, the grading being completed to a point below Sandy Bay. Grading on the Ha Ha Bay Railway is nearly completed, and the laying of rails will soon commence, a steamer cargo of rails being at present landed at Chicoutimi for this purpose. Work on the Quebec division of the Transcontinental railway is also being pushed forward rapidly, and it is expected that the section between Harney Junction and Quebec will be completed by this fall.

CONDITION OF PARTICULAR TRADES.

Lathers, palsterers and stone cutters were active. Bricklayers, masons, car-

penters, joiners, painters and builders' labourers were busy. Plumbers, gas and steamfitters were quiet. Electrical workers were quiet, but the other metal trades were busy, as were also the woodworking trades. Bookbinders were active and printers and pressmen, busy. Glove makers and boot and shoe workers were quiet, but journeymen tailors and garment workers were busy. Cigar makers were quiet, as were also the different branches of the leather trades. Hotel, restaurant and theatre employés were very busy, Laundry workers were busy and furriers were quiet. Railway employés were active. Steamboat men were busy. Ship labourers were dull, but longshoremen were active. Street railway employés, cab drivers and teamsters were busy. The supply of unskilled labour was equal to the demand.

THREE RIVERS, QUE., AND DISTRICT.

Mr. Joseph J. Ryan, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions were fairly active during August, all factories and lumber mills running full time, and the supply and demand being about equal. Wholesale and retail trades show an increase over last August. Rates of wages remain the same, and cordial relations exist between employers and employés.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy harvesting.

Fishing.—This industry was rather dull.

Lumbering.—All lumber mills were running full time and some of them overtime.

Manufacturing.—All factories are doing well, some of them running till midnight.

Railroad construction.—The Canadian Pacific Railway Company has completed the St. Maurice Valley line up to Grand Mere, which has been in operation since the middle of August.

The Shawinigan Water & Power Company has begun the construction of a few substantial buildings for the installation of additional transformers for the supply of electric power to the factories of the city.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters and joiners, lathers and plasterers, painters, decorators and paper hangers, plumbers, gas fitters, stone cutters and all employed in the building trades were active. The metal engineering and ship building trades were also fairly active. Woodworkers, upholsterers, varnishers and polishers, carriage and wagon makers and pattern makers report an extra good month. Printers, pressmen and bookbinders had a fairly active month. Journeymen tailors, garment workers, glove makers and boot and shoe workers had to work overtime. Bakers and confectioners, butchers and meat cutters, ice drivers, cigar makers and tobacco workers were very busy. There has been an improvement in the leather trades in August over last year, and especially over preceding month. Barbers, clerks, stenographers, delivery employés, furriers, hotel, restaurant and theatre employés, and laundry workers, all reported a busy month. Transportation has been active throughout the month in all branches. There has been a good demand for unskilled labour, but the supply was about equal.

SHERBROOKE, QUE., AND DISTRICT.

Mr. H. Logie, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour has been exceptionally well employed during August. The building trade is busy, as well as all other industries. The work on the new dam and power house of the Sherbrooke Power & Railway Company is being rushed to completion, and a large number of men are employed, work being carried on day

and night. The Bishop Construction Company is taking on every available man, and if any man was idle during the past month it was because he did not wish to work. The Sherbrooke Power & Railway Company will start a large gang of men this month in the extension of the street railway system. The rails are expected in a few days, and as soon as they come to hand, work will be commenced. This Company, before the work is finished, will have spent many thousands of dollars. The annual exhibition also called for a large number of extra help, both male and female. With the work now contracted for, there should be a good demand for all kind of help up until the end of the season.

The several machine shops and other industries are all affected by the rush of work, and the city, so far as work is concerned, was never so busy as it is at present. There is a steady influx of population, and the figures taken by the city assessors show that there has been a steady growth in the population during the past year.

The City Council has adjusted the electric light schedule, which has caused so much contention since the city took over the works. The new schedule calls for a uniform rate of 6 cents per kilowatt, with a discount of five per cent. This means that the small consumer gets a better rate, while all churches, hotels, convents, &c., that had previously a special rate, are on the same basis as mentioned.

Retail merchants report business as having been exceptionally good during the month. There was no unrest among workmen, with the exception that the bricklayers on the new Mitchell block went out for a few hours because they contended the contractor had put a labourer to do work which ought to have been done by a skilled man. The matter was amicably adjusted between the men and contractor.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers have secured their hay and grain in good condition. A special report from all over the Township goes to show that the yield of hay and grain is above the average of the past few years. The root crop is also reported good, with the exception of potatoes, which, in some sections, is reported to be light. Considerable loss has occurred by barns filled with hay being struck by lightning. Taken as a whole, the farmers of the Township have had a good season. There is still a large quantity of cream being shipped to the United States, which means that the butter production is short, and as a consequence the price keeps high. It is claimed by those who ship cream that the return is larger than if the cream was turned into butter.

Lumbering.—There is not much change in the lumber industry, and while there have been inquiries for large lots of pulpwood, the owners will not sell, as they claim the price ought to be higher. There are large quantities lying at the various sidings, and unless the same is cleared off this fall there will not be the same demand for men to go to the woods as in former years.

Manufacturing.—All industries are running full time.

Mining.—This industry is very busy, and more men are wanted in several of the large copper properties.

CONDITION OF PARTICULAR TRADES.

All branches of the building trade were busy, and will remain so for some time in order to complete the work in hand. Printers, pressmen and bookbinders were very busy during the past month. Journeymen tailors and garment workers were active. Bakers and confectioners were very busy, while cigar makers had an active month. Miscellaneous trades had a busy month, as also were street railway employés, cab drivers, teamsters, &c. Unskilled labour was in much demand.

SOREL, QUE., AND DISTRICT.

Mr. J. A. Chênevert, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The construction of a break-water, 500 feet in length, by 7 feet in width, will give

employment to about forty men for more than three months.

Besides the dredges already under way as the government yards, work has been started on a new wooden tug boat, to be finished by next spring, which will necessitate an increase of the working force at the yard.

More than 14,000 tons of iron ore have arrived at this port this season from Port Huron, Pennsylvania, and 16,000 tons more are expected before the close of the season. The ore is transhipped here from American canal boats to the steamers of the Dominion Coal Company, and sent to Sydney, N.S. About 35,000 tons of coal are also received here during the season for the Department of Marine and various navigation companies.

Wholesale and retail dealers are satisfied with conditions.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The crops were execellent, hay being gathered in a fair condition. The grain and vegetable crops were plentiful and of a fine quality.

Manufacturing.—The various factories are in full operation, and are increasing their working force, with the exception of the agricultural implement factory, which will, however, resume its activity in October.

ST. HYACINTHE, QUE., AND DISTRICT.

Mr. Victor Phaneuf, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market during August has been excellent. The building trades had a good month, as many new buildings are under way. The repair work on the cathedral is progressing rapidly, and is giving employment to many. Sash and door manufacturers had a good month. The leather industry was active, but not as active as in the corresponding month of last year. The stiffener and innersole plant had an exceptionally active month. Musical instrument manufacturers were very busy, and the new Canada Pipe Organ Company has many orders on hand, and is in need of more help. The boot and shoe factories had a fair month, working with an almost full staff. Outside work has been good for unskilled labour. Retail trade was more active than in the preceding month, and the prospects are very encouraging for the fall season. Wholesale trade is improving all the time. Banks report a good month, with easy collections. There was no change in the rate of wages or hours of labour.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The general condition of agriculture was very good during the month. There is plenty of hay of a fine quality, in spite of the frequent rainfalls during the last few weeks. Vegetables are in abundance, but prices are high; fruits, apples, &c., were plentiful, and sold well. Dairy products are in good demand and bring profitable prices. The condition of farm employment has been excellent, the demand exceeding the supply, and high wages were paid for that class of labour.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, joiners, lathers, plasterers and all the other building trades were fairly busy. Building labourers also had a good month. Plumbers and gas and steam fitters had a good month. Iron moulders, iron workers and heplers, machinists, steam engineers, electricians, blacksmiths, boiler makers and horse shoers had a fair month. Woodworkers were fairly active. Printers, pressmen and bookbinders were fairly active. Journeymen tailors and garment workers had a quiet month. Boot and shoe workers had a fair month. Bakers, confectioners, butchers, meat cutters and ice drivers had an active month. The leather trades had a fair month, with orders enough to keep the men at work all the time. Barbers, clerks, delivery clerks, hotel and restaurant employés and laundry workers were well employed. Railway employés were active. Cab drivers, hackmen, carters, teamsters and

expressmen were well employed. Unskilled labour had an active month and was in good demand.

ST. JOHNS AND IBERVILLE, QUE., AND DISTRICT.

Mr. A. D. Pepin, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of labour is active. For outside operations the demand exceeds the supply, and some work will probably not be finished this season, on account of a shortage of labour. The door and sash factories are working with full staffs. The pottery works are very active, and the staff is being increased steadily. The Singer plant is more active than at any time since its establishment here. The Standard Drain Pipe Company has many orders on hand, and has to work overtime. All the other industries are very busy. Shipping was much heavier this year than last. The work of building wharves for the Government is being rushed rapidly, as well as the construction of the Canadian Pacific Railway bridge. Wholesale and retail business was reported very satisfactory for this season of the year. Bank collections were easy.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The hay crop was plentiful, and the grain crop promises to give better returns than for the past few years. The vegetable and root crops are very promising.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters and joiners, lathers, plasterers, painters and decorators, all report a good month. Plumbers, and steam fitters also report a good month. Stone cutters and helpers are active. Iron moulders, iron workers and helpers, nut makers, machinists and engineers are active. Electricians and linemen report a good month, but shipbuilders, shipwrights and caulkers are rather quiet. Tinsmiths, tool sharpeners, horse shoers, jewellers, woodworkers, and upholsterers report a good month. Varnishers, polishers, wood carvers and carriage and wagon makers are well employed. The printing trades report an active month. Journeymen tailors, garment workers, hatters and glove makers report a satisfactory month for the season. Bakers and confectioners, butchers and meat cutters, ice cutters and drivers are all well employed. Tanners and curriers, leather workers and saddlers had a busy month. Barbers, clerks, stenographers, delivery clerks, furriers, hotel, restaurant and theatre employés and laundry workers were active. Railway conductors, engineers, firemen, telegraph operators and switchmen are active. Trackmen, freight handlers, steamboat men, ship labourers and longshoremen are well employed. Cab drivers, hackmen, carters, draymen and expressmen are all active. Unskilled labour is very active.

MAISONNEUVE, QUE., AND DISTRICT.

Mr. J. F. Girard, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

August was as active a month as July for almost all the trades. Preparations for the Eucharistic Congress have been the cause of an increased activity among joiners, plasterers, and unskilled labourers. This activity will naturally give an impetus to business in general. Manufacturers were all busy, some increasing their staff. With the exception of the bricklayers' and masons' strike all is quiet in the labour market. A number of masons are unoccupied. The bricklayers are all working in spite of the strike, being employed by 176 employers who have made a two-year arrangement.

CONDITION OF PARTICULAR TRADES.

All the building trades were very active, with the exception of masons. Bricklayers, plasterers and building labourers

were unable to meet the demand. The metal trades were well employed. Electricians, blacksmiths, tinsmiths, roofers and horse shoers were in great demand. The woodworking trades were fairly busy, but without being in demand. The printing trades were active. Journeymen tailors were in demand in several shops. Bakers, confectioners, butchers and meat cutters were active, as well as icemen and tobacco workers. Tanners, curriers, leather workers and saddle makers were active, and trunk and bag makers were in demand. Barbers were very busy. Broom makers were fairly active. Clerks and stenographers were active. The other miscellaneous trades were active. The transportation trades were very active and unskilled labour very busy.

MONTREAL, QUE., AND DISTRICT.

Mr. G. Audet, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

All the building trades were exceptionally busy during August, on acount of the building of arches for the Eucharistic Congress which takes place in this city early in September. In some trades men are getting scarce.

Bank clearings in Montreal for the month of July show an increase of twenty-two million dollars over the corresponding month of last year, and of sixty-eight million dollars over July, 1908.

A report prepared by the building inspector shows the value of the building permits issued during the first seven months of the year 1910 was $9,601,140, against $7,783,621 for the twelve months of the year 1909, and $4,285,910 for the first seven months of the same year. The number of permits issued during July, 1910, was 170, representing a value of $3,182,408, against $562,156 for July, 1909, and $391,620 for July, 1908.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—This industry was very active.

Manufacturing. — All manufacturing establishments are very active.

Railroad construction.—There was considerable work done in this line.

CONDITION OF PARTICULAR TRADES.

The various trades were from active to busy.

HULL, QUE., AND DISTRICT.

Mr. E. E. Cinq Mars, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market has been very active during August. Men are scarce, and wages are rising. The manager of a large industrial company of Hull declares that unless the flow of workmen from this district to the farming districts of Alberta and Saskatchewan, soon stops, he will have to offer higher wages, or look for men amongst the foreigners engaged in railroad construction. There is no fear of scarcity of labour for the shanties next winter, as a number of tradesmen employed in cities eagerly accept going to the bush for the winter. It is expected that those engaged cutting timber will be paid from $30 to $35, including board and travelling expenses.

There is not a large number of foreigners employed in the city, owing to small works going on, at which they are usually employed. The sewerage service from Flora Lake to the Ottawa river is progressing slowly.

There will soon be room for some fifty labourers at Aylmer, when the construction of a new wharf built by the Canadian Government will be started.

The lumber trade is active, notwithstanding the complaint made by manufacturers to the effect that owing to the American competition from Michigan State and other places, prices are kept low.

Ordinary labourers are paid from $1.50 to $1.75 per day, while the wages of the tradesmen are firm.

The hay crop throughout this district has been very good, also oats and vegetables.

OTTAWA, ONT., AND DISTRICT.

Mr. W. Gilchrist, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

An active demand for nearly all kinds of labour characterized the month of August. When hiring for the lumber camps began in the early part of the month, men were so scarce that wages went up $4 per month higher than ruled in the corresponding period of 1909. Teamsters, log-cutters, rollers and the best road cutters were hired at $30 and $32 per month, transportation paid to the woods, and release at the end of the log haul. Some firms are paying $35 per month to experienced hands. The highest figure at the beginning of the hiring season last year was $26, and it rose to $30 in the late autumn. Civic improvements, both by day labour and under contract, continued brisk. One hundred men are employed on new granolithic sidewalks, alone, and by the end of the summer, $40,000 will have been spent on these works. Building operations are extensive enough to occupy all the building tradesmen and local contractors. Some structures were held back in the early summer owing to scarcity of brick, and now with the more adequate supply, brick construction is especially active.

Passenger and freight traffic on railways is augmented by fall exhibitions which are being well attended. Incoming freight for Ottawa merchants was delayed through congestion at other points, but still the month showed a good record for freight business. The Customs collections in the port of Ottawa, for August, were approximately $110,000, or $20,000 better than last year. Wholesale trade was equal to the average in all lines except lumber. Clothing manufacturers were very busy.

The International Operative Plasterers' Union, No. 124, numbering sixty members, declared a strike on August 1, when the masters refused to increase their wages from 40 to 45 cents an hour. The Canadian Operative Plasterers' Union, with thirty members, was not affected. 40 cents an hour has been the standard wages for plasterers in both unions for three years. At the end of a week, about ten contractors signed an agreement with the striking union, granting 42½ cents an hour. The Canadian union discussed terms with the masters with the result that an agreement was signed binding the men at the existing wage of 40 cents an hour until May 1. Employés in one of the local breweries, numbering twenty, have applied for a charter from the International Union of the United Brewery Workmen of America.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Crops benefitted by the late rains. Corn is reported better than average. Farmers are selling lambs in large numbers. Most meats are 50 cents or $1.00 a hundred cheaper than a month ago.

Lumbering.—Lumber shipping is dull. Demand is strongest for stocks that can be manufactured for sash, doors, flooring, &c. Prices for high-grade lumber are well maintained. Low water hindered the log drive, and some small mills had to curtail sawing.

Manufacturing.—The Continental Bag and Paper Company is erecting a new factory which will begin operations toward the end of the season, employing about forty hands. An automobile factory has been started by the Diamond Arrow Motor Car Company, with some fifteen hands.

CONDITION OF PARTICULAR TRADES.

All branches of the building trades were busy. Stovemakers, machinists, electrical workers, sheet metal workers and blacksmiths were in demand. Kindred trades were in a normal state. Car builders and shop carpenters were busiest among the woodworking trades. All were steadily employed. Printing and allied trades had a brisk month. Factory owners were looking for girls to operate power machines in garment manufacture nearly the whole month. Tailors were

also busy. Harness manufacturers reported an abundance of orders. Demand for other leather wares was quieter. Autumn trade made more work for clerks and delivery employés, but there was no demand for more help. Theatre hands and restaurant help were plentiful. Domestic help was scarce. Stenographers were plentiful. Transport labour was employed to the full capacity of carrying facilities. Unskilled labour was sought for farm, city and shanty work.

KINGSTON, ONT., AND DISTRICT.

Mr. William Kelly, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There was no pronounced change in the condition of the labour market, as compared with last month. Labour generally seemed fully employed, and very little enforced idleness was reported. The building trades were exceedingly active, trying to make up for the loss of time caused by the strike of carpenters in the early part of the year.

Traffic on the various steamboat and railroad lines was very active. The transportation and banking institutions reported good business.

The wholesale and retail trade was reported in excess of last month, and equal to the corresponding period last year. A slight increase in the various departments of the local branch of the Dominion Cotton mills was reported. A difficulty arose during the month between the stonecutters and masons as to the right to do certain rough work. Up to the time of writing no agreement had been reached.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are very busy and report good crops; farm help is now very plentiful.

Fishing was active during the month.

Lumbering is quiet just now. A busy season is anticipated later and already men are being called for to meet the demand.

Mining was active, several new finds were made in this district.

Railroad enforcement. — Considerable ballasting, etc., was carried on in this district.

CONDITION OF PARTICULAR TRADES.

The building trades have resumed their normal condition and all lines are now active. The metal, engineering, woodworking and finishing trades reported an active month. During the month a number of new engines were turned out by the Canadian Locomotive Works Company, which institution is now running full time. Printers, clothiers, bakers, butchers, ice cutters, cigar makers, tanners, barbers, broommakers, delivery employés, farmers, hotel, restaurant, laundry and theatre employés as well as all branches of the transportation business reported an active month.

BELLEVILLE, ONT., AND DISTRICT.

Mr. H. C. MacDiarmid, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During the past month labour of all classes has been in active demand. All branches of industry have been active, especially since the Grand Trunk Railway strike has been settled. The rolling mills which were closed down for a short time owing to the Grand Trunk Railway strike are again in active operation, also the cement works. Buliding operations are active at present. A large addition is being built to the city hospital, a church hall for Christ Church, and a large addition to the brass works. At the Grand Trunk Railway station premises a large new round house is in course of erection which will cost about $100,000. Other improvements about the station are in contemplation. Transportation on both rail and boat was very brisk.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Crop prospects are very good in this locality. Hay and oats

were good yields. Cheese offerings were exceptionally large.

Mining.—At Deloro and other places in North Hastings several mines are in operation and some have recently changed hands.

Railroad construction and employment.—The Grand Trunk round house is being erected here at a cost of $100,000, also other improvements made about the station. The plan of the route of the Canadian Northern through the city has been filed in the registry office here.

CONDITION OF PARTICULAR TRADES.

In the building trades all mechanics were engaged, a number of buildings being in course of erection. The metal, engineering and shipbuilding trades were kept busy, in some cases working overtime in order to keep up with orders. A good month was reported in the woodworking trades. Both job and news printers were very busy the past month. Bookbinders report a good month. Journeymen tailors were kept very busy. The food and tobacco preparation branches were very busy. Nearly all the trainmen who went out on strike have returned to work. Unskilled labour is in good demand.

PETERBOROUGH, ONT., AND DISTRICT.

Mr. J. Arthur Sharp, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market has been very active throughout August and showed considerable advance over the corresponding month of last year. Outside work especially in the building trade was very brisk. The supply was not equal to the demand for rough carpenters and bricklayers. The Radial Railway Company will build a new power house at the Auburn dam and extend their railway this fall, giving employment to 200 men. Tenders are called for the erection of a new church for the Murrey St. Baptist congregation; it will be a stone structure. The Peterborough Canoe Company is to extend its factory, doubling their output; the building will cost $10,000. The Wm. Hamilton Company has secured two large contracts for machinery for the development of water power. Mr. Geo. Ball has received the contract for making the new uniforms and overcoats for the employés of the Radial Railway Company. The Collier Electric Company is very busy having received one order from Vancouver for 400 electric irons. This city has been used as a demonstration point for the Machine Telephone, no charge being made; they will now put in some 1,500 new telephones and will charge for the service. The barbers have raised the price of a hair cut to 25 cents.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The rains of the latter part of the month as well as two hail storms created havoc in this locality, some of the farmers have nothing left as a result. Apple buyers are now making tours throughout the country. They report the crop very light.

Lumbering conditions are active and lumbermen find it hard to get men to go to the camps. The mills are also busy; the Peterborough Lumber Company has been cutting 1,628 ties daily the last two months.

Manufacturing.—The metal and wood trades have been very busy but the woollen trade has been very quiet.

CONDITION OF PARTICULAR TRADES.

The building trades were all active; metal workers, electric workers, linemen were very active. The woodworking trades were all well employed. The printing trades report business fair and job shops very busy. Journeymen tailors were busy. Bakers were very busy and butchers and meat cutters were active. Leather workers were active. There was a good demand for unskilled labour.

DISTRICT NOTES.

Port Hope.—Not in thirty years has there been such activity in the building

trade as at the present time. A large brick and steel building for the Central Foundry Company, two additions to the Standard Ideal Company's plant. The Canadian Northern Railway Company's station and a number of good brick dwellings are in course of erection.

TORONTO, ONT., AND DISTRICT.

Mr. Philips Thompson, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Active conditions continued throughout August, labour of all kinds being well employed. The building trade was particularly busy. Permits were issued during July for 928 buildings of the approximate value of $1,953,285, as against 707 buildings of the value of $1,854,105 in July 1909. During the seven months ending July 31, permits for 3,738 buildings valued at $11,793,883 were issued, as against permits for 2,952 buildings of the value of $10,683,480, in the corresponding period of last year. In consequence of the rapid expansion of the city an unusually large amount of civic work is being undertaken, and the holding of the Canadian National Exhibition which was formally opened on the twenty-ninth, created much additional work. Relations between employers and employed were generally harmonious. The fear of a serious strike which would have entailed much disturbance being averted by the unanimous acceptance by the employés of the Toronto Railway Company on the twentieth of the terms embodied in the report of the Board of Conciliation, as a settlement of the dispute between the men and the Company.

Since the settlement of the Grand Trunk Railway strike, during which freight delivery had been considerably delayed, the business and manufacturing interests of Toronto have suffered greatly from freight congestion. A meeting of the Board of Trade was held on the twenty-third to consider the question, at which a resolution was adopted protesting against the management of the Grand Trunk and Canadian Pacific Railways and urging that immediate steps be taken to place the management of this district on a more stable and efficient basis commensurate with the requirements.

The Board of Control has decided upon the construction of a new dock, 600 feet long by 250 feet wide to facilitate landing from twenty feet freighters on the eastern shore of the harbour just south of the National Iron Works, at an estimated cost of $200,000.

City Architect McCallum has prepared an amendment to the building by-law whereby better protection will be afforded to men working on scaffolds. The principal provisions are as follows:—Joists to be placed on the first floor as soon as the walls or structural steel have reached that level, and covered temporarily in a satisfactory manner, all buildings over three storeys high to be provided with temporary plank stairs from the bottom to the roof of the building; outside scaffolds to be provided from the second floor up with tight plank floors, ten-inch curbs and hand rails 34 inches high, and when buildings are over 60 feet in height the space between the hand-rail and the curb is to be filled in with wire-netting; planking to be erected above scaffolds to protect workingmen from falling tools or materials on buildings more than two storeys high; all scaffolding or temporary supports to be of sufficient strength to carry safely the load to be imposed.

Hobberlin Bros., tailors, are erecting a four-storey building at the south east corner of Richmond and Yonge streets to cost $72,000.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Harvesting was nearly completed and farmers were busy threshing. Fall wheat yielded well, the crop being in some cases forty-five and fifty bushels to the acre. Potatoes and other root crops are generally good. The yield of ensilage corn has been abundant and there will be plenty of feed for cattle during the winter. Apples have been a failure in some neighbourhoods and the crop is likely to be short. The ground at the close of the month was in a favour-

able condition for fall ploughing, which was being undertaken on a larger scale than usual, indicating an increased wheat acreage next year.

Manufacturing.—There was little change to note in manufacturing conditions, the activity which characterized the last few months being generally well maintained. Orders in most lines have been coming in well, especially since a fair harvest in the West has been assured. The Canada Foundry Company has secured some extensive contracts for bridges, representing an aggregate value of about $600,000. The Nasmith Company, bakers, are constructing a two-storey brick factory and stables at a cost of $50,000 on Duchess Street.

The Canada Cycle and Motor Company are building an addition to their West Toronto plant, consisting of a four-storey building, 90 x 120 feet, to cost with equipment, $100,000.

The Canada Linseed Oil Company is putting up a three-storey brick and concrete mill at a cost of $35,000.

Robert Simpson & Company, Limited, are erecting a wagon storage and harness shop on Dalhousie street to cost $53,000.

Railway construction.—The old Belt line of the Grand Trunk Railway Company is being repaired for traffic between Davenport street and Yonge street, and the completion of the work is expected to enable the road to handle freight traffic more efficiently. Surveyors laying out the route of the new Oshawa Electric Railway Company are working in the neighbourhood of Whitby.

CONDITION OF PARTICULAR TRADES.

Men in all departments of the building trades were busy. Boiler makers, blacksmiths, moulders, machinists, sheet metal workers and structural steel workers all had plenty of work. Electrical workers were generally well employed, but 100 men of the staff working on the Hydro-Electric Power transmission system were laid off temporarily on the seventeenth instant, on account of the delay in delivery of poles. Brass workers, jewellers and silversmiths had an active month.

All classes of woodworkers, upholsterers and piano workers were active. Printers, bookbinders, pressmen, stereotypers and electrotypers had plenty of work. Custom tailors were quiet early in the month but active towards its close. Garment workers, hat and cap workers and boot and shoe workers were active. The trades engaged in food and tobacco preparation had steady employment.

Leather workers had an active month. Railway employés were very busy. Street railway men, teamsters and expressmen were busy, especially during the latter part of the month. Sailors and longshoremen had plenty of work. Hotel and restaurant help, barbers, laundry workers, clerks and salesmen were all busy. Unskilled labour was generally well employed.

DISTRICT NOTES.

Port Credit.—Contracts have been signed for 1,350 horse power of electric energy to be supplied from the electric transformer station to be erected at Port Credit, which, it is expected, will build up a manufacturing district there. Tenders have been received for the electrical equipment of the transformer station.

NIAGARA FALLS, ONT., AND DISTRICT.

Mr. Hewlett Green, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Early in August, there was some irregularity in the labour market owing to the large number of men released on completion of the Ontario Power Company's conduit and the Hydro-Electric Commission's transforming station. Most of the idle unskilled men left the city, and the general activity in the building trades absorbed the skilled men.

On the whole, industrial conditions were excellent. The building trades were probably the most active, but the metal working trades and electric railway men were also very active. General business was good.

A by-law to build a new fire station at the south end of the city was carried.

Several new industries are to be established at once. The Hawes-Von Gal Hat Company purchased a large factory building and are putting in a plant to employ 125 hands. A United States furnace company acquired an unused foundry plant and will employ twenty-five men. Manufacturers of electric lighting equipment will establish a branch factory here. The Canadian Ramapo Company, manufacturers of railway track equipment, was building a large addition to its plant.

New buildings included several stores and office buildings, a bank, a church, a cereal mill, a wholesale grocery, warehouse with 22,500 feet of floor-space, and many dwellings.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers, gardeners and fruit-growers were very busy. Nearly all crops are heavy and labour was in demand. Though the acreage of tomatoes is smaller, the crop is very heavy. Wheat was an unusually large yield and next year's acreage will be much greater.

Manufacturing. — All manufacturing concerns were busy. Metal working concerns were especially active and cutlery factories reported many early orders. The shredded wheat factory was rushed and the haberdashery factories advertised for female labour.

Railroad construction and employment. The Michigan Central Railway employed a considerable number of men in re-laying its Niagara Division (30 miles) with heavier rails. Freight traffic on steam lines was rather light, but on all lines the passenger traffic was very heavy.

The Ontario Power Company continued to employ about a thousand men in back-filling its conduit-trench, excavating and building concrete walls for its power-house extension and completing its overflow works.

CONDITION OF PARTICULAR TRADES.

Building trades were active. For a time there were some unemployed carpenters and bricklayers, but these have found employment on the many new buildings recently started. Planing mills were very busy. Builders' labourers were quiet. Painters were very busy and plumbers all working. Metal-working concerns of all sorts were busy. Electrical workers and linemen were active. Journeymen tailors were quiet. Barbers, butchers, icemen, and employés of canning factories were busy. Barbers, office empolyés, sales people and delivery employés were active. Hotel, restaurant and laundry employés were busy. The effects of the late strike were still felt in the yards and train services of the Grand Trunk Railway Company. Freight traffic on all lines was light, but passenger train and engine crews were very busy. Electric railways were taxed to their full carrying power by a prolonged rush of passenger traffic. Cab men, carters, draymen were busy and teamsters were in demand. Employment on the Canadian lake marine was good. Unskilled labour was fairly well employed.

DISTRICT NOTES.

Chippewa.—The new carborundum factory was in full operation. Harbour dredging was commenced. A waterworks by-law will be voted on.

Bridgeburg.—The foundry and machine shop was employing more men than for many months past.

Welland.—The town secured several new industries during the month. The Peters overall factory was being erected, the contract was let for the Chipman-Holton Knitting Company's factory; the United Motors Company and the Hamilton Tube Company both decided to locate here. Late in the month announcement was made that Deere & Company, controlling several agricultural implement concerns in the United States, would build a large factory here, also that a large electro-chemical works would be established.

ST. CATHARINES, ONT., AND DISTRICT.

Mr. Jas. A. Wiley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market continued active, the supply and demand being well bal-

anced. Few idle hands were to be found. Sewer construction work, laying of sidewalks, boulevards, curbing, etc., will give employment to the close of the season. Extra hands have been employed to hasten the work. Ground was broken the early part of the month for the new chain factory at the McKinnon Dash and Metal Works. The building will be 80 x 300 feet, and will be entirely fire proof, of concrete throughout. It is expected the building will be completed in two months, ready for the installation of the machinery. The McSloy Brother's Haircloth factory will remain in St. Catharines instead of going to Merritton as contemplated. The present premises will be enlarged at once to allow them to employ twenty to thirty additional hands and about double the output. The third and final reading was given to the by-law granting the right of way along Carlington street to the Grand Trunk Railway for a siding to the McKinnon Dash and Metal Company's works, and to serve the proposed factories of the Welland Vale Manufacturing Company. The N. C. & T. R. R. have completed laying their tracks along Ontario street to Carlington street, which will be a source of convenience to those residing in that district of the city. All mills and factories are running full time. Business generally was good. The close of the month will see the last of the Wednesday half-holiday for this season. The half-holidays were much appreciated, both by the business men and their employés, and was more largely adopted this year, than previously. Business places with few exceptions closing at 12 o'clock instead of 1 p.m. as in other years. The McLaren Company, employing about seventy hands closed at 5 p.m. each day except Saturday instead of observing the Wednesday half-holiday..

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers and fruit growers were busy and report conditions satisfactory. Hay proved a good crop, and the early small fruits a fair crop. Plums will average well; while in some orchards the crop may be light, in others it will be a heavy one. Abundance plum will be good and Burbank a full crop. The European varieties are heavy in nearly all well tilled orchards. Crops all round will be as heavy if not more so than for 1909. Pears, except Duchess and Keiffer, are a full crop, with Duchess light and Keiffer medium. Peaches from Jourdan to Niagara river while possibly not so heavy will be of better quality and equal in bulk to last season's. Corop grapes are of fine firm quality and come near to giving last season's "record" heavy crop. Trees and vines are all looking well in the orchards, and vineyards of the careful grower who knows the value of this important industry. From three to seven carloads leave St. Catharines station alone daily, the number increasing daily as the crops mature. Not only are the canning factories doing a large business, but shipments are made to many points in the Dominion east and west. Shipments of peaches to the English markets are to be made by the most approved methods.

CONDITION OF PARTICULAR TRADES.

The building trades were active and report conditions fair. All branches of the metal and engineering trades were active with prospects good. The woodworking and furnishing trades were active The allied printing trades were all active. and report satisfactory conditions. Journeymen tailors were active, as were boot and shoe workers, bakers and confectioners, butchers and meat cutters, ice cutters and drivers, cigar makers and tobacco workers. Tanners and curriers, leather workers, saddlers, trunk and bag makers were active. Barbers, clerks, stenographers, delivery employés, hotel and restaurant employés and laundry workers were active. All lines of transportation were active to busy; conditions have resumed a normal state after the strike on the Grand Trunk Railway. Unskilled labour was active to busy, being better employed than for a year past.

DISTRICT NOTES.

Thorold.—The labour market continued active, labour being well employed. The Colonial Wood Produce Company

is building a 30 x 40 addition to its plant which will enable it to increase the output twenty-five per cent. The present output is 14 tons of pulp daily.

Merritton.—All mills and factories are running full time. Work on the new Lincoln paper mill is progressing satisfactorily. The building previously occupied by the Canadian colored cotton works will shortly be occupied by a rubber plant.

Port Dalhousie.—The labour market was active to busy and labour was well employed.

HAMILTON, ONT., AND DISTRICT.

Mr. P. Obermeyer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There was very little change in conditions in industrial establishments from those prevailing in July. Factories were running full time and full handed throughout the month, and in some instances, notably in the Canadian Westinghouse Company's works, extra time was put in getting out orders during the greater part of the month.

Good progress is beng made with the buildings for the Oliver Chilled Plow Works Company, and manufacturing will likely be started before the end of the year.

Building permits for August, 1910, were seventy-nine, for $230,000; August, 1909, forty-seven for $102,755, an increase of $127,345. Nearly two-thirds of the increase represents additions to factories, or new factory buildings.

The report of bank clearings for August show that they are nearly $1,000,000 more than for the same month last year, and over $200,000 in excess of the year 1908. The total clearings for the past month amounted to $7,964,544, and last year they totalled $6,980,323, leaving a difference of $924,131. In 1908 the total was $5,496,598, being $2,407,856 less than the past month.

The general prosperity is being felt by the city authorities in the police force and fire department. At present, there is a positive scarcity of applicants, and members are resigning frequently to engage in other pursuits.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Reports from the fruit farms in the district are to the effect that apples will not be plentiful; plums, short; grapes, fairly large yield; peaches, medium; pears, fair.

Manufacturing.—The following factories are making additions to their works: Canada Shovel & Tool Company, International Harvester Company, F. W. Bird & Son, Canadian Westinghouse Company, Hamilton Bridge Works Company. The last named firm, in addition to making considerable extensions to its present works, has purchased a large tract of land in the east-end, which will be utilized for storing stock and turning out light structural steel. A ten-ton travelling crane will be erected there and railway switches from all the roads will run into the new plant.

The Kuntz Brewing Company, of Waterloo, will erect a cold-storage plant at the head of West avenue, to accommodate the demand of its Hamilton trade. The Federal Gas Company, on August 3, applied to the Board of Control for a perpetual franchise to supply natural gas to citizens, at not over 40 cents per thousand feet. The application was refused on the ground that the price to be charged was too high.

A public meeting on August 23, adopted a resolution urging the widening and deepening of Burlington canal, to allow vessels of larger tonnage to come through with supplies for local industries.

Among the new concerns announced as coming to this city, are: The Guelph Specialty Company, pickles, jams, &c.; The Canada Reflector & Mirror Company, branch of a Pittsburgh, Pa., company; The Eureka Smoke Consumer Company, Roehester, N.Y.

The Dowswell Company has changed its title to the Cummer-Dowswell Company, and increased its capital from $75,000 to $250,000. Extensions to its plant are contemplated. The firm makes

wringers, washing machines and kindred goods.

CONDITION OF PARTICULAR TRADES.

Workers in the building trades report work steady, with the supply of labour adequate to meet fall demands. The busy conditions of the previous month continued in all the trades. The congestion caused by the Grand Trunk Railway strike made a lot of extra work on its termination, for the freight crews. The demand for unskilled workmen was fairly brisk, and toward the end of the month, some difficulty was experienced in getting men for the heavier class of work, as required in sand pits, brickyards, sewer pipe works, &c.

DISTRICT NOTES.

Dundas.—Letters patent have been issued in Toronto incorporating the Kerr Milling Company, Limited, of Dundas, with a share capital of $50,000. The new concern has been formed to take over the business of the Kerr Manufacturing Company.

The *Ontario Gazette* contains the announcement of the incorporation of the Chapman Engine and Manufacturing Company, Limited, with a share capital of $200,000, divided into 2,000 shares of $100 each. The head office of the Company will be in Dundas. The Company will manufacture engines, machinery and other goods.

BRANTFORD, ONT., AND DISTRICT.

Mr. J. C. Watt, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour continued to be well employed during the month, there being a greater demand than during the corresponding month of last year. The building trades are especially busy, the local supply of labour being taxed to handle it. In addition to several new factories and factory additions, a large number of mechanics' residences are being erected. The iron trades also were busy, and extensive preparations are being made for the fall trade which is expected to be very heavy. The Verity Plow Company has let contracts for additions to be completed in two months, at a cost of $60,000, consisting of: Warehouse, 60 x 200 feet, three storeys high; blacksmith shop, 60 x 200 feet, one storey; paint shop, 58 x 100 feet, one storey; core room, 50 x 60 feet, one storey. They expect to employ 200 more men during the winter than formerly. The Penman Manufacturing Company will commence shortly on additions costing $80,000, and will employ 400 additional operatives.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers and market gardeners were very busy. Grain crops are an average yield; fruit is plentiful so far as early varieties are concerned.

Manufacturing.—Manufacturers were very busy, and more factory additions were announced; prospects for a busy fall are bright.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, joiners, lathers, plasterers, painters, plumbers, gas and steamfitters were very busy. There has been some demand for extra men. Iron moulders, coremakers, machinists, engineers, electrical workers, linemen, metal polishers, stove mounters, blacksmiths and boilermakers were very busy. Sheet metal workers and horseshoers were active. Woodworkers, carriage and wagon makers, and patern makers, were very busy. Coopers were busy. The printing and allied trades were busy. Tailors and tailoresses were active, with shoe workers busy. Bakers and confectioners were very busy. Cigar makers and tobacco workers were active. Leather workers and saddlers were from active to busy. Barbers, clerks, delivery employés, hotel and restaurant employés were steadily employed. Laundry workers were busy. Railroad trackmen were busy, and freight handlers were very busy. Street railway employés were steadily employed. Teamsters and dray-

men were very busy. Hackmen and carters were active. Unskilled labour was in demand.

DISTRICT NOTES.

Paris.—The factories and mills were very busy. There is still a demand for female labour in the fabric mills. Labour was well employed during the month.

GUELPH, ONT., AND DISTRICT.

Mr. Wm. Drever, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions continued active. All men in the building trades were fully employed, and those engaged in manufacturing were also busy. The Gilson Manufacturing Company is building an addition to its factory which will about double its capacity; the Page Hersey Tube Mill Company is extending its plant to meet increasing trade. The Emery Garment factory has moved into its new factory on Yarmouth street, and will employ additional hands. The City Council has rented the new Morlock building to a boot and shoe company, that guarantees to employ fifty hands the first year, seventy-five the second, and 100 the third year. The Guelph Co-Operative Association held its half-yearly meeting, and the directors reported business good in all branches, there being a total increase of over $7,000 for the first six months of the year, as compared with the corresponding months of last year. Also an increase of profits of $1,232, being more than double, which enables the committee to recommend a dividend of 6 per cent. to shareholders, and 3 per cent. to non-shareholders, on purchases.

Wholesale and retail merchants reported a quiet month. The Brussels carpet weavers strike is still on.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers had a very busy month, though the wet weather interfered somewhat with harvesting operations. Threshing is well under way, and crops are up to the average.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, lathers and plasterers had an active month. Painters and decoratiors were well employed. Plumbers, gas and steam fitters had a busy month. Builders' labourers were active. Stone cutters had a slack month. Iron moulders and helpers were well employed, also coremakers, machinists and electrical workers. Stove mounters and blacksmiths, fair. Piano makers were well employed; also sewing machine makers. Pattern makers had an active month. Coopers and carriage workers report a fair month; also printers. Journeymen tailors were quiet, but garment workers were active. Bakers and confectioners had a good month. Barbers, clerks and delivery employés were fairly active. Carters, draymen, teamsters and expressmen were active. Unskilled labour was well employed on street paving and sewer construction work, with the supply and demand about equal.

BERLIN, ONT., AND DISTRICT.

Mr. R. F. Grafton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During August all classes of labour, both skilled and unskilled, were fully employed. There was an increased demand for unskilled workers and also a demand for cabinet workers, finishers, carvers, and boot and shoe workers. In some of the factories both male and female employés are needed. The employés of the Kaufman Rubber Company picniced at Guelph on the 25th, numbering over 300; they will have holidays until September 6th, while the firm takes stock. Good progress was made on new buildings, especially on industrial establishments and public buildings. The Dominion Shoe and Slipper Company started on Monday, August 22nd, with ten hands, and will increase this number in the near future. Commercial

activity and bank clearings were reported favourable. Business both wholesale and retail was favourable. There was no change in rates of wages or hours of labour.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were very busy during August with harvesting and threshing. Fall wheat yields well to the acre. Some farmers report having thirty-five bushels, whilst others report as high as forty bushels, to the acre. Oats will also yield well. Sugar beets are also looking well, as are the mangels, and corn. There are several silos being built. A heavy thunder storm passed over this section about two miles south of Berlin, doing considerable damage on Monday the 15th.

Manufacturing establishments were, with few exceptions very busy, in some instances working overtime.

Railroad construction.—Good progress is being made on the construction of the Peoples' Railway between Berlin and Little Germana, and between Berlin and New Hamburg. A large staff of men and teams are grading the road.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters and joiners, lathers, plasterers, painting, decorating, and paper hanging, plumbing, gas and steamfitting, stone cutters and building labourers were very active. The metal and woodworking trades were all active. Printers, pressmen, bookbinders, the clothing trades, bakers and confectioners, butchers and meat cutters, ice deliveries, cigar makers and tobacco workers were active; tanners, curriers, leather workers, saddlers, trunk and bag makers were active. Railroad conductors were inactive, but locomotive engineers, railroad telegraphers, trainmen and switchmen, trackmen and freight handlers, were active, as were street railway employés, cab drivers, hackmen, carters, draymen, teamsters and expressmen. Unskilled labourers were very active.

DISTRICT NOTES.

Galt.—All classes of labour were well employed during the month, though the building trades were not so active. Manufacturing establishments were all very active, with the Scheldans Company working overtime.

Elmira.—The month of August was a busy one for labour generally. Building operations were very active. The brick work was completed on the Great Western Felt Company's factory, and the roof is being put on. All manufacturing establishments were active and in need of help. At the Co-operative Furniture Company, cabinet makers, glue hands, a spindle carver and machine hands are in demand.

Waterloo.—All classes of labour were busy, with manufacturing establishemnts busy and ,in some instances, working overtime, with an increased demand for help.

WOODSTOCK, ONT., AND DISTRICT.

Mr. J. Markey. correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Woodstock has entered upon a campaign of industrial development. Several new manufacturing concerns are said to be within reach, and before long a considerable increase in the industrial activity of the community is expected. Meantime, reports from all quarters continue to be excellent. The farmers in this district are finishing the work of taking in their harvests, and a good deal of threshing has already been done. The farmers appear to have fared very well in the matter of help, as is shown by the speed with which the harvest was gathered. Speaking generally, the harvest has been an abundant one, and the threshing that has been done so far shows the wheat and oats to be of excellent sample.

Practically all the local industries report trade conditions to be very good. In the musical instrument business one firm reports conditions normal, with

bright prospects for the fall trade. Another firm reports that the prospects are brighter this year than last for both the home and foreign trade. The factories are running full time.

The Stewart Stove Foundry reports trade with the West is very good, in spite of unfavourable crop reports, and the prospects are good for continued activity during the autumn. Trade conditions in this line are reported much beter this year than for the month of August a year ago.

The local factory of the Canada Furniture Manufacturers is running full time. Business is reported good, being better than last year.

The wagon manufacturers are busy and report prospects good.

The Oxford Knitting Company's factory has been closed for a week or so, for extension. It will open again early in September, and will employ from forty to sixty additional hands, mostly girls. This factory finds constant difficulty in supplying its demands for girl help.

Reports from other industrial concerns are in a similar strain.

There is some demand for labour, both skilled and unskilled. The Thomas Organ Company could find work for some good woodworkers now, and expects a demand for skilled labour in the fall.

The Canada Furniture Manufacturers could also find employment for some skilled labour, and the Bain Wagon Works could use more unskilled labour. Speaking generally, however, demand and supply are well balanced.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters and builders' labourers are all busy just now, and the prospects for autumn work are fairly good. Moulders, stove mounters, blacksmiths and machinists are busy, but the local demand at present seems to be pretty well supplied. Woodworkers, upholsterers, &c., are working full time, and there is some demand for good men to work in the furniture factory, the wagon factories and the piano and organ factories. The printing trade is reported to be active, but there is no present demand for printers. Reports from various branches of the clothing trade indicate continued activity. The leather trade is also reported good. There is more demand for unskilled labour, both in the factories and in the building trades.

STRATFORD, ONT., AND DISTRICT.

Mr. Joseph T. Carlin, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market has been very active during the month, and men in all branches of trade were fully employed at good wages. The building trades were active, mostly on small buildings; a number of residences are nearly completed. The Dufton Woollen Mills which were destroyed, have been rebuilt with a large addition and expect to be ready for operation with an increase in staff shortly. Gangs of men and a number of teams were employed on the paving of streets and laying of walks, and a number of men were engaged in erecting posts for Niagara power.

Wholesale and retail merchants report trade active. The banks did a good business.

The Customs returns for the port of Stratford amounted to $9,616.93.

There was no change in the rate of wages or hours of labour, and no trouble in the labour market.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers were busy harvesting; threshing has commenced. They report a very good yield, especially of fall wheat. Market prices are:—

Old wheat, $1.03.
New wheat .97 cents.
Oats, 40 cents.
Barley, 45 cents.
Peas, 70 cents.
Bran, $20 per ton.
Shorts, $24 per ton.
Flour, $2.85 per cwt.
Flour, (special), $2.95 per cwt.

Manufacturing concerns continue busy.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, lathers, plasterers, painters, paper hangers, plumbers, stone cutters and builders' labourers were busy. Iron moulders, workers and helpers were busy. Machinists, linemen, blacksmiths, boiler makers were active. Woodworkers, upholsterers, carriage and wagon makers and coopers were busy. Printers were steadily employed. Journeymen tailors and factory workers were very busy. Bakers, confectioners and butchers were active. Cigar makers were busy. Harness makers did a good trade. Barbers, clerks, delivery employés, hotel, restaurant and laundry workers were active. Railway conductors, engineers, firemen, trainmen and freight handlers were busy. Cab drivers, draymen and teamsters were very busy. Unskilled labour was well employed.

LONDON, ONT., AND DISTRICT.

Mr. A. Woonton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

General labour conditions, with the exception of the building trades, were active throughout the month. In the foundries, business was brisk, and at the London Bolt & Hinge Works three nights a week overtime were worked. On the resumption of work on the Grand Trunk Railway after the settlement of the trainmen's strike, a rush of business occurred, but traffic has now resumed normal conditions. The other roads were also busy handling the extra freight consigned on account of the strike. Building operations have shown a very large falling off this year; for the month of July there were only seventy-two permits issued, for total of $37,750, compared with sixty permits for a total of $73,808 for July, 1909. This year's permits, so far, are 529, valued at $490,216; for the same period, 1909, there were 600 permits for $630,397.

The number of empty houses in this city is causing considerable anxiety among property holders. A large number of people are continually leaving this section for Western Canada.

The settlement of the trainmen's strike was not altogether satisfactory; although all freight men were taken back, not more than six of the passenger men have been allowed to resume work.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The harvest in this district is better than for some time; roots of all kinds also show a heavy yield. Tomatoes are very plentiful and cheap.

CONDITION OF PARTICULAR TRADES.

Bricklayers report business poor, and a number of contractors have no work on hand. Carpenters are fairly busy. Lathers and plasterers are busy. Painters are slack. Iron moulders are busy, as are also iron workers. Machinists report trade good. Electrical workers and linemen are exceptionally busy. Metal polishers and stove mounters are busy. Carriage and wagon workers are busy. Car builders found trouble getting back some of their help after the week's shut down for the trainmen's strike. Coopers are busy. Printers and pressmen are all employed, and business is good. Journeymen tailors are slack. Garment workers and boot and shoe workers are busy. The two biscuit and candy factories are very busy, and find difficulty getting enough female help. Cigar makers are busy. Tanners and curriers are very busy. This has been one of the busiest months for a long time with railway train crews, brought about by the congestion of freight through the trainmen's strike. Teamsters are busy. There is more than enough unskilled workers to supply the demand, and no work of large proportions is in sight.

ST. THOMAS, ONT., AND DISTRICT.

Mr. J. A. Killingsworth, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour was well employed in this city and district during August, unskilled

labour being especially in demand. In the building trades the month was a good average, mechanics being kept busy throughout the month. The season has been a very satisfactory one. Railway employés report an active month in all branches. The Wednesday half-holidays, which have been in effect during July and August, will be discontinued August 31. The practice of closing the stores on Wednesday afternoons during the warm months has found favour with the merchants, and the rule has been well observed in this city. Southern-Innes stave factory resumed operations during the month and will continue during September. Some seventy hands are employed. Work on the Hydro-electric installation continues, and good headway is being made with the power station and in the erection of poles.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The markets have been well attended during the month. Garden produce was plentiful, and easy prices prevailed. The apple crop will not be good. Potatoes will be a good crop. The cereal crops in this district are splendid.

Manufacturing.—Manufacturers report the month a fair average.

CONDITION OF PARTICULAR TRADES.

The building trades continued active, all concerned being well employed. Machinists, moulders and boiler makers report the month an active one. Railway employés, in the traffic department, report the month a busy one, the Michigan Central Railroad Company being particularly rushed with freight and passenger business. Extra men have been busy. There was a steady demand for unskilled labour, and in some cases men could not be procured to go on with the work. A large number of foreigners have been employed by the Michigan Central Railroad Company.

CHATHAM, ONT., AND DISTRICT.

Mr. Alex. Gregory, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market was fairly active, although there were few building permits issued for August. Still all branches of the trade were well employed, but present prospects are for a quiet fall season in the building line. A large amount was spent by the Board of Works for granolithic pavements, and a large number of unskilled labourers were employed. The Dowsley Spring & Axel Works and the Manson-Campbell Fanning Mill Company were compelled to advertise for mechanics during the month, owing to the large amount of work on hand. The Swift Motor Car Company was very busy, and has a large number of the best skilled mechanics employed. The recent strike on the Grand Trunk Railway was felt very severely by the large shippers, and was a loss to all who could not ship on time. Wholesale and retail trade has been very good. Merchants report August sales far in excess of the corresponding month of 1909.

The Industrial Committee of the City Council and the Board of Trade jointly, have concluded an agreement with the Canada Grain Shocker Company, Limited, of Hamilton, capitalized at $250,000, to locate in Chatham. If the citizens take a certain amount of stock in the Company, the Company agrees to erect a $5,000 factory, and employ 250 to 300 men.

The Walker Shirt and Pants Company, which commenced in July with seven hands, have increased the number to thirty, and will continue to add to that number as orders increase.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters and joiners and plasterers, were fairly busy, while painters and decorators were quiet. Plumbers, gas and steam fitters were busy. Iron moulders, iron workers and helpers, machinists, electrical workers and linemen were only fairly active. Metal polishers, buffers, platers and brass workers were very busy. Blasksmiths and boilermakers and sheet metal workers and horse shoers were quiet. Woodworkers, upholsterers, carriage and wagon makers were busy. Printers, pressmen, bookbinders were very busy. Journey-

men tailors, garment workers reported a very good month. Bakers and confectioners, butchers and meat cutters, cigarmakers and tobacco workers were busy. Barbers, clerks, stenographers, hotel, restaurant and theatre employés were active, with laundry workers very busy. Street railway employés, cab drivers, carters and draymen and teamsters were well employed. Among unskilled labour there were few idle.

WINDSOR, ONT., AND DISTRICT.

Mr. D. Mitchell, correspondent, reported as follows:

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market was active. In the factories and foundries, work was plentiful, and larger forces were being worked than last year. Building operations have made a large stride in the past month, and the contractors have their hands full. Contracts have been let for some large buildings, such as the Michigan Central Railroad depot, costing $70,000; a terrace, costing $25,000; a shirt factory, costing $15,000; and a large number of dwellings. There is no complaint of want of employment, as help of all kinds is in demand. A definite announcement has been made that the Michigan Central Railroad tunnel will be opened on the tenth of September for freight, and a month later for passenger traffic. The banks did a good business. Wholesale and retail merchants report trade very good.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers are about through with their harvest, and report crops better than they expected. Owing to the dry weather, the pasture is drying up. There has been no rain for six weeks.

CONDITION OF PARTICULAR TRADES.

All connected with the building trades were well employed. Iron moulders, workers and helpers, and machinists were active, and all conneted with the iron trade fully employed. The woodworkers and furnishing trades have had a good month. Printers and pressmen were very busy. Journeymen tailors and garment workers were steadily employed. Bakers, butchers, ice drivers and tobacco workers were very busy. Leather workers and saddlers were busy. Barbers report an active month. Clerks, delivery employés, hotel and laundry workers were well employed. Railway and steamboat men were active, with street railway employés busy. Unskilled labour was well employed.

DISTRICT NOTES.

Sandwich.—The Canadian Salt Company is building a large salt plant in Sandwich, to cost $250,000 when completed; this will give employment to a large number of hands.

Walkerville.—The building boom continues in Walkerville. There have been some large contracts let in the last month, and all manufacturers are working to their full capacity.

SAULT STE. MARIE, ONT., AND DISTRICT.

Mr. F. A. Denman, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

A good demand for labour existed, particularly in the building trades, where a shortage was severely felt. Business in all lines was good during the month. There was more building construction under way this summer than ever before in this town's history.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—A severe hail storm did considerable damage to crops during the month. The section affected, however, was not large.

Lumbering.—Large gangs of men were sent to the woods, and preparations were being made for a big cut.

Manufacturing.—The various manufacturing plants ran full time.

Railway construction.—Activity prevailed on the Algoma Central Railway extension.

CONDITION OF PARTICULAR TRADES.

The skilled trades were busy.

PORT ARTHUR, FORT WILLIAM, ONT., AND DISTRICT.

Mr. F. Urry, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The busy month of July has been followed by an equally busy month during August. All trades have been fully employed. At times a scarcity has been felt of good joiners and plasterers in the building trades. There have been no new industries opened, but building operations are going on in both cities on the extension of the machine shops of the Canadian Pacific Railway Company at Fort William, and the Canadian Northern Railway Company at Port Arthur. Transportation has been brisk, and the wholesale and retail business houses have had a good month. No changes occurred in the rates of wages, and the month has been very quiet. The men of the Canadian Northern Railway Company shops are still out on strike.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Small farm holdings are increasing in this district, and in the vicinity of the cities, land is being taken up for market gardening.

Railway construction.—Railway construction work continues to call for much labour from these cities, and the employment agencies are all busy sending out men.

The street car lines in both cities have been extended this year, and additional lines are under construction.

The Western Dry Docks Company has over 250 men employed to the north of Port Arthur, and extensive works are going forward.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters and joiners, lathers and plasterers, painters, plumbers, stone cutters and builders' labourers have all been fully employed. Lathers and plasterers especially find it difficult to keep pace with the demand for their labour. All metal workers in the district are working to their full capacity, as well as electrical workers, linemen, &c. Blacksmiths, sheet metal workers, tool sharpeners, have all been fully occupied. Upholsterers and pattern makers are busy, but only a few are employed. Printers and pressmen, electrotypers and photo engravers have been very busy. Journeymen tailors have been normal, and garment workers quiet; so much ready-made and semi-ready-made goods have been sent in that these trades are generally quiet. Cigar makers have been busy. Clerks, and stenographers, delivery employés, hotel, restaurant and theatre employés have all had a busy month. Transport men on the railways, street railways, steamboats,&c., have all been busy, as also have longshoremen and freight handlers. This summer has been, perhaps, the busiest ever experienced in these cities, especially for unskilled labour, as a great number of new roads have been opened up, and old roads repaired. Sewers, gas and water pipes are being laid.

WINNIPEG, MAN., AND DISTRICT.

Mr. John Appleton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The demand for labour during August has been very keen. Substantial and unexpected improvement in the crop situation created a demand for farm help at high wages. At some points the men are demanding $3 per day and board. Generally speaking, as a result of a more bountiful harvest than the hot weather of June and July promised, business conditions have improved. August bank clearings as compared with 1909 show an increase of fifty-one per cent. and for the

first eight months of the present year the increase is thirty-six per cent. The Wortman Ward Company, of London, Ont., is erecting, in Winnipeg, a factory for the construction of municipal and farm equipment. The Otis-Fensome Elevator Company, Limited, purpose in the near future erecting a machine shop in Winnipeg for manufacturing and adjusting elevator parts. The Winnipeg Developement and Industrial Bureau announces that several firms are negotiating for the erection of manufacturing plants in Winnipeg.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—During August the weather in the immediate vicinity of Winnipeg was exceedingly dry, with the result that the field crops of all kinds suffered. Market gardeners also suffered from the same cause and their crops this year will be very much below the average.

Various estimates have been made of the total wheat product of the west during the present harvest. The *Manitoba Free Press* estimates that the yield will be 101,000,000, and the manager of the Ogilvie Milling Company, at Winnipeg, estimates 86,000,000.

Railway construction.—Complaints are being made by contractors because of their inability to get men, and many of them are working at a disadvantage in having part of their equipment idle.

CONDITION OF PARTICULAR TRADES.

8 Months.	Permits.	Bldgs.	Cost.
1906	2,582	3,137	$9,877,850.00
1907	2,043	2,414	5,753,300.00
1908	1,075	1,236	4,241,500.00
1909	1,832	2,166	7,566,800.00
1910	2,512	3,013	12,329,400.00
FOR AUGUST.			
1906	402	479	$1,292,900.00
1907	164	181	394,550.00
1908	192	214	602,000.00
1909	270	322	1,135,250.00
1910	427	482	1,449,100.00

The carmen until recently employed by the Canadian Northern Railway Company are still on strike. The painters are also still on strike. An employer makes the statement that all the principal contractors have all the men they require and the average wage paid is 35 cents per hour. The more skilled men, such as paperhangers and decorators, get 40 cents per hour. Nine hours are worked each day.[1]

BRANDON, MAN., AND DISTRICT.

Mr. E. Fulcher, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The past month has been a very busy one for all classes of labour in Brandon. The building trades have been especially busy. Work is being rushed on the new blocks for Messrs. Clement & Clement, and for the McKenzie Seed Company. On the former the concrete men and carpenters have been working twelve and one-half hours per day, and on the latter two gangs have been at work. The contract for the new Canadian Northern Railway hotel and station has been let to Messrs. Kelly Bros., Winnipeg, and work will be started immediately . The Codville Company has made good progress with the warehouse in place of the one burned down last year. The Brandon Electric Light Company has secured a franchise for heating the city from a central station, and the laying of the mains is now in progress. The Hanbury Manufacturing Company is working overtime in their sash and door factory, and all night in the saw-mill. Many advertisements have appeared in the local papers for unskilled labour. A shortage of men, no doubt, owing to the harvest operations, has been very apparent. There was no unrest in the labour market.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Harvest operations are now in full progress, cutting is finished and threshing is just commencing. The crop is proving better than was expected.

[1] A detailed statement relating to the strike of bricklayers at Winnipeg, Man., will be found in the article on Trade Disputes during August, in the present issue.

CONDITION OF PARTICULAR TRADES.

The building, metal, printing and transportation branches were busy. Other skilled trades were active. Unskilled labour was very active.

REGINA, SASK., AND DISTRICT.

Mr. W. B. McNeil, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

All branches of labour were well employed, especially in the building trades. There was a slight improvement over the preceding month, and a pronounced improvement over the corresponding period of last year. In most trades the supply barely meets the demand, though there are many in the plumbing and steamfitting line, who find it difficult to obtain employment, on account of a number of immigrants, (plumbers by trade) who had been shipped here with a guarantee of employment on arrival. The grading and paving of various roads and side walks was recently started, preparatory for the new Street Railway System. Large orders for the necessary metals, ties, &c., have been given, and immediately upon their arrival, work will be pushed on as rapidly as possible.

Both wholesalers and retailers report business as very active. Many have already found it necessary to build more spacious premises, increasing their staff to cope with the situation.

The bricklayers and stone masons on the Legislative Buildings went on strike on Monday, July 25, having been called off on account of the trouble in Montreal. They had no grievance locally, and the building is so far advanced that its progress is not endangered, as there is a great deal of interior work to be done.

The bricklayers' and stone masons' strike, does not effect the other trades.

Still another firm has decided to locate in Regina, the National Drug & Chemical Company, which took out a permit to build a warehouse of large dimensions to cost $25,000.

There were thirty-eight building permits taken out during the month of August, which aggregated in value, $130,505.

The following figures will show the comparison between the value of permits for 1910 and the corresponding months of 1909:

	1909	1910
January	$ 3,000.00	$ 24,585.00
February	3,065.00	25,255.00
March	78,395.00	329,850.00
April	71,675.00	307,205.00
May	90,325.00	397,070.00
June	121,650.00	255,318.00
July	51,300.00	305,030.00
August	166,929.00	130,505.00
	$586,539.00	$1,774,618.00

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—It is apparent that the Regina district has not suffered so much as the surrounding country, on account of the draught. Outside a thirty-mile radius a great percentage of the crops is burned up, while there is a great deal that has already been plowed up. Cutting is general throughout this district, and farmers are experiencing much difficulty in securing farm help.

Manufacturing.—The soap factory, Young Thomas, still continues to show an increased output, and maintains its position as being one of the most prosperous of local enterprises.

CONDITION OF PARTICULAR TRADES.

The bricklayers and masons were very active throughout the month; frequently the demand was in excess of the supply. All who struck on the New Legislative Buildings readily obtained employment in town. Carpenters and joiners were very busy, bench hands in the local factories being much in demand. Lathers and plasterers had a fairly good month and exceptional activity rested with the painters and paperhangers, the master painters finding it difficult to secure sufficient help. Plumbers and steamfitters had a fair month, and the stone cutters and builders' labourers were well employed. The electrical workers had a good month, as did the bicycle workers and jewellers.

Upholsterers and carriage and wagon makers were kept busy. In all branches of the printing and allied trades labour was well employed. There being a slight demand for electrotypers and bookbinders. The tailors and garment workers had a busy month, having improved over the preceding month. The custom tailors are to organize a branch of their international here, a meeting being called for two weeks hence. Bakers and butchers were well employed and report a good month. The cigar making industry has now installed their factory at Saskatoon, which was until recently in Regina. Barbers had a good month and are in demand. Clerks, stenographers and delivery employés were all active. Hotel and restaurant employés had a very active month; a demand steadily increasing, owing to the fact that a great percentage leave town to engage in harvest work, hence the demand. Commercial telegraphers were very busy, but complain of a dearth here, the demand being greater than the supply. Freight handlers were kept well employed, as also were the hackmen, draymen, teamsters and expressmen. The market is well supplied with unskilled labour.

MOOSEJAW, SASK., AND DISTRICT.

Mr. T. Backus, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour in all branches has been in good demand during the past month, activity in the building trades being exceptional, even for the time of the year. The demand for unskilled labour has also been very brisk. and there is every indication that, given favourable weather, those engaged in out-door work will enjoy a long season.

Good progress has been made with street paving, and more than half the season's programme has already been completed.

Ties for the new street railway are already on the ground, and the company expects to start construction very shortly. The site for the barns and power house has been purchased, and early in the spring, the railway, in all probability, will be in full operation.

The month just closed has been one of great activity in all departments of trade and commerce. The promise of good crops in the district has had a stimulating effect, and a good fall trade is anticipated.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—On the whole, the weather has been favourable to the ripening crops, and in this district there is every prospect of a good average yield. On the well-tilled land in the immediate vicinity of Moose Jaw, there will be some heavy crops of wheat, and other grains promise well. In the newer settlements, the crops are lighter and some of the newcomers will probably feel the effects of the dry summer. On the whole the 1910 crop, so far as this district is concerned, will be profitable to the farmers.

CONDITION OF PARTICULAR TRADES.

Bricklayers, carpenters, lathers, plasterers and builders' labourers have all been very active during the month. Painters and paper hangers have been in brisk demand. Electricians, wiremen and plumbers were all busy. Iron workers and machinists were steadily employed. Printers and allied trades have all been busy. Blacksmiths, boilermakers and horse shoers were active. Harness makers reported a busy month. Barbers, clerks, delivery employés, hotel, restaurant, theatre employés and laundry workers were very active. All branches of railway employment were active. Unskilled labour was in good demand.

CALGARY, ALTA., AND DISTRICT.

Mr. Edwin Howell, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market has been active during the past month,

more so than in the corresponding period of last year. There is little difference as compared with the previous month.

There is still a demand for unskilled labourers and plasterers, but a surplus of masons and stone cutters.

Excavations are nearly complete for Price-Jones departmental store; also for the new school between Tenth and Eleventh streets, which will cost $100,000.

The erection of a business block has been commenced by Sir John Langman, a British capitalist, to cost $75,000.

A representative of J. S. Fry & Sons, Bristol, Eng., one of the largest manufacturers of chocolates and cocoas of the world, was in Calgary, and stated the firm intends to open a wholesale house this fall, as a distributing centre for Alberta, and will erect a building in the near future.

Wholesalers and retailers report trade about the same as last month, but much better than at the corresponding period of last year.

This has been a record breaking year for the laying of sewers and water mains in Calgary, for already there have been 50,000 feet or over 8 miles of water mains put down, at a cost of $100,000, and about 10 miles of sewers, and still the work is being pushed ahead.

CONDITION OF PARTICULAR TRADES.

Bricklayers, carpenters, joiners, lathers, plasterers, plumbers, gas and steam fitters and builders' labourers had a good month. Painters, paperhangers, masons and stone cutters were dull. Sheet metal workers, iron moulders, iron workers and helpers, coremakers, machinists, engineers, electrical workers, linemen, blacksmiths, boiler makers, jewellers, were active. Carriage and wagon makers report satisfactory conditions. The other woodworking trades were moderately busy. The printing trades were busy. Journeymen tailors were active, butchers were active, and bakers and confectioners were busy. Miscellaneous trades had a good month. Railway employés were active. Street railway employés, teamsters and expressmen were busy. Unskilled labour was in demand.

LETHBRIDGE, ALTA., AND DISTRICT.

Mr. J. M. Ritchie, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of August was dull, considering the amount of work in sight at the commencement of the season. The supply of labour was more than the demand, and men were obliged to leave Lethbridge. The month has been little better than July. There has been activity in opening new coal mines west of Lethbridge, on the line of the Canadian Pacific Railway. A clearing house has been established in Lethbridge. There has been no unrest in labour circles during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farming is rather dull, owing to the dry season. The crops are better than was expected a month ago. The want of money is greatly felt amongst the new settlers, owing to crop failures, but faith in the future of this district is expressed on all sides.

Mining.—Coal mining is receiving much attention in this district. The established mines are running full time. For the west of Lethbridge, new mines are opening up, and large bodies of men are finding employment. Everything goes to show that this is to be a great coal district.

The McLean Stone Company, of Rocky Coulee, lying on the Old Man's river, between Lethbridge and Macleod, is supplying stone for some large buildings in Lethbridge. This stone is said to be of superior quality, and to harden with age. This will be one of the main industries of this district. Some thirty men are employed at the quarries, while twelve stone cutters are employed in Lethbridge. Masons say that the stone is better than the Calgary stone.

The coal shaft of the Lethbridge Colliers is down to the depth of 50 feet. About 150 men are employed at present.

A branch railway is surveyed and work on same started to connect with the Canadian Pacific Railway at Kipp, from a point a little the north-west of Diamond City.

CONDITION OF PARTICULAR TRADES.

Bricklayers have been very busy. Advertisements have appeared in local papers on several occasions for bricklayers. Masons have been very busy working at Rocky Coulee stone quarries lying between Macleod and Lethbridge. Carpenters have had a dull month. Joiners, in a few cases, have been busy putting in new shop fronts. Plasterers have been rather dull. Lathers have been dull. Plumbers and steam fitters also were rather dull. Building labourers were fairly well employed, owing to the bricklayers being busy, and concrete foundations being put down. Blacksmiths have been busy.

NELSON, B.C., AND DISTRICT.

Mr. A. B. Docksteader, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market throughout Kootenay district has been active, but somewhat quieter than in previous months, chiefly because of the LeRoi mine, at Rossland, B.C., having shut down, throwing about eighty men out of employment, and the Canadian Consolidated Mining and Smelting Company having reduced forces by about 200 men, at Moyie and Trail, or more properly speaking at the St. Eugene mines and the Trail smelter. Part of those men have been employed in other mines within this district, while the rest have scattered.

Bush fires are prevalent yet in several parts of the district, though no loss except to the lumber interests, has occurred this month. A considerable number of men are employed by the Provincial Government fighting these fires. As soon as the long-looked-for rain comes, they will be thrown on the labour market here. That force should fully supply the demand for the coming fall and winter, except for a small number of experienced bushmen that will be required by the various lumber companies that take out logs during the winter..

CONDITION OF LOCAL INDUSTRIES.

A. McDonald & Company, wholesale grocers, are erecting a new and commodious brick building in which to carry on their Nelson business, and expect to have it completed by the end of September.

The Sheep Creek district, adjacent to Salmo, B.C., continues to develop favourably, the Mother-Lode having struck rich free-gold ore in the lowest tunnel, at a depth of about five hundred feet, while the Queen and Nugget mines are regularly sending out gold bricks.

NEW WESTMINSTER, B.C., AND DISTRICT.

Mr. J. P. McMurphy, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions in and around New Westminster for the past month have been exceptionally good, and from present prospects will continue so for some time. Sheet metal workers are in good demand, and the supply is not equal. The City Council has let a contract to the Hassam Pavement Company for an extension of the Main street pavement; this work will give employment to a number of labourers. All classes of the building trades are busy, as is usual at this season. There is no change in the machinists' strike.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are busy with the oat crop which is larger this year than usual; if the present fine weather continues for a few days longer, the entire crop will be harvested.

Fishing.—Sock-eye fishing on the Fraser river, is about at an end for this year.

Lumbering.—Business in and around New Westminster still continues to flourish, and heavy shipments are being made, both by rail and water. The local demand remains exceptionally good, necessitating the mills running to their fullest capacity.

CONDITION OF PARTICULAR TRADES.

The building trades were active, but quietness prevailed in the iron trades. Steam engineers, electrical workers, linemen, blacksmiths, sheet metal workers and horse shoers were active. The woodworking trades were active. In the printing trades all were working, the supply being equal to the demand. The clothing trades were active, and the food and tobacco preparation, leather and miscellaneous trades were busy. Transport employés were active. At present there is no need for unskilled labourers, a number being out of employment.

VANCOUVER, B.C., AND DISTRICT.

Mr. Geo. Bartley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The state of the labour market continued similar to that of July. The strike of the machinists and engineers was still on, and the iron trades were very unsettled, but in other lines results came up to expectations. The reports of the conditions of the grain crops in the prairie provinces gave promise of activity in fall work. The weather continued very dry.

Several matters of importance to commercial and industrial circles were brought to the attention of the Right Honourable Sir Wilfrid Laurier, Premier, in addresses presented by officers of the Trades and Labour Council and the Board of Trade.

That a tendency has prevailed to draw men away from agricultural pursuits into manufacturing and mercantile occupations during the past few years has caused a shortage of men to till the ground in the adjacent districts.

The conference of mountain and coast millmen and prairie lumber retailers at Banff agreed to a reduction of the price of lumber to the wholesalers of the prairies by $2 per thousand. It was also agreed by both mountain and coast lumbermen that shipments to the prairies would consist of not more than twenty-five per cent. of odd lengths.

The bank clearings for the week ending August 25, 1910, amounted to $8,427,811; ending August 18, to $7,612,815, an increase of $814,996 over the previous week. For the corresponding period of 1909, they were $6,096,708; and in 1908, $3,691,403.

On August 10, were landed at the New England Fish Company's dock, over 900,000 pounds of halibut. The catch was made in four days.

The stock market in mining was characterized by a more active tone than had been apparent for some time.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Mr. W. E. Scott, Deputy Minister of agriculture in this Province, stated to the press: "The labour question in the fruit districts is becoming acute. It will have to be met fairly and squarely before long, as the labour scarcity is having the effect of keeping capital out of the Province. At the present time in many parts of British Columbia orchard labourers command $3 per day."

Fishing.—The season for sockeye fishing in British Columbia closed on August 24, and what was termed, as an "off season" is considered to have been a very fair one. The approximate pack was 549,000 cases, made up as follows:—

	Cases.
Naas river	30,000
Skeena river	180,000
River's Inlet	124,000
Fraser river	145,000
Other districts	70,000
Total	549,000

In 1909, the total pack was 840,441 cases, as follows:— Skeena river,

87,901 cases; Fraser river, 542,248; River's Inlet, 89,007; outlaying districts, 93,019; Naas river, 28,246 cases.

The northern canneries put up a full pack of sockeyes.

The Puget Sound canneries estimate a pack of 225,000 cases. Fishermen received 25 cents a fish .

Mining.—At Portland Canal activity prevailed.

Railway construction on the Pacific coast division of the Grand Trunk Pacific Railway is retarded through lack of white labourers, so say advices from the northern camps.

DISTRICT NOTES.

Prince Rupert.—The Grand Trunk Pacific Railway Company's bridge across the Zenardi rapids was completed. The bridge is the connecting link between the city and the mainland.

The City Council decided to temporary supplement the day labour system on public works by that of contract, because of the difficulty of securing Anglo-Saxon labour.

By a vote of 174 to 9 the ratepayers declared in favour of municipal telephones.

North Vancouver.—While real estate men complained of listless markets, the building trade was very active, and the lumber mills worked to full capacity.

Lulu Island.—A syndicate bought 160 acres of land at $450 an acre, total $27,000. It will be divided into small holdings. The crops were a success, and the farmers are building extensively.

NANAIMO, B.C., AND DISTRICT.

Mr. A. E. H. Spencer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

In this district labour in general has been well employed. The industries in this city and district worked full time and improvements are going on which have given employment to a large number of men not residents of the district. The coal trade has been exceptionally active and the mines in the district have worked steadily. Transportation has been heavy especially in the passenger branch. Wholesale and retail dealers report business active. There have been no changes in rates of wages or hours of labour.

There have been a large number of men employed during the month on sewerage and cement sidewalks in this city.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers of the district have been busy harvesting.

Fishing.—The fishermen of this district have not been active outside of supplying the local trade. The Whaling Station on the west coast is having a very successful season.

Mining.—The coal mines of the city and district have been working steadily, for this time of the year work has been exceptionally steady.

Railway construction is being pushed as fast as practical, as well as land clearing by the Canadian Pacific Railway Company for settlement.

Lumbering.—The sawmills of the district are working full time to keep up with the general demand for lumber. The logging camps are very active this summer.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons have been active. Carpenters and joiners have been exceptionally active, there being a large number of new buildings in the course of erection in this city and district. Lathers and plasterers have been active. The same applies to painters, paperhangers and plumbers. Builders' labourers have had a good month. Blacksmiths and carriage makers report work as active. Printers report work as active. Teamsters and expressmen have been busy. Unskilled labour has been well employed during the month.

INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907—PROCEEDINGS UNDER THE ACT DURING THE MONTH OF AUGUST.

DURING the month of August two appplications for the establishment of Boards of Conciliation and Investigation were received as follows:—

1. On behalf of the ship liners in the employ of the various shipping companies doing business at the port of Montreal, Que., the dispute directly affecting, it is stated, 200 employés;

2. On behalf of certain linemen in the employ of the British Columbia Electric Railway Company, the dispute affecting, it was stated, 50 employés.

Report Received.

During the month of August a report was received in the case of one dispute, that namely of the Toronto Street Railway Company and its employés.

Other Proceedings Under the Act.

In the application of the ship liners in the employ of various shipping companies doing business at the port of Montreal, Que., for the establishment of a Board of Conciliation and Investigation, the nature and case of the dispute related to wages and hours. The employés affected in this matter were described in the application as the ship liners of the port of Montreal. The number of employés directly concerned in the dispute was stated to be 200. A Board was established by the Minister on August 15, the same being constituted as follows:—Mr. J. Herbert Lauer, of Montreal, appointed on the recommendation of the employing companies; Mr. George Poliquin, Montreal, appointed on the recommendation of the employés; and Mr. W. D. Lighthall, K.C., Montreal, Chairman, appointed by the Minister, in the absence of any joint recommendation from the other members. At the close of the month the Board had not concluded its investigation.

In the application of the electrical workers (linemen) in the employ of the British Columbia Electric Railway Company, for the establishment of a Board of Conciliation and Investigation, the nature and cause of the dispute was stated to be a demand made upon the Company by the linemen for the removal of a certain foreman of linemen, arising out of threats of the foreman to "discharge all Englishmen and Canadians in the employ of the Company," and also due to attempts made by the foremen to reduce wages, contrary to the provisions of agreements in force between the Company and the employés. A Board was established on August 26, the following members being appointed: on the recommendation of the Company, Mr. Albert Edward Beck; on the recommendation of the employés, Mr. J. H. McVety; both of Vancouver. At the close of the month no recommendation for Chairman had been received in the Department. Early in September the Department received word that the dispute had been adjusted by the good offices of Messrs. Beck and McVety, and without the appointment of a chairman.

REPORT OF BOARD IN DISPUTE BETWEEN THE TORONTO STREET RAILWAY COMPANY AND ITS EMPLOYÉS.

THE Minister of Labour received on August 20 the report of the Board to which was referred for adjustment certain matters in dispute between the Toronto Street Railway Company and its employés, arising out of a disagreement on the schedule of rules and rates of pay to take the place of the three years' agreement which expired on June 16. The number of employés affected in this case was estimated at 1,300 males over 21 years of age. The report was signed by the three members of the Board, namely: His Honour Judge Barron, of Stratford, Ont., Chairman; Mr. J. P. Mullarkey, of Montreal, Que., appointed

on behalf of the Company; and Mr. J. G. O'Donoghue, of Toronto, Ont., appointed on behalf of the employés, and was to the effect that a satisfactory settlement of all points at issue was concluded on August 16, a schedule of rules and rates of pay embodying the agreement being signed by the representatives of the Company and of the empolyés respectively. A copy of the schedule was embodied in the Board's report, the same to be effective from the sixteenth day of June, 1910, and to remain in force for two years from the above mentioned date. The new schedule of wages provides for increases as follows over the rates formerly prevailing: to motormen, conductors, and motor and truck repair men, in the first year of service, from 20 cents to 21 cents per hour; in the second year, from 22 cents to 23 cents; in the third year and after, from 23½ cents to 25 cents, to shed men-foremen, from 23 cents to 25 cents per hour, assistants, from 21 cents to 22 cents per hour; to car washers, from 20 cents to 21 cents per hour.

The Board expresses in its report its appreciation of the spirit of fairness exhibited by the parties to the dispute and of the deep sense of responsibility which each side felt that it owed to the city of Toronto. It was the opinion of the Board that the final acceptance of the award was due to the large concessions made in the interests of the public by the President and officers of the Company on the one side, and their employés on the other. Referring to a critical period in the inquiry, the Board also states: "It was then that the respective sides began preparations, one to order a strike, the other to meet it. In fact, both sides at this point kept calling for the award, eager to quickly meet the consequences which were then believed to be inevitable. It was at this critical moment that the splendid advantages of conciliation were most apparent."

Letters of Congratulation.

The Chairman of the Board received numerous letters of congratulations on the successful issue of the Board's efforts, including a letter from the Mayor of Toronto. The communications exchanged between the Mayor and the Chairman of the Board were as follows:—

"His Honour Judge Barron, Stratford,

"Dear Judge Barron,—The People of the city of Toronto were so vitally interested in the question of strike or no strike on the Toronto Railway Company's system that the news of the settlement of the difficulty in that regard was more than gratifying to the citizens and the municipal corporation. May I express my warm appreciation of your splendid efforts in these difficult negotiations, and may I compliment you on the success which attended those efforts. I am sure that I only voice the feelings of all the citizens when I say that we fell greatly indebted to you and your colleagues on the Conciliation Board. You have rendered services which have destroyed the possibiilty of a state of affairs arising which would threaten the prosperity of the city and the comfort of the citizens, and at this particular moment the success of the Exhibition.

"Again with thanks and every assurance of appreciation, I am, dear sir, yours very truly,

G. R. GEARY,
Mayor.

REPLY.

"Judge's Chambers, Stratford, August 24, 1910..

"My dear Mr. Mayor:

"I have just received your kind letter of the twenty-second instant, and I thank you for it. I rejoice with you and the citizens generally that a strike, with all its cruel and bitter consequences, has been averted, but you must permit me to say in all sincerity that in the proceedings which prevented it my own part was a minor one.

"It is easier to ask than to give. It was the Board's duty to ask, while it was the privilege of the Company and its employés to give, and owing to the generous forbearance of the two principals on matters which to them seemed so absolutely essential, they are entitled

to the chief credit for the happy result. Whenever confronted with the possible consequences to the public by being too insistent in their demands, the men would hesitate and waver, thus showing that they were properly regardful of the interest of the citizens, and in justice to Mr. Mackenzie and Mr. Fleming I must state that not further off than ten minutes before our report was signed, they, appreciating the importance of a peaceful solution, magnanimouly changed their attitude in regard to a matter most important to the Company, and thus at the last minute saved the situation.

"Then let me add that when the work of the Board was all over there yet remained for Mr. O'Donoghue, the critical task of convincing 1,500 men—many of whom I know were intensely dissatisfied—that they should accept the award and depart in peace. He was splendidly successful, as you know, and to him therefore is due all the credit for the pacific ending of the Board's labours. If I never lost confidence—and I think I never did—it was because of the deep concern plainly manifested by all parties for the comfort and welfare of the Toronto citizens.

"Believe me, dear Mr. Mayor, Yours very truly, (Signed) John A. Barron.

The Mayor of the city of Toronto."

FINDINGS ACCEPTED.

The Department subsequently received word that the findings would be acceptable to each party as a settlement of the dispute.

Text of the Report.

The full text of the report of the Board is as follows:—

In the matter of the Industrial Disputes Investigation Act, 1907, and Amendments thereto, and of disputes between The Toronto Railway Company, employers, and The Toronto Railway Employés' Union No. 113, employés.

The Board of Concilitaion and Investigation appointed by the Honourable the Minister of Labour, in pursuance of a recommendation of the parties immediately concerned, and under and in pursuance of the said Act and of its various Amendments, to consider and settle the said disputes, having taken upon itself the full burden and responsibility of investigating and endeavouring to settle the same, have made an expeditious and careful inquiry into all matters affecting the merits and the right of settlement thereof, and respectfully report to the Honourable the Minister as follows:—

The said Board sat for several days hearing the various statements advanced on behalf of the employers and employés and in receiving from them a large mass of documentary and other information in support of their respective views covering the disputes in question, and in this and other ways have endeavoured to fully and carefully ascertain all the facts and circumstances in connection with the said disputes.

2. They furthermore report that the findings of the Board including its findings of the cause of the said disputes and the Board's recommendations for the settlement thereof, according to the merits and substantial justice of the case, are embodied in a proposed agreement hereinafter set forth *in extenso* and marked "A", which agreement, dealing as it does with each item of the dispute, contains what, in the unanimous opinion of the Board ought to be done by the respective parties concerned.

A strike has undoubtedly been averted. In obedience to the Statute in that behalf, every effort was made by the Board to induce the parties to mutually end their said disputes and thus come to a satisfactory agreement; and it is properly due to the parties concerned to say that each disputant realized the importance of this and diligently worked to that end by making concessions each to the other until a point was finally reached when further concessions on either side seemed utterly hopeless. It was then that the respective sides began preparations, one to order a strike, the other to meet it. In fact, both sides at this point kept calling for the award, eager to quickly meet the consequences which were then believed to be inevitable. It was at this critical moment that the

splendid advantages of conciliation were most apparent. The President of the Toronto Railway and the employés met with the result that further conditions were waived and further concessions made by each side to the other.

It is just to the disputants to say that neither party ever overlooked the public interest; that the result of the negotiations had been mainly achieved from a deep sense of the responsibility each side felt that it owed to the City of Toronto, and the Board report that if this award is finally accepted it will be because the President and Officers of the Company on the one side, and their employés on the other, have mutually made large concessions in the interests of the public.

All of which is respectfully submitted.

Dated at Toronto this twentieth day of August A.D. 1910.

(Sgd.) John A. Barron,
Chairman.

J. P. Mullarkey,
For the Company.

J. G. O'Donoghue,
For the Employés.

(Schedule "A" referred to in the foregoing report and made part and parcel thereof.)

"A"

An agreement made this eighteenth day of August A.D. 1910, between the Toronto Railway Company, hereinafter called "the Company", and A Committee of the employés of the said Committee, appointed at a meeting open to all the employés of the Company, hereinafter called "the Committee."

Whereas, a certain agreement bearing date the thirteenth day of July A.D., 1907, entered into between the Company and a Committee of the Employés of the said Company, appointed at a meeting open to all the employés of the Company, held on the eleventh day of May, 1907, has expired by effluxion of time, and it is in the interest of the parties hereto that a new agreement should be entered into, whereby their mutual interests may be ascertained and fixed for the period of this agreement, having in mind as a first consideration, the service of the Toronto Railway Company as a public utility, and these presents are intended to carry out such a purpose.

Therefore it is agreed as follows:—

First.—All matters in dispute between the Company and its employés are hereby settled.

Second.—The wage schedule shall relate back and be in full force and effect on and from the sixteenth day of June, 1910, until the end of the term of this agreement, and shall be as follows:—

Motormen and conductors:

For first year	21 cents per h
For second year	23 "
For third year and after	25 "

Shed men:

Foreman	25 cents per h
Assistant	22 "
Car washers	21 "

Motor and truck repair men:

For first year	21 cents per h
For second year	23 "
For third year	25 "

Third.—The term of this agreement shall be for two years from the sixteenth day of June 1910.

Fourth.—The Company will pay half the cost of the uniforms of the motormen and conductors who have been in the Company's service for a period of one year, and will provide free uniforms for motormen and conductors who have been in the Company's service for a period longer than two years, it being the understanding that no employé shall be required to pay for more than one uniform and a half. Regulations from time to time will be made by the Company to provide for protection against loss in this matter, from employés leaving the Company's service.

Fifth.—The following regulation is agreed upon as to discipline: Any employé against whom charges may be received will be required to report when off duty to the Superintendent. His case will then be considered by the proper officials

of the Company and will be dealt with upon the following principle: For minor cases he is to be warned. For serious cases, including drunkenness, drinking in uniform or drinking on cars, destruction of property, accidents through carelessness or neglect, missing fares through neglect, or carrying friends free, using stools on portion of route not allowed by Company, incivility to passengers and profanity on cars, he may be suspended or dismissed at the discretion of the proper official.

Sixth.—Any employé against whom any charges may be received shall have the right of appeal in person to the General Superintendent, and, except as to a charge of dishonesty, may bring with him in his interest a deputation or any committee of his fellow employés.

Attendance in such capacity shall not operate to an employé's disadvantage. An employé standing on such deputation or committee, shall give due notice to his car-starter, or foreman, and, if he be a motorman or conductor, shall take his car upon reporting to his car starter and shall not be required to report in the usual course to the Head Roadmaster.

Seventh.—The Company will provide seats for motormen upon closed cars, and will also proivde seats for motormen upon open cars, if a fixed seat of a pattern which will not interfere with the public can be obtained. In the event of it being found impossible by the Manager to obtain a satisfactory fixed seat, motormen to be allowed to provide and use uniform portable stools of design to be approved of by the Manager, for open cars, provided such stools can be used without interfering with the use of the front seat of open cars by the public. Motormen to have the right to use such seats upon certain portions of the line, notice of which will be subsequently issued by the Company.

Eighth.—Having due regard to all the conditions of the service the Manager undertakes that the schedules will be so arranged that the hours worked on the cars will be put in within the least number of hours as in his opinion will be considered practicable and consistent with the service performed by the Company. Provided, however, that nothing herein contained shall be taken to vary, alter or modify any of the terms or conditions mentioned in certain contracts between the City of Toronto and the Toronto Railway Company dated September 1, 1890 and March 26, 1897.

It is understood that the Company reserves its right to vary the schedules for Sunday work and allot the time to motormen and conductors in whatsoever manner may be considered by the Management to be in the interests of the services to be performed to the public; and it is agreed that regular and relief men shall, as heretofore, be paid for Sunday runs the time scheduled to them on the board for their week-day runs, excepting where such time is exceeded on Sunday, in which case they shall be paid *pro rata* for the actual time they work on Sunday. But taking into consideration the necessities of the service to the public and the interests of the Company, the Management will arrange the Sunday schedules to conform as nearly as possible to an eight hour day basis.

Ninth.—The Company, will, upon application to the car-starter or foreman, give leave of absence to employés for a reasonable period of time when their services can be spared, and in the event of the refusal of the car starter or foreman, the matter to be settled by the Superintendent.

Tenth.—The Company will not discirminate against employés by reason of their being members of any organization.

Eleventh.—On the lines where no office of the Company is passed, or close by, an officer of the Company will collect and exchange fare boxes at points appointed for the purpose.

Twelfth.—It is understood that only the men in the shops required for the necessities of the service shall be compelled to work on Saturday afternoons, excepting, when in the opinion of the Management, the services of all the men, or any of them, are required on Saturday afternoon to meet the necessities of the business.

Thirteenth.—Tools necessary for work in the motor shop shall be supplied em-

ployés. The men shall not take tools away from the shops, and shall be responsible for breakages or loss occasioned by their negligence, and must return said tools in good condition; in default of doing so, they must pay for same.

Fourteenth.—The men in the Motor Shop and its branches shall be given five minutes in which to wash before leaving work, and any employé abusing this privilege, in the opinion of the Management, shall be subject to dismissal.

Fifteenth.—The General Superintendent or Manager shall receive a Committee of Employés at any reasonable time to discuss any matters arising out of this agreement.

Sixteenth.—All rights, privileges and immunities now enjoyed by, and obligations of, the employés shall continue.

Seventeenth.—All cars shall be properly equipped before being taken out each morning; but this shall not relieve any conductors from his obilgation to see that his car is properly equipped.

Eighteenth.—The change slip pertaining to the fifth off-day shall be discontinued and men who are entitled to five off-days per month shall be allowed the same.

In witness whereof the parties hereto have executed these presents.

Dated at Toronto,
This 18th day of
August, A.D. 1910

MISSION OF THE MINISTER OF LABOUR, CANADA, TO EUROPEAN CONFERENCES ON SOCIAL REFORM.

ON August 16, the Honourable W. L. Mackenzie King, Minister of Labour, left Ottawa for Europe, for the purpose of attending several international conferences on important questions of social reform. Orders-in-Council deputing the Minister of Labour as the representative of Canada at the conferences in question had been previously passed.

The conferences which the Minister will attend are as follows: International congress of social insurance, to be held at The Hague, September 6 to 8; a congress representing higher technical education, to be held at Brussels, September 9 to12; international conference on unemployment, to be held at Paris, France, September 2 to 21; Congress of the International Association for Labour Legislation, to be held at Lugano, Switzerland, September 26 to 28, at which will be specially discussed the question of the eight-hour shift in uninterrupted processes and the question of a minimum wages policy in connection with home work.

Invitations to the congress on social insurance, unemployment and higher technical education were received from the governments of the countries in which the conferences will be held, having been transmitted through the Royal British Embassies and the Colonial Office.

Copy of Order in Council.

A copy of the Order-in-Council appointing the Minister of Labour as the representative of Canada at the congresses on social insurance, unemployment and labour legislation, is as follows:—

Certified copy of a Report of the Committee of the Privy Council, approved by His Excellency the Administrator, on the 11th June, 1910.

On a Memorandum dated June 9, 1910, from the Right Honourable Sir Wilfrid Laurier, stating that a communication has been received from the Minister for the Netherlands at the Court of St. James, which has been transmitted in the form of a despatch from the Right Honourable the Secreatry of State for the Colonies, under date the nineteenth May, 1910, in which an invitation has been extended to the Government of Canada to be represented at an International Congress of Social Insurance, which is to be held at The Hague, from September 6 to September 8, 1910.

The Minister further states that a communication has also been received from the Ambassador for France at the Court of St. James, which has been transmitted

in the form of a despatch from the Right Honourable the Secretary of State for the Colonies, under date the twenty-eighth April, 1910, in which an invitation has been extended to the Minister of Labour of Canada to attend an International Conference on the subject of Unemployment, which is to be held in Paris, France, from September 18 to September 21, 1910.

That a communication has been received from the President of the International Association for Labour Legislation, by the Minister of Labour, in which an invitation has been extended to the Government of Canada to appoint a delegate to attend the Sixth Delegates' Meeting of the International Association for Labour Legislation, which is to be held at Lugano, Switzerland, from September 26 to September 28, 1910, at which the question of the eight hours' shift in uninterrupted processes, and the question of a minimum wages' policy in connection with home work, are to be discussed.

The Minister is of opinion that it is desirable that Canada should be represented at these important International gatherings, and that the invitations above mentioned should, for this reason, be accepted.

The Minister recommends that the Honourable W. L. Mackenzie King, C.M.G., M.P., Minister of Labour of Canada, be named as the representative of Canada to attend the above mentioned Conferences.

The Committee submit the same for approval.

(*Signed*) F. K. BENNETTS,

Assist. Clerk of the Privy Council.

An Order-in-Council to similar purport was passed deputing the Minister of Labour to attend as the representative of Canada, the Congress on Higher Technical Education, to be held at Brussels, Belgium.

FURTHER DECISION BY PERMANENT BOARD OF CONCILIATION IN DIFFERENCES BETWEEN MONTREAL SHIPPING COMPANIES AND LONGSHOREMEN.

THE issue of the *Labour Gazette* for August contained a statement of proceedings incident to a reference before the permanent Board of Arbitration established as part of the adjustment in April last before a Board of Conciliation and Investigation established under the Industrial Disputes Investigation Act 1907, of differences between the various Shipping Companies of Montreal and longshoremen in their employ. The award of the permanent Board was dated July 7, and was unanimous in nature, being signed by Mr. Farquhar Robertson, ex-President of the Board of Trade at Montreal, as Chairman, Mr. G. R. Brunet, of the Typographical Union of Montreal, as representing the longshoremen, and Mr. J. Herbert Lauer, Secretary-Treasurer of the Builders' Exchange of Montreal, as representing the Shipping Companies.

The Department has since received a statement of a second reference, the award in which bears date of July 29, and which was again signed by the three members of the Board. The text of this second report of the Board is as follows:—

Board of Arbitration in re-: Complaint submitted by the Elder-Dempster Company, Limited, (one of the constituent parties of the shipping federation) versus the syndicated longshoremen.

The Board having heard evidence submitted to it as per the Minutes hereto attached, after due and careful consideration, awards the following decision:—

1. In the specific case of the SS. "Canada Cape," the refusal to work by the men forming part of the gang on the wharf was unjustified. The loss of time caused to the Shipping Company by this refusal must therefore be borne by the Longshoremen's Union, if these five men are members thereof; if non-members, to be borne jointly and severally by these five individual men. The cost is fixed as: Loss incurred by gang of fifteen men, time three hours, equalling forty-five hours at thirty cents, or $13.50 (Thirteen 50–100 Dollars.)

2. The claim that the term "gang" does not include the foreman is not borne out by the evidence. The Board draws attention to the misuse of the word "foreman," this officer being correctly designated in other ports as the "ganger", the Board is of opinion that the same term should apply to the Port of Montreal.

3. The indefinite wording of Clause 8 of the agreement has been exhaustively considered, and the Board awards: That the distribution of the gang must be left to the officer in charge of the boat, but recommends that moderation and discretion be exercised. The number of men in the hold, according to evidence may be automatically increased or decreased, according to the character of the cargo. No evidence has been shown that same should be definitely fixed at eight men. The Board feels that friction might be easily avoided by placing additional men on the wharf (for trucking) in the case of long hauls from the sheds, which is hereby recommended.

4. In the case of alleged grievances, and previous to the serious step of the men going on strike, or the Companies suspending work on their Boats, it shall be necessary for either party to first make a formal statement of their grievance to the Superintendent, or "Walking Boss"; and in no case shall such strike or suspension occur before first submitting the alleged grievance to the Board of Arbitration and awaiting their prompt decision.

5. The statement having been made in the Press that the Longshoremen's Union were dissatisfied because witnesses hitherto had not been examined under oath, the Board desires to express its entire willingness to have sworn evidence, if mutually requested by both parties hereto. The Board at the same time would remind such objectors of the additional expense incurred by stenographers, etc., in the matter of sworn testimony, and that the Union would naturally have to shoulder its proportion of such expense.

6. The Board having regard to the conflicting character of Clause 8 of the award, has decided that the Statutory fees of this inquiry shall be borne one-half by each of the parties hereto. The specific charge defined in Clause 1 of the present award is of course excepted.

In conclusion the Board earnestly hopes that both on the part of the Shipping Companies and the Longshoremen, the award of the Conciliation Board will be interpreted in a spirit of mutual good will and forbearance. The exercise of a little common sense and discretion on both sides would go far to avoiding a number of petty complaints.

It is again with pleasure that the Board reports the present award to be a unanimous one on the part of the three arbitrators appointed.

(Sgd.) FARQUHAR ROBERTSON,
Chairman.

J. H. LAUER,
Representative of the Longshoremen.

G. R. BRUNET,
Representative of the Companies.

Board of Trade, Montreal, July 29, 1910.

RESOLUTIONS OF THE DOMINION LEGISLATIVE BOARD OF THE INTERNATIONAL BROTHERHOOD OF LOCOMOTIVE ENGINEERS TO BE DISCUSSED WITH THE BOARD OF RAILWAY COMMISSIONERS OF CANADA.

AT a meeting of the Dominion Legislative Board of the International Brotherhood of Locomotive Engineers, held at Ottawa, Ont., in March last, certain resolutions were adopted looking to the improvement of conditions of employment for this class on Canadian railways. A letter embodying the resolutions in question was addressed to the Board of Railway Commissioners of Canada, under date of April 8, 1910.

During the month of August it was announced by the Board of Railway Commissioners that the matter will be

discussed at the sittings of the Board to be held in Ottawa, on Tuesday, November 1, 1910, and that the matter will, therefore, be placed on the November operating list of the Commissioners, for that date.

A copy of the letter containing the requests of the engineers is as follows:—

Resolutions Submitted.

OTTAWA, ONT., April 8, 1910.

To the Honourable, the Chairman and Board of Railway Commissioners.

Gentlemen,—

At the recent session of the Dominion Legislative Board of the International Brotherhood of Locomotive Engineers, held in Ottawa, March 29 to April 2, inclusive, the following resolutions were unanimously adopted, and the Legislative Representative instructed to place them before your Honourable body for your most earnest consideration.

No. 1.—That sign-boards be placed at the side of the railway track defining the limits of cities, towns and villages, for the guidance and information of the men in train service.

No. 2.—That owing to the liability of accident and the exposure to the severe cold during our winter season, that a law be enacted preventing the running of locomotive tender first beyond a distance of ten (10) miles, except in cases of emergency.

No. 3.—That a law be enacted requiring all railway companies in Canada to equip their locomotives with power headlamps and air bell-ringers.

No. 4.—That, recognizing the many dangers and the liability of accident in running over portions of the railway unknown to the engineer, that a practical and competent engineer familiar with the road about to be run over, be placed upon the locomotive, in addition to the regular engine crew.

No. 5.—That, owing to the very fatiguing nature of our occupation, and the constant demand for vigilance neecssary for the faithful performance of our duties as locomotive engineers in handling the commerce of the country and the lives of its citizens, it therefore follows that we would be provided with clean, comfortable and sanitary quarters where we may be assured of uninterrupted repose and quiet in order to prepare ourselves for our important duty.

Many terminals, we regret to say, are absolutely unprovided for in this respect. As a class we do not desire to patronize or frequent places where intoxicants are sold, and we therefore ask that the railway companies be required to establish suitable quarters at all terminals, as above mentioned.

No. 6.—That owing to the absence of land marks in many of the localities in which our men are employed, and as a guide to inform them of their exact whereabouts in approaching stations, it was unanimously decided to recommend to your honourable body that a large signboard be placed one mile outside of yard limit.

No. 7.—That the matter of the removal of all snow-cleaning devices from locomotives, which was referred to your honourable body in 1908, be again brought to your attention, as we are firmly of the opinion that such devices should have no place on locomotive, with the exception of the steel pilot plough now used by the Canadian Pacific Railway Company in the mountain districts of British Columbia. These ploughs do not project above the buffer-beam, nor do they touch the rail, and are considered a reinforcement to the pilot.

No. 8.—That we respectfully request the Board of Railway Commissioners to take such action as they may deem advisable to have suitable inspection supplied for all wooden bridges.

No. 9.—That the attention of the Board of Railway Commissioners be called to the fact that many of the modern engines now being built and used in Canada are totally devoid of comfort or convenience for the men who are obliged to spend the greater part of their time on them. Everything is apparently sacrificed in order to make them as huge and powerful as possible. As most of them carry at least 200 lb. pressure per square inch, it means that the men who handle them are separated by only a few inches from a temperature of 387 degrees of heat.

To get into position to handle these monsters, the engineer is obliged to climb over obstructions in the shape of different parts of the equipment, and wedge himself in the narrow space between the side of the cab and the boiler. Should the engine run off the track and turn over, the engineer has not the slightest chance of escape and would likely be crushed and scalded to death.

Further, that we respectfully ask the Board that they give this matter their most earnest consideration, and endeavour to place some limit on the size of boiler and cab that will allow for ample room and breathing space. The appliances for operating the engines are not infrequently placed in such very awkward positions that the engineers are at a disadvantage in cases of great emergency.

Water-glasses, steam-guages, air-guages and lubricators, which require almost constant observation, are often found so inconveniently located that the engineers attention is too long diverted from the track and signals.

No. 10.—That owing to the unclean condition of the working parts, especially that portion under the boiler and between the frames, and the liability to accident by the engineer in attempting to crawl under the engine between the wheels, to inspect his locomotive, the Board recommends that the engineer be held responsible only for such defects as may be reasonably detected from the outside, and in addition to the inspection by the engineer, the engines shall also be inspected by a competent inspector at all railway terminals, and the enigneer not held responsible for any defects which the inspector may find.

No. 11.—The Board was of the opinion that as the safety of life and property depends upon the sight and judgement of the men who guide the traffic, and having practical knowledge of the inability, under certain conditions, to obtain more than a partial view of the track and signals, such protection should be afforded as would enable the engineer to, at all times, have a clear and uninterrupted view ahead. Having examined a model of the "Quirk Storm Guard or Protector," and heard the endorsement of one who had used it, they were unanimous in the proposal of recommending to the management of the several Canadian railway companies a trial of the "Protector."

The patentee, Mr. T. J. Quirk, 183 East Front street, Dunkirk, N.Y., will be glad to furnish sketches, or any information desired.

No. 12.—That owing to the fact that not infrequently an employé of the railway company is injured through no fault of his own, and the railway company's officials eventually refer him to their claims-agent, who usually requests the employé to wait until such time as his is completely recovered before making a settlement, thus requiring him, in many cases, to become indebted for the necessities of life for himself and family. The Board therefore agree unanimously to request that monthly payment of a sum at least equal to that which he would have earned, should be made to injured employés.

All of which is respectfully submitted.

(*Signed*) C. LAWRENCE, *Chairman.*

(*Signed*) BYRON BAKER, *Secretary.*

ROYAL COMMISSION ON INDUSTRIAL TRAINING AND TECHNICAL EDUCATION—WORK ACCOMPLISHED DURING AUGUST.

THE Royal Commission on Industrial Training and Technical Education continued its work in the Maritime Provinces during August following the itinerary published in the August issue of the *Labour Gazette*, and in addition visited Chatham, N.B., on August 26, and St. Catharines, Ont., and Paris, Ont., on August 30 and 31. Industrial conditions in the Provinces of Prince Edward Island and New Brunswick were fully investigated and some towns in the Province of Nova Scotia not covered in July were visited during the month. The cordial reception which had been given to the Commission during its progress through Nova Scotia, as recorded in the statement for the preceding month,

was repeated in the Provinces of New Brunswick and Prince Edward Island, the assistance, and in many instances, the hospitality of representative citizens and municipal officials was continued throughout the tour.

During the first few days of August the work of the Commission took it to Sydney, Glace Bay, North Sydney and Sydney Mines, where a thorough investigation of the mining and steel industries which have been developed in these districts, was made; at the same time considerable attention was paid to the industries of agriculture and fishing, evidence being taken as a rule from leading citizens and officials prominently connected with the enterprises indicated. At Sydney the Commission was tendered a public banquet which was attended by the leading citizens and at which there were numerous expressions of satisfaction at the establishment of the Commission and at the work accomplished to date. On August 4 the Commission visited the summer school at Antigonish and paid special attention to the work of the University of St. Francois Xavier. On the evening of August 6 the Commission reached Charlottetown, P.E.I., where they were met on landing, by Premier Haszard, who welcomed the members of the Commission to the island Province, placed the legislative chamber at its disposal during their stay in the Capital, and personally attended the sessions held at Charlottetown and at Hillsboro. Premier Haszard also presided at the civic exercises held in connection with consolidated school at the latter place. In his address of welcome at the opening session at Charlottetown the Prince Edward Island Premier expressed the great satisfaction of the people of the Island with the establishment of the Commission, both as to its membership and its objects. The name of the Chairman, Dr. Robertson, was in his opinion a sufficient guarantee that the investigations of the Commission would be thorough and the outcome practical and helpful. The Commission held a session at Summerside, P.E.I., on the 10th of August. Returning then to the mainland, Amherst, N.S., and Springhill, N.S., were visited, after which points in the Province of New Brunswick were taken up, beginning with Sackville on the afternoon of the 12th instant and proceeding to Moncton, the headquarters of the Intercolonial Railway, where two days were spent, namely, August 15 and 16. Sussex and Hampton were visited on August 17. At St. John three days were spent, from the 18th to the 20th. Fredericton, Woodstock and Chatham were then taken in turn, the Commission closing its tour of New Brunswick at Chatham on the 26th instant. The first session of the Commission at St. John was attended by Premier Hazen of New Brunswick, who cordially welcomed the Commission to that Province and placed the legislative chamber in Fredericton at its disposal during any sessions it might have at the Capital. On a later occasion at a luncheon tendered the Commission by the Mayor and President of the Board of Trade at St. John, Premier Hazen expressed his pleasure at the action of the Dominion Government in appointing the Commission.

A brief summary of the work of the Commission in the Maritime Provinces from July 18, the date of its first session, to August 26 shows the Commission to have been 33 days on tour and to have visited during that time 33 towns and cities. Nearly 400 witnesses have been examined, whose evidence, when typewritten in full, will cover 1,000 foolscap pages. On leaving New Brunswick the Commission proceeded to Toronto to be present in that city during a portion of the first week of the Canadian Industrial Exhibition, also to hold sessions at points in Ontario as above noted. The members of the Commission are to be the guests of the Directors of the Exhibition at the luncheon on September 1, Manufacturers' Day.

It has been found necessary to make some change in the itinerary for Ontario and Quebec as originally planned and as printed in the August issue of the *Labour Gazette*. Owing to the number of places which it was felt desirable the Commission should visit in the Province of Ontario, and with a view to covering the ground as quickly as possible, it was decided to di-

vide the Commission into two sections during the early weeks of September, one of these sections, that covering Eastern Ontario, to be under the Chairmanship of the Honourable J. N. Armstrong, and that covering Western Ontario to be under the Chairmanship of the Reverend Dr. Bryce. Dr. Robertson, Chairman of the Commission, had been compelled to leave the Commission at the close of its tour in New Brunswick in order to carry out some private engagements in Newfoundland, his intention being to rejoin the main body of the Commission about the middle of September. The itinerary of the Commission for Ontario and Quebec as rearranged is as follows:

St. Catharines	August 30.
Paris	August 31.
Collingwood	September 6.
Woodstock	September 12.
Goderich	September 13.
Listowel	September 14.
Owen Sound	September 15.
Barrie	September 9.
Orillia	September 10.
Lindsay	September 12.
Oshawa	September 13.
Cobourg	September 14.
Cornwall	September 15.
Smith's Falls	September 16.
Ottawa	September 26-27.
Brockville	September 28.
Kingston	September 29-30.
Belleville	October 1.
Peterboro	October 3.
Toronto	October 4-5.
Hamilton	October 6-7.
Niagara Falls	October 8.
Brantford	October 10.
Galt	October 11.
Guelph	October 12-13.
Berlin	October 14.
Stratford	October 15.
London	October 17-18.
St. Thomas	October 19.
Chatham	October 20.
Windsor and Walkerville	October 21-22.

The Commission intends to visit Toronto a second time after its return from the Western Provinces. It will then receive testimony at greater length from those who may be arranged with, by local committees to come before it, representing educational institutions, the various industries and workers.

Montreal	September 19 and 21.
Macdonald College	September 20.
Quebec	September 22-23.

In addition to the above, other places in the Province of Quebec will be visited after the Commission returns from the Western Provinces. As in the case of Toronto, a second visit will be made to Montreal, to receive fuller testimony from those who may be arranged with to to come before it, by local committees, representing the educational institutions, the various industries and workers.

REPORT OF THE MASSACHUSETTS COMMISSION ON THE COST OF LIVING.*

A state commission was appointed in Massachusetts on February 28 of the present year, for the purpose of inquiring into the causes of the increased prices of the necessaries of life, as compared with wages and income, and into the direct and indirect effect of the tariff upon wages, income and cost of living. The report of the commission, which has recently been published, forms an important contribution to the literature on the subject of the cost of living. While the Report deals more particularly with conditions prevailing in Massachusetts, a broad survey of the whole question is taken, thus rendering many of the opinions and recommendations expressed therein capable of a general application.

Scope of Inquiry.

As a basis of comparison, price statistics of the principal commodities are given for the United States, Canada, France and Germany, and it is shown

*The findings and recommendations of this Commission are given in full in the July issue of the *Labour Gazette*, page 115.

that there has been a parallel movement of wholesale prices in England and America since 1840, the differences between the two countries from year to year being readily explained by local circumstances. It is remarked that the advance in prices in Canada in 1909, over the average for the years 1890-99, is 38.6 per cent., whereas the advance in the United States was 21.3 per cent. The difficulties in arriving at a correct estimate of prices are pointed out, owing to the fact that in some products a deterioration of the quality has taken place instead of an increase of price, and that prices of a similar article vary greatly in different localities. Statistics of wages and yearly earnings are given, which show a correspondence between the rise and fall of wages and the rise and fall of prices, but variations in wages, as a rule, lag a year behind the variations in prices.

The factors which tend, or are thought to tend, to an increased cost of living are discussed in detail. These are grouped under the headings, Social Wastage, Individual Wastage, Changes in Supply, Changes in Demand and Changes in the Value of Money. The forms of social wastage which have led to higher prices comprise war, cost of government, crime, pauperism and insanity, accident and disease, waste from fire, unemployment, and a faulty system of education. The forms of individual wastage comprise drink, luxury, amusements and domestic waste. Under the heading of Changes in Supply are discussed the drain of population from the land, the exhaustion of natural resources, transportation methods, advertising, adulteration, package goods and short weights, the tariff, trusts, trade unions and the cost of labour. The changes in demand are brought about by movement of population, the rise in the standard of living, and extravagance.

Effects of Increase of Cost of Living.

It is claimed that the advance in prices has brought some gains to producers, while it has inflicted hardship on consumers. Rising prices stimulate business and avert prolonged industrial depression. On the other hand, they promote a reckless speculative spirit in business circles and inflict a hardship on wage-earners and salaried persons, whose incomes do not rise proportionately. The consequences are a tendency to reduce the standard of living among these classes, which is overcome by the influx of women into the field of commercial employment, and by the limitation of the size of families.

QUEBEC LEGISLATION AFFECTING LABOUR.

THE Statutes passed by the Legislature of the Province of Quebec, during the session of the earlier months of the present year, were recently issued, and a copy received at the Department of Labour. The following is a brief review of the more important Acts affecting labour which received the Royal assent:—

Establishment of Employment Bureaus.

The establishment and maintenance of employment bureaus in cities and towns is authorized by special statute. The control of such bureaus is vested in the Minister of Public Works and Labour. Each bureau is to have a separate superintendent, who is to receive a salary of not more than $1,000 a year, and who is to report annually when required to do so. The engaging of the necessary subordniate employés is also provided for. The purpose of the bureaus is to enable workmen, who are British subjects or born in Canada and who reside in the Province, to register their names free of charge; employers requiring the services of workmen may also register applications free of charge; and the two will in this way be brought together. Bureaus under the control of private persons must be licensed and held subject to inspection by the Factory Inspectors, and must report as required by the Minister of Public Works and Labour under a penalty of $50. The term "work-

man" includes every person who does manual labour and who is included in the class of persons named by the Order in Council creating a Bureau.[1]

Protection of Child and Female Labour.

The employment of any boy or girl less than sixteen years of age who is unable to read and write fluently is now prohibited. An inspector may require children of sixteen years of age to undergo examination and may dismiss them if they fail to pass. He may also require a birth certificate. The employment is prohibited of any child less than fifteen years of age to act or sing in a theatre, hall for moving pictures, etc., except in educational institutions or in entertainments for charitable purposes.

An important addition to the law in this connection has reference specifically to cotton and woollen factories. The working hours of children and women is limited to ten per day in these establishments and to fifty-eight per week, though an apportionment of working hours, for the purpose of giving a shorter day's work on Saturdays is permitted. An hour must be allowed each day for meals and must not be counted as part of the hours of employment. The "day" mentioned above is not to begin before 6.30 in the morning nor end after 6.30 in the evening, and is in no case to exceed ten and one half hours.

It is understood that this change has been made largely as the result of the representations of the then Deputy Minister of Labour, Mr. W. L. Mackenzie King, C.M.G., who in 1908 conducted an investigation as a Royal Commissioner into conditions of employment in the textile industry of Quebec.

The Act will come into force on January 1, 1911.[2]

Co-operation.

Agricultural societies and farmers' clubs have been given permission with the sanction of the Minister of Agriculture to take shares in co-operative agricultural associations. Societies for the manufacture of dairy products may also become members of a co-operative association. Moreover, a co-operative agricultural association may become a member of any similar association, but is not permitted to subscribe more than one share. Any director of a farmers' club, agricultural society, etc., who is a member of a co-operative association is eligible for appointment as a director of such co-operative association. The president or vice president of an agricultural association may represent his association at general meetings of the shareholders of co-operative associations and may vote in the name of the association which he represents.[3]

Aid to Forestry Education.

A grant of $4,000 for the school year of 1910-1911 and a sum of $5,000 for each subsequent school year are authorized to *Le Syndicat Financier de l'Université Laval*, to aid in the establishment and maintenance of forestry education in the province "of a nature to train men competent to assume the control and management of forests belonging to the Crown or to private persons."[4]

Protection of Government Annuities.

The property and interest of an annuitant in a contract for an annuity under the Dominion Statute and its amendments is declared to be unassignable and not subject to seizure, except as provided by legislation of the Dominion.[5]

Miscellaneous.

The charter of the Montreal Firemen's Benefit Association was extensively amended by special Act.[6]

Timber cut on certain lands granted by way of subsidy is made subject to new regulations ordering the manufacture thereof within the Dominion of Canada.[7]

The appointment of a Commission to submit rules for the management of running waters is authorized, the object

1. Que. Stat. 1910, chap. 19.
2. Que. Stat. 1910, chap. 27.
3. Que. Stat. 1910, chap. 14 and 15.
4. Que. Stat. 1910, chap. 21.
5. Que. Stat. 1910, chap. 41.
6. Que. Stat. 1910, chap. 89.
7. Que. Stat. 1910, chap. 3.

being to further the utilization of the water powers and to reconcile the interests of agriculture, manufacturing and forestry.[8]

Railway passenger tickets, baggage checks, way bills, bills of lading, notices, blank forms, etc., issued by a railway, navigation, telegraph, telephone, express or electric power company, must in future be printed in both French and English.[9]

Under an Act authorizing the appointment of a Commission to consider the best means of establishing a system of parks on the Island of Montreal and the Ile Jesus, a portion of the duties of the Commission is defined as to prepare plans and devise the best means for securing areas for model homes for workingmen.[10]

The Quebec License and the Closing of Taverns Acts are amended with respect to the time of closing. The hour is placed at seven o'clock on Saturday evenings, instead of eleven o'clock as previously. Sales are prohibited on Christmas, New Year's day and Good Friday.[11]

The Act respecting the manufacture of dairy products is amended by the addition of a section providing for the inspection of butter and cheese factories, the licensing of the same and the closing of unsanitary establishments.[12]

IMMIGRATION AND COLONIZATION.

The official statements given below with regard to recent immigrant arrivals in Canada, number of homestead entries made, land patents issued, etc., are published except where otherwise stated, by courtesy of the Department of the Interior, Canada.

British Emigration Returns.

During the month ended July 31, 1910, the number of passengers leaving the United Kingdom for British North America, according to official returns of the British Boards of Trades, was as follows:—

EMIGRATION FROM GREAT BRITAIN DURING JULY, 1910.

Nationality.	1910	1909.
English	11,717	6,778
Welsh	195	213
Scotch	3,208	1,953
Irish	469	460
British Colonial	613	596
Total British subjects	16,382	10,000
Foreign	4,104	2,901
Total	20,486	12,901

During the seven months ending July 30, 1910, the number of passengers leaving the United Kingdom, as above, was:—

EMIGRATION FROM GREAT BRITAIN MAY-JULY, 1910–1909.

Nationality.	1910	1909
English	71,132	37,889
Welsh	1,541	705
Scotch	23,959	11,444
Irish	4,303	2,582
British Colonial	2,054	1,310
Total British subjects	102,989	59,930
Foreign	24,296	16,137
Total	127,285	70,247

Recent Immigrant Arrivals.

THE following table gives a detailed return of the total immigration to Canada for the months of April and May, 1910, compared with the months of April and May, 1909.

TOTAL IMMIGRATION TO CANADA FOR THE MONTHS OF APRIL AND MAY, 1910, COMPARED WITH THAT OF APRIL AND MAY, 1909.

Total	307	300	2,576	2,304	1,356	1,617	21	27

Total number of entries: July, 1910—4,260
July, 1909—4,248

Net increase for July, 1910 12

It will be seen that there have been net increases of 1,597 in the number of entries made during July, 1910, as compared with the corresponding months of 1909.

A statement of the entries made during the first seven months of the calendar year 1910, compared with the same period of 1909, is as follows:—

ENTRIES DURING JANUARY-JULY, 1910-1909.

MONTH.	MANITOBA.		SASKATCHEWAN.		ALBERTA.		BRITISH COLUMBIA.	
	1910	1909	1910	1909	1910	1909	1910	1909
January	152	125	976	605	1,558	566	12	12

Totals	1,380	248,223.57

In June, 1909, the number of patents issued was 1,636 covering an area of 251,226.12 acres, showing a decrease for the month of June, 1910, of ninety-eight in the number of patents issued, but an increase of 9,865.24 acres in the area patented.

In July, 1909, the number of patents issued was 1,204 covering an area of 186,013.98 acres, showing an increase for the month of July, 1910, of 174 in the number of patents issued and of 62,209.59 acres in the area patented.

Notes.

One hundred and sixty thousand immigrants came into Canada in the six months of the calendar year up to June 30. Of this number the American proportion is about ninety thousand and seventy thousand are British and from the continent of Europe.

More than 1,700 immigrants have obtained employment through the Ontario Bureau of Colonization since the beginning of the present year. The majority found positions as farm labourers in Western Ontario. The number of new arrivals placed by the Provincial Bureau so far this year exceeds the number placed during the whole of 1909.

RECENT INDUSTRIAL AGREEMENT.

ARTICLES of agreement entered into in duplicate this twenty-eighth day of June One thousand nine hundred and ten, between, The British Columbia Electric Railway Company, Limited, hereinafter called "The Company," and The Amalgamated Association of Street and Electric Railway Employés, of America, Divisions No. 101, Vancouver; No. 109 Victoria, and No. 134, New Westminster, (representing the Employés of the British Columbia Electric Railway Company, Limited, affected by this Agreement hereinafter called "The Association":

RAILWAY, ROBERVAL-JAMES BAY, QUE.

For a line of railway from Roberval westward towards James Bay in lieu of subsidy granted by chapter 63 of 1908. Date of subsidy agreement, August 25, 1910; amount of subsidy, $3,200 per mile, not exceeding $6,400 per mile. Railway Company, The James Bay and Eastern Railway Company.

RATE OF WAGES.

All mechanics, labourers or other persons who perform labour in the construction of the work hereby contracted for, shall be paid such wages as are generally accepted as current for competent workmen in the district in which the work is being performed, and if, there is no current rate in such district, then a fair and reasonable rate, and shall not be required to work for longer hours than those fixed by the custom of the trade in the district where the work is carried on, except for the protection of life or property or in case of other emergencies. In the event of a dispute arising as to what is the current or a fair and reasonable rate of wages, or what are the current hours fixed by the custom of the trade, it shall be determined by the Minister of Labour, whose decision shall be final.

These conditions shall extend and apply to moneys payable for the use or hire of horses or teams and the persons entitled to payment for the use or hire of horses or teams shall have the like right in respect of moneys so owing to them as if such moneys were payable to them in respect of wages.

In the event of default being made in the payment of any money owing in respect of wages of any mechanic, labourer or other person employed on the said work, and, if a claim, therefore, is filed in the office of the Minister of .....

and proof thereof satisfactory to the Minister is furnished, the Minister may pay such claim out of any moneys at any time payable by His Majesty under such contract, and the amounts so paid shall be deemed payments to the contractors.

Post Office Department.

During the month of July, orders were given by the Post Office Department for the supplies below mentioned, subject to the regulations for the suppression of the *sweating* system and the securing of payment to the working men and working wowen of fair wages, and the performance of the work under the proper sanitary conditions.

TRADE DISPUTES DURING THE MONTH OF AUGUST, 1910.

THE only important disturbances of industrial activity in Canada during August through trade disputes was caused by a general lockout of bricklayers and masons at Winnipeg, Man., which led to a cessation of building operations during the latter half of the month. There was an improvement in conditions prevailing at Springhill, N.S., where a strike of coal miners had been in existence for a year, but normal conditions were not yet resumed.

Number and magnitude.—The total number of trade disputes reported to have been in existence in Canada during August was fourteen, six less than in the previous month and two less than in August, 1909. About 107 firms and 5,067 employés were affected by these disputes, about eighty-six firms and seventy-two employés being affected by new disputes.

Loss of time in working days.—The loss of time to employés from trade disputes was approximately 54,800 working days in August, compared with a loss of about 100,260 days in July, and about 108,925 days in August, 1909.

Trades affected by new disputes.—There were four new disputes in August, all of which were in the building trades. These affected about 384 employés.

Localities affected by new disputes.—One of the new disputes occurred in the Province of Ontario, two in the Province of Manitoba, and one in the Province of Saskatchewan.

Causes of disputes.—The following were the causes of the new disputes of the month.

Cause.	Disputes. No. of
For increase in wages	1
Sympathetic	2
Lockout, a protest against sympathetic strike	1
Total	4

Methods of settlement.—Of the fourteen disputes in existence during August, four were terminated in the course of the month, leaving ten still unsettled. One dispute was settled by conciliation, one by negotiations between the parties concerned, one partly by negotiations and partly by the places of the strikers being filled, and one by the places of the strikers being filled.

Results of disputes.—The employers were successful in one of the disputes that were terminated, compromises were effected in two disputes, and the result of the remaining dispute was not reported.

Disputes which Commenced Prior to the Beginning of the Month.

The trade disputes which began in previous months and which were not reported to have been settled before August 1, comprised strikes of coal miners at Springhill, N.S., conductors and trainmen on the Grand Trunk Railway system, bricklayers and iron-moulders at Montreal, Que., sheet metal workers at Vancouver, B.C., machinists and engineers at Vancouver and New Westminster, B.C., railway carmen and steamfitters of the Canadian Northern Railway from Winnipeg to Edmonton, and carpet weavers at Guelph, Ont.

Strike of Coal Miners at Springhill, N.S.

The strike of coal miners at Springhill, N.S., which began on August 10, 1909, on account of the refusal of the Cumberland Coal and Railway Company to recognize the United Mine Workers of America and to grant certain demands for an increase in wages and changes in conditions of employment, continued throughout the month. Many of the strikers, however, were reported to have left the place to seek work elsewhere, and the company was steadily increasing its force of miners and the output of coal.

Strike of Conductors and Trainmen of the Grand Trunk Railway Company.

The strike of conductors and trainmen of the Grand Trunk Railway Com-

pany, which began on July 18, owing to the refusal of the Company to grant a demand for the standardization of wages and general conditions of employment was terminated on the evening of August 2, through the friendly intervention of the Honourable the Minister of Militia and the Honourable the Minister of Labour. About 2,750 employés were directlv affected by this dispute inCanada, including 250 employés of the Wabash Railway Company. In the course of the strike the Company had engaged a number of new men to replace the strikers, and consequently on the termination of the dispute the strikers were not all taken back immediately, but it is understood they are gradually being restored to their former positions.[1]

Strike of Bricklayers at Montreal, Que.

No settlement was reported in the case of a strike of bricklayers employed by the firm of P. Lyall & Sons, Limited, at Montreal, who went out on June 20, on account of dissatisfaction with a foreman. According to the employers about thirty men were involved in the dispute, but according to the Bricklayers' Union, about forty-five men were directly and 175 men were indirectly involved.

Strikes of Iron Moulders at Montreal, Que.

No settlement was reported in two strikes of iron moulders at Montreal, Que. One, involving twenty-five men, began on June 10, on account of the refusal of the employers to grant recognition of the Moulders' Union and a 'closed shop,' and the other, involving twenty-three men, began on July 23, on account of the refusal of the employers to grant a demand for an increase in wages from $2.75 to $3 per day.

Strike of Sheet Metal Workers at Vancouver, B.C.

No settlement was reported in the case of a strike of twenty sheet metal workers at Vancouver, B.C., which began on April 20, on account of the declaration of the employers for 'open shops.'

Strike of Machinists and Engineers at Vancouver and New Westminster, B.C.

A strike involving about thirteen firms and 145 machinists and engineers at Vancouver and New Westminster, B.C., which began on July 5, continued through out August, no settlement being reached.

Strike of Carpet Weavers at Guelph, Ont.

No definite settlement was reached in a strike of carpet weavers at Guelph, Ont., which began on December 11, but the employers claimed they had twenty-five looms running and that there was no strike so far as they were concerned. Twenty-eight men were originally involved in this dispute, but of these all but twelve had sought work elsewhere. The dispute arose from a demand of the empolyés for extra pay for overtime and from their general dissatisfaction with the conditions of employment.

New Disputes.

Strike and Lockout of Bricklayers and Masons at Winnipeg, Man.

On August 15 about twelve men employed by the Lyall-Mitchell Company at Winnipeg, Man., were ordered out on strike by the Bricklayers' and Masons' International Union on the ground that this firm was identical with the firm of Peter Lyall & Sons, Limited, of Montreal, against whom a strike was in force. The matter had been referred to a joint arbitration board, in accordance with the terms of an agreement made on May 17, 1910. This Board decided, on July 25, that the two firms were in no way connected. It was claimed, however, later by a representative of the International Union, that conclusive evidence of the identity of the two firms had come into his possession.

On August 17, a general lockout of bricklayers and masons was declared by the Builders' Exchange, which took effect two days later, the Union not having called off the strike against the Lyall-

[1] A full account of this dispute is given in the August issue of the *Labour Gazette*, on page 194.

TABLE OF TRADE DISPUTES DURING THE MONTH OF AUGUST.

Occupation.	Locality.	Alleged Cause or Object.	No. of Firms or Establishments affected.		Approximate No. of Employees affected.				Date of commencement.	Date of termination.	Result.
					Directly.		Indirectly.				
			Directly.	Indirectly.	Males.	Females.	Males.	Females.			
DISPUTES WHICH COMMENCED PRIOR TO THE BEGINNING OF THE MONTH											
Mining— Coal miners	Springhill, N.S.	For recognition of union, increase in wages and against conditions of employment	1		900				Aug. 11'9		No settlement reported, but places of many strikers were filled.
Building trades— Bricklayers	Montreal, Que.	Against employment of a foreman	1		45	—	175		June 20		No settlement reported at end of month.
Metal trades— Sheet metal workers	Vancouver, B.C.	Against declaration of employers for 'open shops.'			20				April 8		No settlement reported at end of month.
Iron moulders	Montreal, Que.	For recognition of union and 'closed shop'	1		25				June 30		No settlement reported at end of month.
Machinists and engineers	Vancouver and New Westminster, B.C.	For increase in wages from 40 to 45 cents an hour	13		145				July 5		No settlement reported at end of month.
Iron moulders	Montreal, Que.	For increase in wages from $2.75 to $3 per day	1		3				July 23		No settlement reported at end of month.

Textile trades—												
Carpet weavers	Guelph, Ont.	Demand of men for extra pay for overtime and general dissatisfaction with conditions	1		12				Dec.	11		No settlement reported, but employers claimed to be no longer affected, twelve men still out, and others had sought work elsewhere.
Railway service—												
Conductors and trainmen	Grand Trunk Railway System east of Chicago	For standardization of wages and general conditions of employment	1		2,750				July	18	Aug. 2	Settled by friendly mediation of Minister of Militia and Minister of Labour—a compromise.
Railway carmen	Canadian Northern Railway system from Winnipeg to Edmonton	For increase in wages	1		600				July	1		No settlement reported at end of month.
Railway steamfitters	Canadian Northern Railway system from Winnipeg to Edmonton	For increase in wages	1		600						Aug. 4	Agreement reached, terms of settlement not reported.

DISPUTES WHICH BEGAN DURING THE MONTH.

Building trades—												
Bricklayers and Masons	Winnipeg, Man.	In sympathy with striking bricklayers at Montreal, Que.	1		12				Aug.	15		No settlement reported at end of month.
Bricklayers and masons	Winnipeg, Man	Lockout, on account of strike of bricklayers	64		288				Aug.	9		No settlement reported at end of month.
Plasterers	Ottawa, Ont.	For increase in wages from 40 to 45 cents an hour	20		60				Aug.	1	Aug. 8	Ten employers signed agreement to pay 42½ cents an hour. Ten others employed members of National Union at 40 cents. Some plasterers left town at beginning of strike, none were idle after settlement.
Bricklayers and masons	Regina, Sask.	In sympathy with striking bricklayers at Montreal	1		24				Aug.	8		No settlement reported at end of month.

*Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where after the declaration of a strike, some of the original strikers have returned to work or had their places filled with new hands, or where establishments affected have found that for either of these reasons, or both, or for the other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table therefore, includes mention only of such disputes as during the month or at its termination affected, to an appreciable degree, the carrying on of the industrial or business operations of the firm or establishments concerned. Mention moreover, is not made of disputes involving less than six employees, or of less duration than 24 hours.

Mitchell Company. Through the intervention of the Mayor of Winnipeg, the dispute was referred to a new Board of Arbitration, which, however, had not concluded its labours at the end of the month. About sixty-five firms and 300 men including the twelve who ceased work on August 15, were involved in this dispute.

Strike of Bricklayers and Masons at Regina, Sask.

On August 8, a strike of bricklayers and masons took place at Regina, Sask., in which twenty-four men employed by the firm of Peter Lyall & Sons, Limited, were involved. This strike was called in sympathy with striking bricklayers at Montreal, Que., who were employed of the same firm. No settlement of the dispute was reported during the month. The strikers were employed on the new legislative buildings, upon which there was much interior work to be done, which was carried on during the strike.

Strike of Plasterers at Ottawa, Ont.

On August 1, a strike of plasterers took place at Ottawa, Ont., in which twenty firms and sixty employés, members of the International Operative Plasterers' Union, were involved. The cause of the dispute was the refusal of the employers to grant a demand for an increase in wages from forty to forty-five cents an hour. On August 8, a compromise was reached with the ten firms, by which the wages were increased to 42½ cents an hour. The other firms involved employed members of the National Plasterers' Union. Some of the strikers having left town during the strike, none remained idle after August 8.

The table which is published herewith is a compilation of the trade disputes of the Dominion of Canada, which began or were in continuance during the month of July, and which have been reported to the Department.

INDUSTRIAL ACCIDENTS DURING THE MONTH OF AUGUST, 1910.

Under this heading, account is taken of such accidents only as were sustained by workmen in the course of their employment, and resulted in loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the Department through the press of the country to correspondents of the *Labour Gazette*. The Department is also indebted to the Bureau of Mines of Ontario, and British Columbia, to the office of the factories' inspector of the Province of Ontario, the Ontario Railway and Municipal Board, and to the Department of Railways and Canals, for their assistance in furnishing the Department with the statement of returns of accidents reported to them.

INDUSTRIAL accidents occurring to 222 individual work people in Canada during the month of August, 1910, were reported to the Department of Labour. Of these, eighty-two were fatal and 140 resulted in serious injuires. In addition, one fatal accident was reported as having taken place prior to the beginning of the month, information not having been received by the Department before August, 1910.

In the preceding month there were 116 fatal and 238 non-fatal accidents reported, a total of 354, and in August, 1909, there were 126 fatal and 264 non-fatal accidents, a total of 390. The number of fatal accidents reported in August, 1910, was, therefore, thirty-four less than in the preceding month, and forty-four less than in August, 1909. The number of non-fatal accidents reported in August, 1910, was ninety-eight less than in the preceding month, and 124 less than in August, 1909. Altogether, there were 132 less industrial accidents reported in August, 1910, than in the preceding month, and 168 less than in the same month of the preceding year.

Of 149 returns received during the month, giving the ages of the victims of industrial accidents, eleven referred to persons under twenty-one years of age, twenty to persons between twenty-one and forty-five, and eight to persons over forty-five. One hundred and ten persons were over twenty-one years of age but their exact ages were not specified.

The following is a record of the accidents of the month by industries and trades:—

STATEMENT OF ACCIDENTS DURING AUGUST 1910, BY INDUSTRIES AND TRADES.

Trade or Industry.	Killed.	Injured.	Total.
Agriculture	14	19	33
Lumbering	7	8	15
Mining	9	11	20
Building trades	5	16	21
Metal trades	9	17	26

Navigation	9	4	13
General transport	.....	11	11
Civic employés	.....	7	7
Miscellaneous	5	10	15
Unskilled labour	6	9	15
Total	82	140	222

Nature of Fatalities and Accidents.

The chief disasters of the month, causing the death of more than one workman, were: The electrocution of three workers at Niagara Falls, Ont.: the death by electric shock of two linemen at Winnipeg, Man.; the death of two railway employés at Belleville, Ont.; and the death of two miners by a rock slide at Phoenix, B.C.

Electrocution of Three Workmen at Niagara Falls, Ont.

On August 3, at Niagara Falls, Ont., several men were engaged in removing steel concrete-forms from the interior of the Ontario Power Company's conduit. A steel section touched a worn electric-light wire carrying 220 volts, and three men who were moving it and standing in water, were killed. Twenty others received lesser shocks.

Death by Electric Shock of Two Linemen at St. Boniface, Man.

On August 19, 1910, two linemen employed by the Winnipeg Electric Company were instantly killed by electric shock while working on a pole, at St. Boniface, Man.

Disastrous Railway Collision at Belleville, Ont.

On August 27, 1910, an engineer and a car inspector were killed in a head-on collision at Belleville, Ont. An immigrant special on the Grand Trunk Railway ran through an open switch and struck an engine which was standing on a siding, istantly killing the two employés in charge of the latter locomotive. The verdict rendered by the jury in this case was as follows:—

"We find from the evidence and plan submitted to us that the accident was caused by Engineer R. Weir, of the immigrant special, not being as familiar with the location of semaphores at the point where the accident occurred, as he should have been. Also that his view of said semaphore was partially obscured by escaping steam from passing locomotives, said steam misleading him in his judgement of the distance, and we exonerate Engineer Weir from any criminal negligence."

Death of Two Miners at Phoenix, B.C.

On August 17 two miners at Phoenix, B.C., met accidental death through a fall of rock.

Record by Trades and Industries.

Agriculture.—In this industry there were fourteen killed and nineteen injured in August, 1910, compared with eighteen killed and thirty injured in July 1910, and forty-five killed and thirty-nine injured in August, 1909. Six of the deaths were caused by machinery, four by being run over, and one each by being choked to death by barley seed, by live stock, by falling material and by a runaway. Of the non-fatal accidents, eight were caused by falls, four by machinery, three by runaways, two by tools, and one each by being run over and by flying material.

Lumbering.—Seven workers were killed by accident and eight were injured in August, 1910, as against eight killed and three injured in the preceding month, and three killed and sixteen injured in August of last year. Three of the fatalities were due to drowning, two to machinery and one each to being run over and to falling material. Six of the minor accidents were due to machinery and one each to flying material and to a gunshot wound.

Mining.—In this group, nine miners met death through accident, and eleven were injured, during August last, compared with seventeen killed and nine injured in the previous month, and twelve killed and eighteen injured in August, 1909. Five of the fatalities were caused by falling material, three by being crushed between cars, and one by being run over. Six of the lesser accidents were caused by being caught between cars, two by falls, and one each by a tool, by machinery and by falling material.

Building trades.—During August, there were five killed and sixteen injured in this group, as against two killed and twenty-eight injured in July last, and three killed and twenty-six injured in August, 1909. The five accidental deaths were due to falls, as were also sixteen of the injuries, the other one of the latter being due to a collision.

Metal, engineering and shipbuilding trades.—Among these workers nine were killed by accident and thirty-six injured in August, compared with eleven killed and forty-three injured in July, 1910, and five killed and thirty-six injured in August, 1909. Electric shock caused eight of the deaths, and machinery, one. Twenty workers were injured by electric shock, eight by machinery, three by falling material, two each by explosions and by falls, and one by molten metal.

Woodworking trades.—Two woodworkers were killed and six injured in August, compared with two killed and fourteen injured in the preceding month, and one killed and fifteen injured in August of last year. To machinery was due one of the fatalities, and to flying material the other. Machinery was responsible for four of the injuries and flying material for two.

Printing trades.—Machinery injured one workman in these crafts during August, 1910. Four workers were injured in the previous month, and four in August, 1909.

Textile trades.—There was one accident by machinery, as against three injuries in July last, and two injuries in August of last year.

Food and tobacco preparation.—During August, 1910, a tool injured one of these workmen, and machinery another. In the month before, the record was two killed and nine injured, and in August, 1909, five injured.

Leather trades.—An explosion of steam caused one death in these trades. There was one injury in the previous month, and none in August of last year.

Railway service.—Eighteen railway employés were killed and twenty-one injured during August, 1910, compared with twenty-five killed and twenty-six injured in the month before, and eleven killed and twenty-two injured in August, 1909. Of the fatalities, eleven were due to being run over, two each to flying material and to collisions, and one each to falling material, to being caught between cars and to drowning. Of the non-fatal accidents, seven each were due to falls and to being caught between cars, three to being run over, two to collisions, and one each to being struck by an object in passing, and to falling material.

Navigation.—During August, 1910, there were nine of these workers killed and four injured, as against six killed and ten injured in the month before, and six killed and three injured in August, 1909. Falls caused five of the deaths, drowning three and machinery one. One each of the injuries were caused by falling material, by an explosion, by a fall and by flying material.

General transport.—Eleven employés engaged in these trades were injured during August last, seven by falls, two by collisions and one each by falling material and by live stock. In the month previous the record was ten killed and thirteen injured, and in August of last year, eleven killed and twenty-five injured.

Public employés.—Seven of these employés were injured in August, 1910, four by explosions and one each by falling material, by being run over and by a fall, compared with two injuries in the preceding month, and one killed and seven injured in August of last year.

Miscellaneous trades.—In this category five workers were killed and ten injured during August, 1910, as against nine killed and twenty-one injured in July last and twelve killed and sixteen injured in August, 1909. Three of the deaths were

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF AUGUST, 1910.

Trade or Industry.	Locality.	Date.	No.	Cause of Fatality.
Agriculture—				
Farmer	Carp, Ont.	Aug. 6	1	Choked to death, by barley seed.
"	Belleville, Ont.	" 8	1	Run over by train.
"	Trenton, Ont.	" 8	1	Run over by train.
"	Havelock, Ont.	" 18	1	Kicked by a horse.
"	Eessx, Ont.	" 20	1	Caught in belting of thresher.
"	Vineland, One.	" 24	1	Caught in thresher.
"	Penobsquis, N.B.	" 24	1	Run over by train.
"	Clinton, Ont.	" 24	1	Crushed between engine and separator.
"	Brampton, Ont.	" 26	1	Fell from a thresher.
"	Kilbride, Ont.	" 6	1	Barn fell on him.
"	Pokroh, Ont.	" 24	1	Caught in mower.
"	St. Alexandre, Que.	9 9	1	In a runaway.
Farmer's wife	West Lorne, Ont.	" 5	1	Struck by train at crossing.
Dairy worker	St. Remi, Que.	" 24	1	By bursting separator.
Lumbering—				
Logger	Lake Temiscamingue, Ont.	" 5	1	Drowned, fell off boom.
"	Wanapitae, Ont	" 17	1	Drowned.
"	Long Rapids, Que.	" 15	1	Drowned, fell off logs.
"	Vancouver, B.C.	" 25	1	Run over by train.
Pulp factory hand	Hull, Que.	" 30	1	Caught in machinery.
Pulp factory hand	Windsor Mills, Que.	" 28	1	Caught in machinery.
Saw mill hands	Vancouver, B.C.	Aug. 27	1	Pile of lumber fell on him.
Mining—				
Miner	New Waterford, N.S.	" 12	1	Caught between cars.
"	Springhill, N.S.	" 26	1	Fall of coal.
"	Coal Creek, C.B.	" 26	1	Fall of coal.
"	Extension, B.C.	" 6	1	Knocked off car by stringer.
"	Cumberland, B.C.	" 10	1	Caught between cars.
"	Phoenix, B.C.	" 17	2	Fall of rock.
"	Thetford, Que.	" 4	1	Run over by locomotive.
Quarryman	Queenston Quarries, Ont.	" 1	1	Fall of rock.
Plasterer	Toronto, Ont.	" 15	1	Fell 26 feet.
Painter	Cobalt, Ont.	" 24	1	Fell on live wires, electrocuted.
"	St. John, N.B.	" 12	1	Fell 25 feet.
Carpenter	Chatham, N.B.	" 24	1	Fell from staging.
Builders' labourer	Lethbridge, Alta.	" 27	1	Fell 14 feet.
Metal, engineering and shipbuilding trades—				
Electrical workers	Niagara Falls, Ont.	" 3	3	Electrocuted.

"	Quebec, Que.	" 27	1	Struck by wire cable.
"	Sherbrooke, Que.	" 25	1	Crushed between cars.

FATAL ACCIDENTS HAPPENING IN THE PREVIOUS MONTH, BUT ONLY REPORTED TO THE DEPARTMENT IN AUGUST, 1910.

Miner	Greenwood, B.C.	July	27	1	Fell down shaft.

due to falls and two to machinery. Three of the other accidents were due to elevators, two each to machinery and to falls and one each to being run over, to an explosion and to flying material.

Unskilled labour.—There were six killed and nine injured in August, compared with five killed and twenty injured in the month before, and eleven killed and twenty-nine injured in August, 1909. Being run over caused four of the deaths and falling and flying material, one each. Four of the injuries were caused by falling material, two by being run over, and one each by an elevator, by a fall and by an explosion.

REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus were received at the Department of Labour, Ottawa, during July and August, 1910.

DOMINION REPORTS.

The Mining Industry.

Summary report of the Mines Branch, Department of Mines, for the calendar year ending December 31, 1909. Ottawa, King's Printer, 1910. Page, 190, [price, 10 cents.

THE summary report of the Mines Branch for 1909 shows increased activity in this branch, much work being done of practical value to mining of all kinds and kindred industries. Field investigations were conducted in many parts of the country covering in their scope iron, copper, molybdenum, manganese, nickel, peat, coal, asbestos, gypsum, talc and soapstone. Attention is called to the rapid development of the electro-thermic processes for the production of steel in Europe, forty-six having been in operation in 1908, and thirty-one under construction, whereas there were only four in 1904.

In a preliminary report on accidents in mines, it is stated that the average yearly death rate in coal mine in Canada during the ten years from 1899 to 1908 was 9.21 per 1,000, while the death rate in England was only 2.24 per 1,000 from 1873 to 1882, and 1.29 per 1,000 in the five years from 1903 to 1907. It is recommended that the Mines Branch be given authority to call for the immediate reporting of accidents, with powers to co-operate with mining authorities in the formulation of an efficient code of laws and regulations relating to mining and the use of explosives, and to verify statements of accidents and investigate the causes.

ONTARIO REPORTS.

Factory Inspection.

Twenty-second annual reports of the Inspectors of factories for the Province of Ontario, 1909. Toronto: King's Printer, 1910. Page, 79.

In the report of the Chief Inspector of Factories for Ontario for the year 1909 attention is called to the need of proper fire escapes in factories, a matter which requires the constant vigilance of the Inspectors, although they have no power to pass upon the construction of a new fire escape without being requested to do so by either the contractor or the owner of the premises. A list of specifications for fire escapes is given, which was prepared in the office of the Factory Inspectors and sanctioned by order-in-council of June 10, 1909.

There were 665 accidents reported during June, which was an increase over the previous year, attributed to a better observance in reporting accidents and to increased industrial activity rather than to failure to safeguard machinery. Applications for permits to employ women, girls and youths to a later hour than 6.30 each evening in factories were in excess of the previous year. A marked improvement is noted in canning factories. It is suggested that the preparation and packing of cereal foods should be regulated as strictly as are the bake-shops.

The inspection of elevators, it is said, should cover not only factories, but mercantile houses, office buildings and hotels. The city of Toronto has passed a by-law licensing elevators, and appointing an inspector to examine and report on their working conditions.

Prison Statistics.

Forty-second Annual Report of the Inspector of Prisons and Public Charities upon the Prisons and Reformatories of the Province of Ontario, for the year ending September 30, 1909. Toronto: King's Printer, 1910.

In the Report of the Prisons and Reformatories of Ontario for 1909, it is stated that the number of persons committed to gaols and lock-ups in the past year was 13,535, an increase of 452 over the previous year. The principal increase was in commitments for crime against public order and peace, which numbered 7,827 in 1909 and 7,187 in 1908. There was also an increase of 212 in the crimes against public morals, and of 96 in the number of insane persons committed to

gaols. There were decreases in the number of commitments for murder, manslaughter, and crimes against the person and against property.

A strong recommendation is made for the adoption of the system of the indeterminate sentence and probation, and it is pointed out that during the past year a man was sent to an Ontario gaol with a record of fifty-six previous commitments. A gaol farm is also advocated where habitual criminals could be kept and given plenty of outdoor exercise, until they have shown signs of a reformation.

BRITISH REPORTS.

Street Trading of Children.

Report of the Departmental Committee on the Employment of Children Act. 1903, appointed by His Majesty's Principal Secretary of State for the Home Department. London: Wyman and Sons, 1910. Page, 23. Price, 2½d.

In July, 1909, a committee was appointed by the Home Secretary of Great Britain to inquire into the operation of the Employment of Children Act, 1903. It was decided by the committee to limit its inquiry to the subject of street trading, and its report is based almost entirely on this branch of child employment. By the Act, local authorities are given wide powers for the regulation of street trading by persons under the age of sixteen. In England and Wales, fifty county boroughs out of seventy-four have made street trading by-laws, including nearly all the large centres of population. Of the smaller boroughs forty-one out of 191 have exercised their powers. No country councils in either Scotland or Ireland have yet passed such by-laws, and in Scotland only three burghs out of fifty-six have done so, and in Ireland only five councils of urban districts out of forty-three. In most cases, street trading by girls under sixteen is prohibited altogether, unless they are in the company of a parent or a guardian. The regulation of street trading is most highly organised in Manchester, where a special staff of plain-clothes officers give their whole time to the work, knowing the traders personally, visiting their homes, advising the parents and clothing the children.

The principal occupation of juvenile street traders is selling newspapers, for which over 16,000 are licensed in England and Wales. Many girls as well as boys are engaged in this. A much smaller number sell flowers or matches, and another small class is that of children assisting costers, or at work in recognised markets. Street trading is said to produce many evil effects . It causes a dislike for regular employment, tending to develope beggars or gamblers, while girls are also subject to great moral perils.

The reports were presented by the committee. In the majority report the following recommendations were made:

1. That street trading by boys be wholly permitted by statute up to the age of seventeen. (2). That street trading by girls be similarly prohibited up to an age not less than eighteen. (3). That the definition of street trading be revised so as to make it clear that the delivery of newspapers and other goods by the employés of a tradesman to regular customer is not covered by the term. (4). That the functions of Local Education Authorities should be extended so as to include the administration of the law, either through school attendance officers or through officers specially appointed for the purpose, as well as the giving of advice and assistance to the children at or leaving shcool in the finding of suitable employments. (5) That street trading cases should be heard in the Children's Court, or, failing such a court, in a court of summary jurisdiction. (6). That the penalties for illegal street trading should be revised.

The minority report recommended that further powers be given to local authorities for dealing with street trading as carried on by boys, enabling them to prohibit street trading up to the age of eighteen, where other suitable forms of employment are available, and where a local organisation has been formed for finding suitable employment for children, and to refuse or withdraw a license where street trading is not being carried on for any beneficial purpose. They should also have power to make it a condition of a license for boys over fourteen that they should at-

tend technical or continuation classes while holding the license. The licensing system should be extended to the districts of all urban authorities under the Act, and local authorities should be required to appoint a sufficient number of specially selected officers for the enforcement of the Act.

Labour Colonies in Europe.

Royal Commission on the Poor Laws and Relief of Distress. Appendix Volume XXXII. Reports on Visits paid by the Labour Colonies Committee to certain Institutions in Holland, Belgium, Germany, and Switzerland. London: Wyman and Sons, 1910. Page, 120. Price, 1s.

The Royal Commission on the Poor Laws and Relief of Distress appointed a committee of four of its members to make inquiry into methods of relief in certain European countries, and in regard to measures there adopted in dealing with unemployment. The report of the Committee contains an account of the institutions visited by them, and four appendices containing (a). Balance sheet and Profit and loss account of the Association of Beneficence of Holland for 1906. (b). Bill for the repression of Mendicancy and vagrancy and drunkenness, drafted by the Dutch Vagrancy Commission, and proposed incidental amendments in the Dutch Criminal Code. (c). Balance sheet of the workshops at Merxplas for 1907. (d). Municipal unemployment Insurance at Strassburg.

The following labour colonies were selected as typical and visited: The free labour colonies at Fredericksoord, and the penal colonies at Veenhuizen in Holland: the colonies of benevolence in Belgium, including the Beggars' Depot at Merxplas, and the 'Refuge' colonies at Wortel and Hoogstraeten; the town labour colony at Hamburg, and the farm labour colony at Schâferhof near Hamburg; the forced labour farm at Witzwyl with the supplementary labour colony at Nusshof, and the labour colony at Tannenhof near Berne.

Factory Conditions in Great Britain.

Annual Report of the Chief Inspector of Factories and Workshops for the year 1909. Reports and statistics. London: Wyman and Sons, 1910. Page, 298. Price, 2s. 6p.

The Report of the Chief Inspector of Factories and Workshops for 1909 contains the reports of the Superintending Inspectors, Principal Lady Inspector, Medical Inspector, Electrical Inspector, Inspector for Dangerous Trades, and Inspector of Textile Particulars. A number of statistical tables are given, relating to complaints received, contravention notices issued, medical examinations, reported cases of poisoning, accidents, works under regulations or special rules, prosecutions, and the administration of the Factory Acts, 1899–1909.

In the General Report of the Chief Inspector, it is stated that the manufacture of white phosphorous matches ceased by law on January 1, 1910. In 1909, regulations came into force relating to the dangerous trades of East Indian wool, vitreous enamelling, electricity, tinning of metal hollow-ware, iron drums and harness furniture, and the grinding of metals. Regulations for brass casting came into force on January 1, 1910.

NEW ZEALAND REPORT.

Industrial Unions in New Zealand.

'The Industrial Conciliation and Arbitration Act, 1908.' Return showing the number of members in each Industrial Union registered under the Act to Dec. 31, 1908. Wellington: Government Printer, 1909. Page, 9. Price, 6d.

A return issued under the Industrial Conciliation and Arbitration Act, 1908, of New Zealand, shows that on December 31, 1908, there were registered 122 industrial unions of employers with 3,918 members, and 325 unions of workers with a membership of 49,347. Sixteen unions of employers and sixteen unions of workers were cancelled owing to their failure to send in annual returns.

UNITED STATES REPORTS.

Industrial Training in New York State.

Twenty-sixth Annual Report of the Bureau of Labour Statistics of the State of New York, for the year ended September 30, 1908. Part 1, Industrial Training, Albany, N.Y. State Department of Labour, 1909. Page, 400.

Report on Industrial Training, prepared by Charles R. Richards, Director of Cooper Union, has been issued by the Bureau of Labour Statistics of New York. The subject is discussed in eight

chapters, under the following headings: General Summary, Conditions of Entrance and Advancement in individual Industries; Attitude of Labor Unions toward Industrial and Trade Schools; Comments by Employers on Industrial Training; Rules and Agreements of Labour Unions in regard to Apprentices and Helpers; Laws of New York State relating to Child Labour; Compulsory Education; Apprenticeship and Industrial Education; Institutions offering Courses in Industrial Training in New York State: A Selected Bibliography on Industrial Education.

The following is a summary of the main conclusions of the Report: (1). The need of skilled male labour in the industries of the State is reported most severe in the manufacture of blown glass, many of the machine and metal trades, the manufacture of furniture, boots and shoes, the printing trades and in certain of the building trades, for females the need is reported most serious in the manufacture of silk, carpets, braids and embroideries, and in the machine operating trades.

2. The apprenticeship system in such industries as machine and printing trades and certain of the building trades is capable of being made most effective and a larger instrument of training skilled employés by the introduction of definite provisions for systematic instruction.

3. The need and value of general industrail or preparatory trade schools for boys and girls between fourteen and sixteen years of age is emphatically testified to by the employers in all the industries and agreed to by the labour unions.

4. Practical trade schools seem to be most in need and to give promise of most practical results in the machine and building trades. Such schools are strongly urged also by employers in the boot and shoe trades, furniture manufacture, and the printing trades.

5. The extension of evening schools giving both practical and technical instruction for workers in the trades is demanded by employers in a large proportion of the industries.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopses of recent cases affecting labour are based upon the latest reports of legal proceedings and other legal records of the different Provnices of Canada.

ONTARIO CASES.

Master and Servant.—Negligence of Fellow Servant.

AN overhead crane in the defendant's factory, operated by electric power, was used to raise and move heavy castings from place to place. M., the man who operated the crane, sat in a cage which ran upon rails, and from it he regulated the movement of the crane. When the crane was brought to the place where it was to be used, it was lowered and raised according to the direction of the foreman who stood on the ground below, near the casting which was to be moved. The crane had been in use where the plaintiff, a foreman moulder, was working, and he had told M. that he did not require it any more, and, while M. was moving it away, it was raised above the plaintiff's head, the cable parted, and a heavy hook attached to the cable fell and injured the plaintiff. In an action to recover damages for the injuries sustained, which were a fracture of the skull which incapacitated him from work, the jury found that the injuries were caused by the negligence of M., in hoisting the hook and sheaf of the crane over the plaintiff's head and letting it come in contact with the drum or something unknown, thereby breaking the cable. The action was tried before Chief Justice Meredith, with a jury, at Welland.

The Workmen's Compensation for Injuries Act (R. S. O. 1897, chapter 160, section 3, 5,) provides that "where personal injury is caused to a workman, by reason of the negligence of any person, in the service of the employer, who has the charge or control of any points signal, locomotive, engine, machine, or train upon a railway, tramway or street railway, the workman . . . shall have the same right of compensation and remedies against the employer as if the workman had not been a workman of, nor in the service of, the employer, nor engaged in his work."

Upon the findings of the jury, the Chief Justice held, (1) that M. was a person having the charge or control of an enigne or machine upon a railway or tramway within the meaning of the above enactment; and (2) that the enactment, as it now stands, is much wider in its scope than as it stood in the first Ontario Act, 49 Victoria, chapter 28. The case of *Murphy v. Wilson*, (1883) 44 L.T.N.S., 788, was distinguished from the present case.

(McLaughlin v. Ontario Iron and Steel Co., 10 Ont. L. R. 335.)

Negligence.—Injuries to Workman.

The defendant company being in occupation of a building as lessees, the lessor came in to do some work, pursuant to an undertaking in the lease, and in doing the work his men took up a moveable floor or platform made and used by the lessees, and stood it on edge. One of the employés of the lessees assisted in setting it on edge, and, to make it safe, tied it with a rope. The rope got loose, and the platform fell on the plaintiff, an employé of the lessees, and injured him. In an action against both the lessees and the lessor, the jury found negligence against both defendants and $1,000 damages. Upon an appeal to the Divisional Court it was held, (1) that the jury were justified in finding that the platform was not safely placed, and the lessees, as the occupiers of the property (the plaintiff being lawfully there) were obliged to have the property in a safe condition; (2) that the lessees could not have any relief against their co-defendant the lessor, although claimed in the action, there being no order for the trial of an issue between the defendants (following the decision in *Cope v. Crichton* (1899), 18 Ontario, P. R. 462). The Court also held, that the lessor owed no duty to the plaintiff, and was under no liability to him for non-repair of the premises, notwithstand-

ing that he actually came upon the premises and did work there. He was not to be considered as in occupation, because the work he was doing was for the benefit of the lessees, who might have waived it and excluded him from the premises if they chose; and so, notwithstanding the finding of negligence, the lessor was not liable to the planitiff. The decision in *Malone v. Laskey*, (1907) 2 K. B. Reports, 141, was specially referred to by the Court. The action had been tried before Mr. Justice Magee with a jury, and his judgement against both defendants, on the jury's findings, was varied as above stated. The appeal of the defendant company, who had leased the premises from their co-defendant, Eckhardt, the lessor, was dismissed with costs; that of Eckhardt, the lessor, was allowed with costs, and the action against him dismissed with costs.

(Gregson v. Henderson Roller Bearing Co. and Eckhardt, 10 Ont. L.R. 584.)

Municipal Property and the Mechanics' Lien Act.

In the June number of the *Gazette* a case was noted (*General Contracting Company v. City of Ottawa*) in which the County Judge of Carleton decided that lands of a municipality actually required for the use of the municipality, such as for fire halls, police stations, &c., are exempt from the operation of the Mechanics' and Wage Earners' Lien Act, on the grounds of public policy and public convenience. The Divisional Court has since allowed an appeal from that judgement and remitted the action to the same county judge for trial; and the Court of Appeal has affirmed the order of the Divisional Court on the ground that the language of some of the sections of the Act seems to imply an intention to bring at least some classes of municipal property within its provisions, and that the case altogether is of a character which requires further investigation.

In the case of *Lee v. Broley* (2 Saskatchewan L. R. 288) it was held that the lands of a school district were liable to be sold under the provisions of the Mechanics' Lien Act. In the Ontario Court of Appeal Mr. Justice Meredith was of opinion that the Lien Act did apply to such buildings as those in question, and, therefore, that the case was properly remitted to the county judge.

"The Practice of Medicine"—What it means.

A judge of the High Court (Mr. Justice Middleton) has decided that the Ontario Medical Act (R. S. O. 1897, chapter 176, section 49) did not grant to the medical profession a monopoly of supplying, for gain, such things as go to make life easier for those who suffer from physical defects. That Act relates, it was said, only to the "practice of medicine," as is understood in its primary and popular meaning, and does not cover all kindred and cognate arts. This was decided on an appeal in the prosecution of one W. J. Harvey, the defendant, an oculist, who had been convicted on a charge of having charged $13 for treatment of the eyes, and $10 for glasses, and was fined $50 and $23 costs. Mr. Justice Middleton quashed the conviction, and ordered the informant to pay the costs of appeal as well as of the proceedings before the magistrate.

Workmen's Compensation Act.—Doubtful Negligence.

Plaintiff was ordered by defendants' foreman to go from a tramcar to the engine on a tramway train of defendants, the car being close up against the engine. While in the act of doing so the separation of the car from the engine occurred, and plaintiff fell between them and was injured. In an action for damages for injuries received, evidence was heard as to the order for the separation of the car from the engine, and as to plaintiff's knowledge of that order. The jury found in plaintiff's favour and assessed the damages at $1,500, and judgement was directed accordingly. The Court of Appeal set aside the judgement and ordered a new trial, on the ground that the findings of the jury were insufficient and unsatisfactory. Mr. Justice Meredith, who dissented from the rest of the Court, held that the jury's findings were sufficient and satisfactory, and that the appeal should be dismissed.

(McLeod v. Canadian Stewart Co. Ltd. 16 Weekly Reporter, 533.)

Unsuccessful Suit for Insurance.

In the Divisional Court, in Copeland v. Locomotive Engineers' Insurance Association, the following judgement has been entered: An appeal by plaintiff from the judgement of the Chancellor, of April 27, 1910. Plaintiff, a locomotive engineer on the Grand Trunk Railway, alleges that he lost the sight of his right eye on August 26, 1905; that he is a member in good standing in defendant Association, and entitled to his insurance, and he claimed $1,500 for insurance, and $121.50 for assessments paid, with interest on each sum. Defendants deny the loss of the eye, that plaintiff has fulfilled conditions imposed in his policy, or has brought his action in time. At the trial, the action was dismissed with costs. Plaintiff's appeal therefrom argued and judgement reserved. Judgement: Appeal dismissed with costs, if exacted.

Disallowance of Strike Wages.

Because Thomas Allen is what is called a "privilege" member of the National Builders' Labourers' Union, and because he was not working when the union declared a strike on June 2, Allen is not entitled to strike wages from the union.

This is in accordance with a decision given by Judge Monson, in Division Court at Toronto.

Allen, who was one of the organizers of the Union, has been a member for twenty-four years, and is now old and finds it difficult to get jobs, sued the union for $15, being at the rate of $5 a week for three weeks. The Judge ruled that, according to the Union's by-laws, Allen was not entitled to any strike wages on two grounds: that he was a "privilege" member, and as he paid only half the regular dues, was entitled to $75 death benefits, but no wages in case of strike, and that he was not working at the time. He did not, however, allow the Union their costs.

Claim for "Sick Benefits" in Order of Foresters.

Upon an appeal by the defendants from the judgement of the County Court of the County of York, in favour of the plaintiff, in an action to recover $168 for "sick benefits," it appeared that the plaintiff, a member of the defendant "Court," a subordinate branch of a friendly or benefit society, incorporated by a Dominion statute and registered under the Ontario Insurance Act, applied for "sick benefits" to which he would have been entitled under the laws of the society, upon a satisfactory certificate from the medical officer of the Court. The medical officer, however, certified that the plaintiff's illness was caused or contributed to by the excessive use of intoxicating liquors, and the Court refused the benefits. This was affirmed by the various appellate bodies having jurisdiction under the laws of the Society, but none of them had any evidence before them other than the certificate of the medical officer, and two certificates of a contrary opinion given at the instance of the plaintiff by another physician. There was no tender of other evidence by the plaintiff. In an action brought for the recovery of the amount of the "sick benefits," the trial judge heard evidence as to the cause of illness, and found that it was not caused or contributed to in the way certified to by the medical officer, and that the certificate, though honestly given, was founded upon an erroneous diagnosis. It was held on appeal, by the Divisional Court, that the matter was one to be disposed of by the methods of the society, to which the plaintiff subjected himself on becoming a member; and the action of the Society was final, unless it was made to appear that it was contrary to natural justice, or in violation of the rules of the body, or done in bad faith. An erroneous medical certificate, given honestly, but by mistaken diagnosis, cannot be regarded as fraudulent; "legal fraud" does not exist in a sense distinguishing it from dishonesty or moral wrongdoing. Judgement of the County Court of York, in favour of the Plaintiff, reversed.

(Thompson v. Court Harmony No. 7045, Ancient Order of Foresters (1910) 21 O.L.R. 303.)

MANITOBA CASES.

Dangerous Work.—Liability of Contractor and Sub-Contractor.

The defendants were the contractors for the building of a railway. They sublet a portion of the work to sub-contractors, who, in the prosecution of the work, negligently discharged a dynamite blast and injured the plaintiff. In an action against the sub-contractors, the plaintiff obtained judgement for damages in respect of his injuries, but on a writ of execution upon the judgement, he did not recover anything. He then brought this action against the defendants, the contractors. It was admitted that the injury complained of in both actions, and the cause of such injury, were identical; and it was conceded by the defendants that, upon the facts alleged in the statement of claim, they were jointly liable with the sub-contractors, and might have been sued by the plaintiff, either jointly with the sub-contractors or alone. It was held at the trial by Chief Justice Mathers, that the work sublet by the defendants to the sub-contractors being of a dangerous character and liable to result in injury if negligently performed, the defendants were liable for the sub-contractors' negligence in performing it—following the decision in *Penny v. Wimbledon Urban District Council* (1898), 2 Q. B., 212; (1899) 2 Q. B., 72. But it was also held, that the judgement recovered by the plaintiff against the sub-contractors, although it remained unsatisfied, was a bar to this action—the defendants and the sub-contractors being joint wrongdoers—following the decision in *Brinsmead v. Harrison*, L. R. 7, C. P. 547. The Chief Justice quoted the following summary of the Law on the point from a well known authority: "There are no degrees of responsibility, nothing answering to the distinctions in criminal law between principals and accessories, but when the plaintiff, in such a case, has his choice, he is concluded by it. After recovering judgement against some or one of the joint authors of a wrong he cannot sue the others or other for the same matter even if the judgment in the first action remains unsatisfied. By that judgement the cause of action passes into the judgement so recovered and is no longer available." The reason of the rule is stated to be that otherwise a vexatious number of actions would be encouraged. In the present case the action against the defendants, the contractors, was dismissed with costs.

(Longmore v. J. D. McArthur Co., 14 Western Reporter 233.)

Master and Servant.—Breach of Duty, Trespass, etc.

The plaintiff being employed by the defendants as the agent for the sale of their goods in a defined territory, agreed to hold himself subject to the direction of the defendants and to serve their interests, and not to carry or offer for sale any goods except those manufactured or sold by the defendants. The plaintiff was paid by commission on his sales. He entered the service of the defendants on January 1, 1908, and continued till May 15, 1909, when he was dismissed. He had an office, rented in his own name, and of which he paid the rent, but it had the defendants' name on the door. In January or February, 1909, the plaintiff entered into negotiations with a firm doing a similar business to that of the defendants, with a view to entering into the service of that firm in 1910, and while still in the service of the defendants, endeavoured to induce a number of the defendants' agents to leave the defendants and enter the service of the other firm. A contract was entered into between that firm and the plaintiff, dated March 30, 1909, to take effect on or before January 1, 1910. The plaintiff had, while in the defendants' service, prepared a mailing list of customers and prospective customers in his own territory, for use in the prosecution of the defendants' business, and he had bought from another agent of the defendants' a similar list in respect of another territory. He had also a card index of names, and had prepared a list of probable buyers all over Canada. He had also a ledger in which he had entered

the name of each person from whom he got an order for the defendants, with particulars, prices and dates. During the absence of the plaintiff, the defendants entered his office, removed the furniture, which was their own, and the ledger, the mailing list and the card-index. The general mailing list of all Canada they destroyed. In an action by plaintiff for money claimed to be due him by defendants on commissions, or for an account, and for damages for entering his office, as above stated, and removing the articles referred to, and for having torn up and destroyed correspondence, papers, &c., Chief Justice Mathers, who tried the action, held: (1) That the defendants had no right to enter the office without the plaintiff's permission, and, in doing so, they committed an act of trespass; (2) that the general mailing list was the plaintiff's property, and the plaintiff was entitled to damages for its destruction; (3) that the other articles were the defendants' own property, and plaintiff could recover nothing for their conversion; (4) that defendants were entitled, upon their counterclaim, to damages for breach of the plaintiff's contract to serve them to the best of his ability.

Evidence was admitted, subject to objection, to show loss to the defendants occasioned by the fact that the plaintiff did not continue in their service till the end of the year, although, in fact, the defendants dismissed him. The Chief Justice held, that the evidence was open to the double objection that it was too remote, and that it showed special damage, for which no foundation was laid in the pleadings in the action. A verdict was given for the plaintiff for $300 and costs of suit, and for the defendants for $551.33 and costs of their counter-claim—the costs in each case to be taxed and added to the verdict, and the amounts so ascertained set off. Judgement to be entered for the balance so ascertained against the party so found to be indebted.

(Martin v. Brown, 14 Western Reporter, 237.)

BRITISH COLUMBIA CASE.

New Trial for Excessive Damages.

The plaintiff, a tinsmith, was injured by the admitted negligence of the defendants; his thigh was dislocated; and the medical evidence showed that he would probably never fully recover from the injury. The limb, it was said, would always have a limited action, and the resuilt was that he would be unable to follow at least some branches of his trade. He would be unable to get about on roofs and scaffolding, and will have to confine himself to work which will require less activity. His medical and hospital bills amounted to about $500, and, up to the time of the trial, he had been idle for about eight months by reason of the injury. In an action to recover damages for his injuries, a jury awarded him $11,500, $10,000 of which, as one of the judges said, would be available to compensate him for his pain and suffering and decreased earning powers. The amount would give him an annuity amounting probably to more than fifty per cent. nearer seventy-five per cent., of what he could be reasonably expected to earn without the disabilities occasioned by the accident. Upon an appeal to the Court of Appeal, three of the four judges composing the Court, were of the opinion that the damages were excessive, and that there must be a new trial. Mr. Justice Galliher said, "There can be no question that this Court has the power to order a new trial in cases where they are clearly of opinion that the evidence did not warrant the finding of the jury. I take it we are very much in the same position in this as we should be in a case where we were deciding upon the weight of evidence, and while Courts of Appeal must exercise great care in overruling the findings of juries, yet, if they did not in a clear case exercise their powers, their functions would be very much limited. I think this is clearly a case where the Court should interfere and order a new trial."

(Farquharson v. British Columbia Electric R. W. Co., 14 Western L.R. 91.)

ENGLISH CASE.

Refusal to Work Overtime.

A test case as to the right of printers to refuse to work overtime was heard in the City of London Court, on the twenty-first ultimo, before Judge Lumley Smith, K.C. Robert E. Cole, machine manager, Walthamstow, sued Messrs. Howard & Jones, Limited, printers, Bury street, London, E.C., for £4 19s. 4d., for alleged wrongful dismissal. The plaintiff had been in the service of the defendants for more than eight years. On February 18, at 6.15 P.M., he was told he would be required to work overtime, and as his trade union, the London Machine Managers' Trade Society, had decided that the men should not work overtime, he declined to go on. At 6.30, when he left, the plaintiff was at once discharged, and a number of men were brought in, under a police escort, from the Labour Exchange, to take the places of those who left.

The objection to work overtime was arrived at as a means of dealing with the subject of unemployment. Giving evidnce, the plaintiff said, in cross-examination, that he had worked overtime on several occasions previously, but he refused to do so after his trade unions' resolution. The Master Printers' Association and the men's society had worked together, but the agreement had been set aside. Mr. F. Jones, one of the defendant company's directors, said they had always paid the plaintiff time-and-a-half for overtime. Great inconvenience was caused when the plaintiff and others refused to work overtime. The defendants were no parties to abolishing overtime. They never thought that men like the plaintiff would refuse to work overtime when required. As the plaintiff would not work he was discharged. Judge Lumley Smith held that the workers should have given fourteen days' notice that they would not work overtime. As that was not done, he found for the defendants, and he gave costs on the higher scale, as the case was of importance.

THE

LABOUR GAZETTE

OCTOBER, 1910.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF SEPTEMBER, 1910.

I.—GENERAL SUMMARY.

INDUSTRIAL activity was very pronounced throughout Canada during September. Weather conditions were excellent for agriculturists and for outdoor employment generally. The more favourable estimates of the Western crop-yield made at the close of August were generally confirmed; the returns, though falling below that of 1909, will be better than had been expected in July. In Ontario and the Eastern Provinces the crops will yield considerably better than in 1909. Work on railway construction, civic improvements, and in the building trades, was very actively prosecuted during the month, and additional men could have found employment in certain localities. Railway construction in British Columbia was seriously hampered by lack of labour. The building year, in particular, will compare favourably with that of 1909, and a good winter season on indoor work is expected. Reports from the lumbering and mining industries were, on the whole, very favourable; labour for the winter lumber camps in Ontario is commanding a higher price than last year. Fishing operations have been quiet and returns light. In manufacturing, nearly all branches were working to full capacity, and a considerable expansion in premises and equipment was in progress. Transportation employés of all classes were exceptionally active, the shipments of the Western grain crop having begun and the usual rush of freight having set in in anticipation of the close of navigation.

Changes in Wages and Hours of Labour.

The following is a statement by industries and groups of trades of the more important changes in wages and hours of labour, information concerning which was received at the Department of Labour during September, 1910.

Building trades.—Bricklayers and masons (500) at Montreal, Que., received an increase in wages from 40 to 45 cents per hour, after a strike.

Food and tobacco preparation.—Employés in the biscuit and confectionery factories of the Perrin and McCormick Companies, at London, Ont., to the number of 325 males and 575 females, had their hours reduced three per week, without changes in wages. The change was a voluntary concession by the firms, with the object of inducing a larger supply of labour.

Railway employés.—Engineers in the employ of the Michigan Central Railroad Company received a substantial advance in wages.[1]

Street railway employés.—The British Columbia Electric Railway Company signed an agreement with its employés, after lengthy negotiations, providing for an increase in wages, and the retention of the nine-hour day.

Interruptions to Industry.

Among industrial establishments, &c., destroyed by fire or through other causes.

[1] See report of St. Thomas correspondent.

The LABOUR GAZETTE, in its accounts of proceedings, abstracts of reports, legal decisions, quotations or other records of matters of concern to labour, is not to be regarded as necessarily endorsing any of the views or opinions which may be expressed therein.—Ed.

during September, 1910, as reported in the press of the Dominion, the following may be mentioned:—

Nova Scotia.—At Halifax, storehouses and business block, loss, $10,000; two stores and residence, loss, $20,000. Livery stable and contents at Glace Bay.

New Brunswick.—Roundhouse, two locomotives and one car at Minto, outbuildings and residence at Fredericton, loss, $1,500. At St. John, livery stable and contents; shop and foundry.

Quebec.—Saw-mill and lumber at Como, loss, $40,000; hotel and three dwellings at Compton, loss, $6,000; 10,000 cords of pulp wood at East Angus; sash and door factory at Granby, loss, $25,000; tenement house at Laprairie, loss, $1,000; hospital (partial) at Levis, loss, $1,000. At Montreal, stable of sixty stalls at Parc deLorimier; lumber warehouse and contents, loss, $5,000; outbuildings and residence, loss, $2,000; paint and oil establishment, loss, $25,000; stable and two horses; ice house; hotel, loss, $2,500; hay warehouse, loss, $2,500; a cheese warehouse, loss, $2,500. Saw-mill at Orford, loss, $10,000. At Quebec, boot and shoe store and residence, loss, $8,000; provision warehouse, loss, $1,500. Foundry (partial) at Sorel, loss, $1,000.

Ontario.—Stables and residence at Carleton Place; stave mill at Comber, loss, $8,000; outbuildings and residence at Embrun; lithographing establishment at Hamilton, loss, $10,000; two warehouses at Iroquois loss, $3,000; engine works at Midland, loss, $12,000; outbuildings and residence at Millington, loss, $2,500; hotel at Niagara Falls, loss, $2,000; general store at Ottawa, loss, $3,000; outbuildings and contents at Peterborough, loss, $1,600; steamer *Keministiquia* at Port Arthur, loss, $7,500; outbuildings and residence at Princeton; granary, shed and residence at Ridgetown, loss, $5,000; hotel at Schreiber; roller rink at Sudbury, loss, $15,000; cooperage and residence at Trenton, (100 men out of employment); club house (partial) at Toronto, loss, $3,000; printing office at Toronto; oil refinery and glass factory (partial) at Wallaceburg, (100 men thrown out of employment). Barn at Clarendon.

Manitoba.—Hotel and two stores at Dominion City, loss, $12,000; clothing warehouse at Winnipeg, loss, $50,000; apartment block and six residences at Winnipeg, loss, $110,000.

Saskatchewan.—Granary and residence at Hayfield, loss, $4,500.

Alberta.—Sheds, machinery room and saw-mill at Leduc, loss, $3,000; abattoir at Strathcona, loss, $15,000.

British Columbia.—Three herring canneries at Nanaimo, loss, $20,000; hospital at Rock Bay, loss, $10,000; business block at Whiterock, loss, $20,000.

Conditions in the Industries and Trades.

Conditions of employment during September, in the several industries and groups of trades, throughout Canada, as indicated by reports of correspondents of the *Labour Gazette*, and by information received at the Department of Labour from other sources, may be briefly summarized as follows:—

Agriculture.

Weather conditions were generally favourable. Temperatures were uniformly high, and showers in the latter half of the month improved pasturages and brought the root crop on, while improving the land for ploughing. The result was a very busy month for agriculturists. Threshing, ploughing, corn cutting, fall wheat sowing and apple packing constituted the chief items of employment. Grain cutting was completed early in the month.

No material change in the crop estimates sent out in the closing days of August was recorded. General satisfaction is expressed with the agricultural yield in Ontario, the total value of field crops in this province being estimated at $205,000,000, an increase of $35,000,000 over last year. The more favourable estimates of August, as compared with those sent out following the drought of July, with regard to the western crop, have been confirmed. The annual crop estimate of the North-west Grain Dealers' Association, issued in the closing days of September, is as follows:—

					Bushels.
Wheat	8,453,200	acres at	12.6	per acre	106,510,320
Oats	4,217,400	"	26.5	"	111,983,000
Barley	1,002,000	"	19.1	"	19,520,000
Flax	630,000	"	8.4	"	5,292,000
Wheat inspected to date					92,904,000
Oats	"	"			32,706,000
Barley	"	"			4,628,009
Flax	"	"			3,576,000

The estimate of the Canadian Pacific Railway Company of the western wheat yield is 94,900,000 bushels. The Bureau of Statistics, Canada, places the total wheat crop at 99,890,000 bushels. In the Eastern Provinces substantial gains on last year's output are shown in wheat, oats and barley.

A cablegram received September 27, from the International Institute of Agriculture, gives the yield of wheat estimated September 1 as follows:— Italy, 165,346,656 bushels, compared with 184,956,913 reported last month, and 125,363,287 last year; Roumania, 108,853,211 bushels, compared with 107,886,633 reported last month, and 59,043,045 last year; Hungary, 198,482,118 bushels, compared with 189,352,220, reported last month, and 125,363,287 last year; Russia, 917,633,489 bushels, compared with 784,203,650 last year; Prussia, 87,799,070, compared with 138,000,049 in all Germany last year. Conditions: Great

Britain, 90 against 101, August 1; Germany, August 15, Winter wheat, 2.5, against 2.3, July 15; Spring wheat, 2.7, against 2.6, July 15; Austria, 2.8, August 15, compared with 2.5, July 15.

The exodus of harvesters to the Northwest Provinces was much less severely felt in the general market for labour than last year. Wages ran form $20 to $45 per month with board, or from $2 to $3 per day for exceptionally good men.

Agricultural exhibitions were unusually well attended, and exhibits were larger and better than last year.

Apples, generally speaking, will be a light crop, peaches fair, grapes medium and plums a good crop. Very favourable reports are received from the fruit dristicts of British Columbia. On the subject of the method of shipping apples to the British market the Dairy and Cold Storage Commissioner of Canada reported on September 25, as follows:—

"Several shipments of early apples have been made to Great Britain during the past month. Our inspectors report some shipments in ordinary cars arriving at Montreal in a heated, over-ripe, and even rotten condition. In view of the arrangement between the department of agriculture and the railways, whereby shippers may obtain iced cars at ordinary rates for the carriage of fruit intended for export in cold storage, it is amazing that such a complaint can be founded on fact. Some of the oldest shippers are the worst offenders in this respect. The direct loss for such neglect or ignorance falls on the shipper or owner, but the indirect loss from injury to the reputation of Canadian apples reaches every apple grower in Canada, and it is about time that the careless, slipshod operator should be given to understand that he has no right to jeopardize the interests of an important industry in this irresponsible manner."

Shipments of western grain have been begun on an extensive scale. The prices of farm products have been firm.

The decline in the sheep industry in Canada is to be investigated by a committee of two, under authority of the Honourable the Minister of Agriculture, Canada. The committee consists of an English wool expert, and an experienced Canadian sheep breeder.

Fishing.

The month was quiet throughout Canada. The oyster season began in the Maritime Provinces, but catches were light. In New Brunswick, however, quahaug beds are yielding well. The herring and mackerel fleets reported small catches; sardines also were scarce. The total catch of the Lunenburg Grand Banks fleet was 147,125 quintals. Most of the steamers have returned, and will not engage in fishing during the rest of the season, owing to scarcity of bait and ice and disaffection among the crews. Conditions on the Great Lakes and in British Columbia were normal for the season. Over 750 whales have been taken by the Pacific Company's whaling fleet operating on the west coast of Vancouver Island, this year.

The yearly convention of the Fishermen's Union of Nova Scotia was held at Halifax, September 29.

The decline in the fish supply in Saskatchewan and Alberta will be made the subject of inquiry by a Royal Commission consisting of Professor E. E. Prince, chairman, Mr. Justice McGuire, of Prince Albert, and Dr. Euston Sisley, of Calgary. Sessions at various points in the provinces will be held, beginning early in October.

Lumbering.

In Ontario and the Eastern Provinces preparations for winter operations in the woods were actively under way; large gangs were engaged, though the supply of labour was scarce, as compared with last year, and wages offered were higher. Stocks of logs in the Ottawa valley were reported low, and the cut during the coming season is expected to be large. In New Brunswick, however, no increase in production is looked for. Saw-mills were still running to their full capacity and will continue to do so in most localities until the frost comes. In British Columbia, no marked change from last month occurred; conditions were generally active in camps and mills. A merger of four large lumber companies on the Pacific coast, with a total capitalization of $5,000,000, under the title of the Canadian Pacific Lumber Company, with head offices in Victoria, was reported.

Mining.

The large outputs from the Nova Scotia collieries of the preceding months of the season were maintained, and shipments were somewhat increased, during Sep-

TABLE SHOWING STATE OF EMPLOYMENT

This table is based largely on the reports of the correspondents of the *Labour Gazette* as published in the present n the several trades and industries throughout the Dominion. The table has reference only to the amount of employ- separate headings in the *Labour Gazette*. In tabulating the informations in question, the terms employed are divided as follows: (1) active, very active, (2) quiet and very quiet.

City and district of correspondent.	Agri-cultural opera-tions.	Fishing.	Lumbering (including saw-milling.)	Mining.	Manufac-turing.	Railway construc-tion.	Building trades.

tember. Additional labour could have found employment at certain points; the strike at Springhill, however, still continues. Very active conditions were reported from the asbestos regions of Quebec, and there was considerable activity in the mica market. The Cobalt and other important camps of Northern Ontario continued to produce steadily. The coal mines of Alberta and Eastern British Columbia were somewhat hampered for lack of transportation facilities, owing to the diversion of cars to the grain traffic, but more active conditions of employment are expected in November. Extensive colliery development operations are in progress in the vicinity of Lethbridge, Alta. The mines on Vancouver Island continued to produce heavily. Little change was reported from the metalliferous camps of the interior. The Granby Consolidated Mining, Smelting & Power Company is rebuilding and equipping the large copper producer at Phoenix, recently destroyed by fire.

The mineral production of Ontario for the half year of 1910 ended June 30, was considerably in advance of that of 1909. Altogether the mineral output of Northern Ontario shows a very considerable increase. The production for the first half of 1910, as compared with that of 1909, reads:—

	Ounces.	Value.
1910	12,804,992	$6,260,197
1909	11,324,382	5,379,980
Increase		$880,217

A statement recently published gives the value and quantity of the ores smelted at the works of the Consolidated Mining & Smelting Company, during the time it has been in operation, at $42,646,025, and 2,458,684 tons, respectively.

Manufacturing.*

Very active conditions prevailed in this industry during September, full staffs and full time being worked in most branches and localities, with several instances of overtime. Factory extensions and increases in equipment were in progress on a considerable scale, and the general tone and outlook of the industry was regarded as very favourable. Female help still remained scarce in white wear and kindred establishments.

The annual meeting of the Dominion Millers' Association was held at Toronto, September 1.

The iron and steel industry continued exceedingly active, and the output of pig iron, steel ingots, rods, rails, etc., in the various plants was very heavy. In Nova Scotia, the companies report a very active demand for labour.‡

Railway Construction.

Work was very active in the various railway construction contracts under way. Good progress was reported, the supply of labour, at some points, being somewhat better than in September, though in Western Canada a scarcity was still complained of. In British Columbia, the scarcity was given as the cause for deferring the letting of some important contracts.

An important incident of the month was the turning of the first sod by the Honourable the Minister of Railways and Canals for the building of the substructure of the bridge over the Saskatchewan river at Pas Mission, being the first step in the construction of the proposed Hudson Bay Railway.

Another important work begun during September was that of improving the grade between Mimico and Toronto, by the Grand Trunk Railway Company, at an estimated cost of $2,000,000.

Final preparations were also made by the Canadian Northern Railway Company for the calling of tenders for a line of railway between Chilliwack and Lytton, B.C., and between Victoria and Barclay Sound, Vancouver Island.

The operation of the National Transcontinental Railway between Winnipeg and Lake Superior junction will be begun at an early date.

As the season is advanced, only temporary buildings will be erected to replace those burnt at Campbellton, N.B., with the exception of the locomotive house.

*A special article on the annual convention of the Canadian Manufacturers' Association appears elsewhere in the present issue.

‡See also the report of the Sault Ste. Marie, correspondent.

General Transport.

For transportation employés of all classes the month was very active. Freight and passenger traffic were very heavy, both by water and rail, in anticipation of the close of navigation.

Railway earnings on the Canadian Pacific, Canadian Northern and Grand Trunk Railways, according to the latest returns, showed a considerable increase, as compared with last year.

The twenty-ninth annual report of the Canadian Pacific Railway Company was presented to the shareholders during September. For the year ending June 30, 1910, the following results are shown:

Gross earnings	$94,989,490
Working expenses	61,149,534
Net earnings	$33,839,955
Steamship earnings	909,235
Interest on securities	2,426,477
	$37,175,668
Fixed charges	9,916,940
Balance	$27,258,728

Out of this latter sum provision was made for steamship replacement, the pension fund, dividends, &c., and $13,896,615 was carried forward to the supplus fund. The working expenses for the year amounted to 64.38 per cent. of the gross earnings, and in the net earnings to 35.62 per cent. as compared with 69.92 per cent. and 30.08 respectively in 1909. Sales of agricultural land during the year amounted to 975,303 acres for $14,468,564 being an average of $14.84 per acre. Irrigated land brought $26.59 per acre, so that the average price of the balance was $12.78. The Company will spend during the next three years $8,500,000 to provide water over the eastern section of the irrigation block. The tons of freight carried during the year rose from 16,549,616 to 20,551,368.

Traffic on the Great Lakes and canals, and trans-oceanic traffic at Montreal, were heavy. Winter sailings were announced by several of the companies during September. Revenue returns of the Port of Montreal, show a gain of $31,350 up to September 1, 1910.

A summary of the traffic on the Sault Ste. Marie canals, for the month of August, 1910, is as follows:—

	U.S. Canal.	Can. Canal.	Total.
Vessel Passages No...	2,116	1,045	3,161
Reg'st'rd Tonnage Net	4,433,837	3,251,851	7,685,688
Freight—			
East Bound, Net tons	2,660,345	4,759,443	7,419,788
West Bound, Net tons	1,686,236	638,532	2,324,768
Total Freight, Net tons	4,346,581	5,397,975	9,744,556

Street railway traffic has shown an increase in nearly all Canadian cities. Earnings of the Toronto Street Railway Company during August were the largest in the history of the Compnay, totalling $386,805, an increase of $43,247, compared with that of August, 1909. A subcommittee was appointed by the Toronto City Council to consider the proposal to municipalize the railway company's lines and equipment.

The Board of Railway Commissioners have requested a return from the various railway companies showing the highway crossings on which electric bells are located, and the number of level crossings with other railway lines. Particulars of all overhead bridges, snowsheds, &c., not of statutory height have also been requested.

The twenty-first annual report of the Intercolonial and Prince Edward Island Railway Employés Relief and Insurance Association has been issued to the members. The death claims paid during the year ended June 30, 1910, number fifty-eight, and the total amount paid out was $24,750.

The Trades.

Building.—With the advance of the building season, conditons became exceedingly active. From nearly every point reports show an increase in the number of men employed, as compared with August. Notwithstanding the lateness of the season, many new building contracts were begun, and the outlook is for extreme outside activity as long as the weather permits, a good winter on interior work and a considerable amount of work on the opening of spring.

Metal and woodworking.—Most branches of the metal and woodworking trades had an active month, especially those engaged on structural material.

Printing.—Reports generally were of steady employment for the allied trades.

Clothing.—Journeymen tailors were more active than in August from seasonal causes. Garment workers and boot and shoe workers had an active month.

Textile.—Steady employment was the rule in textile establishments.

Leather.—Tanners, curriers and leather workers had a good month.

Food and tobacco preparation.—The volume of trade was well maintained. Bakers were active; the trend of the flour market was upward. Cigar makers and tobacco workers were well employed. Confectioners' establishments were very busy.

Miscellaneous.—Retail clerks and laundry workers were active in the large centres. The season for theatre employés opened. Domestic servants were in very keen demand.

Unskilled labour.—For this class, the month was very active, and additional men could have found employment in several localities. Work on railway construction, civic improvements and building was being pushed as vigorously as possible, and in only a few localities was the supply of help greater than the demand.

Canadian Trade and Revenue.

Foreign trade.—During August, 1910, the total value of imports entered for consumption in the Dominion of Canada, was $38,691,965, compared with $30,605,350 in August, 1909. For the first five months of the present fiscal year ending August 31, 1910, the total value of imports entered for consumption was $184,602,965, compared with $142,753,993 in the corresponding period of the last fiscal year. The total value of domestic exports during August, 1910, was $22,461,918, compared with $23,537,330 in August, 1909. The total value of domestic exports during the five months ending August, 1910, was $103,414,496, as against $96,935,925 in the corresponding months of last year. During August, 1910, there were increases in exports of the mine and manufactures, and decreases in exports of the fisheries, the forest, animals and their produce and agriculture. The grand total of Canadian trade for August, 1910, was $63,187,521, compared with $55,869,031 in August, 1909, and for the five months ending August 31, 1910. $295,817,781, as against $247,788,335 in the corresponding months of 1909.

According to reports of Canadian Trade Commissioners received at the Department of Trade and Commerce, Canada, the total imports and exports in 1909 between Canada and China, exclusive of Hong Kong, amounted to $1,763,572, or an increase over 1907, of $542,346, and over 1908, of $196,373. The total trade of Canada-China for 1909 amounted to about $2,500,000. A decrease of imports of flour to China was reported. Canadian condensed milk is in favour, and there is a large market for it. A good market for canned goods also exists. Canadian butter packed in oil paper found a good market. Canadian potatoes shipped from Vancouver had a ready sale. A permanent resident representing Canadian wholesale houses in the City of Mexico is strongly urged.

Imperial trade.—In Great Britain and the different Dominions of the Empire, openings for Canadian products were reported as follows: For Canadian hay and oats in Great Britain. The first cargo of Canadian ore, 5,600 tons, arrived at Ardrossan, Scotland, in September. This is an experiment which will be keenly watched. It is anticipated that there will be a heavy demand for Canadian turkeys at Christmas. Openings were reported for Canadian broken glass and honey in the markets of the United Kingdom. A heavy Canadian trade is looked for in Australia. Canada has practically obtained control of the canned salmon trade of the Commonwealth. An increase in the imports of Canadian preserved fish was reported in South Africa. In Trinidad the imports of Canadian oats for the year ended December 31, 1909, nearly doubled those of last year. Openings in this island for Canadian crackers, biscuits, cheese, fresh fruits, vegetables, stock feed, condensed milk and candles were reported.

An International Town Planning Conference is to be held in London, Eng., in the second week of October, under the patronage of His Majesty the King. It is desired that Canada be adequately represented at this conference.

The Department of Trade and Commerce estimates that, with reasonable allowance for the coming winter months, it would appear that nothing will prevent the total trade of Canada for the current fiscal year ending March 31 next, from

being well above $800,000,000. The total trade for the fiscal year ended March 31, 1910, was $693,161,865. Every indication points to the fact that the trade of the current fiscal year will not only be the greatest in the history of Canada, but will be very much more than double the total trade of Canada only ten years ago.

Domestic trade.—General trade conditions have not varied greatly during the past month; the movement of merchandize in most lines has been fair, with prices firm. Remittances came in well, though in some districts collections were disappointing. The demand for seasonable spring merchandize has been brisk. In dry-goods, the turn-over has been satisfactory, fall trade opening up somewhat earlier than usual. The grocery and hardware trades have been good. Large shipments of heavy goods were made.

The August bank statement indicates continued commercial expansion on a sound basis. Loans were increased by $5,000,000, and circulation by $2,500,000. At the same time, an addition to reserve and assets was made. There was a withdrawal of funds from abroad for home purposes during August. As indicating the expansion of Canadian banking in recent years, it is pointed out that the Bank of Montreal alone transacts ten per cent. more business to-day than that done by all the banks in Canada put together twenty years ago.

Notes.

The annual convention of the Associated Canadian Clubs was held at Toronto.

The third convention of the Canadian Pharmaceutical Association was held at Halifax, N.S.

The Maritime Funeral Contractors' Association held its annual session at St. John, N.B.

Mr. Raoul Bolté has been appointed Municipal Fair Wages Officer for the City of Montreal.

The Report of the Royal Commission to inquire into trade relations between Canada and the West Indies has been issued.

The Retail Lumbermen's Association of Ontario was organized at Toronto at a convention at which about 200 retailers were present.

An organization called the Canadian Credit Men's Association, for the purpose of improving existing credit methods through the co-operation of individuals engaged in extending credit, was organized at Winnipeg.

Hereafter Chinese who leave Canada to visit their homeland and who are exempt from the head tax, if they return within a year, must be photographed for purposes of identification. A new instruction to this effect was issued during September.

At the fifteenth annual convention of the Master Plumbers' Association of Canada, held at Toronto, a resolution urging the necessity of legislation to secure the examination of plumbers as to their fitness as workmen and as master plumbers, passed.

An important seizure of opium was made at Nelson, B.C., and a fine of $200 imposed. At Saskatoon, Sask., also a seizure of opium was made and a fine of $100 levied. The meeting of the International Opium Conference at the Hague, Holland, which had been suggested for the present year, has been postponed for one year.

The Magog, Que., Co-operative Society during the past four months' operations reports an increase from $277 to $634 in fortnightly sales. The Society started with eighty-eight members and has now 162. A dividend of five and one-half per cent. was declared.

A statement issued by the Board of Trade of Winnipeg, Man., would indicate that that city is now the largest wheat market on the continent. The number of bushels handled this year is placed at 88,269,330. The City of Minneapolis, which stands next, is estimated to handle 81,111,410 bushels.

Further conferences took place during September between the Chairman of the United States Commerce Commission and the Chairman of the Railway Commissioners of Canada, with respect to the international regulation of railroads. An international tribunal, to have authority

over freight rates and telegraph, telephone and express traffic, as well as over railroad and steamboat traffic, was suggested.

An important conference was held in Ottawa, Ont., under the auspices of the Department of Mines, Canada, for the purpose of discussing the recommendations of Captain A. P. Desborough, an expert employé of the British Government, engaged by the Canadian Government to report on the subject of the proposed legislation to ensure greater safety in the handling of explosives in Canada. The conference was attended by representatives of several Provincial Governments and of private firms interested in the manufacture and sale of explosives. Captain Desborough presented a summary and review of his recommendations. It was decided to hold another conference shortly, and, in the meanwhile, to have copies of the recommendations distributed among those interested. Among the recommendations was one suggesting the establishment of a testing station at Ottawa, and the inauguration of a licensing system for manufacture under Federal inspection and control.

The tenth annual convention of the Union of Canadian Municipalities was held at Toronto, Ont., August 31 and September 1–2. Papers were read on municipal accounting, the Ontario Hydro-Electric Power Commission, town planning and embellishment, level crossings, automobile legislation, &c. Mr. J. A. Chisholm, Mayor of Halifax, N.S., was elected president and Mr. W. D. Lighthall, K.C., Montreal, secretary-treasurer.

At a special meeting of the Vancouver, B.C., Board of Trade it was resolved to form a transportation bureau, to embrace the members of Boards of Trade in other cities of British Columbia should they wish to join. It was also decided to appoint a traffic officer. The resolutions passed by the Board were as follows:

"Whereas it has been decided that a transportation bureau should be formed in connection with this Board, the duties of the Board to be as follows:—

"(a)—To conserve Vancouver's and British Columbia's interests in freight matters, import, export and domestic.

"(b)—To be represented at meetings of the Railway Commission, when thought advisable by the freight rates' Committee.

"(c)—To facilitate adjustments through overcharges, delays, loss or damage to goods, demurrage, classifications, etc., etc.

"(d)—Generally to advise members as to their rights under the Railway act:

"Be it resolved;

"(1)—That the Bureau be a department of the Board of Trade.

"(2)—That its members must be members, in good standing of a Board of Trade of British Columbia;

"(3)—That the Bureau be self-supporting so far as possible;

"(4)—That the bureau dues for membership be between $25 and $50 per annum, payable half yearly in advance, and that in the first year, owing to inauguration expenses and our important case before the Railway Commmission, the higher fee be charged.

"(5)—That the engagement of a traffic officer and other bureau arrangements be left in the hands of the freight rates' committee."

The twenty-eighth quarterly meeting of the Valleyfield, Que., Co-operative Association, held September 7, showed sales of $8,616, an increase of $158. Net profits were $435. The Sydney Mines, N.S., Co-operative Association's average weekly sales were $2,239 during the past quarter. The increase in the quarter's business over the same period of last year was $10,042.

A branch of the National Industrial Peace Association was formed at Vancouver, B.C. Officers were elected as follows: President, Charles Woodward; Vice-presidents, Rev. W. H. Fraser and R. P. McLennan; Secretary, S. M. Eveleigh; Treasurer, W. I. McMillan; Executive Committee, Rev. W. H. Fraser, Chairman, and Messrs. W. J. McMillan, S. M. Eveleigh, J. J. Dissette and F. K. Dunlop. The following names were added as directors of the association:—Messrs. G. E. Trorey, Johnson, D. A. Smith, F. G. Proctor, Theodore Knight, W. M. Standevan, Wm. Godfrey, T. A. Fee, Allen Girard and John Rummell.

II. REPORTS OF LOCAL CORRESPONDENTS.

DURING September, 1910, Mr. A. B. Jones, Saskatoon, Sask., has been appointed correspondent of the *Labour Gazette* for Saskatoon, Sask., and district. Mr. John Chrow, Victoria, B.C., was appointed correspondent for Victoria, B.C., and district in the room of Mr. W. E. Ditchbourne, resigned.

SYDNEY, N.S., AND DISTRICT.

Mr. John Moffatt, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market was very active during the month, and workingmen in all trades were well employed. The collieries and steel plants continued active, and large outputs were obtained in both of these industries. Railways and tramways were very busy and shipping continued heavy. Factories and foundries and the building trades all shared alike in the business activity.

The Sydney Steel Works was active in every department while construction work was rapidly rushed forward, and plans laid down for the erection of seven other large buildings. The Steel Company contemplates the erection of a large general office further from the centre of their plant. The Sydney Steel Works are very extensive, and cover a large track of ground; with the additions and improvements now being added and contemplated the plant will soon be the second largest of its kind on the American Continent.

The Steel Works at Sydney Mines continued active, and good outputs were obtained.

The Dominion Collieries were very busy, and the large outputs of the preceding months were maintained. Much more coal was shipped, however, during September, as the steam shovels were kept going at the coal heaps, and much coal was filled away. The Sydney Mines' Collieries were very active, the demand for this coal being keen. It is expected that work at the Collieries will be very good during the last three months of the year, although from some quarters, it is reported that trade may be slack.

Inverness Colliery worked steadily, and had good outputs.

Port Hood Colliery was not so busy as the others, and it is stated that winter prospects are not bright.

Work on the Little Bras'Dor extension of the Intercolonial Railway, progressed well during the month.

The building trades were active, and will continue active during the fall season.

Transportation by water was fairly heavy, while rail freights were up to the usual of the summer months. The passenger traffic of the Intercolonial Railway was heavy during the whole summer and as a result the two passenger trains, running daily from Sydney to Halifax, will be continued throughout the winter. The wholesale trade was normal, while the retail trades strengthened up material during the month.

The Grand Council of the Provincial Workmen's Association met in Halifax in the early part of the month. The Association was reported financially and numerically strong. Over sixty delegates were in attendance. A resolution was passed asking the Federal Government to establish a testing station for explosives at Ottawa, the Technical College of Halifax to do the testing of mine explosives for Nova Scotia. Many other matters of importance were discussed. The Association sent fourteen delegates to the Convention of the Canadian Federation of Labour which opened in Montreal, on the 13th of the month.

Apart from the Town of Springhill there is no labour unrest in these districts. There is abundance of labour around the collieries with the exception of Port Hood.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The season was a fairly good one for farmers, crops of all kinds being above the average. The grain crop was well gathered. Potatoes are above the average yield and of good quality, the dry weather favouring them very much.

Fishing.—The fisheries continued to give but little better results than were obtained in the early part of the season.

Skilled and unskilled labour was well employed.

WESTVILLE, N.S., AND DISTRICT.

Mr. T. Hale, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions in this district were generally satisfactory, the outputs from the different collieries being about equal to the corresponding month of last year. Great activity was reported in the various industries, ready employment being available for all in the building trades, and there being a demand for men in some of the collieries. The Allen shaft advertised for rock miners and helpers and the Acadian Coal Company increased the working staff in its mines.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Work has been very brisk in this industry, garnering a bountiful crop, and help was in demand in many instances. The root crop promises a good return. The Harvest Excursions, though late in being advertised this season, took away a number of young men as usual and the further draft on this class caused by the mobilizing of the militia at about the same time, also engaged a large number, curtailing the supply for the time being.

Lumbering.—Quiet conditions prevailed in this industry, the hauling of pit timber being the chief occupation.

Manufacturing.—All branches were fully employed, the Trenton Steel Works reporting very brisk conditions.

Mining.—Mining operations were being briskly carried on, full time being worked, and in some instances the supply of labour being much less than the demand.

CONDITION OF PARTICULAR TRADES.

The building trades had a good month. Horseshoers were quiet, but the other metal trades were busy. Printers had a fair month. Boot and shoe workers had a good month; the other clothing trades were quiet. The food and tobacco preparation trades reported satisfactory conditions. Delivery, hotel and restaurant employés were active; laundry workers and barbers had a good month. Railway employés were well employed. Business was good with ship labourers, street railway employés, cab drivers, draymen, teamsters and expressmen. The supply of unskilled labour was not equal to the demand.

HALIFAX, N.S., AND DISTRICT.

Mr. A. J. Smith, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market for September continued dull. There are several repairing contracts, as well as old ones in progress, and the erection of new residences, offices, &c., but this does not contribute sufficient to industrial activity to place it on a par with the corresponding period of the last few years. The principal contract now in progress is the new Young Men's Christian Association building, which is to cost $125,000. A $3,000 and $7,000 dwelling, and new offices, to cost $6,000, are the next of consequence. The other works are of minor importance.

Along the waterfront work is quiet, but should be active in October, and the succeeding months. Besides the Allan and Canadian Pacific Railway steamers which make their callings in winter, the White Star Dominion Line, the Uranium Steamship Line from Rotterdam, and other steamers will probably make this city their port of call.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Much activity has prevailed in crop gathering during the past month. Wholesale prices in the local market towards end of month were:

Eggs 20 to 21 cents a dozen.
Butter, 21 to 23 cents a pound.
Potatoes, 75 cents a bag.
Apples, $1 a bag.
Plums, 65 cents a pail.
Wheat, 90 cents a bushel.
Oats, new, 32 cents a bushel.
Oats, old, 35 cents a bushel.
Barley, 40 to 45 cents a bushel.
Peas, 70 to 75 cents a bushel.
Flour, $2.80 a cwt.

Fishing.—Local fishermen have made but small catches, particularly of mackerel. Near the end of the month indications were favourable, but they only came in small quantities, and unless they again return the revenue of our fishermen will be greatly lessened. Those caught, retailed at 25 cents, each. There were considerable importations of pickled and dry salted fish to the local market, including mackerel from Ireland and salmon from Newfoundland.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, plasterers and painters had a quiet month. Plumbers and gasfitters improved slightly over August. Stonecutters and builders' labourers were dull. Electrical workers had a fair month. Boilermakers were dull. Horseshoers and blacksmiths were better employed than last month. Other lines were normal. Printers, pressmen and bookbinders had a fair month. Tailors were dull. Bakers, confectioners, butchers, had a good month. Barbers were busy. Railway men generally were well employed, considering the season. Ship labourers were quiet, as were unskilled labourers.

AMHERST, N.S., AND DISTRICT.

Mr. A. D. Ross. correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of September has witnessed a pronounced revival in the industrial market in this vicinity.

The Amherst Boot & Shoe Company, one of the largest industries in the town, started the erection of a large four-storey building as an addition to plant, and expects to have it finished and ready for occupancy by the first of the year. This will mean the employment of a large number of additional hands, and the manufacture of various lines of boots and shoes not made in Amherst.

The Amherst Malleable Company also began the construction of a new ell to its already extensive premises. The new building will be over 300 feet long, and will give employment to probably 150 men, the majority of whom will be skilled mechanics. In addition to this, the Canadian Car & Foundry Company built a large warehouse for the accommodation of its local trade. All the industries report business prospects for the winter, good.

There has been a steady demand for labour. The fire in Campbellton has drawn many carpenters and stonemasons to that town, creating a scarcity of this class of workmen in this immediate vicinity.

Both wholesale and retail trades report a steady improvement and times better than at any other period for the past three years.

Springhill continues the dark spot on the industrial map of this county. The strike still continues. The mines are now being operated, and the output of coal is slowly, but steadily, being increased.

The Maritime Coal Railway & Power Company closed its mine at Chignecto on account of scarcity of orders. Their mines at the Joggins are operating steadily and the manager claims that all the orders can be filled from the Joggins' Colliery. There was, however, some discussion between the men and management regarding the new schedule of wages, and it is thought that when this is satisfactorily arranged, work will be resumed.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Crops all over the county are reported good, and farmers are very hopeful. The prices for market produce

continue high with a great demand. The chief difficulty experienced during the summer has been the scarcity of agricultural labour. Outside of the fruit crop, which does not play very much part in this section of Nova Scotia, the crops are very heavy.

Fishing.—At this season of the year, there is but little fishing in Cumberland county. The oyster season opened this month, but unfortunately the oyster beds of this county have been so depleted in former years that they yield but a scant return for the labour put upon them.

Lumbering.—The lumber market has been decidedly dull. There has been a slump in prices, but those engaged in the trade declare that it is only temporary and preparations are now being actively made for the winter's work. It is feared that there will be a scarcity of labour in this section as experienced lumber men are now in demand in Northern New Brunswick and large numbers are leaving Cumberland to seek employment in the vicinity of Campbellton.

Manufacture.—Manufacturing has been very active during the past month.

Mining.—The Chignecto Mines, a colliery operated by the Maritime Coal Railway & Power Company, are shut down during this month. Work is very active at the Joggins' Colliery. More men are being employed there than for many years and work much steadier. The Empire Coal Mine, which has been out of business for some years was taken over by a new company during the month of September and the stock is now being placed on the market; when a certain amount of this stock is sold, active operations will be begun. The Eastern Coal Company with headquarters at Maccan, have had an unfortunate experience. For the past three years, they have been endeavouring to locate the main seam of coal, but many "faults" have been found, and one seam after another has been abandoned. The Company has now a number of men boring to locate the seam.

CONDITION OF PARTICULAR TRADES.

There has been a great demand for bricklayers and masons during the present month. Carpenters and joiners are also reported scarce. The demand for stonecutters has been very active. In the metal and engineering trades, iron moulders have been well employed during the month. Machinists and engineers have had steady work. Electrical workers and line men have also been busy. Boilermakers have been employed steadily for the month, many of them having to work nightwork. In general woodworkers have been well employed, but upholsterers report work dull. Carbuilders have had steady work all through September and pattern workers have also been well employed. In the printing trades, work has been rather slack but this is usual during the holiday season and a revival of such work is expected early. The journeymen tailors and garment makers have been active. Bakers and confectioners report a steady month, and ice-cutters and drivers were kept exceptionally busy. Trunk and bag makers also report a busy month with labour scarce. Clerks and stenographers have been fairly well employed. Unskilled labour has been well employed all during the month. There has been a remarkable revival of work along many lines giving employment to all classes of unskilled labour.

CHARLOTTETOWN, P.E.I., AND DISTRICT.

Mr. F. J. Nash, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during September differed very little from that of August. The supply was slightly in excess of the demand, and the situation was similar to that of 1909. Good progress was made with a number of buildings in the city, the principal being the new Heartz Memorial Hall and a new Methodist Parsonage. The holding of the Exhibition during the latter part of the month made trade brisk for several days for merchants and hotel keepers. The harvest was practically gathered in at the close of the month, and the crop, which was an ex-

ceedingly good one, saved in good condition.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The month on the whole was favourable for harvesting. This year, the number of young men going west on the harvest excursion was only twenty-five per cent. of the number which left last year.

Fishing.—With the exception of cod-fishing, operations in this line were quiet during the month. The oyster season opened the middle of the month and some fair catches have been made.

Manufacturers. — The few factories were carried on under normal conditions; supply and demand being well balanced.

Railway construction and employment.—Good progress was made at the Elmira Branch, the principal work under construction this year.

The building, metal and other skilled trades were active, with unskilled labour in excess of the demand.

MONCTON, N.B., AND DISTRICT.

Mr. J. C. Graves, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during September have been about on par with those of August. Building trades continue fairly active. Sixty-four building permits have so far been issued, totalling a valuation of $68,000. Of these, twenty-four are for cottages and tenements, the remainder being for warehouses, outbuildings and remodelling. In the various suburbs, about thirty buildings are in course of construction. The Massey Harris Company is erecting a large two-storey warehouse with concrete basement to cost $8,000. Work upon the public wharf extension is well advanced. Twenty men are employed upon it, and wages paid are $1.50 to $1.75 per diem for ordinary labourers, and $2.00 to $2.50 for mechanics and carpenters. Civic work on water and sewer extensions, street macadamizing and permanent sidewalks still employ a large number of labourers. The Moncton schools now under the Compulsory Education Act employ a teaching staff of forty-three. The total enrollment to date is 2,086 and the number of new permits issued 401. Retail trade is average and wholesale trade good. No change in hours of labour were noted and harmony between employers and employés prevails.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have been very active harvesting grain and marsh hay, the yield being excellent and harvesting conditions good. Potato digging has just commenced with the yield fair and the demand so far moderate. The supply of beef cattle and lambs is reported limited. Pork is 10 cents, per pound, per carcass. Fruit of all kinds is scarce.

Manufacturing. — Active conditions prevailed in all local manufacturing concerns and machine shops.

Mining.—Development of areas by Maritime Oilfields Company continued. Well No. 12 is drilled to a depth of 1,925 feet and a large flow of gas struck with considerable oil.

Railway construction and employment. —The estimate of the National Transcontinental Railway for the six sections in New Brunswick for the month of August was $322,439. Connections with the Intercolonial Railway at Moncton were made September 8th. About 160 miles of track westward from here is now laid and ballasted with the exception of a fill near Chipman. Other railway employment is limited to general repairs and track work preparatory to winter, upon the Intercolonial Railway, and considerable extra help is being used.

CONDITION OF PARTICULAR TRADES.

Building trades. — Bricklayers were quiet, with masons and carpenters busy. Painters and decorators active. Plumbers and stone cutters busy and builders' labourers in fair demand. Iron moulders, workers and helpers, machinists, engineers, electrical workers and boiler makers were active and blacksmiths and

horseshoers busy. Woodworkers were busy, also upholsterers and carmen. Carriage and wagon makers were quiet. Coopers and shingle weavers are slackening off. Printers, pressmen and bookbinders were busy, and journeymen tailors, garment workers, milliners, bakers and butchers active. Tanners and curriers were quiet, but leather workers were busy. Barbers were active, clerks and stenographers steady with limited demand. Hotel, restaurant and theatre employés were active and laundry workers busy. Exceptionally heavy passenger traffic and average conditions in freight lines made a demand for railway crews good. Trackmen and freight handlers were active, also carters and express men. Among unskilled labourers, supply and demand were fairly well balanced. Average wages are $1.50 per day, and there are no unemployed.

DISTRICT NOTES.

Sussex.—Work upon the Sussex Institute and opera house is well advanced. The new Mercantile Company has erected a large business block now ready for occupation. Several dwelling houses are in process of erection.

ST. JOHN, N.B., AND DISTRICT.

Mr. W. H. Coates, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour remained about the same during September as in August, but the supply seemed to equal the demand. The St. John Street Railway Company has purchased a property on Wentworth Street, adjoining the present holdings of the Company, and intends to erect a large car barn thereon, giving accommodation for about twenty-five cars. Messrs. Macauley Brothers & Company have opened a new store. The Empire Coal Company, whose coal areas are situated near Maccan, has secured a year's contract from the Intercolonial Railway for 100 tons of coal per day. Announcement has been made that the Eastern Securities Company, Limited, have succeeded the firm of Messrs. W. F. Mahon & Company, investment bankers. The Bennaiack Printing Company, Montreal, which recently acquired control of the Maritime Lithograph Company, have moved the plant from this city to Montreal. They will continue an office here, and L. D. Clarke will be the manager. The *New Star,* a daily evening paper, suspended publication on September 20, throwing ten men out of employment. The D'Israeli Asbestos Company was placed in liquidation on an order issued out of the Supreme Court, King's Bench division. The Hassam Paving Company completed its contract on Main Street on the 9th September. It has also completed the retaining wall on Mill Street, and the paving on Water Street. Shipping men are making arrangements for the winter trade, and the Allan Line has announced the following sailings:

Steamers from—	*Liverpool,*	*St. John,*	*Halifax.*
Virginian	Nov. 11	Nov. 25	Nov. 26
Tunisian	Nov. 17	Dec. 3	.....
Victorian	Nov. 25	Dec. 9	Dec. 10
Grampian	Dec. 1	Dec. 15	.....
Hesperian	Dec. 9	Dec. 23	Dec. 24

Bank clearings for the four weeks ending September 22 were $5,754,816, and for the corresponding period last year $5,653,886, being $100,930 greater in 1910 than 1909, and $523,864 less than during the four weeks ending August 25 of the current year. Messrs. Edward Partington, Glossop, England, Thos. McAvity, Geo. S. Fisher, Joseph R. Clarkson, Harry W. Schofield and A. H. Hanington, St. John, are asking for incorporation as the Edward Partington Pulp & Paper Company, Limited, with a capital of $950,000 in $100 shares. The Company is to take over and manage the Partington pulp mill and Cuching lumber mill. Among the objects stated are these:

"To carry on and conduct the business of machinists and foundrymen, and to cast, make, manufacture and construct all and any implements, machines, tools and appliances of every kind in brass, iron, copper, steel or other metals, and to buy, sell, and deal in machines, machinery, implements and tools and all articles manufactured from iron, brass, steel, copper or other metals or the products thereof.

"To carry on a general mercantile business.

"To manufacture or generate electricity for the purpose of electric light, power or heat, and to sell and supply and distribute the same to others upon such terms as the said Company may deem expedient."

The wholesale and retail dealers report business away ahead of any previous years during the exhibition opening. The Maritime Funeral Directors' Association held a two days' Session in St. John, opening on September 5. On September 2, fire broke out in S. H. Seely's stables, which were completely destroyed, several valuable horses being burned. The fire then spread to a four family tenement, thence to a large building adjoining, occupied by the Maritime Rug Works, thence to William Kearns' carriage factory. Several other buildings took fire, but were only slightly damaged.

CONDITION OF LOCAL INDUSTRIES.

Railway construction.—Field work on the St. John River Valley Railway Survey will be completed within a short time, and the work of preparing estimates of the cost in accordance with the Act passed by the legislature at its last session will then be commenced.

CONDITION OF PARTICULAR TRADES.

Skilled tradesmen were generally active and unskilled labour well employed.

DISTRICT NOTES.

Fredericton.—The John Palmer Company, tanners and manufacturers of larrigans, has been re-organized. The capital stock will be increased from $75,000 to $125,000. Montreal and New York capitalists are being interested. The City Council has decided against granting a loan of $10,000, but have agreed to pay interest for ten years on a loan of $10,000 to the Company in addition to giving them exemption from taxation, free site, and free water for the same period.

St. George.—Owing to the St. George Pulp Company making repairs to the dam and sluiceway, the granite factories were idle for a time, only hand work being done.

Blackville.—The Gibson Company has closed down its mill at Blackville for the season. The season's output from Blackville mill was about three million feet, somewhat smaller than usual. There is still about a month's more work at the Company's mill at Marysville, where it is believed that the output this year will be about eighteen million feet, making the Company's total output for the two mills about twenty-one million feet. Men who have been employed at Blackville mill find their services in demand, as there is a shortage of help for the woods and lumber operators are scouring the country for men.

NEWCASTLE, N.B., AND DISTRICT.

Mr. James Falconer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During August the labour market was never more active. All classes have been well employed. In fact, men are rather scarce at present; some of the saw mills being short of help. Contractors are having fine weather for finishing outside work, and there is considerable building going on at present. The repairs on the Baptist church are well under way. The extract factory, which was closed down for a while, is running again, day and night. The pulp and paper mill is to be enlarged to about double its present capacity.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have about finished harvesting; the weather has been ideal. There has been no rain to speak of all September. Most of the farmers are now busy threshing. The oat crop is the best for several years; wheat is not so good. The weather is so dry and the ground so hard that very little ploughing can be done. It is too dry for the turnip crop, and for pasture.

Lumbering is brisk this fall. There are already more men than usual in the woods and the cut will likely be large, as the price of sawn lumber is high.

Railway construction.—Morrison & Clark, the contractors for changing the road from Nelson to Chatham, have quite a number of men at work, and are making good progress; they are still looking for more men.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons and carpenters are all busy. The demand for mechanics is greater than the supply and will continue for at least one month. Plumbers are also busy. Blacksmiths are busy preparing lumbermen for the winter, horseshoeing and making and repairing sleds. Carriage and wagon makers have had an unusually good summer, and are now very busy repairing and getting wagons ready for portage work.

QUEBEC, QUE., AND DISTRICT.

Messrs. P. J. Jobin and E. Little, correspondents, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of September has been much more active than the month previous in all kinds of outdoor work. An accident to the caisson of the Quebec Bridge threw out of employment a number of labourers; these are of a special class, workers in compressed air. The mishap, however, made more work for another class charged with repairing and refloating the caisson. The Commissioners on Technical Education had a two-days' sitting in the district. The contract for the construction of the wing to be added to the Parliament Buildings in Quebec was awarded to Mr. Joseph Gosselin, Sr., of Levis, at the sum of $329,000. The extension, which will be started this fall, will when open, be occupied by the library, museum, public instruction department and the quarters of His Honour the Lieutenant-Governor.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers had a busy month harvesting. With the exception of a slight frost towards the middle of the month, which caused very little damage, weather conditions have been excellent. Root and grain crops are heavy.

Lumbering.—The large saw mills have continued running and some of them do not expect to finish their cut until the frost prevents operations.

Railway construction.—The new branch of the electric road from Maple Avenue to Sillery is nearly completed, rails having been laid and cars run over it. The ballasting of the track, however, has not yet been finished, but will be shortly. The new line will be between 4 and 5 miles in length, and will be known as the Quebec County Railway.

CONDITION OF PARTICULAR TRADES.

Lathers and plasterers were quiet, but the other building trades were busy. Electrical workers, linemen and horseshoers were quiet; the other metal trades were from busy to active. Busy conditions were reported in the printing trades. Journeymen tailors and garment workers were busy, but glove makers were quiet, and boot and shoe workers dull. Hotel, restaurant, theatre and laundry workers were active. Delivery employés and furriers were dull. Railway employés, steamboat employés and street railway employés were busy. Cab drivers, carters, hackmen and draymen were active, but freight handlers and teamsters were quiet. Ship labourers reported dullness, while longshoremen were active. The supply of unskilled labour was equal to the demand.

DISTRICT NOTES.

Beauport.—By a vote of seventy-four to sixteen, the people of Beauport, on September 21, approved the municipal by-law relative to the establishment there of the factory of the Canadian Cotton and Silk Manufacturing Company.

THREE RIVERS, QUE., AND DISTRICT.

Mr. Joseph J. Ryan, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Considering the advanced season of the year September was a good month

The corporation has begun the paving of streets in the business district. The harbour has been busy, coal and sulphur steamers coming in and steamers going out with lumber. Wholesale and retail stores report a fair month. There have been no changes in rates of wages and hours of labour. The best of understanding prevail between employers and employés.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy harvesting and report an extra good grain crop. Pastures are in excellent condition.

Fishing.—Fishing was rather quiet.

Lumbering.—Lumbering was very active. All mills running full time.

Manufacturing. — Factories were all busy.

Mining and railway construction were dull.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, capenters and joiners, lathers and plasterers and all other branches of the building trade were fairly active. Iron moulders, iron workers and helpers, coremakers, machinists and engineers, steam engineers, electrical workers, linemen, metal polishers, buffers, platers and brass workers, blacksmiths, bicycle workers, horseshoers, were very busy, but jewellers were rather quiet. In the woodworking and furnishing trades all branches were active. Printers, pressmen, electrotypers, and bookbinders were fairly active. Journeymen tailors, garment workers, glove makers, and boot and shoe workers were very busy. Bakers and confectioners were very busy. Butchers and meat cutters and ice drivers were rather quiet, but cigar makers and tobacco workers were very busy. Leather trades remain quiet. Barbers were busy, stenographers, also clerks, delivery employés, furriers, hotel, restaurant and theatre employés were fairly active and laundry workers had plenty to do. Transportation companies report the month of September as one of the best of the year. The demand for unskilled labour was fairly good, and the supply equal.

DISTRICT NOTES.

The Union Bag & Paper Company has started the foundations for a pulp and paper mill at the Cape de la Madeleine, a few miles from this city, on the St. Lawrence river.

SHERBROOKE, QUE., AND DISTRICT.

Mr. H. Logie, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour has been very well employed during September, and the demand has been much greater than is generally the case at this season; the supply was not equal; this applies more particularly to unskilled labour; in the various industries where skilled labour is employed there was no scarcity of work.

In the work now going on for the Sherbrooke Power and Railway Company many men are employed, while the Jenckes Company who have the contract for the iron work and flume has been kept busy. In addition the contractors for the extension of the rail system have large gangs of men at work. Sherbrooke never before had such a demand for labour as existed in September until the winter sets in. The City of Sherbrooke too, has a large force at work on the new reservoir which is being installed to give a better water service both for fire and domestic use. The several machine shops and factories are running to their full capactiy. Wholesale and retail traders had a good month. There has been no change in the rate of wages and hours.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have harvested a good crop of grain and roots. Work on fall ploughing has now begun. Taken as a whole the farmers in this section have had the best crops in many years.

Lumbering.—Lumbermen are sending out advance parties to the different timber limits. Pulpwood is beginning to move, and it is expected that an average cut will be made during the coming winter. With so much construction work in the city, it is somewhat difficult to get all the men required in the woods just yet.

Manufacturing.—The different manufacturing plants are fully employed and running to the limit.

Mining.—The mining industry is fully employed and in connection with some of the large mining concerns the difficulty is to get sufficient help.

Railway construction.—A large force of men are engaged in the extension of the street railway in this city.

CONDITION OF PARTICULAR TRADES.

The building trade was busy, both in the city and district. At East Angus the Brompton Pulp & Paper Company is erecting several large buildings which give employment to a large force of bricklayers and helpers. At the present time this Company is spending $200,000 on improvement. Machinists, moulders and iron workers were busy during the month. Linemen, blacksmiths, horseshoers and jewellery works were busy. The woodworking shops, as a result of the building now going on, were kept busy. The printing trade was busy, and will be so for some time. Journeymen tailors, garment workers and glove makers were busy. Bakers and confectioners had an active month, while cigar makers were busy. The various miscellaneous trades were busy. Those connected with transport were busy. Unskilled labour was much in demand.

DISTRICT NOTES.

Bromptonville.—The Pearl Shirt Waist Manufacturing Company here is running again, having been reorganized with a capital of $18,000. Of this $8,000 bonus was given by the town, and $10,000 by the Company. Twenty-five hands are now working which will be increased to fifty later.

Granby.—Work was commenced on the foundation of the building for the Elastic Web Company on Tuesday. The contract for the superstructure has not been given out as yet, but will be soon. The work will be rushed while the good weather lasts.

SOREL, QUE., AND DISTRICT.

Mr. J. A. Chênevert, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During September the manufacturing establishments in Sorel and the district were very busy, and in some cases had to work overtime. Great activity prevailed at the Government navy yard, where the building of two lighters, one tug and one coal barge has just been commenced. A breakwater is also under construction which will employ about twenty men for several months. Wholesale and retail dealers find business heavier than last year. Goods are generally sold for cash, which shows that the working people have money to supply their wants.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have finished harvesting their crops, which are plentiful. The weather in the latter part of summer was favourable and the returns exceeded all anticipations. With excellent pastures, there was plenty of milk, and the abundance of cheese and butter will prevent a rise in the prices of winter supplies. Hay is cheap, the crop being very plentiful.

CONDITION OF PARTICULAR TRADES.

Carpenters, joiners, painters, plumbers, electricians and moulders had a good month.

ST. HYACINTHE, QUE., AND DISTRICT.

Mr. Victor Phaneuf, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the outside trades was very active during the month of

September, but the local supply was more than sufficient to meet the demand. The month was a very active one for industrial establishments. Both shoe factories were working full time. The iron industry had a good month. There was much activity in the leather industry and a busy fall is anticipated. The sash and door factories were busy enough to employ their full staffs. Organ builders were very active. The garment factory had a very active month. A number of men were still employed on the repairs at the cathedral. Business, wholesale and retail, was good. Banks reported collections easy.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The agricultural situation is very prosperous. Fruits and vegetables easily find purchasers. The demand for farm labourers was satisfactory, but a supply was not lacking.

CONDITION OF PARTICULAR TRADES.

The building trades were more active than during August. The month was a good one for carpenters, painters and plumbers, but a quiet one for bricklayers, masons, stonecutters and builders' labouers. The month was an active one in the metal and engineering trades. The iron mills kept their workmen fairly busy. Woodworkers had a very good month. The printing trades were very well employed. Garment workers had a quiet month. Bakers and confectioners, butchers and ice drivers had a fair month. Tanners and curriers had a very good month. Barbers, clerks, stenographers and delivery employés had a fair month. Railway employés, cab drivers, hackmen and carters were very active. Unskilled labour had plenty of work.

ST. JOHNS AND IBERVILLE, QUE., AND DISTRICT.

Mr. A. D. Pepin, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market was fairly active. The demand for outside labour somewhat exceeded the supply. Cluett, Peabody & Company, of Troy, N.Y., have made an agreement with the City by which the latter gives five acres of land and will furnish water for ten years without taxes for the same period. The Company will employ 300 hundred hands and will erect a factory at a cost of over $100,000.

All the industrial establishments were running full time and increasing the number of employés.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have plenty of product to sell. The market is a little easier, but prices are firm for this season. There is considerable buying being done for export to the United States.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters and joiners were all very active and in good demand. Lathers and plasterers, painters and decorators reported a busy month. Plumbers and steamfitters reported a fairly active month. Stonecutters and builders' labourers reported an active month and were in good demand. Iron moulders, iron workers and helpers, coremakers, machinists and engineers are very actvie. Electricians and linemen had a fair month. Shipbuilders, shipwrights and caulkers were rather quiet. Tinsmiths, tool sharpeners, horseshoers and jewellers had a good month. Woodworkers, upholsterers, varnishers and polishers, wood carvers, carriage and wagon makers were very active. The printing and clothing trades were well employed. Bakers and confectioners, butchers and meat cutters, ice drivers and tobacco workers, tanners, curriers, leather workers and sadlers were well employed. The miscellaneous trades had a good month. Railway conductors, engineers, firemen, telegraphers and all the other transportation trades were very active. Unskilled labour is still in demand and hard to secure.

MAISONNEUVE, QUE., AND DISTRICT.

Mr. J. F. Girard, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

September was as favourable as the preceding month for workingmen, particularly in the building trades, and was much better than the same month last year. The bricklayers' and masons' strike has been terminated through a two-year agreement whereby the men have secured an increase in wages and the "closed shop." The tin roofers also secured a minimum of 30 cents per hour, after a strike lasting four days.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—All the manufacturing establishments in the Maisonneuve District are in full activity. The sash and door factories are increasing their staff, some of them having doubled it since the beginning of the year.

CONDITION OF PARTICULAR TRADES.

All the building trades are active and in demand. The metal trades are working full time, some of them, such as tin roofers and electrical workers, being in demand. Woodworkers are active, polishers being in demand. Printers, bookbinders and metal plate printers are very busy, pressmen being in demand. Journeymen tailors and garment workers report a good month. Furriers are very active. Food and tobacco workers are busy, the latter, however, at small wages, which fact is attributed to the substitution of women and children for men in the cigar industry. Leather workers are active. Barbers, clerks and delivery employés are in great demand. Hotel and restaurant workers have been exceptionally busy, as well as laundry workers and cab drivers, on account of the Eucharistic Congress. Unskilled labour is very busy.

MONTREAL, QUE., AND DISTRICT.

Mr. G. Auget, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

September was a good month for the building trades, all of which were busy with the exception of plumbers, who went on strike about the middle of the month. Conditions have become normal again in the large manufacturing establishments, vacation time being over. General business has also improved for the same cause. Building permits issued in August were valued at $1,393,-047, as against $699,255 during the same month last year. Their number was 348, of which 60 were for the erection of stands for the Eucharistic Congress. The receipts of the Montreal Street Railway during August were $398,828.57 and the expenses $216,314.38, as against $355,229.72 and $180,582.60 in August of last year. The report of the Harbour Commissioners for the year ending December 31, 1909, shows the elevator traffic to have increased from 1,078,289 bushels in 1907 to 11,554,262 bushels in 1909. The revenue was $687,772 for the year, or an increase of $26,781 over 1908.

CONDITION OF PARTICULAR TRADES.

All the skilled trades were active with the exception of the striking plumbers.

HULL, QUE., AND DISTRICT.

Mr. E. E. Cinq-Mars, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Conditions were exceptionally active, the demand for men being largely in excess of the available supply for the lumber mills and shanties. Lumbermen anticipate a slight advance in monthly wages compared with last winter. Lumbermen were preparing for a large cut

of lumber, stocks being low and a large output being necessary to run the mills to full capacity next season. Great activity prevailed in all industries. Farmers in this district report very satisfactory hay grain and vegetable crops. There have been no changes in rates of wages or hours of labour, nor have any industrial disturbances taken place. Contractors were engaging men at the rate of $1.75, and $2.00 per day. Millmen employed in the Booth, Eddy, Gilmour and Hughson, Fraser and other large lumber mills work for $1.35 per day the year round. The mills will not probably close until the end of October when most of the employés will be engaged in the woods. Local agents in search of shantymen have to send to Quebec and below in order to fill their contracts with their employers. The scarcity of men for the woods this fall is partly due to the fact that the crops have been excellent and farmers and their sons are in a good position to meet winter conditions.

OTTAWA, ONT., AND DISTRICT.

Mr. W. Gilchrist, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The demand of lumbermen for help in the woods was not met at the close of the harvest season as it was last year. The labour market during September was marked by a search for shantymen at wages running from $28 to $32 per month. Building operations and street works were very brisk all month, and unskilled labour was quickly picked up at from $1.75 to $1.85 per day. There was a falling off in the number of building permits issued compared with previous months, but there are enough large structures under way to insure a steady winter's employment for many members of the skilled trades. The value of building permits in August, 1908, was $105,000; in 1909, $317,200; in 1910, $146,000. The bank clearings in August, 1909, were $13,955,000 as to $15,904,000 in 1910. The first three weeks of September, 1909, showed $9,644,000 in bank clearings as to $11,816,000 for the corresponding weeks this year. Ottawa merchants imported heavily during September as shown by $118,000 collected in duty, exclusive of the last two days, a gain of seventeen per cent. over the corresponding month of 1909. Lumber sales are remarkably slow and prices weak, but other branches of trade are in a buoyant state. The gate receipts of the Central Canada Exhibition held from September 9 to 17 were, $31,400 as to $28,300 last year. Larger displays of live stock and poultry attested development in the agricultural industry in the Ottawa district.

The city sold $620,507 worth of debentures to meet expenditures on civic improvements at 97.13. The publicity bureau, recently started by the city, has obtained a new industry and has undertaken a vigourous campaign to place the advantages of Ottawa as a manufacturing centre before the world.

The City Council has approved the rule of permanent employés taking three weeks vacation a year, and is considering a by-law governing other arrangements affecting holidays.

The Labour Day parade included between 3,500 and 4,000 men, and was regarded as the greatest success of the kind the Ottawa unions have accomplished.

In sympathy with the striking plumbers of Montreal, thirty-six plumbers and helpers employed on the Grand Trunk hotel and station quit work on September 17. They are nearly all Montreal men brought here for special work. The Ballantyne Company which is doing the Grand Trunk Railway Station plumbing stated that its pay for plumbers sent out of Montreal was 30 cents an hour and an allowance of $5 per week for board. The strike in Montreal is for a three-year agreement at 40, 42½ and 45 cents per hour respectively and an eight-hour day. Six plumbers quit work on the Grand Trunk Railway station, but the helpers remained and the small portion of the contract uncompleted was finished without inconvenience. Garth & Company, plumbing contractors on the Grand

Trunk Railway hotel, was awaiting orders from Montreal as to a settlement at the end of the month. A majority of the plumbers in Ottawa are paid the amount demanded in Montreal, although the agreement with the union stipulates no more than a minimum wage of 39 cents an hour.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers disposed of many cattle, lambs and hogs in preparation for wintering only as much stock as they can conveniently feed. Crop reports indicate a shortage of straw, but an average yield of grain and roots. Vegetable growers are busy marketing. Potatoes sell at 65 cents a bag, and are not so plentiful as last season which saw an abnormal crop.

Lumbering.—Sawing in the lumber mills is being suspended a little earlier than last year, in some cases the supply of logs giving out. The hands released are in every instance needed for logging in the woods. The upper grades of pine are well sold up, but box lumber is plentiful. Long telegraph poles became so scarce in the Ottawa valley that one firm brought some from British Columbia. The cost delivered in Ottawa was $18 a piece for 60-foot poles, half that amount going for freight. The demand for fine lumber, sash, doors, &c., was never more active for local building.

Manufacturing.—Clothing factories are very busy. The stove manufacturers report brisk trade. Carriage makers are very busy.

Railway construction.—Railway construction in the vicinity of Ottawa is quiet. One of the city controllers has moved to investigate why some railway charters providing for lines that would enter Ottawa are not being made use of.

CONDITION OF PARTICULAR TRADES.

The building trades are exceedingly brisk. Electrical workers, linemen, boiler makers, and stove mounters are busily occupied. The other metal trades are quiet. Woodworkers are busy. Printers and allied trades are sought in several shops. Hat makers, garment workers (women) are much in demand. Bakers and butchers are very busy. The ice business is quiet. Harness makers are very busy. Clerks in dry goods and grocery stores are busy, the tendency in all stores being to enlarge staffs; the demand for stenographers is quiet. Delivery employés are busily occupied. The various branches of transport are busier than the previous month on account of fall fairs and autumn buying and selling. Return of city people from summer resorts increased traffic on railways. Unskilled labour was sought all month at the highest wages of the year. Domestic help continues scarce.

KINGSTON, ONT., AND DISTRICT.

Mr. William Kelly, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market showed a marked improvement during the month of September as compared with the previous month. The building trades were particularly active. Instead of adding a story to the present Royal Military College, it was decided to lengthen the dormitory to twice its present size. There will be 114 cadets in attendance this term. It is anticipated that this number will be doubled before long. A number of public buildings were greatly advanced during the month, since the resumption of work by the carpenters, and all other trades. The Kingston Shipbuilding Company had a large staff of skilled workmen rushing repairs to the steamer *Rosemont* and other boats, during the month at the government dry-dock. A number of mechanics were brought from Collingwood, and a number of extra local men were put to work. A large amount of up-to-date machinery has recently been installed by this Company. It is intended to call for tenders soon for the extension to the local post office. The cutting of the stone, &c., will be done this winter, so as to be ready for an early start in the spring. During the month the cornerstone for the new addi-

tion to the Orphans' Home was laid by his worship, the mayor, and the work is now being rushed along.

During the month of August the building permits taken out for work amounted to an estimated cost of $18,778. The annual statement of the city assessor shows the assessment to be over $9,000,000, last year it totalled $8,900,000, and this year will reach $9,100,000, although the population has not materially increased. The registration at Queen's University will be close to 1,700, last year it was 1,517. There are over 200 houses advertised as lodgings, &c., for students. The rates vary from $4.00 to $6.00 per week. While boats are being laid up and the tourist traffic is falling off, the season proved a very successful one, and marines say they have nothing to complain of.

The Labour Day picnic as carried out by the Trades' Council was a great success. During the month the Board of Education increased the minimum salary for qualified teachers from $325 to $400, per annum. There were no strikes or lockouts reported.

CONDITION OF LOCAL INDUSTRIES.

Agriculture, fishing and lumbering were active.

Mining, manufacturing, and railway consrtuction were extremely active.

CONDITION OF PARTICULAR TRADES.

The building, metal, enigneering, shipbuilding, woodworking and furnishing trades reported an active month in all branches. Printers, tailors, bakers, butchers, ice cutters and drivers, cigar makers, tanners, barbers, broom makers, clerks, delivery employés, furriers, hotel, restaurant, theatre and laundry workers, as well as all branches of the transportation business and unskilled labour were active.

PETERBOROUGH, ONT., AND DISTRICT.

Mr. J. Arthur Sharp, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market was generally active but not more so than last month. Out side workers, particularly in the building trades, had an active month. The Peterborough Lock Manufacturing Company is asking for a fixed assessment of $20,000, having recently made improvements to the extent of $25,000. This will employ a large number of additional men. The contracts in connection with the new sewers in the south part of the city have been awarded, with that for the new pumping station. The Industrial Fair this year has been the most successful on record. At the last meeting of the Cheese Board, 3,801 cheeses were boarded. Wholesale and retail merchants reported trade very good.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy harvesting and threshing and preparing for fall sowing. The crops are very uneven, some fields being good, and others not more than half a crop. The potato crop is a failure in this district, the dry rot has affected them.

Lumbering.—Conditions are active.

Manufacturing.—There is little change in conditions, factories all running full time, with larger staffs of employés.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, joiners, lathers, plasterers and painters were busy. Plumbers and gasfitters were active. Builders labourers were very busy. Iron moulders, iron workers, helpers, core makers and machinists were active. Electrical workers and linemen had all they could do. Blacksmiths and boilermakers were busy, with woodworkers active. Printers had a good month, and tailors and garment workers had plenty of work. Bakers and confectioners were busy. Butchers and meat cutters also were busy. Cigar makers report business improved. Leather workers had a good month. Railway and street railway employés were active. Teamsters and express men report business good. Unskilled labour was in good demand.

DISTRICT NOTES.

Port Hope.—The International Tool Steel Company, Limited, is to put up four buildings and expend $35,000 in machinery and buildings. Kuhne & Anderton, of Beaver Falls, Pa., are to establish a branch here, and will manufacture wooden and steel door-mats. The Bank of Toronto will build a new bank building this fall, the contract having been let.

TORONTO, ONT., AND DISTRICT.

Mr. Phillips Thompson, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

September was an active month, all classes of skilled and unskilled labour being well employed. The building trade continued very busy, and a great deal of civic work in hand. Many public and corporate undertakings will continue to employ a large number of men, so long as the weather permits. There was a noteworthy absence of disputes between employers and employed.

The assessment returns give the total population of Toronto as 341,991, as compared with 311,354 for 1909, an increase of 30,637. The total assessment amounts to $309,147,053, as against $268,737,947 last year, an increase of $40,409,106.

The City Council has decided to submit to the electors a by-law to raise $100,000 for the construction of good roads leading into the city.

The annual report of city engineer C. H. Rust states that Toronto has 407.57 miles of streets, of which 262.13 miles are paved. There are 298½ miles of sewers and an extensive trunk sewer, to cost $2,400,000 is now under construction. The cost of the waterworks system to date is given at $7,000,000. The water filtration plant being constructed at the Island will cost $750,000. There are 371 miles of water mains, and 71,068 water services. The total revenue from water works last year was $641,442.

The F. H. McGuigan Construction Company has been awarded the contract for the construction of the Queen street east high level bridge, at $193,000. The total cost, including filling and paving, is estimated at $212,000, which will be apportioned between the city and the railways.

The total attendance at the Canadian National Exhibition this season is given as approximately 837,000, as compared with 752,520 last year. The surplus of receipts over expenditure is approximately $45,000.

A contract has been let for new buildings for the Toronto Electric Light Company, on the harbour front, at $100,000.

The centre section of the addition to the Western Hospital is being erected at a cost of $75,000.

A six-storey addition is to be made to the Telegram building, Melinda street, at a cost of $70,000.

The Board of Education is erecting additions to the school on Howard Park avenue, to cost $35,000, and to the school on Kingston Road to cost $40,000. An addition is also being built to the Humberside Collegiate Institute, West Toronto, which will cost over $50,000.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy with fall plowing and sowing, for which the weather has been very favourable. An unusually large acreage of fall wheat has been sown. Pasturage has been good, owing to heavy rains. The Toronto Milk Producers' Association, which met on the fifth instant, decided to retain the present price of $1.50 per eight-gallon can for the six winter months. The price of sweet cream was fixed at 40 cents per pound of butter-fat.

Manufacturing.—Active conditions continued to prevail in all lines, with orders coming in satisfactorily. Building activity has caused a great demand for structural steel and other material. Some inconvenience is still experienced on account of delay on the part of the railways in forwarding shipments.

The Don Valley Brick Works have secured a contract for the brick required for the new General Hospital, involving about $300,000.

The Mendelssohn Piano Company will

erect a four-storey factory building on Adelaide street west, to cost $20,000.

The Ford Motor Company is building a warehouse, at a cost of $10,000.

The Smith Manufacturing Company, woollen manufacturers, are putting up a factory on Campbell avenue and Sarnia street, to cost $25,000.

Railway construction.—The Toronto Railway Company has begun the work of constructing additional car lines in connection with the street railway system, as ordered by the Ontario Railway Board some time since, embracing about 25 miles of new track.

On the fourteenth, the Grand Trunk Railway Company began the work of changing the grade of its tracks from Bathurst street west to the Humber river. From Bathurst street to Sunnyside the track will be depressed, and the section from Sunnyside to the Humber will be elevated, with subways at the street crossings. The grading will ultimately be carried to Mimico. The cost of the undertaking is estimated at about $2,000,000.

Work on the city's industrial line east of the Don, to connect the factory district of Ashbridge's Bay with the railways, is being rapidly pushed.

CONDITION OF PARTICULAR TRADES.

The building trades were all busy, with the prospect of steady employment until cold weather set in. The metal and engineering trades had an active month. Shipbuilders were quiet. Jewellers and silversmiths had plenty of work. Furniture workers, cabinet makers, and upholsterers were active. Carriage and wagon makers had steady work. Piano workers were busy. Printers, book binders and allied trades had a good month. Custom tailors were fairly employed. Garment workers, hat and cap workers, boot and shoe workers, and furriers were active. The provision trades were steady. Those engaged in connection with fruit and vegetables were very busy. Cigar makers found trade good. Leather workers were well employed. Hotel and restaurant help, barbers and laundry workers had plenty of employment. Clerks, salesmen and warehousemen were generally well employed. Railway and street railway employés, teamsters, expressmen, sailors and longshoremen were active. Unskilled labour was in good demand.

NIAGARA FALLS, ONT., AND DISTRICT.

Mr. Hewlett Green, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market continued in a most satisfactory condition throughout September. Employment was good in practically every branch of industry. Municipal works continued to employ a considerable number of men, and further paving and waterworks extensions have been decided upon. The building trades and the haberdashery and canning factories were busiest. General business was good.

The transmisson lines of the Ontario Hydro-Electric Power Commission were completed, and underwent a very satisfactory test. Reports of the companies engaged in the production of electric power here, show large increases in the amount of power transmitted and sold.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The harvest and fruit picking season was closing at the end of the month. A large number of persons have been employed. General crops were good. Some sorts of fruit did not yield heavily, but the average was satisfactory.

Manufacturing.—Manufacturing concerns all reported a busy time. Female labour was in demand for the suspender and neckwear factories. The sanitary can factory was running overtime.

Railway construction.—Railway employment was good. Re-laying and improvement of trackage has given employment to extra forces of trackmen.

CONDITION OF PARTICULAR TRADES.

The building trades were active. Bricklayers and masons were fairly busy, car-

penters well employed. Painters were very busy. Stone cutters and builders' labourerss were the only classes reported quiet. Metal-working concerns in the city were busy. A similar condition prevailed in the same classes of industries throughout the district. Electrical workers were quieter, but linemen were busy. Journeymen tailors were active and haberdashery factories were running to full capacity. The shredded wheat and the numerous canning factories were all very busy. Barkers were active. Sales people were facing a quiet period. Several large hotels and restaurants will close for the winter, and many employés will be laid off. Laundry workers were active. General railway business was steady, but not very heavy. Trackmen were the only class of employés reported very busy. Electric lines were quieter. Lake and canal traffic was good. Teamsters were busy. Unskilled labour was well employed.

DISTRICT NOTES.

Bridgeburg.—The Canada Foundry Company has re-opened the shops at the ship-yards, and seventy-five men are employed. It is expected that many additional men will be engaged shortly.

Wellandport.—The loss in the fire which swept part of this village at the end of August was about $27,000, with insurance of $5,300. Four dwellings, three barns, two shops, post office and telephone office were destroyed.

Welland.—The ratepayers voted $52,000 for waterworks improvements. The ship-yards have three contracts on hand, and will be busy all winter. The cordage factory, and the other iron-working plants were all busy.

ST. CATHARINES ,ONT., AND DISTRICT.

Mr. Jas. A. Wiley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month was exceptionally good for labour; practically all branches of industry were active to busy. While there were no large works going on in the building lines, the large number of residences and similar jobs kept the building trades active.

A permit for the enlarging of the tannery of F. C. McCordick has been taken out, it being found necessary to materially enlarge the premises to accommodate the increasing volumn of trade. The Monarch Knitting Company recently located here, has added largely to its staff of employés and with the trade in hand will require additional help. Good progress was made on the new factory building of the McKinnon Dash & Metal Company for the manufacture of chaines. The canning factories are rushed to their fullest capacity, plums, peaches, tomatoes, corn, &c., being the principle fruits and vegetables being canned and being of much better quality than usual. The clerks are once more working full time after their mid-summer Wednesday half-holidays which were much appreciated by employés and employers. Business, wholesale and retail was good for the month. Civic improvement work continues an important factor of employment.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Fruit men were busy harvesting the crops of fruits; peaches, pears, plumbs, grapes, being the principle crops engaging their attention. The quality is above the average. Five to ten carloads are shipped daily from this district.

Manufacturing.—All manufacturing plants were active to busy and report trade good.

CONDITION OF PARTICULAR TRADES.

All branches of the building trades were active to busy. The metal and engineering trades were active and conditions of employment fair. The woodworking and furnishing trades were active. The printing and allied trades were all active with conditions good. Journeymen tailors and boot and shoe workers were active. Bakers and confectioners, butchers and meat cutters,

ice cutters and drivers, cigar makers and tobacco workers were active. The leather trades were active. Barbers, clerks, stenographers, delivery employés, hotel and restaurant employés and laundry workers were active. All lines of transportation were busy, with the volume of trade heavy. Unskilled labour was active with conditions for employment good.

DISTRICT NOTES.

Port Dalhousie.—Labour was well employed. The Maple Leaf Rubber Company's factory was running full time.

Thorold.—Favourable conditions for the employment of labour prevailed.

Merritton.—All mills and factories were running full time. The ratepayers will be asked to vote on a fixed assessment of $52,000 to the New Rubber plant. The Company to employ 300 hands and pay in wages annually, $100,000.

HAMILTON, ONT., AND DISTRICT.

Mr. P. Obermeyer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

September has, without doubt, been the busiest month, industrially, in the history of this city. Manufacturing establishments were worked to their capacity, and the large amount of building construction under way kept workers in the building trades fully employed; the supply of the latter class of labour at times being hardly sufficient to meet the demand.

Building permits for the month totalled in value, $266,475, compared with $181,950 for September, 1909. The permits were for seventy-two brick dwellings, forty frame dwellings, seven factory buildings, six store buildings, and about twenty alterations and additions.

Since the appointment, early in the spring, of William Mullis as industrial commissioner, the following new concerns have been established here. The Ludlow - Ainslie Company, building frames and interior trim; Richardson Manufacturing Company, spice mills; Canada Reflector Company; the Oliver Chilled Plow Works; National Fireproofing Company; Ford & Smith, machinists; Fox & Searles, silverware manufacturers; Wm. Ray & Company, motor car builders, and the Canada Steel Goods Company, angles and light structural steel shapes.

The increase in the bank clearings, as shown by the report of the Hamilton Clearing house association for the month of September over the corresponding month last year, is about $1,500,000. The figures for the month with corresponding figures for the last two years are:

Clearings for September, 1910	$8,316,695
Clearings for September, 1909	6,916,970
Clearings for September, 1908	6,121,766

Relations between workmen and employers during the month were amicable. Only one slight difficulty occurred. A clothing manufacturer had trouble with about a dozen garment workers, whom he desired to work on a piece-work basis. The men, who came here from New York, when they found that the piecework system was not in vogue here, objected to work under it, and struck on September 7, to enforce a weekly scale. The matter was adjusted the next day, the men returning to work on a weekly wage scale with a fifty-four-hour week, in accordance with conditions prevailing in the trade in Hamilton.

The Police Commissioners on September 7, advanced the age limit for new members of the police force from 25 years to 30 years, and the age limit for retiring members from 55 years to 60 years. The constables petitioned for an increase in pay of 50 cents per day, but no action was taken on it. The policemen are paid the following rates: First-class constables, $840; second-class constables, $803; third-class constables, $675.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—There was practically a continuous market during the month, the fruit men and market gardeners coming in every day, instead of three days a week, as was formerly the rule. Friday night has become a popular mar-

keting time, the supplies being almost equal to those on sale on Saturday. The markets' committee has been asked to instal lights on the market for the benefit of the night traders. Supplies of all sorts have been very heavy, with the exception of ripe tomatoes, which were not as plentiful as usual, the crop not ripening owing to unfavourable weather conditions. The price was 5 cents to 10 cents per basket higher than last year.

Railway construction.—Fresh rumors of the entrance of the Canadian Northern Railway into this city were started by the report that the Company had taken up the options it held on property along the north shore of the bay.

The Street Railway Company is putting its new cars into commission as fast as they are supplied by the manufacturers. They are of the pay-as-you-enter type.

John Patterson, promoter of the Hamilton & Guelph Electric Railway is in England, trying to secure financial backing for the enterprise.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing. — The Canada Steel Company, Limited, has decided to locate in Hamilton. This Company will reroll from old rails, making angles, light structural shapes and other sections not now made in Canada. It will be the only mill of its kind in this country. The site selected is on the west side of Sherman avenue, between the main line of the Grand Trunk Railway and the spur line of the Toronto, Hamilton & Buffalo Railway. The Company announces that when running at full capactiy, it will employ 300 men. The plans for the mill building have been prepared by a Pittsburg firm of engineers, and tenders will be asked for in a week or two by Munro & Meade, local architects. This firm has already prepared the plans for an office building, on which work was started this week.

The Oliver Chilled Plow Works of Canada, Limited, has been making very rapid progress on the erection of its plant here. The buildings under way and which will be completed within the next month include the forge building, the machine shop, the stock building and the power house. In addition to these, good progress is being made on the construction of the dock. Machinists have been started on the work of equipping the machine shop and the firm is advertising for machinists, pattern makers, diesinkers, &c.

There is unusual activity among all the large industrials in Hamilton at the present time and from the number of inquiries that are being received from United States manufacturers looking towards Hamilton as a possible location for their proposed Canadian factories, it looks as if Hamilton would have a season of unparalleled activity next year.

CONDITION OF PARTICULAR TRADES.

The skilled trades had a very active month. The large amount of building construction under way made labour scarce in the building trades. Plumbers, plasterers, electrical workers, carpenters, and sheet metal workers were exceptionally busy. Additional help was being sought in various departments of the metal trades. Woodworkers were also in demand. The allied printing trades had a good month. The clothing trades were active, women operatives being scarce. The tobacco trades were fairly well employed, although a ten-days' shut-down occurred in the cigar department of the Tuckett Company toward the end of the month, for stock taking purposes. This affected about 275 cigarmakers. Barbers, broommakers and laundry workers were all steadily employed. Transportation employés were busy, as were teamsters. Labourers were in great demand, and the supply was not up to requirements.

BRANTFORD, ONT., AND DISTRICT.

Mr. J. C. Watt, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The same busy conditions reported last month continue. The building

trades were especially busy, and will continue so late into the fall if weather conditions are favourable. The iron trades also were busy, with a demand for men, principally for unskilled labour. Merchants had an active month.

The report of the assessment department places the assessment of the city at $14,646,715, an increase over the previous year of $836,410. The total population is 21,964, an increase of 1,253.

CONDITION OF LOCAL INDUSTRIES.

Agriculture. — Farmers and market gardeners were very busy. Grain crops were the average; early fruit was plentiful, but the later varieties were not so plentiful as last year. Potatoes are a heavy crop.

Manufacturing continues brisk. Factory extensions are progressing rapidly; prospects are bright and there is a demand for men.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, joiners, lathers, plasterers, painters and decorators, plumbers, gas and steam fitters were very busy. Iron moulders, coremakers, machinists, engineers, electrical workers, linemen, metal polishers, buffers and platers, stove mounters, boilermakers, blacksmiths and sheet metal workers were busy. Horseshoers were active. Woodworkers, carriage and wagon makers, pattern makers and coopers were busy. The printing and allied trades were busy. Tailors and tailoresses were busier than last month. Boot and shoe workers, bakers and confectioners were busy. Cigar makers and tobacco workers were active. Leather workers and saddlers were busy. Barbers, clerks, delivery employés, furriers, hotel and restaurant employés were all steadily employed. Laundry workers were busy. Railroad trackmen, freight handlers, and street railway employés had steady employment. Draymen and teamsters were busy. Expressmen were active. Unskilled labour was in demand.

DISTRICT NOTES.

Paris.—Factories and mills were busy. Prospects are for a brisk fall trade.

GUELPH, ONT., AND DISTRICT.

Mr. Wm. Drever, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during September varied little from the preceding month. Building trades were active and work was generally plentiful. Work has been commenced on the permanent reformatory buildings,and a number of skilled mechanics from the city are employed thereon. The demand for skilled labour was good, many of the factories taking on extra hands. On the twenty-sixth instant the ratepayers endorsed two by-laws; one granting the People's Railway running rights over certain streets; the other a debenture by-law, whereby the city takes $85,000 preference stock in the same.

Wholesale and retail merchants report a good month. Customs receipts for the month of August were $21,490.01, an increase of $6,143.87 over the corresponding month last year.

The Ontario Agricultural College and Macdonald Institute have re-opened for the winter session, with the largest attendance on record.

The Trades and Labour Council have leased a hall in the Norrish block for a term of three years, which, after November 1, will be headquarters for all trades unions in Guelph.

No settlement has yet been reached in the Guelph Brussels carpet weavers' strike.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—September was, as usual, a very busy month with the farmers, fall ploughing and threshing operations being in full swing. The Central Fair was held and proved a great success, with large crowds and good exhibits.

Manufacturing.—Industrial establishments were all running full time, with full staffs.

CONDITION OF PARTICULAR TRADES.

All employed in the building trades had a good month, with prospects good for as long as weather will permit. Iron moulders, helpers and coremakers were well employed. Electrical workers and linemen were very busy on Niagara power work, getting factories and lines in order for the coming power. Iron tube-mill workers were very busy. Stove mounters, blacksmiths and sheet-metal workers were well employed. Piano and organ makers, also sewing machine makers, were active. Carriage makers and coopers were busy. Printers and allied trades were fair, also journeymen tailors. Garment workers were busy, female help being in demand Bakers and butchers report a good month, also street railway employés. Unskilled labour was well employed.

BERLIN, ONT., AND DISTRICT.

Mr. R. F. Gofton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET

The month was a busy one in the labour market, all classes of workmen being well employed, with an increased demand for skilled hands. There was a demand for cabinet makers, machine hands, boot and shoe workers and female garment workers. Twenty-one building permits, valued at $31,100 were issued. Good progress was made on various new buildings, the Wounder furniture factory being completed during the month, and the walls of the Lippert furniture factory made ready for the roof. Work was being vigorously pursued on new sidewalks. Commercial activity and bank clearings were reported favourable. Wholesale and retail business had a good month. No changes in wages nor in hours of labour occurred during September.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were very busy during the first part of the month sowing fall wheat, threshing, cutting corn and filling silos for the winter. Potatoes were offered at 60 cents per bag, in large lots; butter sold at 25 cents per lb.; eggs, at 25 cents per dozen; and farmers' cheese at from 15 to 16 cents per lb. The apple crop is a light one.

Manufacturing.—Manufacturing establishments were all busy, some working over time. Additions were being built to several factories.

Railway construction.—Busy conditions were reported in the grading of the People's Railway through this district.

CONDITION OF PARTICULAR TRADES.

The building trades were active. Busy conditions prevailed in the metal and woodworking trades. The printing and allied trades were active, as were also the clothing, food and tobacco preparation, leather, miscellaneous and transport trades. Unskilled labour had a busy month.

DISTRICT NOTES.

Waterloo.—The month was a busy one for all classes of labour. The building trades were active. The new station building was completed towards the end of the month. The new market building was made ready to receive the roof. Busy conditions were reported in manufacturing circles, the Globe Manufacturing Company working overtime. Unskilled labour was in demand.

WOODSTOCK, ONT., AND DISTRICT.

Mr. J. Markey, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Industrial conditions continue satisfactory. All the factories are busy, and all report the outlook encouraging. There is some demand for labour, both skilled and unskilled, but the demand is not yet sufficient to indicate anything like a serious scarcity. The supply of unskilled labour will be sufficient, it is thought,

when the men attracted to the country during the summer season drift back to town. Reports from the musical instrument manufacturers are excellent, and the same is true of the wagon makers and furniture manufacturers. The Karn-Morris Company reports sufficient orders on hand for pianos and reed organs to keep the factory working till next May. The Stewart Stove Works reports as many orders on hand as can be attended to. The Tobin Arms Company's factory, a new industry, is kept busy, and the outlook is said to be bright. The management of this Company recently purchased the plant, patents and other assets of the Caldwell Bit and Tool Company, of Port Rowan, and the business will be transferred to Woodstock. Three other new industries will be in operation here before long; a textile concern, a factory for the manufacture of the Linderman dovetail glue-jointing machine, and a fibre-board box factory, all of which will add materially to the number of workmen, skilled and unskilled, employed here.

The Oxford Knitting Company report business very good. They are in need of girl labour, both skilled and unskilled.

CONDITION OF PARTICULAR TRADES.

The building trades are steadily employed. There is no special rush, but there is no lack of employment. Painters, decorators and paper hangers are busy. The same is true of builders' labourers. There is some demand for moulders. The Stewart Company are looking for good men. Iron workers are busy, and there is some demand for good blacksmiths. Woodworkers are busy, and there is a demand for skilled men, especially cabinet makers and machine hands. The Canada Furniture Manufacturers report a demand for cabinet makers, and expect to have need for unskilled labourers in a while. The printing business is reported fair, but there is no demand for men. The clothing trades are reported steady. Cigar makers are steadily employed. The leather trades are reported good. There is at present a growing demand for unskilled labour, but this may be met before the winter sets in.

STRATFORD, ONT., AND DISTRICT.

Mr. Joseph T. Carlin, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour, during September, has been as fully employed as during the preceding month. The building trades were actively engaged. The Dufton Woollen Mill is nearly finished, the installing of new machinery will mean a large increase in its staff of workers. A number of men and teams were employed in the paving of streets and laying of cement walks.

The Bell Telephone Company has erected a new brick building and has a number of men engaged in placing under-ground wires on some of the streets. The Stratford Light and Heat Commission are placing and erecting poles on the streets ready for Niagara power, which has given work to a number of men. Wholesale and retail merchants report an increase in trade over the preceding month. No change in the rate of wages or hours of labour, and no trouble in the labour market, was reported.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy threshing and fall ploughing. Market prices were:—

Butter, creamery, boxes, 25c. to 27c.
Butter, creamery, 30 lb. tubs, 27c.
Butter, dairy, tubs, 22c. to 23c.
Butter, dairy, ordinary, 20c. to 21c.
Butter, dairy, rolls, 21c. to 22c.
Butter, dairy, prints, 23c. to 24c.
Cheese, large, 12½c. to 13c., twins, 13c.
Eggs, dozen, fresh, 24c. per dozen.
Beef, fore-quarter, 8c. to 9½c.
Beef, hind-quarter, 10c. to 12c.
Lamb, 10c.
Mutton, 7c to 9c.
Veal, 7c. to 8½c.
Pork, 10½c. to 11½c.
Bacon, 20c.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, lathers, plasterers, painters, plumbers, stonecutters and builders' labourers were busily engaged. Iron moulders, workers and

helpers were busy. Machinists, blacksmiths and boilermakers were active. Woodworkers, upholsterers, carriage and wagon makers were busy. Coopers were active. Printers were busy. Journeymen tailors and factory workers were busy. Bakers, confectioners and butchers are doing a good business. Cigar makers were steadily employed. Harness makers were active. Barbers, clerks and delivery employés were busy. Hotel, restaurant and laundry workers were active. There is a demand for female help in hotels and factories. Railway conductors, engineers, firemen, trainmen, switchmen and freight handlers were busy. Cab drivers, draymen and teamsters were very busy. Unskilled labour was very busy.

DISTRICT NOTES.

Monkton.—Labour is well employed here. Hay Brothers' elevator is completed and is a substantial structure.

LONDON, ONT., AND DISTRICT.

Mr. A. Woonton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions in this city were fair in factories and foundries, but not as active as last year in the building trades. In the business district the streets are being prepared for a new asphalt pavement, and the street railway company is laying new rails, and wires are being put underground in preparation for the work.

The Western Fair was held during the month, and weather conditions were excellent. It is estimated that 120,000 people visited the fair, which supplied temporary work to a large body of men.

A meeting of the several municipalities interested in Niagara power was held here on the 22nd and 23rd, and it was voted to allow Windsor to sell power to Detroit, the different municipalities to receive a part of the benefit derived from the sale.

It has been decided by the City Council to have 10,000 copies of the Assessment Roll printed and distributed among the property holders. This will mean an $800 job for the printers, and work for several clerks preparing the copy.

A shortening of the hours of labour has taken place at the McCormick Manufacturing Company and Perrins, both biscuit and candy factories, employing between them about 900 hands. The men get a reduction from 56 to 53 hours per week, and the girls from 56 to 50 hours per week. The reason is to induce labour to come to them, as it has been very difficult to get sufficient female help.

Of those who went out during the Grand Trunk Railway Company strike, the freight men have all been taken back; but very few of the passenger men are working, those who took their places during the strike still retaining the runs.

CONDITION OF LOCAL INDUSTRIES.

Railway construction.—It is stated that the Canadian Pacific Railway Company will begin work of an extensive nature in this city shortly, on a new roundhouse, car shops, repair shops and a new station in the east end. A tract of land has been purchased for this purpose.

Agriculture.—Market prices continue high:—

Oats, $1.05 per hundred.
Hay, $12.00 per ton.
Live Hogs, $8.65 a hundred.
Butter, 25 cents per pound.
Eggs, 27 cents dozen.
Chickens, 85 to $1.25 per pair.
Potatoes, 70 cents per bag.
Tomatoes, 20 cents a basket.
Onions, $1.10 per bushel.
Green Corn, 7 to 8 cents per dozen.
Apples, 90 cents per bushel.
Peaches, 85 cents per basket.
Grapes, 20 cents per basket.
Plums, 65 cents per bushel.
Pears, $1.10 per bushel.

CONDITION OF PARTICULAR TRADES.

Bricklayers reported very little new work, and prospects poor. Carpenters, lathers and plasterers reported trade fair. Painters were busy. Moulders

were very busy, especially in jobbing lines. Iron workers were busy. Electrical workers and linemen were busy on Niagara power work. Metal polishers, brass workers and stove mounters were all busy. Sheet metal workers reported trade fair. Carriage and wagon workers were busy. At the Grand Trunk Railway Company's car shops they are only working five days a week or 50 hours this month, an order having gone forth to cut down expenses. Coopers were busy. Business is good in all sections of the printing trades, and more especially during Fair week. Journeymen tailors report business fair. Garment workers are busy. Boot and shoe workers were very busy. Bakers and confectioners were busy, large shipments are being made to Western Canada. Cigarmakers report trade good. Tanners were busy. Broom makers were busy, but furriers were slack. Railroad train crews report conditions good, with plenty of work. Street railway empolyés have had a very busy month. For unskilled labour there has been sufficient work for all, but the future is not promising.

ST. THOMAS, ONT., AND DISTRICT.

Mr. J. A. Killingsworth, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market in this city and district during September was decidedly quieter than at any time during the summer. Work in the building trades was not nearly so brisk as during the preceding month, notwithstanding that weather conditions were excellent for outside work. In the railway shops all hands were actively engaged, with plenty of work in sight for the immediate future. Skilled mechanics are in demand. Traffic employés on the railways entering the city report the month less brisk than during the preceding month. An employment agent has been working in this city and as a result of his efforts fifteen or twenty experienced men have gone to Brandon to accept positions on the Canadian Pacific Railway out of that city, and it is stated that more men are to follow. The men engaged are the very best class. The locomotive engineers employed on the Michigan Central Railway were granted a substantial increase in wages as a result of a conference between the officials and enginemen's representatives from their organization. The increase places the Michigan Central Railway enginemen among the highest paid enginemen in Canada.

Under the new schedule freight engineers will receive $4.85 per 100 miles. Passenger engineers will receive $4.15 per 100 miles. The passenger engineers' rate will apply on all branch lines. Switch engineers will receive 40 cents per hour. Transfer engineers will receive 41 cents per hour.

A representative of the Trades and Labor Congress was sent from this city to Fort William to attend the recent conference.

Unskilled labour was not so much in demand during the latter part of September, and as a result the supply is slightly in excess of the demand.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Local markets were well attended. Farmers report good harvests and excellent weather for the late crops.

Manufacturing.—Local manufacturers report the month normal.

CONDITION OF PARTICULAR TRADES.

The building trades were not so active as during the summer months. Most contracts have been finished, and the work which is being done is mostly repair work. Iron moulders, machinists and blacksmiths employed in the railway shops report an average month. Trade was livelier with journeymen tailors towards the latter part of September and the prospects are good for fall trade. Railway employés in the traffic department were not as well employed as heretofore. There was a slight falling off in the demand for unskilled labour.

CHATHAM, ONT., AND DISTRICT.

Mr. Alex. Gregory, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market was active throughout the month, the building trade being very active in all branches. A large number of permits were issued, and the prospects for a busy fall work are expected. The Canadian Grain Shocker Company called for tenders for a large stone and brick factory. When completed it will employ a large staff of men. The city Board of Works has a large amount of sewer and paving under way, and unskilled labour has had ample work all month. Factories of all kinds are very busy, some were running extra time. Planing mills, which had been somewhat slack the forepart of the season, became very active. Carriage and wagon factories were unusually busy. The Gananocque Axle Works were still advertising for men, and good men were readily given employment. There was no unrest in the labour market.

CONDITION OF LOCAL INDUSTRIES.

Agriculture. — Farmers were active, seeding during the first part of the month, and the latter part, harvesting the corn and bean crop, which are the largest in this district for years. A very serious loss to the section is the complete failure of the apple crop. The evaporating factories have been unable to start operations so far for lack of apples, which will mean a loss to a very large number of hands who formerly were engaged for two and a half months in the fall.

CONDITION OF PARTICULAR TRADES.

Bricklayers, carpenters and joiners and plasterers were very busy. Painters, decorators and paperhangers were fairly active. Plumbers reported trade good. Builders' labourers were well employed. Machinists, electrical workers and linemen were busy. Metal polishers, buffers, platers and brass workers were very busy. Stove mounters, blacksmiths and boiler makers and sheet-metal workers were active. Woodworkers, upholsterers, carriage and wagon makers were very busy. Printers, pressmen and bookbinders were very busy. Journeymen tailors, garment workers, boot and shoe workers were normally active. Bakers and confectioners, butchers, cigar makers and tobacco workers reported trade good. Barbers, clerks, stenographers, delivery employés, hotel, restaurant and theatre employés were busy. Laundry workers were active. Freight handlers were quiet, little local freight moving during the first part of the month. Street railway employés, cab drivers, carters and draymen and teamsters were busy. There was a demand for unskilled labour.

WINDSOR, ONT., AND DISTRICT.

Mr. D. Mitchell, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

General activity prevailed in the labour market. All branches of industry were well employed, and in some trades men were in demand. The building trades were very busy. Notwithstanding the large number of houses that have been erected in the last two or three years, there is a demand for houses to rent from $12 to $15 a month. Manufacturers employing female help, say they could employ forty per cent. more help, but it is not to be had. The Sandwich, Windsor and Amherstburg Electric Railway Company has installed a new $35,000 power plant. Another American concern called the Burlington Blanket Company, of Burlington, Wis., has purchased the woollen mill property, and expects to have it ready for business in about six weeks, and will give employment to twenty-five hands to start with. The new Michigan Central Railway tunnel was formally opened September 12 for freight traffic. It will be some time yet before it will be ready for passenger service.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are busy marketing their produce, which commands good prices.

Manufacturing.—Manufacturers are very busy.

Railway construction and employment.—The Grand Trunk Railway Company has a gang of men laying heavy rails from Windsor to Chatham.

CONDITION OF PARTICULAR TRADES.

All connected with the building trades were very busy. All the metal and engineering trades were active. The woodworking and furnishing trades report plenty of work, and in some cases are working overtime.

Printers and allied trades were busy. Journeymen tailors were fully employed. Garment workers were in demand. Bakers, butchers, ice drivers, cigar makers and leather workers were very busy. Barbers report a fair month, with every one working. Clerks, delivery employés, hotel and laundry workers can find plenty of work. Railway employés were all working. Freight handlers and street railway employés were busy. Unskilled labour was in demand.

SAULT STE. MARIE, ONT., AND DISTRICT.

Mr. F. A. Denman, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Conditions during September were very active. Labour was well employed, there being a shortage in the building trades. Business was good, and manufacturing plants were all busy. The annual fair held in September was the best in the history of the district. The attendance was large, and the exhibits of a superior class. The Board of Trade held a meeting for the purpose of hearing Mr. C. O. Michaelson, of Minneapolis, who proposes to establish a stamping mill at Sault Ste. Marie. For this enterprise a bonus of $100,000 is asked. The stamping mill to be erected would cost $150,000, and would employ about thirty men. The necessary steps to be taken to have such a proposition submitted to the ratepayers were explained, and it was suggested that a joint committee of the Board of Trade and citizens should confer, and that a proposal which might be accepted by the ratepayers should be drawn up by a solicitor. This suggestion was accepted. The rate of taxation for Sault Ste. Marie this year will amount to 18½ mills on the dollar.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Satisfactory reports were received. The establishment of a town market this year has done much to stimulate this industry, especially in the garden truck line.

Fishing.—Normal conditions prevailed.

Lumbering.—The outlook was promising. Good progress was made in preparations for the winter season's work in the woods.

Manufacturing.—The different establishments were busy. The annual report of the directors of the Lake Superior Corporation for the fiscal year ending June 30, 1910, shows the output of the Company's steel plant during said year, compared with the previous fiscal year, to have been:—

	1908–9	1909–10
Pig iron, tons	130,268	153,528
Steel rails, tons	158,465	201,615

The result of the year's operations of all the subsidiary companies of the Lake Superior Corporation shows a surplus, subject to depreciation and other charges, of $1,194,735.22.

Mining.—Conditions were quiet, except in the Michipicoten district, where they were busy.

CONDITION OF PARTICULAR TRADES.

The building trades were very busy. Busy conditions prevailed in the metal and woodworking trades, while satisfactory reports were received from the printing, clothing and food and tobacco preparation branches.

DISTRICT NOTES.

Steelton.—An extensive sewer system is being installed in this municipality, and a by-law being prepared for submission to the ratepayers on January 1, 1911, looking towards the establishment of a $30,000 lighting plant.

PORT ARTHUR, FORT WILLIAM, ONT., AND DISTRICT.

Mr. F. Urry, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Throughout the month of September labour has been fully employed in this district. Unskilled labour especially being in great demand on foundation work, laying out new streets, extension of railway system, excavations at the Western Dry Docks, excavation work along the Grand Trunk Pacific Railway line at Fort William, street improvement of a permanent character by the councils of the two cities, and extension of water, gas and sewerage systems. The machine shop of the Canadian Pacific Railway Company, at Fort William, and the docks of the Canadian Northern Railway Company, at Port Arthur, are being extended.

The building trades have been exceptionally busy all summer, and although the season is getting late, new buildings are being started. Transportation at docks has been normal. Wholesale and retail traders report steady progress.

The strike of the stove plate moulders at Fort William is still in force. It is reported at the foundry that many orders are in, but the firm have difficulty in getting men.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Local farmers are bringing their produce to the cities. There is an agitation on foot to establish a central market place for Port Arthur, and some talk of extending the street car system into the agricultural district, when the line from Fort William to Kakabeka Falls is opened. This would give the farmers of the State valley district a better chance of reaching the market.

One of the urgent needs of the whole district is a system of good roads and a cheap method of transporting farm produce. This would encourage the settlement of the rich agricultural valleys of the district, lessen the cost of living, while opening up the mineral wealth of the hills. Miners would be able to work the district to advantage with good roads and an agricultural settlement in the productive valleys.

Railway construction.—Employment on railway construction has been in full swing and many men are recruited for railway construction work from these cities. There have been complaints made by men who have been victimized by sub-contractors.

CONDITION OF PARTICULAR TRADES.

The building trades have had a busy month. Masons and bricklayers, carpenters and joiners have been fully employed. Lathers and plasterers have had difficulty in keeping ahead of their work, and painters, plumbers and labourers have all been busy. The buildings in the two cities this year erected and in course of erection, have been very numerous, and from all appearances there is likelihood of a fair winter's work in the building trades. The iron moulders at Fort William stove works are still on strike, and the men are working at what they can get in other lines. Electrical workers, linemen and sheet-metal workers have been kept fully employed. The printing and allied trades have had a good month. The clothing trades are not important here, as a great deal of clothing is shipped either ready-made or in a semi-ready state. Bakers, confectioners and butchers have had a good month, and clerks, stenographers, delivery employés, have all been busy. All transport workers have been busy, and although work at the docks has been only normal, in other parts of the cities there has been a rush of business in transport, keeping teamsters and expressmen and labourers very busy; freight handlers have not been rushed, but steady work has been in progress.

NOTES.

The month of September was made notable for the workers in this district by the meeting of the Convention of the Trades and Labour Congress of Canada. The Congress met in these cities, September 12 to 17, inclusive, and was heartily welcomed by the civic authorities and the citizens generally. The City Councils of each city provided a meeting place, and donated $500 to each of the Labour Councils of the cities to entertain their visitors. The street railway commission gave all delegates to the congress free transport on the street railway system. On Wednesday afternoon, the delegates and friends enjoyed a trip on Thunder Bay and the river and harbour of Fort William. The extensive works at the dry docks, Port Arthur, and the Grand Trunk Railway, Fort William, thoroughly interested the visitors. The business of the Congress is reported elsewhere, and it is only necessary to state here that the labour men of Port Arthur and Fort William have been greatly helped by the Congress meetings, while the citizens generally have had their interest stimulated in the objects of labour and the method pursued to reach those objects.

WINNIPEG, MAN., AND DISTRICT.

Mr. John Appleton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During the whole of September the demand for workmen of all classes has been very active. In July, there was a decided tendency on the part of employers, especially those engaged in manufacturing industries, to cut down staffs. The improvement in the crop conditions, however, during August, and the early threshing returns having indicated that the cereal crop generally would be, at least, an average one, caused business to become very active, and fresh confidence was infused into manufacturing and business enterprises. The harvesting operations and the high wages paid had a tendency to draw men away from employment in the city, and some of the manufacturing plants were seriously affected by this movement.

Business generally has been very good. The railroads have been carrying a heavier volume of traffic than usual, and grain has been coming through Winnipeg in about the same volume as last year. The shipments of cattle to Winnipeg have been very much greater than usual and this movement is partly attributed to the shortage of hay and feed generally in southern Manitoba and Saskatchewan, from which points the bulk of the shipments are coming. There is of course, the usual heavy shipments from northern Manitoba, where the conditions have been excellent for cattle, and where the farmers give more attention to this branch of husbandry.

Bank clearings for September 1910 are 26.5 per cent. greater than for September, 1909, and for the nine months of the year to the end of September the increase is 34.8 per cent. The amount of the clearings for September is $76,951,048, and for nine months, $621,213,673.

The strike of the Canadian Northern Railway Company's workmen which was inaugurated on July 7 last, has been brought to a close. Approximately, 500 men were involved. The cause of the strike was dissatisfaction with the award of the Board of Arbitration. On September 27, the men returned to work unconditionally. It is understood that this strike was not sanctioned by the International Union. On September 28, about twenty-eight men returned to work and since that time about a hundred more have applied to be re-instated. Most of the men, however, have secured other employment. From the commencement of the strike the men have been able to get other work and in consequence there was no suffering entailed. A committee was employed to maintain the strike, but the rest of the men appear to have had work from the commencement of the strike.

On September 8, thirty employés of the Manitoba Clothing Company went on strike because of the failure of the management of that Company to recog-

nize a new agreement formulated by the Garment Workers' Union. This new agreement called for a forty-eight hour week, and the following rates of pay: First-class tailor, $22; bushelmen, $17; presser, $20; operator, $22; coat finishers, $12; vest finishers, $10; pants finishers, $10. For working on holidays, double pay. After being on strike for a couple of days the men went back to work pending the arrival of the representative of the International Union, who effected a settlement.

A local branch of the International Brotherhood of stationary firemen, stokers, oilers and helpers, was organized in Winnipeg on September 8. R. W. Parr, Trades' Hall, Winnipeg, was elected president and business agent. The Union starts with a membership of sixty-five.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Threshing operations in Manitoba are practically over, and so far as returns have come to the city, the yield is very much better than anticipated. In some parts of southern Manitoba where it was feared that the crop was an entire failure, wheat has yielded seven or eight bushels to the acre. The late rains improved the pastures, but the hay lands cannot be cropped this year. In the northern parts of the Province, there is abundance of hay and in view of the probabilty of there being a demand for this commodity at higher figures this year, the northern farmers have been cropping as much hay as possible.

A deputation from south-western Manitoba met on September 28, the Honourable Robert Rogers, the Minister of Public Works, discussed the matter of seed wheat and feed required by farmers who had lost their crop and would be placed thereby in a position of embarrassment. It was represented by the delegation that farmers generally in southern Manitoba were able to stand the loss of their crop this year, but there were many who would have difficulty in making arrangements to obtain feed and seed. The delegation also waited upon the railway officials in the city with a view to procuring the co-operation of the railroads in dealing with the situation.

Railway construction.—The improved crop conditions changed the situation in so far as the contractors employed in railway construction are concerned. It was thought that the crop shortage in Dakota and in Manitoba would make available for contractors' camps a larger supply of men than usual, but the demand for harvesters was so pronounced and the wages offered so high that the contractors had difficulty in holding what men they had and have had great difficulty in getting enough men to keep their plant in operation.

Flour milling.—The local mills have been running at full capacity during the month. Export business has not been heavy and the cause is said to be the high price of wheat.

CONDITION OF PARTICULAR TRADES.

Engineering.—All the local iron works are very busy, especially those who give special attention to structural steel. Moulders are also very active.

Building.—During September, the number of building permits issued was, 287 for 330 buildings, at an estimated cost of $804,400. For the same month of 1909, the permits issued numbered 280 for 321 buildings at an estimated cost of $802,950. For the nine months ending September 30, the total permits issued numbered 2,799 for 3,343 buildings at a cost of $13,132,800. Last year for the same period the permits issued numbered 2,112 for 2,487 buildings at an estimated cost of $8,369,750.

All other trades are busy and there are very few workmen looking for jobs.

DISTRICT NOTES.

A report is current to the effect that the Hudson Bay Company will erect in Winnipeg, a new store equal in size to any existing here. The intention of the Company is said to be to further develop its mail order business.

The Point du Bois power development which is being carried out by the City is

making rapid progress. A large party of business men of Winnipeg visited the works during the month. The power house walls are practically completed, and it is expected that the roof will be on and completed before the winter sets in, thus enabling the machinery contractors to proceed with their part of the work during the winter months.

The Winnipeg Electric Street Railway Company is starting operations upon several important additions to tracks.

Operations will commence during the present month upon the erection of a costly building for the Canadian Bank of Commerce.

BRANDON, MAN., AND DISTRICT.

Mr. E. Fulcher, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during September has been very busy, advertisements appearing in the local papers for all classes of labour.

Many large buildings are in process of erection and overtime has been worked on nearly all of them; on the McKenzie re-inforced concrete building the work has been carried on at nights.

Many of the new buildings are nearing completion and already business men are talking of next season's building.

The basement for the new Canadian Northern Railway Hotel and Depot is nearly completed; it is expectd to have the station part finished this winter. The total cost of the building will be $425,000. The Railway Commission has just concluded a session in Brandon. The residents east of First street protested against the application of the Canadian Northern Railway Company to lay transfer tracks on First street, and won their case, the application being refused. The commission also refused to allow the Canadian Pacific Railway Company to lay an industrial spur on the Rosser Avenue Lane.

The City Council asked for the opinion of Professor Herdt of McGill University on the new power scheme for bringing power from Kenora to Brandon. Professor Herdt pronounced that the scheme was impracticable.

CONDITION OF LOCAL INDUSTRIES.

Agriculture. — Threshing is almost over, and the results are generally known. The crop has proved better than was expected, and though not up to the average, a fair crop has been harvested.

Manufacturing.—The Hanbury Manufacturing Company is still running its sash and door factory overtime, and its saw mill all night.

CONDITION OF PARTICULAR TRADES.

Bricklayers were fairly busy and stonemasons active. Carpenters and joiners, lathers and plasterers were very busy, with painters active; plumbers and gasfitters busy, stonecutters active and builders' labourers very busy. Machinists were busy. Cigar makers were active. Railway employés were very busy. Unskilled labour was also very busy.

REGINA, SASK., AND DISTRICT.

Mr. W. B. McNeil, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Generally speaking labour was well employed throughout the month, there being little or no change from the preceding month. Compared with the corresponding period of last year, labour was more fully employed. In most branches of industry the supply barely met the demands and the prospects are favourable. Buildings continue to be started; in some cases the foundations only are to be constructed this fall.

CONDITION OF LOCAL INDUSTRIES.

Agriculture. — With all grain cut, threshing was general throughout the district, though reports received as to the average yield are not very favour-

able. Farm labour is plentiful and weather conditions are favourable.

Manufacturing. — One of Regina's youngest manufacturing concerns—the Egg-O Baking Powder Company is leaving, to make its headquarters at Hamilton, Ont. This action was said to have been taken on account of the high freight rates existing in this part of the country. It was stated recently at one of the railway commission's meetings, that the merchants could send their products from Hamilton to Vancouver for less than they could from Regina, and as the Egg-O Company do a large business at the coast, it was found it would be to their interests to make the move.

The soap industry continues to progress as is evidenced by the increasing staff.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons had a fair month, though there are a few who find no demand for their labour; for owing to an employment agency in Great Britain sending emigrants (bricklayers) to work on the New Legislative Buildings now under construction, who upon arrival find the situation far from expectations. Carpenters and joiners were very busy and at all times meeting the demands. Lathers were much in demand, while plasterers were well employed. Painters and paperhangers were very active as also were plumbers and steamfitters, and stonecutters. Builders' labourers were much in demand. Electrical workers were kept busy, while bicycle workers were quiet. All branches of the printing trade were active, as also were the journeymen tailors and garment workers. Bakers and confectioners were well employed. Butchers and meat cutters were active. The cigar makers were quiet. Barbers were active and in demand, but clerks, stenographers and delivery employés met all demands. Hotel and restaurant employés were active, a steady increase in the demand being noted. Laundry workers were well employed. Commercial telegraphers were very active and much in demand, as were freight handlers. Hackmen, carters and draymen were very busy, also teamsters. An exceptional demand exists for unskilled labour, which has caused employers to increase labourers' wages ten to fifteen per cent.

MOOSE JAW, SASK., AND DISTRICT.

Mr. T. Backus, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market was active in all lines during September, with a brisk demand for men in many departments of trade. Last month proved to be the most active of the year as regards building operations, and this is reflected in the large total of building permits taken out. A total of $314,275 was the value of the permits granted. This sum is fifty per cent. higher than that of the previous best month of the year, and represents a percentage increase of 624 over the same month last year. The building figures for August represent work that is actually under way. Included in the total are two sums representing work now proceeding at the Saskatchewan Flour Mills. One for $85,000 applies to the new oatmeal mill and another of $45,000 to improvements and alterations in the present buildings. The two Provincial Government buildings, land titles office and telephone building are also included in the figures given.

For the eight months to date the amount of the permits issued is $897,640, $826,000 of this relating to permits issued since the opening of spring. Last year the total for the year (inclusive of certain improvements undertaken by the city) was $1,500,000. At the present rate of progress, and there appears as yet no diminution in the volume of work proceeding or contemplated, this year's figures will be far ahead of the record of 1909. City work and municipal improvements will reach a total never before approached; such work as the new produce market, isolation hospital and new branch fire

hall will help swell the total and there are yet to come the car barns for the street railway company and power house.

An analysis of the figures for the past eight months and those of the corresponding period last year is interesting. The figures are as follows:—

1909.

January, February and March	$ 7,950
April	161,250
May	25,700
June	118,500
July	35,650
August	42,150
Total	$ 391,200

1910.

January, February and March	$ 58,825
April	153,250
May	207,000
June	83,090
July	81,200
August	314,275
Total	$ 897,600

Increase in eight months, $506,400. Percentage of increase, 130 per cent. City improvements undertaken or provided for this year amount to $940,000. Making a grand total, of buildings to date and improvements of $1,837,640.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—On the whole the month was favourable for harvest operations and most of the grain in this district has been threshed. The yield is very satisfactory. Sharp frosts during the end of the month did slight damage to garden stuff.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, joiners, lathers, plasterers, painters, paperhangers and builders' labourers have all been very active, electricians and linemen were also active. Transportation employés busy; also engineers, moulders, iron workers, plumbers, blacksmiths, horseshoers, machinists, and boilermakers. Printing and allied trades all very active. Bakers, confectioners and butchers active, with steady work for barbers, clerks, stenographers, laundry workers and hotel employés. Labourers have been in brisk demand.

EDMONTON, ALTA., AND DISTRICT.

Mr. P. C. Foley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during September was active in all lines. A number of carpenters on the new exhibition grounds were out of employment a short time, on completion of the buildings. These, however, are now employed, as an increased demand has arisen for mechanics, on new residences. Compared with August, a slight increase in demand for skilled and unskilled labour was felt. Compared with September a year ago, the demand for labour was much greater. The supply, however, has been about equal to it. The excavations for the abutments for the high level bridge across the Saskatchewan river, connecting Edmonton and Strathcona, began, and a number of men and teams are employed. Transportation companies are busy. Shipments show a decided increase. Wholesale and retail trade has been good, especially in fruit.

CONDITION OF PARTICULAR TRADES.

Agricultural operations received a temporary check, owing to wet weather.

Bricklayers and masons were fully employed, the demand sometimes exceeding the supply. Carpenters were busy, with supply about equal to demand. Painters reported trade quiet for this time of year, supply being in excess of demand, and a number idle. Plumbers and steamfitters were fairly well employed, with supply and demand about equal. Builders' labourers were well employed, but the supply is equal to demand. Iron workers were busy, also electrical workers and linemen and blacksmiths. In all building trades an increased demand over September, 1909, was shown. The sheet-metal workers were on strike for about a week. This, however, has been settled satisfactorily. The lathers also went on strike for an agreement and a slight advance in wages. Up to the present, this trouble has not been adjusted. The

printing and allied trades have been busy, also the clothing trades. Bakers, confectioners, butchers and cigar makers were busy. Employés of all transportation companies were busy; this was especially true of street car employés, the number of passengers carried during August, 1910, being double those carried during August, 1909.

The volume of business done in Edmonton, for the first eight months of 1910, and for last year, has been furnished by the Secretary of the Board of Trade, as follows:—

	1908	1909	1910	P.C Inc. 1910 over 1909
Customs Returns.	$ 142,143	$ 176,768	$ '219749	25
Building Permits.	738'924	*1,468,472	1,648,442	12
Bank Clearings . .	24,564,396	31,732,614	42,028,729	32
Post Office (Stamps Only).	37,070	47,415	51,553	9
Street Railway.				
Passengers carri'd		1,219,238	2,299,762	88
Revenue.		$ 50,279	$ 99,198	97

LETHBRIDGE, ALTA., AND DISTRICT.

Mr. J. M. Ritchie, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The conditions for employment during the month of September have been fully better than in August, owing to men leaving for other points to engage in harvest operations and new mining operations. The extensive works entered into by the City of Lethbridge, grading streets, laying water in new streets, sewerage, and excavations for new buildings, gave work to many. There has been exceptional activity for bricklayers, and in stone work on buildings. Wood constructions are giving place to fire-proof buildings. Business is on the increase and warehouses are being built to meet the demand. Wages and hours for labour remain the same, and there were no labour disturbances during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The prospects for farming are very good. Rain commenced to fall about the middle of the month, raising the hopes of farmers and others, and having a general tendency to encourage enterprises. A greater rain-fall in the fall of the year is needed here.

Mining.—Miners were busy on development work. This promises to be one of the most important districts for coal mining in the Dominion of Canada. The Diamond City Coal Company is getting ready for a larger output of coal, opening up the mine, building new power houses, &c. The Lethbridge Collieries are putting down two shafts, with about 150 men employed. The Royal Collieries have built a new tipple and other houses to carry on operations on a more extensive scale. The Galt Coal Company is working full time, and shipping coal daily.

CONDITION OF PARTICULAR TRADES.

The conditions in the various trades have remained much the same as in the month of August. Bricklayers were busy and masons in demand. Carpenters and joiners were rather dull; many men have left during the month. Lathers and plasterers were rather dull. Plumbers had fair employment during the month. Stonecutters were busy, and labourers very busy. Stove mounters and woodworkers were fairly busy. Printers and pressmen were very busy. Journeymen tailors were very busy. Bakers and confectioners were very busy supplying surrounding district. Clerks and stenographers were busy, and hotel and restaurant employés very busy. There was a demand for teams on city work. Unskilled labour was in demand, owing to the activity of building and the amount of work the city is doing.

NELSON, B.C., AND DISTRICT.

Mr. A. B. Docksteader, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market throughout Kootenay district,

during the month of September, was quiet, the supply slightly exceeding the demand for both quartz and coal miners.

The Highland Mine at Ainsworth recently leased and bonded by the Kootenay Silver-Lead Mines, Limited, has resumed operations with a force of about twenty-seven men, which force they expect to increase as development may justify.

The Slocan-Star Mine at Sandon has once more resumed work with a force of about twenty-five men, after having passed through several years of litigation, which caused a suspension of operations.

The Molly Gibson Mine, tributary to Kootenay Lake, has been taken over by the Trail Smelter Company, which has a small force employed making preparations to operate the property on an extensive scale.

The Corbin Coal & Coke Company has about 350 men on the pay-roll, and reports a greater demand for coal than it can supply. It cannot, however, secure cars enough from the railway company, and the workmen have lost a few days this month.

The Crow's Nest Pass Collieries at Michel and Coal Creek are working the men about half-time on an average this month, owing to shortage of railway cars, and a temporary reduction in demand for coke, though so soon as the railway company can release sufficient cars from the wheat carrying traffic it is stated that the coal mines will work full time. Thus the shortage in work is only temporary. However, a further influx of miners into this district during the winter months would only be over supplying the labour market.

The Assistant Horticulturist for the Kootenay-Boundary district is reported as estimating that the district has produced fifty-eight car loads of apples this year, distributed as follows:—

Boundary District, 36 cars.
Lake and River Kootenay and Slocan, 12 cars.
Arrow Lake District and Columbia river, 5 cars.
Creston District, 5 cars.

The fifty-eight car-loads of apples produced this year does not include by any means all the fruit that has come off the ranches. Of plums and prunes, there are seven car-loads, and one car-load of pears, bringing the total production of large fruits up to sixty-six cars.

The new lumber mill at Castlegar has commenced operations. It has a capacity of 60,000 feet per day, and will employ from thirty to forty men when running at full capacity.

The Canadian Pacific Railway Company officials have announced that the depot at Nelson is to be enlarged.

C. W. Sharp & Son, of Winnipeg, are reported as having received the contract for the construction of the Canadian Pacific Railway Tourist Hotel at Balfour, on Kootenay Lake, the building to be completed by May 1, 1911, at a cost of $150,000.

The customs receipts for the Port of Nelson during August reached the sum of $9,212.81, a slight increase over the same month in last year. The Inland revenue receipts amounted to $3,034.84 for the same month.

NEW WESTMINSTER, B.C., AND DISTRICT.

Mr. J. P. McMurphy, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Unskilled labourers are in demand in and around New Westminster at the present time, and will be for some time to come, the City Council having let the contract for a further extension of the main street, in addition to seventeen thousand dollars worth of paved side-walks.

As the days pass, and construction work on the Pacific section of the Canadian Northern Railway becomes more advanced, the work becomes more rushed, and to-day there are nearly 900 men employed on the work between Port Main and Matsqui, the end of the first section. The Canadian Western Lumber Company is extending its large plant at Fraser river mills, and within a short time this Company will give regular employment to one thousand men. Almost all the different trades reported plenty of work, especially the sheet-metal workers; and

in this particular trade the supply is not equal to the demand.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers, with but few exceptions, are prosperous, the crops, which were very good, being safely harvested. The following quotations are the latest from the city market:—

Beef, hindquarters, per lb. 8½ to 9½ cents.
Beef, forequarters, per lb., 7 to 8 cents.
Lamb, per lb., 14 cents.
Mutton, per lb., 12 cents.
Veal, large per lb., 8 to 9 cents.
Veal, medium, per lb., 11 to 12 cents.
Pork, prime, per lb., 12½ to 13 cents.
Eggs, wholesale, per doz., 43 to 45 cents.
Eggs, retail, per doz., 45 to 50 cents.
Butter, wholesale, per lb., 30 cents.
Butter, retail, per lb., 35 cents.
Fowl, per dozen, live, $9 to $11.
Chickens, per doz., live, $5.50 to $8.
Broilers, per doz., $4 to $5.
Ducks, per dozen, $9 to $11.
Potatoes, new, per ton, $18 to $20.
Onions, per sack, $1.50.
Turnips, per sack, 50 cents.
Carrots, per sack, 75 cents.
Parsnips, per sack, 75 cents.
Apples, wholesale, per box, 70 to 90 cents.
Plums, wholesale, per crate, 30 to 40 cents.
Prunes, per crate, 40 to 50 cents.
Pears, wholesale, per box, 60 to 75 cents.
Cucumbers, per dozen, 30 cents.

Fishing on the Fraser river is fairly active for this season of the year, and the men who follow this calling are doing very well.

Lumbering.—Business continues to be very good. All the mills hereabout are working to their fullest capacity.

Railway construction. — Steam and electric railway construction is in full progress in this vicinity, and is giving employment to a large number of men. The British Columbia Electric Railway Company expects to have its road to the City of Chilliwack completed in about a month's time.

CONDITION OF PARTICULAR TRADES.

In nearly every case the building trades were busy. Bricklayers, masons, carpenters, lathers and plasterers were all working, as were plumbers and builders' labourers. Sheet-metal workers were all busy. Owing to the machinists being still on strike, the foundry employés were affected. Electrical workers, linemen, blacksmiths and horseshoers were active. Woodworkers, upholsterers, varnishers, electric car builders and shingle weavers were busy, as were the printing and allied trades. Cigar makers were only fairly active, but barbers, delivery employés, laundry workers and street railway employés were all working full time. Unskilled labourers were in demand.

VANCOUVER, B.C., AND DISTRICT.

Mr. Geo. Bartley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Unusually fine weather prevailed, and building operations were carried on with activity. A lull will ensue when the wet season sets in. Hard wheat flour, after jumping to $7.40 a barrel early in August, has fallen now (September 24) to $7.10. All other lines of provisions were firm. Transfers in real estate were numerous, but the interests involved were small.

The logs scaled at this port in August were 78,000,000 feet; in August, 1909, 42,000,000; in June, 1910, 70,000,000. These are record figures. The price has fallen from $8.50 per thousand, to $7.50.

There was a fair amount of trading on the local exchange in Portland Canal mining shares. Large shipments of salmon were made to the Orient and Great Britain. With a catch of 225,000 lb. of halibut, the fisher *Flamingo* arrived in port on the eighteenth instant.

The total weekly bank clearings for the week ending September 15, are $9,222,577, as compared with $6,911,622 of last year. The figures for the corresponding week of 1908 were $4,129,791. While over the nine million dollar mark, the clearings this week do not constitute a record. The biggest week in the history of Vancouver was that ending May 5, when the clearings totalled $9,428,636. Other big weeks this year were April 21, $9,237,654; June 30, $9,294,618; July 14, $4,153,451; July 21, $9,094,975.

The Medical Health Officer stated that the unskilled labourers seeking work usually come here in the slack season, and for obvious reasons are not particularly

wanted then. In the winter of 1907–8 the civic authorities were obliged to start relief work, and Dr. Underhill does not want to see a repetition of such conditions during the coming winter.

Organized labour observed Labour Day with a large parade, and held games at Stanley Park. The shingle mills were all busy.. The Trades and Labour Council decided to ask the City Council to place the minimum wage at $3 for eight hours for city work. The Trades and Labour Council will assist the waitresses' union to have the following agreement signed by hotel and restaurant proprietors:—

"We, the undersigned, do hereby agree to employ union waitresses and to apply to the secretary of the waitresses' union when there is a vacancy in my place, all of which I agree to do for a term of one year, from September 1, 1910. The waitresses' union, in consideration of the signature herein contained, do promise the support of the local unions and the central bodies in Vancouver to support houses displaying the card of the Waitresses' Union, Local 766, Vancouver."

In furtherance of this, it was resolved by the central body to interview the licensing commissioners, in order to have a clause inserted in hotel and restaurant licenses providing that no Orientals be employed on these premises.

The Western Canada Power Company has spent $3,000,000 on its plant at Stave Lake, to supply electric power for Vancouver. By January next, it will be ready to furnish 30,000 horse power.

The Bank of Ottawa has started the erection of an eight-storey building at the corner of Seymour and Hastings streets, to cost $250,000. A new fourteen-storey wing, 50 x 200 feet, will be added to the Canadian Pacific Railway Company's hotel, Vancouver.

Marc Klaw, New York, announced that his company will build an opera house, costing $250,000, aside from the lots. It will seat 2,000 people.

The last sailing of vessels to the far north is set for October 17.

The City's percentage share of the British Columbia Electric Railway Company's earnings for August was $5,409.44. The total paid to date this year amounts to $26,760. The ratepayers, on November 5, will vote on a loan by-law for $500,000, for sewers, and also upon the advisability of electing a board of control for the city. The new lodging by-law provides the minimum size of rooms shall be 9 x 6 feet, and 8 feet in height.

The report of the Provincial Chief Fire Warden for August showed that 3,572 men were employed at a cost of $40,669.-50., while $18,592.95 was estimated to have been spent by companies. The forest fires were smaller than in July.

The endless chain or belt system, instead of the line and hook, will in future be used at this port in unloading Pacific coast vessels.

DISTRICT NOTES.

South Vancouver.—The Reeve stated that the council could not get tenders for road improvements, on account of the scarcity of labour. Building operations were active.

North Vancouver.—The Council decided to spend $10,500 on the sewerage system.

NANAIMO, B.C., AND DISTRICT.

Mr. A. E. H. Spencer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market in this district, has not shown much change from last month; although there have been more men coming here looking for work than during the summer months.

There has been a good deal of activity on public works, owing to the large contract entered into by the city for sewerage and cement sidewalks as well as for repairs to the Water Works system. Commercial activity has been shown by the large number of people arriving and departing on boats and trains. Merchants in the wholesale and retail trades report business as good. There have been no changes in hours of labour or rates of wages.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—There is little activity among the fishermen in this district at present. The whale fishing stations on the West Coast of the Island are working to their full extent as whales are abundant this year.

Lumbering.—The saw mills in the city and district are working steadily with favourable prospects. The logging camps of the district all are going full time, the output being very large.

Mining.—The coal mines of the city and district are working full time. A large sum of money is to be expended on the improvement and extension of the Wellington and Cumberland mines. Quartz mining in the district is quiet.

Railroad construction is being pushed as fast as practicable. Some of the new roads will be opened by the first of next month. The Canadian Pacific Railway Company is still clearing and opening up land for settlement.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were active. Carpenters and joiners were very active, owing to the large number of residences in the course of erection in this city and district. Painters and paper hangers were active, as were plumbers. Builders' labourers have been well employed during the month. Blacksmiths and carriage makers were active. Printers have been fairly active during the month. Teamsters and expressmen reported work as good. Unskilled labour has been very active, the demand and supply being fairly equal.

THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907.—PROCEEDINGS UNDER THE ACT DURING THE MONTH OF SEPTEMBER, 1910.

DURING the month of September four applications for the establishment of Boards of Conciliation and Investigation were received, as follows:—

1. On behalf of the maintenance-of-way employés of the Canadian Pacific Railway Company, the dispute affecting, it was stated, 4,000 employés.
2. On behalf of the maintenance-of way employés of the Grand Trunk Pacific Railway Company, the dispute affecting, it was stated, 1,000 employés.
3. On behalf of the maintenance-of-way employés of the Canadian Northern Railway Company. the dispute affecting,it was stated, 1,800 employés.
4. On behalf of the deckhands, members of the Sailors' Union of the Pacific, empolyed at Vancouver and Victoria by the Canadian Pacific Steamship Company, the dispute affecting, it was stated, directly, eighty-six employés, and indirectly, fifty employés.

Reports Received.

During the month of September reports were received in the cases of two disputes as follows:—

1. In the disputes between the various Shipping Companies doing business at the Port of Montreal and the Ship Liners of that Port. In this case a minority report was also received, bearing the signature of Mr. J. H. Lauer.
2. In the dispute between the British Columbia Electric Railway Company and its linemen.

Other Proceedings under the Act.

In the application of the maintenance-of-way employés of the Canadian Pacific Railway Company, for the establishment of a Board of Conciliation and Investigation it was stated that the dispute related to demands on the part of the employés concerned for an increase in the rates of pay and a revision of the rules of the current schedule, their contention being that there should be a standard schedule covering all manitenance-of-way employés on the entire system of the Canadian Pacific Railway Company. The number of employés concerned in this dispute was placed at 4,000. A Board was established by the Minister of Labour on September 12,

and was constituted as follows:—Mr. F. H. McGuigan, of Toronto, Ont., member appointed on the recommendation of the employing Company; Mr. W. T. J. Lee, of Toronto, Ont., member appointed on the recommendation of the employés; and His Honour Judge D. McGibbon, of Brampton, Ont., Chairman, appointed by the Minister in the absence of any joint recommendation from the other two members of the Board.

In the application of the maintenance-of-way employés of the Grand Trunk Pacific Railway Company for the establishment of a Board of Conciliation and Investigation, it was stated that the dispute related to demands on the part of the employés concerned for an increase in the rates of pay and a revision of the rules of the current schedule. The number of employés concerned in this dispute was placed at 1,000. A Board was established by the Minister of Labour on September 15, and was constituted as follows:—Mr. J. W. Dawsey, of Melville, Sask., member appointed on the recommendation of the employing Company; Mr. W. T. J. Lee, of Toronto, Ont., member appointed on the recommendation of the employés; and his Honour Judge D. McGibbon, of Brampton, Ont., Chairman, appointed on the joint recommendation of the other two members of the Board.

In the application of the maintenance-of-way employés of the Canadian Northern Railway Company for the establishment of a Board of Conciliation and Investigation it was stated that the dispute related to demands on the part of the employés concerned for an increase in the rates of pay, and a revision of the rules of the current schedule, their contention being that there should be a standard schedule for all maintenance-of-way employés on the entire system of the Canadian Northern Railway. The number of employés concerned in this dispute was placed at 1,800. A Board was established by the Minister of Labour on September 12, and was constituted as follows: — Mr. F. H. McGuigan, of Toronto, Ont., member appointed on the recommendation of the employing Company; Mr. W. T. J. Lee, of Toronto, Ont., member appointed on the recommendation of the employés; and His Honour Judge D. McGibbon, of Brampton, Ont., Chairman, appointed on the joint recommendation of the other two members of the Board.

In the application on behalf of the deckhands employed by the Canadian Pacific Steamship Company, at Vancouver and Victoria, B.C., for the establishment of a Board of Conciliation and Investigation, it was stated that the dispute related to demands on the part of the men for increased compensation for holidays and overtime, a reduction in working hours, and improved conditions of employment. The number of employés concerend in this dispute was placed at eighty-six, directly, and fifty, indirectly. A Board was established by the Minister of Labour on September 20, Mr. James H. McVety, of Vancouver, B.C., being appointed on the recommendation of the employés. At the close of the month correspondence was still in progress with respect to the final constitution of the Board.

I. REPORT OF THE BOARD IN DISPUTE BETWEEN THE VARIOUS SHIPPING COMPANIES DOING BUSINESS AT THE PORT OF MONTREAL AND THE SHIP LINERS OF THAT PORT.

THE Acting Minister of Labour received on September 16, the report of the Board of Conciliation and Investigation to which had been referred certain differences between the various shipping Companies doing business at the Port of Montreal, and the ship liners of that Port; on September 17, a minority report was also received, bearing the signature of Mr. J. H. Lauer, of Montreal, Que., member appointed on behalf of the employing Companies.

The differences in question related to wages, hours and conditions of employment.

The Board which was appointed to

investigate this dispute was composed of Mr. W. D. Lighthall, K.C., of Montreal, Que., Chairman, appointed by the Minister, in the absence of any joint recommendation from the other members of the Board; Mr. J. W. Lauer, of Montreal, Que., member appointed on the recommendation of the employing Companies and Mr. George Poliquin, of Montreal, Que., member appointed on the recommendation of the employés. The Board was convened in Montreal on August 23 and continued to hold sittings until September 13.

The Board was unanimous in its findings with regard to all points at issue, except the questions of a minimum rate of wages, the Chairman and Mr. George Poliquin concurring in recommending a rate of 25 cents for day and 32 cents for night work. The Board reported that the ship liners had withdrawn their request that hiring should be made by the foreman and that ship liners should make repairs instead of the carpenters on board. A memorandum by the Chairman was attached to the report, giving the reasons for his final decision.

In his minority report, Mr. J. H. Lauer, of Montreal, Que., expressed regret that he had been unable to agree with the majority of the Board, but submitted that the weight of evidence did not justify the demand for an increase of wages.

On the sixteenth of the month, the Department was informed that the ship liners of the Port of Montreal had accepted the findings of the Board for a period of one year from the date of the award.

On September 30 the Department was informed that a meeting had been held in Montreal on September 29, of the representatives of the various shipping Companies concerned in this dispute, and, "that in view of the findings in the minority report, they respectfully regret that they cannot see their way clear to accept the findings of the majority report."

Report of Board.

The text of the findings of the Board of Conciliation and Investigation in this matter is as follows:—

Montreal, September 13, 1910.

In re

The Industrial Disputes Investigation Act 1907, and in *re* the Shipping Companies of the Port of Montreal, employers, and the shipliners of the Port of Montreal, employés.

F. A. ACLAND, ESQ.,
Deputy Minister of Labour,
Ottawa.

DEAR SIR.—The undersigned members of the Board of Conciliation, appointed in this matter, beg respectfully to report as follows:—

Their first meeting was held on the twenty-third August, 1910, and subsequent meetings on the twenty-ninth, thirtieth in the morning, and thirtieth in the afternoon, on Tuesday, September 6, 7, 9, 10 and 13. Several delays having occurred at the request of the parties.

After hearing witnesses and the production of statistics and having prolonged discussions on the various questions raised the Board has come to the following conclusions:—

1. The Board has all agreed on the following points:—

(*a*) The working hours shall be from 7 o'clock a.m. to 12 o'clock noon, and from 1 o'clock p.m. to 6 o'clock a.m., for night work; night meal to be taken between 11 o'clock p.m. and 12 o'clock midnight, each man being entitled to one hour, and ship owners to supply night meal either by ticket or cash to the value of 20 cents. The Board recommends the ticket system in preference to cash, and that the various superintendents satisfy themselves that good value is given by the restaurants.

(*b*) No meal hours shall be paid for unless worked, and in this case shall be paid at double rate.

(*c*) Sunday work shall be paid for at double rate.

(*d*) Waiting time shall be paid only from the time ordered. Day time at day rate; night time at night rate.

The Shipliners withdraw their request that hiring be made by the foremen, and that shipliners shall make repairs instead of the carpenters on board.

2. With regard to minimum rate of wages, the Board do not agree, the majority, composed of the Chairman and Mr. Poliquin, representing the employés, concur in recommending a rate of 25 cents day, and 32 cents night work.

The minority, being Mr. Lauer, representing the employers, will present a minority report, to be attached hereto.

The whole is respectfully submitted.

(Sgd.) W. D. Lighthall,
Chairman.
George Poliquin,

(Sgd.) J. H. Lauer,
Representing the Shipping Company's Minority Report.

Memo of reasons of Chairman (among others) for his final decision or report.

1. Increase as recommended, (25 cents day, 32 cents night) is as nearly as possible equal to an increase of 2 cents an hour on the day basis—the night being reduced from 33¾ cents at present obtained. This 2 cent rate totals about 25 cents per day. That an increase was fair is deducible from, among other facts, the recent increase to the longshoremen, whose business is comparable with that of the shipliners.

2. The longshoremen received 27½ cents per day and their night rate was at rate of day and a half, They now receive 30 cents day and 35 cents night, which is regarded as an increase, and intended as such. (Some received a bonus, but for an extra cause.) The present recommendation is comparable generally with this, as being on the principle of an increase.

3. A larger increase would be unfair to the employers and probably out of proportion to other trades. The longshoremen, for example, though not having the grade of skill possessed by the shipliners, more than make it up in the heavy nature of their labour and ought to receive somewhat more than shipliners. Shipliners compare in some respects with the ordinary carpenters in shop-employment, but though they require a less measure of skill, the work is more intermittent and exposed, hence their hour rates should equal these.

4. There was no convincing evidence that the increase recommended would injure the trade of the port or cause loss to the employers. The trade, a number of years ago, was much larger, but appears subject to only ordinary fluctuations in its present value.

5. The employers offered an increase of 1 cent a day hour. The increase recommended by me was 1 cent more. If this be accepted and an agreement settled on that basis, it will be better than an unsettled condition of affairs. The same employers gave the longshoremen a bonus of 2½ cents for steady season engagement.

September 14, 1910.

(Sgd.) W. D. Lighthall,
Chairman.

Minority Report.

The text of the minority report of Mr. J. H. Lauer, is as follows:—

Eastern Townships Bank Building,

Montreal, September 15, 1910.

F. A. Acland, Esq.
Deputy Minister of Labour
and Registrar of Boards of
Conciliation and Investigation,
Ottawa, Ont.

Sir,—

In the matter of the Industrial Disputes Investigation Act, 1907, and in the matter of differences between the various shipping Companies doing business at the port of Montreal and the shipliners at Montreal.

I regret to be unable on the part of the Shipping Companies herein represented to concur in the award rendered by the majority of the Board, as I respectfully submit that the weight of evidence adduced on both sides does not justify the demand for an increase of wages.

The reasons which lead me to this deliberate conclusion have already been stated in a general way in the memorandum submitted under date of September 5, 1910, to the Chairman, and which I have asked to be embodied in the Board's report as giving a just and accurate state-

ment of the actual conditions existing in this port at the present moment with reference to the shipping and transportation of cattle. I now propose to sum up these conclusions as briefly as possible:—

(*a*) It is an obvious truism that capital will always seek the cheapest market for its supplies, whether of materials or labour. If a line of business is unremunerative it will in the very nature of things be dropped sooner or later. We have just about reached that point now at which cattle shipping has ceased to be a paying branch of the business. The export cattle trade, unfortunately, has shown a marked decline during the past few years, both in the number of cattle shipped, and the freight-rates obtained by the Shipping Companies. Indisputable evidence has been tendered by leading exporters, as well as by the Companies, that rates at present are actually producing a loss. The following authentic figures, compiled from the actual records of cattle shipments and cattle rates during the past two or three years, were put in evidence, and are not disputed:—

Cattle Rates.

1909	Highest,	32%	Lowest,	25%.
1910	"	30%	"	20%.

Whereas the figures of thirty per cent. per head may be regarded as a fair standard price for reasonably remunerative transportation, the figure this year has averaged less than twenty-five per cent. There is also a keen competition from American ports, exporters producing telegrams from Boston and Philadelphia quoting rates as low as fifteen per cent. and even ten per cent. per head, the desire apparently being to capture Canadian business even at a dead loss. Business once diverted from this port would be difficult, if not impossible, of recovery; and failing this traffic, there evidently would be no need of any shipliners.

Cattle Shipments.

From May 1 to July 31 inclusive, we have the following figures:—

1908.	1909.	1910.
37,943	39,071	28,209

It has been claimed by the other side that the balance of the season, August to November, would reverse all this. On the contrary, the figures for these months show a still heavier loss:—

1908.	1909.
73,084	57,079

Under these circumstances, much as the Companies might desire to see their employés participate in any profitable enterprise, the present outlook in the cattle trade certainly does not warrant loading an unprofitable line of cargo with still greater charges.

The following significant statements were made at the last session by the leading steamship Company:—

1. "The net profit in carrying cattle at "present is so small and the competition "so keen that any increase in wages will "tend to divert the business to American "ports. A large percentage of our Cana-"dian cattle are to-day moving in that "direction.

2. "If the increase in lumber, supplies "and wages go on increasing in the same "ratio as in the past, the question as to "whether it will be profitable to handle "cattle or not is a matter which ship "owners will be obliged to give serious "consideration. Our cattle question for "the future seems a doubtful and un-"satisfactory problem. In my opinion "it would be against the interests of all "concerned, including the men, to add "one cent more to the cost of handling "cattle."

(*b*) We are not dealing here with "skilled labour." The shipliners are really "helpers or handy-men," and the current rate of wages for unskilled to partly skilled labour is at present $1.75 to $2.25 per day. It must also be borne in mind that a fair to a good journeyman carpenter is earning to-day, 25 cents to 30 cents per hour, and we cannot compare this skilled mechanic requiring a $100 kit of tools with the average shipliner whose only requirements are an axe and a saw, needed to erect rough partitions on board for cattle.

(c) It must further be remembered that the present rate of wages of 22½ cents for day work, really represents far more actual earnings than is apparent at first sight. A large part of the work is night work, paid for at time and one-half, and occasional Sunday work at double time. The actual pay-sheets for the current year were produced, showing that the average pay for steady employés runs from $12 to $16.25 per week, and in the case of foremen even up to $21.55 and $25 per week; so that this class of work cannot justly be termed under-paid. The combined average pay of day and night work, with 2 cents an hour added for the meal paid for by the Companies, actually brings the all-round rate of wages up to about 30 cents an hour, equal to the pay of the best carpenter mechanics in the city. It has also been shown that since the year 1900 the rate of pay has steadily increased with the cost of living, rising from 16 cents an hour in that year, to 22½ cents at present.

As the representative of the Shipping Companies on the Board, I regret to be unable to concede an increase in the minimum rate which must stand as under:

Ship Liners.—Day work, 22½ cents; night work, 33½ cents; double time as specified in my schedule, 45 cents per hour. These rates also cannot be applied to what is known as "Wood Passers" who are admittedly paid a lower rate, and whose wages must be a matter of arrangement between them and their individual employers.

I wish to emphasize that the various representatives of the Companies testified under oath that their relations with the men were entirely friendly, and that no complaint had been made to them.

It is a matter of history that some years ago the well-known P. & O. Company, of London, then had their shiplining and veneering done in London. A strike of French polishers ensued, with the result that now the P. & O. Company have all their ships re-fitted in Bombay, at far less cost, and the whole business is lost to the Port of London. It has also been admitted by the representative of the shipliners that with only two or three exceptions the steamers trading to this Port now have permanent cattle fixtures erected on the other side, where the labour is cheaper. It not the inference obvious?

The foregoing proves conclusively that the present demand is not opportune; it is doubtful if there is any general demand behind it. And finally, if persisted in, I do not hesitate to warn the shipliners that they are being misled as to the present condition of the cattle trade, and are in danger of seeing their very livelihood depart forever from the Port of Montreal. This is precisely what has already taken place in the Port of Quebec, where the former flourishing shipping industry has been permanently destroyed by incessant labour troubles, and which port now stands black-listed in all ship chartering guides, as a place to be avoided because of unsatisfactory labour conditions.

The whole of which is respectfully submitted.

(*Signed*) J. H. Lauer,
Representative of the Shipping Companies on the Board

I. REPORT OF BOARD IN DISPUTE BETWEEN THE BRITISH COLUMBIA ELECTRIC RAILWAY COMPANY AND LINEMEN IN ITS EMPLOY.

[N the September number of the *Labour Gazette* reference has been made to the satisfactory settlement which was reached between the parties concerned in this dispute through the efforts of Mr. Albert E. Beck, of Vancouver, B.C., member appointed on behalf of the employing Company, and Mr. James H. McVety, also of Vancouver, B.C., member appointed on behalf of the employés.

On September 12, the Minister of Labour received the formal report, signed by the two members of the Board of Conciliation and Investigation, and in a communication which accompanied the report, the following statement was made: "Believing the purpose of the Industrial Disputes Act to be conciliatory, we felt justified in using every available means to settle the dispute without completing the

Board, and giving the matter undue publicity, and in this we were sucessful, thanks to the fair spirit shown by Messrs. Sperling and Payne, General Manager of the Company, and Business Agent of the Linemen, respectively."

Report of Board.

The text of the findings of the Board of Conciliation and Investigation in this matter is as follows:—

VANCOUVER, B.C.,
September 6, 1910.

F. A. ACLAND, ESQ.,
Deputy Minister of Labour, and Registrar,
Ottawa, Ont.

Dear Sir,—

In connection with the dispute between the British Columbia Electric Railway Company and linemen in the Company's employ, we beg to report as follows:—

On receipt of notice of our appointments as representatives of the employer and employés, respectively, meetings were held on August 26, 27, 29, 30 and 31.

After discussing the selection of a Chairman for some time, we dicided to investigate the merits of the dispute referred for adjustment, in the hope that an arrangement could be arrived at without the necessity of completing the Board by the selection of a Chairman. Representatives of the Company and the linemen were brought together, and after some discussion and consideration, an arrangement was finally arrived at whereby the dispute was settled satisfactorily to all parties concerned.

The necessity for the appointment of a Chairman, therefore, no longer exists, this report concluding the investigation.

Yours truly,

(*Signed*) A. E. BECK,
Representing the Employer.

(*Signed*) JAS. H. MCVETY,
Representing the Employés.

THE TRADES AND LABOUR CONGRESS OF CANADA.—TWENTY SIXTH ANNUAL CONVENTION.

THE twenty-sixth annual convention of the Trades and Labour Congress of Canada was held in the cities of Fort William and Port Arthur, Ont., from the twelfth to the seventeenth of September, 1910. The sessions of the first three days were held in the auditorium at Fort William, while the remaining meetings took place in the Finnish Labour Temple in Port Arthur.

At the opening session in Fort William, Mr. Lionel Coursolle, and Mr. James Booker, the presidents of the Trades and Labour Councils of Fort William and Port Arthur, respectively, welcomed the delegates on behalf of organized labour, while His Worship, Mayor L. L. Peltier, of Fort William, extended the civic welcome. Mr. Alphonse Verville, M.P., of Maisonneuve, Que., Mr. Allan Studholme, M.P.P., of Hamilton, Ont., Mr. A. W. Puttee, ex-M.P., of Winnipeg, Man., Mr. Donald McNabb, ex-M.P.P., of Lethbridge, Alta., Mayor George Hastings, of Guelph, Ont., and Mr. John J. Manning, of Troy, N.Y., fraternal delegate from the American Federation of Labour, also spoke at the opening proceedings. At a subsequent meeting, Mayor I. L. Matthews, of Port Arthur, extended greetings to the delegates.

Opening Proceedings.

The first business transacted after the Convention had been declared open by the president, Mr. William Glockling, of Toronto, Ont., was the adoption of the report of the Credential Committee, which showed 158 delegates entitled to seats. Thirty-eight of these represented twenty-three trades and labour councils, and 120 delegates were sent by 107 international trades unions. One fraternal delegate was present from the American Federation of Labour.

The president submitted a report of his attendance at the convention of the Am-

erican Federation of Labour, in Toronto, Ont., in November, 1909, as well as of the organizing work done, the union affiliations secured and the places visited in the interests of the Congress during the past year.

Mr. Andrew Boyd, of Port Arthur, Ont., presented a report of his efforts in securing the affiliation with the Congress of unions in Fort William and Port Arthur, Ont.

Mr. W. R. Trotter, of Winnipeg, Man., gave a detailed statement of the localities visited in the Western Provinces, in securing affiliations, while Mr. J. C. Watters, of Victoria, B.C., reported along similar lines for the City of Victoria and other places in the Province of British Columbia.

Report of the Executive Council.

The following is a summary of the reports of the Executive Council and Provincial Executive Committees, as submitted to the delegates at the opening session:—

The report of the Executive Council referred to the great industrial activity of the past year, and the country's continued prosperity. Under the head of International Peace, the opinion was expressed that the electorate should have been given an opportunity of expressing its views on the question of the establishment of a navy for Canada. The Executive recommended that continued efforts be made to promote the efforts of those who believe in international peace. The withdrawal of the Bill introduced in the Senate to place trade unions in the category of illegal associations was referred to. On the question of the eight-hour day on Government work, it was stated that the agitation would have to be vigorously continued in order to offset the action of the opponents of the measure. Pleasure was expressed in the appointment by the Dominion Government of a Commission on Industrial Training and Technical Education, to which the nominee of the Congress had been appointed. On the question of immigration it was stated that systematic endeavours are being made in Canada and Great Britain by immigration societies and employers to evade the provisions of the law. The various trades unions in Canada should watch such efforts closely and protest when necessary. The Executive suggested that the provincial legislatures should be urged to pass a law requiring that when statements are made public as to the number of men wanted, the name of the employer should be published, as well as the wages to be paid, and the hours to be worked. Attention was drawn to Section 38 of the Immigration Act, as follows:—

"The Governor-in-Council may by proclamation or order whenever he deems it necessary or expedient (c) Prohibit for a stated period or permanently the landing in Canada or the landing at any specified port of entry in Canada of immigrants belonging to any race deemed unsuited to the climate or requirements of Canada, *or of immigrants of any specified class, occupation or character.*"

It was recommended that every advantage of this provision of the Act be taken to prevent the influx of strike breakers during the time of industrial disputes. Another section of the Act may also be invoked for this purpose, *viz.*, Section 3, Sub-Sections 7 and 8, which prohibits the entry of professional beggars or vagrants or persons likely to become a public charge, and immigrants to whom money has been given or loaned for the purpose of enabling them to qualify for landing in Canada. The annual interview of the Executive with the Federal Government was held, when the wishes of the Congress regarding legislation were made known. The supremacy of the Congress as the mouthpiece of organized labour in Canada was referred to and the opinion expressed that where trades and labour councils are chartered by the Congress they should not be required or requested to take out charters from the American Federation of Labour, and the recommendation was made that the Executive be authorized to take steps to have such efforts discontinued. The formation of provincial federations in each province along the lines of state federations in the United States, with charters from the Congress, was strongly recommended, and the further recommendation was made that the incoming provincial executive committee of the Congress take the initiative in organizing

such federations. For the purpose of co-operating with the farmers for mutual protection it was recommended that a special committee be appointed to take up the matter at the earliest opportunity. The Executive reported having secured amendments to the Industrial Disputes Investigation Act which placed the onus of asking for a board of investigation on the parties proposing a change in working conditions. The passage of the Combines Investigation Act was referred to. As a protection to trade unions the following clause had been inserted by the Minister of Labour: "This Act shall not be construed to repeal, amend or in any way affect the Trade Unions Act, Chapter 125 of the Revised Statutes, 1906." The placing of cable companies along with express, telegraph and telephone companies under the jurisdiction of the Railway Commission was commended, and Congress asked to re-affirm its position on the State owning and operating all public utilities. After referring to the action brought by the Buck Stove & Range Company against the American Federation of Labour, the Executive referred to the efforts of the Central Immigration Board of London, England, to establish labour exchanges in Canada and expressed disapproval of the scheme. The Executive called attention to the continued success of the British Labour Party, as well as the favourable result of the elections to the Labour Party in Australia, and stated that renewed action should be taken to convince the workers of the desirability and necessity of sending their own representatives to Parliament. Reference was made to the success of the strike of the members of the Order of Railroad Conductors and Brotherhood of Railroad Trainmen on the Grand Trunk Railway System, for the standardization of rates of pay and working rules with those adopted by other roads in the eastern territory, and the securing of an increase in wages from the first of May, 1910. Referring to the statement that legislation providing for cumpulsory arbitration in labour disputes would be introduced at the next session of Parliament, the Executive believed that the organized workers of Canada were almost unanimously opposed to such a law, and were of opinion that compulsory arbitration would lead to strife and industrial disturbance. The report concluded with references to the success of the convention of the American Federation of Labour in Toronto, in November of last year, the decease of Mr. Goldwin Smith, and to the death of several fellow workers since the last convention.

Reports of Provincial Executive Committees.

British Columbia.—The Executive Committee reported the formation of a provincial federation of labour, and the amalgamation of the United Mine Workers of America with the Western Federation of Miners. An effort had been made to secure the affiliation of unions with the Congress. The Executive Council was commended for its action in supplying information regarding proposed legislation at Ottawa. In February of the present year, when the Provincial Legislature was in session, the following matters were brought to the attention of the Government:—

1. Abolition of property qualifications for holding public office. 2. Abolition of election deposit. 3. Abolition of poll-tax and exempting tax on incomes less than $2,000 per year. 4. Eight-hour day on all Government work. 5. The insertion of a clause in all Government contracts for work to be done compelling contractors to pay workmen not less than the recognized trade union rate of wages. 6. The Government to take over the Tranquille Sanitarium and operate and maintain the same as a free public institution. 7. The amendments of the British Columbia Railway Act so as to apply to Interurban Electric Lines. 8. The Factory Act to apply to bakeries. 9. Amendment to Coroner's Act making it mandatory on Coroners to make inquest in every case of sudden or violent death. 10. The extension of further timber leases be refused and restriction on handloggers be removed. 11. The amendments to School Act submitted by Vancouver School Board. 12. Extention of the free text-book principle to include all school supplies. 13. The strict enforcement of the Steam-boiler Inspection Act and no amendments made with the view of reducing the qualifications required for engineers. 14. The Government ownership of coal mines, lumber industries, telephones and all public utilities.

On the twelfth of March, 1910, a communication was received from the Premier of the Province giving the decision of the Government on the above demands. The report closed with a plea for united political action.

Saskatchewan.—The Executive Committee reported the passage by the Legis-

lature of an Act for the protection of persons employed in factories, and the appointment of an inspector to secure its enforcement. The granting by the municipality of Moose Jaw of a twenty-year street railway franchise was regretted, and the action of the Regina Trades and Labour Council in assisting the defeat of a similar measure in that city was commended as being in accord with the principles of public ownership. After reporting on labour conditions in the cities of the Province, the Committee stated that on June 29, 1910, the following matters, with a view of having legislation enacted, had been submitted to the Attorney-General, who had informed the Committee that the demands would be carefully considered.

1. Workmen's Compensation.
2. Abolition of the Householder's tax as a qualification for muntcipal suffrage.
3. Amendment to Cities' Act, giving cities in the Province, right to change basis of taxation. (Single Tax.)
4. Amendment to Cities' Act. Removing the bonds of public utilities from amount debited to cities' borrowing powers.
5. Abolition of election deposit.
6. The Union Label to be used (where practicable) on all Goverment supplies.

Manitoba.—The Executive reported that substantial progress had been made during the year, and that after three years' agitation the Legislature had passed a Workmen's Compensation Act. The Legislature had also appointed a Commission for the purpose of inquiring into the question of technical education. Efforts were being made to have the Government establish a labour bureau, and also appoint a competent factory inspector to enforce the provisions of the Factory Act. The failure of the appeal of the Plumbers' Union against the verdict for damages awarded in a picketing case had caused the dissolution of the union. As a result of a movement originated in the Winnipeg Trades and Labour Council a labour party had been formed. The report suggested that combined political effort was imperative.

Ontario.—The Executive Committee reported that having learned of the Legislature intending to amend the present or substitute a new Workmen's Compensation Act, they took steps to ask for a special commission to hear evidence in favour of drafting a new law, emphasizing the necessity of the obliteration of the contributory negligence clauses. Sir William R. Meredith has been appointed as the Commissioner. Other requests made on the Legislature were: Amendments to the Municipal Assessment Act, giving municipalities autonomy in taxation; that Sunday work for street railway employés in cities and towns be limited to eight hours; that it be made compulsory that pay-as-you-enter cars be provided with vestibules, and all other cars with centre aisles; that a law be passed for an eight-hour day for miners; and that legislation be enacted to enforce the fair-wage clause in municipal, as well as provincial contracts. Provincial aid for technical education has also been requested. Political action on the part of the wage-earners was suggested in the concluding clause of the report.

Quebec.—The Executive Committee referred to the election as controller in the City of Montrael of a member of organied labour, and the success of five members of the labour party in the aldermanic elections. The extension of the hours of voting from 5 to 7 p.m., had been secured, as well as the adoption of a fair-wage clause in all civic contracts. On the tenth of March, 1910, the following matters were brought to the attention of the Provincial Cabinet: Abolition of propperty qualification for public office; protection of wages in cases of insolvency; for the enforcement of the factory Act in foundries; reduction of working hours in cotton mills; reduction in the cost of school books; for revocation of charter of Provincial Master Barbers' Association; in favour of provincial employment bureaus. The latter request had been complied with, and a law passed providing for a fifty-eight hour week in cotton factories had also been passed. Reference was made to the prosperity of the province, and also to the decease of several prominent workers.

New Brunswick.—The Executive Committee reported that an extension of the franchise in civic affairs had been secured, and urged the necessity of experienced international organizers being sent into the Province.

Nova Scotia.—The Executive Committee reported the passsage by the Legislature of a Workmen's Compensation Act. An attempt had been made to have the sections of the child labour law dealing with the working hours of women and children repealed, but owing to strong opposition being made, the effort was unsuccessful. Through an amendment to the Factory Act, the Committee stated the women workers had been deprvied of protection in regard to the hours of employment. A Bill providing for compulsory recognition of labour unions as well as one limiting the hours of employment in shops and offices to ten per day, had been defeated in the Legislature. Reference was made to the report of the Eight-Hour Commission which declared against a general and cumpulsory eight-hour law for the Province. The Halifax Labour party has selected a candidate to contest Halifax county in the forthcoming provincial elections.

Report of Fraternal Delegate.

The report of the fraternal delegate to the twenty-ninth annual convention of the American Federation of Labour, held in Toronto, Ont., from the eighth to the twentieth of November, 1909, gave an account of the growth of the organization for the year, as well as a synopsis of the business transacted at the convention.

Report of Parliamentary Solicitor.

The parliamentary solicitor, Mr. J. G. O'Donoghue, of Toronto, Ont., presented a report giving a short statement of matters affecting labour which had been before Parliament at the last session, *viz.*: Proportional representation; overloading of ships; wireless telegraphy on ships; amendment to the Intercolonial Raliway Provident Fund Act; the eight-hour Bill; amendment to Dominion Election Act, providing for abolition of election deposit, and the making of election day a public holiday; also one to give railway employés an opportunity of voting; wages of machinists on the Intercolonial Railway; Alien Labour Act; Payment of wages fortnightly to railway employés; amendment to Shipping Act; Inspection of vessels; amendment to Railway Act *re* names of men who work more than twelve hours per day; Daylight Saving Bill; The Senate; Placing of cable companies under jurisdiction of Railway Commission; Militia Pension Act; Pay of railway mail clerks; number of Chinese who entered Canada last year; amendment to the Industrial Disputes Investigation Act; defeat in the Senate of the Co-operative Bill; Technical Education Commission; Combines Investigation Act; amendment to Immigration Act; withdrawal of the Belcourt Bill. Mr. O'Donoghue gave a clear explanation of the different subjects, and replied to various questions which were asked.

Report of Committee on Officers' Reports.

The above reports of the Executive Council, Provincial Executive Committees and Parliamentary Solicitor were referred to the Committee on Officers' Reports. This Committee concurred in the various reports and recommendations made, with very few exceptions, and urged continued activity to secure the passage of the eight-hour Bill. One of the recommendations of the Committee in reference to provincial federations of labour was that charters be issued when a majoirty of affiliated unions of a province applied for same. The Committee also recommended that the Government be asked to either enforce the Alien Labour Act or repeal the law; that efforts be renewed to have the Co-operative Bill passed by the Senate, and that the provisions of the amendments to Immigration Act, under which should the importation of strike-breakers be likely at any time, the Minister has power to issue an order preventing their coming, be taken advantage of when necessary. This report and recommendations contained therein were approved.

Secretary-Treasurer's Report.

The Secretary-treasurer, Mr. P. M. Draper, of Ottawa, Ont., presented an itemized statement of the receipts and expenditures of the Congress from September 23, 1909, to September 13, 1910, which showed that the total receipts,

including balance on hand, were $9,482.34 expenditures, $7,103.56, leaving a balance on hand of $2,378.78. The report also indicated that thirty-nine trades and labour councils, and 916 international trade unions were in affiliation with the Congress. The Audit Committee, to which this statement was referred, reported as having found the accounts correct, and the report was approved.

Immigration.

Mr. W. R. Trotter, of Winnipeg, Man., former agent of the Congress in Great Britain, presented a long report in which special attention was called to the necessity for the restriction of immigration, and for provisions against exploitation. The report recommended a continuance of the methods which have enabled the Congress to keep a close watch on what was termed a very complicated situation, and asked for an increased vigilance in immigration matters, both east and west. Mr. Trotter also referred to recent Orders-in-Council amending the immigration regulations which permitted certain persons to land without the required $25 of landing money, which he claimed was most injurious.

The above report, as well as all resolutions bearing on the subject of immigration, was referred to a special committee. This Committee recommended for adoption a resolution declaring in favour of the appointment of an agent in Great Britain, with a permanent office for the purpose of checking misrepresentation of labour conditions in Canada. The prevailing opinion in the discussion appeared to be that at such times as occasion demanded should such a representative be sent, and on a vote taken, the Committee's recommendation was not concurred in. The balance of the report, containing the following recommendations, was unanimously adopted:—

That the Executive officers be instructed to endeavour to secure legislation compelling employers when advertising for workpeople while a strike or lock-out is in progress to clearly specify such fact in the said advertisement, and in case of failure to be compelled to return all persons who have been misled to their starting points, with such compensation as is just, to be determined in the same manner as shipping companies are at present held responsible for the introduction of persons contrary to the immigration regulations.

That the action of the Federal Government in removing the restriction from immigration to Canada be protested against most emphatically and that the Congress demand that the provision for $25,00 landing money be reimposed on all immigrants other than farm labourers and domestic servants.

That no scheme of Imperial labour exchanges can possibly be agreed to which is not preceded by a system of provincial and dominion exchanges which would have to satisfactorily demonstrate their usefulness and their further inability to supply any legitimate demand within the confines of the Dominion.

That, whereas Asiatic immigration is still a menace to the Dominion of Canada, and more particularly to the Province of British Columbia, and whereas Asiatic immigrants imperil the economic and moral welfare of the people of Canada, and whereas in spite of the restrictions imposed by the Government the influx still continues; therefore, be it resolved, that the Dominion Trades and Labour Congress demand the total restriction of this class of immigrants—Japanese or Chinese—or failing this, that the tax on Chinese be increased from $500 to $1,000; that the control of Japanese immigration be removed from the hands of the Japanese Government and placed where it rightfully belongs in the hands of the Canadian Government; and that total restriction of immigration from India continue as at present.

It was further recommended that the Executive officers take some definite steps to procure reliable statistics regarding all classes of Asiatic immigration.

Fraternal Greetings.

At one of the sessions of the Congress Mr. John J. Manning, of Troy, N.Y., fraternal delegate from the American Federation of Labour, tendered greetings from that organization. During his address, Mr. Manning gave a review of labour conditions in the United States, the efforts which have been made for the uplifting of the wage-earners, and the success which had accrued. On behalf of the Trades and Labour Congress, the president, Mr. Wm. Glockling, thanked the fraternal delegate for the greetings conveyed and the address given.

Moral and Social Reform.

Rev. Dr. J. G. Shearer, of Toronto, Ont., secretary of the Moral and Social Reform Association, with which the Congress is affiliated, was given the privilege of addressing the delegates during one of the sessions. Dr. Shearer congratulated the delegates on the apparent increased interest in the work of the Congress, and referred to the advance being made in the direction of economic social and moral reform.

Lord's Day Alliance.

A communication was received from Rev. T. Albert Moore, of Toronto, Ont., secretary of the Lord's Day Alliance, in which he gave an account of the work of the Alliance, and the contemplated action of the Association in endeavouring to decrease work on the Lord's Day. The continued support of the Congress was solicited, and in compliance with this request a resolution indorsing the work of the Alliance was submitted and unanimously adopted.

Constitution Amended.

Several resolutions having for their object the amendment of the Constitution were presented and referred to the Committee on Constitution and Law. The only proposition which was favourably reported upon by the Committee was that amending the Constitution to provide for the chartering and affiliation of Provincial Federations of Labour. The Committee's report was concurred in. Provincial Federations of Labour will be granted charters and supplies for $10; at conventions they will be entitled to one delegate each, and the annual cost of affiliation will be $10.

Appropriations.

The report of the Ways and Means Committee, which was adopted, recommended payment of the customary grants as follows:—

Secretary-treasurer, $800; Parliamentary solicitor, expenses attending convention, $200; payment of hotel expenses of fraternal delegate; caretakers of halls at Fort William and Port Arthur, $10 each; fraternal delegate to the American Federation of Labour, $400; Moral and Social Reform League, $50.

An account of $261.35 from the Manitoba Provincial Executive, in connection with local expenses incurred with the passage of the Workmen's Compensation Act, was presented by the secretary. The Congress ordered that the account be paid, but in doing so decided that his action must not be considered as a precedent for the payment of expenditures of this kind.

Eight-Hour Day.

The special committee to which was submitted the question of the eight-hour day referred to in the officer's reports presented the following resolution, which was carried unanimously:—

Whereas, this Congress has repeatedly placed itself on record in favour of a shorter work-day, and whereas Mr. A Verville, M.P., succeeded in getting an eight-hour bill before the special committee of the House of Commons at its last session, at which evidence was submitted by the Executive of this Congress, and the Secretary of the Canadian Manufacturer's Association, together with a mass of evidence from wage earners and employers, and whereas no substantial arguments were advanced from the employers' standpoint; and as good sound and substantial reasons were submitted from the wage workers' side; Be it resolved, that this Congress in convention assembled reiterates its former demand on the Federal Government to place an eight-hour day lawon the statute books of Canada; and we also recommend that the Executive Council be empowered to request all trades and labour councils and affiliated locals to petition all members of Parliament and Senators to support and vote for the eight-hour bill when it is next introduced.

The Deceux Case.

The Special Committee on the question of a member of the United Mine Workers of America, at Frank, Alta., being charged with murder, presented the following resolution as their report, and the same was adopted:—

Whereas the workers of Western Canada, more particularly in the mining districts of the Crow's Nest Pass, have witnessed what appears to them a prejudiced enforcement of the criminal law in the case of one Deceux, who was persecuted in the law courts, largely, we believe because of his membership in the United Mine Workers of America, and whereas, the workers of Canada desire to respect the law, and will do so as long as the administration of it is not of the jug-handled variety, therefore be it resolved that the Executive of the Province of Alberta be instructed to bring the facts of the Deceux case before the Attorney General with a request for an immediate investigation into the circumstances surrounding the prosecution of Deceux.

Resolutions Submitted.

Nearly seventy resolutions were submitted to the Convention, and referred to the Committee on Resolutions. Only such resolutions as were concurred in are taken into account in the following synopsis of proceedings.

Compulsory arbitration.—By a unanimous vote, the convention declared against compulsory arbitration, by adopting the following resolution:—

"Whereas the compulsory arbitration as a means of settling labour disputes is being advocated from time to time by certain newspapers;

"And whereas a compulsory arbitration law would destroy that freedom of liberty which permits the working classes to sell labour when and to whom they may choose, and would also destroy the alienable right to their liberty to do that which is legitimate;

"And whereas compulsory arbitration has not proven a success in those countries where it has been tried;

"Therefore, be it resolved, that this Trades and Labour Congress inform the Federal Government through its Executive that it is opposed to the enactment of a compulsory arbitration law."

International Peace.—By the unanimous adoption of the following resolution the Congress, in addition to re-affirming its opposition to international warfare, instructed its Executive to take steps to arrange an international peace conference of all federations of labour:—

"Whereas it is the desire of this Congress in convention assembled to again express its disapprobation of international warfare because of the burdens and hardships which such warfare inflicts upon the working class of all countries;

"Whereas it is the desire of this Congress to again declare itself in favour of universal peace between nations in order that the best interests of the working man be conserved;

"And whereas international warfare is the result of the personal ambition for the self aggregated or commercial gain of exploiting and influential minority of the people, Congress in addition to re-affirming;

"Therefore be it resolved that this its position on the above statements hereby instructs its Executive to open communication with all labour congresses and federations for the purpose of arranging an international peace conference, at which an attempt should be made to establish a universal policy of opposition to international warfare among the working classes throughout the country;

"And be it further resolved that the Executive report in detail to the next convention of this Congress in regard to the steps taken by it in pursuance to this resolution."

Co-operation.—The following resolution in favour of co-operative societies was approved by the Convention:—

'Whereas co-operation has proved one of the best methods to save the working classes from the clutches of capital;

"And whereas at the last session of the Dominion Parliament a Bill was presented regarding co-operation but was not passed;

"And whereas the Retail Merchants Association of Canada has made strong protest against this co-operation bill, proving by their action that co-operation is in favour of the working class,

"Be it resolved that this Trades and Labour Congress desire to place once more on record the unanimous desire of the working classes of Canada in favour of Federal legislation regarding co-operation."

Independent political action.—A resolution calling on the Congress to take political action in all elections was presented and referred to the Resolutions Committee, who submitted the following as a substitute:—

"Whereas this Congress is not a political party, but truly the legislative expression of organized labour throughout all Canada;

"And whereas this Congress has repeatedly declared itself in favour of independent political action on the part of the working class itself;

"And whereas many conventions have urged upon the wage workers of Canada the absolute necessity of seizing the Federal and Provincial law making powers;

"Therefore be it resolved that this 26th annual convention reaffirm such action, and in the matter of enforcement it believes that the best interests of organized labour can be conserved by recommending and permitting provincial autonomy."

Before the resolution was adopted it was pointed out that the Congress was not a political organization; that the matter of political action had been left to the Provincial Executive Committees, who had complete authority in such matters.

Child labour.—The following resolution which was adopted without opposition, seeks to increase the age at which children may be employed, from fourteen to sixteen years.

"Whereas the employment of children in Canada is injuriously affecting the interests of the working class as wage earners;

"Whereas the physical, mental and moral welfare of children is sacrificed to the capacity and greed of the employing class through the employment of children at too early an age;

"Therefore be it resolved that this Trades and Labour Congress of Canada, instruct the Provincial Executives to secure the passage of an enactment raising the age of children eligible for employment to 16 years of age."

Weekly pay-day.—The Resolution Committee recommended concurrence in the following resolution, and asked that it be referred to the Provincial Executives Committees for presentation to the Legislatures, as well as the Dominion Parliament:—

"Be it resolved that this Congress instruct its Executive to draft and present to the Dominion Parliament a Bill providing for and making compulsory the weekly payment of wages in cash, and in cases where the employer discharges the employé, or where the employé leaves the service of the employer all wages due to the employé be paid within 24 hours after leaving the emment, also providing that in case where the employment is placed under the necessity of carrying additional expense while waiting for the employer's compliance, the employer shall be responsible and be held liable to pay to the employé such expenses incurred.

"Be it further resolved that the Congress use all possible efforts to secure the passage of such bill."

It was moved in amendment that the word "weekly" be changed to "fortnightly". A discussion ensued, in which the different systems of wage payment were referred to. It was stated that, under a weekly-payment plan, the wage-earner and the mercantile community

would be greatly benefitted, as more cash payments would be made for commodities purchased. The concensus of opinion being in favour of a weekly pay-day, the amendment was withdrawn, and the report of the Committee adopted.

Legislation desired.—The following resolutions having for their object the passage of legislation by either the Dominion Parliament or Provincial Legislatures, were concurred in:—

"That this Congress use every effort to engage legislation in the next session of Parliament to compel railway companies to provide proper repair sheds for carmen, who have at present to work out of doors in all weather. And also the proper accommodation be provided for men to take their meals and the drying of wet clothes

"That the Executive endeavour to have placed on the Statutes a law which makes illegal a continuous twenty-four hour work day and makes it compulsory whenever continuous twenty-four hour work day obtains it be compulsory that three shifts working eight hours be the only legal method of time in the said branches of labour."

"Resolved that the Congress go on record as being opposed to the system of Government by injunction which is being rapidly developed by the employers during trade dsiputes and do instruct its executive to endeavour to have the laws amended so as to eliminate this cursed system or enact a law similar to the Trades Disputes' Act of Great Britain."

That the Provincial Executives endeavour to secure legislation providing that in cases of assignment, wages earned shall be paid before any other class of claims shall be admitted."

"Whereas the Catholic School Commission for the city of Montreal has granted one of our most fought for demands, abolition of the monthly school fee, but only for the old section of the City;

"And whereas a large number of schools are not benefiting by this concession on account of being under the supervision of our twenty different schools commissions.

"And whereas the labour party of Montreal has submitted to the Royal Commission appointed to investigate the feasibility of uniting all school commissions.

"Be it resloved that the Quebec executive be instructed to do all in its power and co-operate with the labour party to attain this desirable legislation."

"That this Congress endorse the proposed legislation for the protection of barbers and public health and hereby instruct its provincial executives to give all the assistance in their power to secure the enactment of the same into law."

"That the Executive demand the passage of a law providing for the inspection of locomotive steam boilers, and that the Solicitor draft the necessary bill; that the Congress endorse any bill that will compel all steam railroads in Canada to equip all locomotives with safe and suitable boiler appliances; and will provide for periodical inspection and test by a fully qualified and practical inspector.

"That the Congress use all its influence to have an act passed to prohibit municipalities from bonusing industries either by direct money bonuses, land grants or exemption from taxes."

"Approving the proposed amendment to the assessment act of Ontario to permit municipalities, if they so desire, to tax improvement values at a lower rate than land value; business assessments, incomes and salaries to be classed with improvement values, and the difference in the rates in every case to be determined by the municipality. This Congress would urge on all labour bodies throughout the Dominion to work for amendments to the Assessment Acts of the various provinces on similar lines to the proposed Ontario amendments.

"Instructing the Ontario Executive Committee to bring to the attention of the Ontario Government the unsanitary conditions existing in the metal foundries, and asking that the grievance be remedied.

"Asking the Provincial Legislature to prohibit the use of running boards on street cars."

"Resolved that all Provincial Executives be instructed when interviewing their Provincial law makers that they demand a law enacted, which will enable the public to take over and operate any public utility in their jurisdiction at one time they deem fit irrespective of any term being granted for said franchises, when upon majority vote of the voters interested it is so decided."

"Against dual voting on money by-laws."

"Asking that the Workmen's Compensation Act of Quebec be amended so as to make it more acceptable to the working class."

"That whereas, there is in existence in the railroads, and the large manufacturing concerns in this Dominion a system known as the personal record system;

"And whereas, this past or personal record system has caused, and is causing considerable hardship to the wage worker, and inflicting upon him the indignity of having to seek employment under an assumed name, a condition which is even admitted by many officials to be unjust, but one which they seem powerless to prevent.

"Be it therefore resolved that this Congress go on record as being opposed to, and use its best effort in securing legislation to eliminate this degrading and obnoxious system."

"Seeking legislation to prohibit merchant tailors and clothing manufacturers from having clothing made up in the homes of employés, believing such practice to be detrimental to the public health.

"That the Provincial Executive endeavour to bring about such legislation or amendments to present acts, as to the erection of scaffolds, and floors so as to prevent the great loss of life in the erection of buildings, especially the modern steel construction work, also that inspectors be appointed to see that such acts are enforced."

"That this Congress instruct its Executive to do all in their power to have an act passed by the Federal Government abolishing the practice of calling out the militia in any labour dispute."

"That the Provincial Executive be hereby instructed to secure legislation requiring that all vehicles be heated the same as the body of the street cars."

"In favour of abolition of property qualification for public office."

"That the various Provincial Legislatures be requested to make amendments to their factories Acts, whereby all laundries be brought under their operation.

"That the Provincial Executives endeavour to secure legislation providing that all street cars be equipped with air brakes and modern appliances."

"That the Executive Council be instructed to use their efforts to secure amendments to the present act regarding illegal commission so as to have law apply to fees charged for giving or securing employment.

"That the Executive press for a law that will require when an accident happens, that is likely to lead to serious results that all work cease and the evidence concerning such accident be taken in writing by a neutral person. Such evidence to be a prime factor in any claim for damages that may be taken."

"That the Executive take the necessary steps to endeavour to have Federal or Provincial laws enacted whereby widows not otherwise provided for and old

blind; totally disabled workers will receive an annuity sufficient to maintain them.

"Instructing the Executive and solicitor to draft a bill or measure to be brought in at the next session of Parliament on the lines of the sixteen-hour law, now in force in the United States, which prohibits the employment of railway men for more than sixteen continuous hours."

Miscellaneous resolutions.—The following resolutions of a miscellaneous character were also adopted:—

"That printed copies of the proceedings be sent to all *university libraries*."

"Expressing sympathy with members of the *Lake Seamen's Union* who are on strike against the espionage system of the Lake Carriers' Association.'

"Asking that the Federal Government nationalize the harbours of Fort William and Port Arthur."

"Expressing sympathy with the members of the *United Mine Workers* who are on strike in Springhill, N.S."

"Requesting that as the former organizer of the American Federation of Labour in the Province of Quebec had been elected to a public office, that another be appointed who can speak both the English and French languages."

"That as capitalists of the world create all wars, this Congress insists upon them doing their own fighting."

"That the Postmaster-General be asked to put into force a rule strictly limiting the hours of letter carriers to eight per day, and that the former rate of double pay for Sunday work be restored."

"That more suitable and better fitting uniforms be provided for letter carriers; and also that in the event of a superannuation Act being passed, that letter carriers may be eligible on attaining the age of fifty-five years or on completion of twenty-five years' service."

"Indorsing the label of the International Brick, Tile and Terra Cotta Workers' Alliance."

"That the Secretary-Treasurer be instructed to send to all affiliated unions such information as may be deemed advisable."

"That the Executive endeavour to have the wages paid to mechanics in the metal trades department in the Government yards at Sorel increased to the same rate as is being paid by other establishments in the same industry."

"That the Executive committee for the Province of Ontario take the necessary steps to secure better protection for the licensed bartenders of the Province."

"Against the circulation of dirty bank notes."

"That the Executive Council be instructed to take note of the complaint of the stone cutters regarding tariff regulation *re* cut stone, with a view of bringing the matter to the attention of the proper authorities."

"That the Executive Committee report at next convention on the feasibility of having a permanent organizer."

"Whereas commanding officers of military reorganizations of the Canadian Militia are endeavouring to hold military inspection reviews and manœuvers on Labour Day thereby interfering with the holiday, specially set apart for the working class;

Be it resolved that this Congress executive interview the Minister of Militia and request that district officers commanding regiments be notified that it is undesirable that such displays of militarism be not held on Labour Day.

"In favour of supporting the labour press."

"That whereas education is one of the chief means of uplifting the standard of living and elevating the masses of the toilers, and whereas the better the children of our Dominion are educated the greater the asset to our country."

"Be it resolved, that this Congress go on record that the time is ripe when provision should be made by the Dominion and Provincial legislatures and School Boards to provide the necessary money and create scholarships, so that the child of the toiler whose parents or guardians are unable to provide the necessary funds for such education, to compete for a scholarship, and to obtain the best education possible;

"And be it further resolved, that pressure be brought upon the above legislatures and school boards to provide all necessary school books and appliances out of the public treasure."

"That, whereas marked tendency has asserted itself in the summoning by coroners of jurymen who may be partial to the interests of corporations, where those interests conflict with those of the workers;

"Resolved that this Congress instructs its Provincial Executives to take up the matter with the different attorneys-general in an effort to mitigate this already evident danger."

"That the incoming Executive urge upon the Minister of Labour the necessity of (*a*) the appointment of more fair wage officers, to devote the whole of their time to the administration of the Dominion fair wage schedules. (*b*) To insert the following clause in the fair wage schedule, conditions: If any foremen, workman or labourer employed on any portion of the work covered by the said contract is paid at a less rate than that specified in the foregoing schedule, the Minister shall be entitled at any time or times to deduct from the moneys due or accuring due, or to recover from the Contractor a sum equal to the difference between such lesser wages actually earned by such foreman, workman or labourer, in accordance with his agreement with the Contractor, and the amount which he would have earned had his wages been in accordance with the schedule hereinbefore mentioned, and it shall be optional with the Minister either to retain the said moneys so deducted or recovered for the departments own use or to pay the same over to the workman.

"Whereas, it is understood that in the Province of Quebec there are certain paper making factories which are operated on Sunday, and as this is a direct violation of the Lord's Day Act;

"Be it resolved that the Congress officially investigate the illegality and use the necessary means to have said act of transgression against the Lord's Day discontinued, and the employés thereby enabled to have the one day holiday per week as anticipated by the said Lord's Day Act.

Officers Elected.

The officers elected for the ensuing term were:—

President—Wm. Glockling, of Toronto, Ont.

Vice-President—Gustave Francq, of Montreal, Que.

Secretary-Treasurer—P. M. Draper, Ottawa, Ont.

BRITISH COLUMBIA.

Vice-President, J. C. Watters, Victoria;
Executive Committee—R. A. Stony,

New Westminster; R. P. Pettipiece, Vancouver; H. Kempster, Revelstoke.

ALBERTA.

Vice-President—W. Symons, Lethbridge.

Executive Committee—J. L. Snowdon, Medicine Hat; Donald McNabb, Lethbridge; George Howell, Calgary.

MANITOBA.

Vice-President—R. S. Ward, Winnipeg.

Executive Committee—A. W. Puttee, R. A. Rigg, W. J. Bartlett, Winnipeg.

SASKATCHEWAN.

Vice-President—J. Sommerville, Moose Jaw.

Executive Committee—A. S. Wells, Regina; C. E. Perry, Saskatoon; W. McAllister, Regina.

ONTARIO.

Vice-President—W. Lodge, Ottawa.

Executive Committee—Joseph Marks, London; James Gibbons, Toronto; S. B. Pegg, Fort William.

QUEBEC.

Vice-President—Fred. Robert, Montreal.

Executive Committee—Z. Desperance, J. T. Foster, O. Brunet, Montreal.

NOVA SCOTIA.

Vice-President—John T. Joy, Halifax.

Executive Committee—H. Gregory, Sydney; A. J. Smith, Halifax; W. Watkins, Springhill.

The appointment of the Vice-Presidents and Executive Committees for the Provinces of New Brunswick and Prince Edward Island was left to the Executive Council.

Mr. R. P. Pettipiece, of Vancouver, B.C., was elected as fraternal delegate to the American Federation of Labour convention, which meets in St. Louis, Mo., in November, 1910.

Calgary, Alta., was chosen as the city in which the convention is to be held in 1911.

THE CANADIAN FEDERATION OF LABOUR.—SECOND ANNUAL CONVENTION

THE second annual convention of the Canadian Federation of Labour began in the City of Montreal, Que., on September 13, 1910, and continued for the three following days. On the opening of the convention, an address of welcome was extended by the Honourable J. J. Guerin, Mayor of Montreal, who was presented to the convention by Mr. D. Verdon, president of the National Trades and Labour Council, of Montreal. Mr. James W. Patterson, president of the Federation, and delegate J. A. Langlois, M.P.P., for Quebec, replied to the address.

The Department of Labour for Canada was represented by Victor DuBreuil, Fair Wages Officer, while the Department of Public Works and Labour of the Province of Quebec was represented by L. Guyon, Chief Factory Inspector, and P. J. Jobin and Felix Marois, Factory Inspectors for the District of Quebec. There were also present two fraternal delegates: John Mee and Alf. Bergeron, of the Hotel and Restaurant Employés National Union of Montreal.

The sessions of the Federation were held in the City Council chamber, under the presidency of Mr. J. W. Patterson. Mr. George Mercure, Secretary-Treasurer, was assisted by Mr. John Moffatt, Grand Secretary of the Provincial Workmen's Association of Nova Scotia.

The president announced the formation of committees, as follows: On Ways and Means, on Resolutions, on Audit, on Officers' Reports and on Thanks.

Unions Represented.

The following is a list of the Associations represented, with the number of delegates for each:—

Grand Council of the Provincial Workmen's Association of Nova Scotia, five delegates, including the Grand Master and the Grand Secretary; eight lodges were also represented by one delegate each.
Printing Press Assistants of Feeders, No. 1, Toronto, 1.
Carpenters and Joiners, Ottawa, 2.
Canadian Typographical Union No. 1, Ottawa, 2.
Plasterers' Union, Ottawa, 1.
National Trades and Labour Council, Ottawa, 3.
Bricklayers and Masons, Beauport, 1.
National Workmen's Union, St. Romuald, 1.
Protective and Benevolent Journeymen's National Union, Quebec, 4.
Carpenters and Joiners, Quebec, 1.
Bricklayers and Masons, Quebec, 1.
Machine Boot & Shoe Workers, Quebec, 9.
Tanners & Leather Dressers, Quebec, 1.
Maple Leaf Association, Quebec, 2.
Trades & Labour Council, Quebec, 3.
Brewery employés, Quebec, 1.
Bakers' Union, Quebec, 1....
Granite Cutters, Beebe Junction, 1.
National Trades & Labour Council, Montreal, 3.
Boot & Shoe Workers, No. 2, Montreal, 1.
Canadian Federation of Shoemakers, Montreal, No. 1, 1.
Canadian Federation of Shoemakers, Montreal, No. 2, 3.
Canadian Federation of Shoemakers, Montreal, No. 3, 1.
Canadian Federation of Shoemakers, Montreal, No. 4, 1.
Bricklayers & Masons, Montreal, 2.
Bakers and Confectioners, Montreal, 1.
Coopers' National Union, Montreal, 1.

Making a total of sixty-two delegates, representing thirty-two organizations.

General Executive Report.

The General Executive reported that there was every reason to be satisfied with the progress made and the encouragement received throughout Canada, to continue the work of establishing a strong and progressive labour organization.

The Executive presented the resolutions passed at the last session, to the Ministers of the Government, referring to the following subjects:—

1. Status of foreign organizations.
2. American Immigration Law.
3. Imperial Defence.
4. Immigration.
5. Alien Labour Law.
6. Military Bands.
7. Co-Operative Bill.
8. Marine Laws.
9. Industrial Disputes Act.
10. Ship Building Subsidy.
11. Label on Government Printing.
12. Cartridge Factory Inspection.

The Right Honourable Sir Wilfrid Laurier, the Honourable M. Brodeur and the Honourable W. L. Mackenzie King were present, and the Committee were accorded a good hearing. The Honourable Mr. King, Minister of Labour, and the Honourable Mr. Brodeur, Minister of Marine and Fisheries, replied on behalf of the Government. On 1, 2 and 5, Mr. King stated that he would inquire and bring the matters to the attention of the Government. On Imperial Defence the Government was quite in accord with the spirit of the resolution. The policy of the Government, since defined, carries out the recommendation as to provision being made to build naval ships in Canada. This covers resolution 10, as it provides for subsidizing building docks. No. 6, *rê* Military bands, was, by consent, referred to the Adjutant-General. That officer has since promulgated an order prohibiting any interference with the rights of musicians in military bands. To No. 7, the Minister promised to support a measure, if one could be devised to overcome constitutional objections. The Minister stated that he was favourable to a further extension of the Industrial Disputes Investigation Act. He suggested that the building trades should apply to have its provisions extended to them. The Honourable Mr. Brodeur stated that if any specific case could be cited of a violation of the Marine laws, he would attend to it at once. With regard to No. 12, Mr. King promised to inquire. The following extract is from a letter reporting thereon:—

"The report to the Minister of Militia and Defence states that the Superintendent of the Dominion Arsenal has instructions to take due care that the laws passed for the protection of labour are complied with. No children under the age limit are employed, a medical officer makes a sanitary inspection weekly, and an annual inspection is made by the Director General of Medical Services. Further, the boilers are thoroughly examined and reported on every year by the Government Steamboat Inspector."

The Committee stated that it was well satisfied with the general results of the interview.

During the year the work of adding new locals and increasing the membership has been carried out, to the extent that the means at the disposal of the Federation would admit. The City of Toronto has given the Federation two locals, the Printing Pressmen and the Pressmen's Assistants. It had been hoped to have made further progress westward. Some eighteen locals have been added, and more are in progress of formation.

The Executive recommended that a Special Committee be formed at this Convention to report upon and deal with the question of grouping the following:—

Group No. 1.—National Federation of Shoe Workers and Allied Leather Trades.
Group No. 2.—An extension of the Provincial Workmen's Association (Miners), Nova Scotia, to the miners of the rest of the Dominion.
Group No. 3.—The formation of a Building Trades Group, and making rules for the same.
Group No. 4.—The formation of Printing Trades Federation.

The Executive recommended that a Special Committee be appointed to devise and report on: (1) Ways and Means to increase the fund for organizing purposes; (2) The provision of a reserve or defence fund; (3) providing a Mortuary Benefit, and (4) the payment of salary to officers.

The Executive further recommended that the Standing Committee on Resolutions prepare and present to the Convention resolutions asking for amendments to (1) The Trade Union Act, to provide means for the proper incorporation of national and local trades unions; (2) The Lemieux Act, to change the procedure and personnel of arbitrators; (3) To consider the advisability of having compulsory arbitration; (4) To pass a Co-operative Act; (5) To express the opinion of the Federation on the eight-hour Bill.

It was recommended that the incoming Executive be instructed to take the necessary steps for the publication of an official paper at the earliest date possible.

Secretary-Treasurer's Report.

A detailed statement of the money received and expended by the Secretary-Treasurer, from September 25, 1909, to September 1, 1910, is as follows:—

Revenues.

Per Capita	$ 1,917 49	
Sundry revenues	32 90	
		$ 1,950 39

Expenditures.

Organization	$ 1,338 74	
Voted at last convention	21 50	
Printing	198 50	
Typewriting	34 15	
Supplies	46 00	
Postage	31 20	
Telegrams	9 60	
Express Co	4 20	
Commission	9 20	
Sec.-Treas	200 00	
		$ 1,893 09
Gross Receipts	$ 1,950 39	
Expenditure	1,893 09	
Balance	75.30	
Balance from last year	318 79	
	376 09	
Stock	150 00	
Total	520 09	

Charters Issued.

Printing Press Assistants, Toronto.
Printing Pressmen, Toronto.
Plasterers, Ottawa.
Stonecutters, Montreal.
Stationary Engineers, Montreal.
Stitchers, Quebec.
Carpenters and Joiners, Montreal.
Bricklayers and Masons, Montreal.
Bakers and Confectioners, Montreal.

Charters renewed.

Bricklayers and Masons, Ottawa.
Maple Leaf, Montreal.
Shoemakers, No. 1, Montreal.
Shoemakers, No. 2, Montreal.
Shoemakers, No. 3, Montreal.
Leather Cutters, No. 4, Montreal.
Stationary Engineers, Quebec.

The Committee on Audit reported that they had examined the books of the Secretary-Treasurer and had found them to conform with the above statement.

Report of Committees on Ways and Means.

The Committee on Ways and Means reported as follows:—

1. That the question of increasing the *per capita* tax to 10 cents per member be referred to a referendum of the different Unions affiliated.

2. That the Provincial Workmen's Association, which now pay in from their central body a specified or lump sum of money, be left to their own discretion in this matter.

3. That the locals be asked to discuss the formation of a mortuary fund, and, if favourable to such a fund, that they form one as early as possible, and report to the Executive.

4. That all Unions shall hold a charter under the Federation, and that Unions holding Federation charters must be affiliated with the Trades and Labour Council of their own District.

5. The head government of the organization to be vested in a Federation known as the "Canadian Federation of Labour."

6. The Federation to consist of a president, a vice-president, a secretary-treasurer and experienced members duly elected by each of the locals composing the organization.

7. The officers and members of the Federation in annual session to elect the general officers for the year. Any member of the Federation and any member of affiliated bodies to be eligible to any office in the Federation. All officers to be elected by ballot.

The secretary-treasurer of the Federation shall be paid a salary of not less than $250 per year, and the president shall be paid not less than $200 for the present year. A vice-president shall be elected for each province.

The Special Committee of the leather trade group recommended the formation as soon as possible of a Federation of the Boot and Shoe and Leather Workers throughout this country in compliance with the expressed desire of this Congress.

The Special Committee of the printing trade group reported that after due consideration of the question of forming a Federation of printing trades, this Committee believes the time is not ripe for such a formation. This report was referred to the incoming Executive, with instructions to take action in the matter, if possible.

The Special Committee of the building trades group reported as follows:—

"That the building trades of Canada be federated and shall be known as the Canadian Federated Building Trades, under the jurisdiction of the Canadian Federation of Labour, and shall embrace all trades and callings in connection with building or structural work.

"There shall be appointed in each city or district a general executive, composed of one per cent. of each local union.

"A general executive officer shall be appointed by the Executive of the Canadian Federation of Labour, who shall hold office temporarily until the Federation is working under proper rules.

"The general executive of the Canadian Federation of Labour, acting in conjunction with representatives from the cities of Montreal, Quebec and Ottawa, shall advise and adopt provisions for advance fund, and draft such working rules as may be necessary, and to give effect to the clause."

Resolutions Adopted.

The following is a copy of the more important resolutions adopted by the Convention:—

Trade Federations.

That delegates representing groups of trades be instructed to appoint a committee of each group with a view to the formation of Federations of the different trades. The following groups appointed their special committees: Printing trades, building trades, leather trades, mining trades. The Special Committee of the group of miners then reported as follows:—That in the opinion of this Committee it would be unwise to enter into any active campaign in organizing the Western Coal Miners without a complete knowledge of western sentiment, and in order to obtain such a knowledge the Protective Workmen's Association be recommended to send an agent to the west, and the Canadian Federation of Labourers to do likewise if at all possible.

British Congress.

That the Executive officers be instructed to prepare and forward to the British Central labour bodies a statement of our position in the Trades Union movement in Canada, and ask for their co-operation and also that they be furnished with proper information as to the labour market here.

Explosives.

That the Federal Government be asked to establish a testing station at Ottawa, having control of the class of explosives which are manufactured in Canada, or that some scheme be followed in Canada similar to those so successfully followed in Great Britian. If such a station is established in Ottawa, it is only fair that a portion of the work of analysing and testing explosives such as are used in Nova Scotia mines, be carried on by the Technical College at Halifax, and that class of work done by the Technical College have the same force and effect as if done in Ottawa

Incorporation.

That the Federal Government be requested to pass a law similar to that of Great Britain, by which any Trades Union can be incorporated if it so desires

Industrial Disputes Investigation Act.

That recommendation be made to the Federal Government to enforce the "Industrial Disputes Act" as it stands, and that this Convention is of opinion that it has rendered great services to the country, but that the incoming Executive be instructed to study it very carefully during the coming year and present amendments to it if found necessary

Compulsory Arbitration

That the discussion of a system of compulsory arbitration is not opportune at the present time.

Co-operation.

That the Bill concerning Co-operation be endorsed.

Quebec Technical School Board.

That the Quebec Government be requested to appoint a representative of Organized Labour in Quebec on the Technical School Board.

Sunday Observance.

That the Quebec Government be asked to enforce the Sunday Observance Law in the bakeries as well as in all other industries.

Constitution.

That for future conventions all motions or amendments to the Constitution be forwarded to the General Secretary not later than the fifteenth of July, said motions or amendments shall then be printed and sent to each Union or Council for their consideration.

Union Label.

That the National Union Label be advertised throughout Canada.

Hours of Labour.

That this Convention express approval of the principles contained in the Bill known as the "Hours of Labour on Public Works" and hope that the effect of the investigation now proceeding by a special committee of the House of Commons will result in reporting a Bill to Parliament to ensure an eight-hour day on all public works.

Children's Aid.

That this Convention endorse and support the work being done by the Children's Aid Association in combatting the cocaine evil, and ask the Government to take action against that traffic in conformity with the request from the Children's Aid Association.

International Organizations.

That the question of dealing with the status of foreign organizations be referred back to the Executive for further presentation to the Government.

Official Journal.

That the incoming Executive be instructed to take the necessary steps for the publication of an official journal of the Canadian Federation of Labour.

Thanks were voted to the Trades and Labour Council of Montreal, to His Worship the Mayor and the City Council, to the Press, to the public of Montreal, and to Victor DuBreuil, of the *Labour Gazette*, to L. Guyon, P. J. Jobin and Felix Marois for services rendered during the Convention.

Other Proceedings.

During the Convention, Mr. L. Guyon, Chief Factory Inspector of the Province of Quebec, invited the delegates to visit the Museum of Safety Appliances of his Department. When the delegates visited this establishment, Mr. Guyon gave them a full demonstration of the application of the appliances in the different industries.

The Trades and Labour Council gave the delegates a car ride around the mountain and throughout the city, and a smoking concert.

Officers.

The following officers were elected for the ensuing year:—

President—J. G. Tapp, Ont.

Vice-President—J. B. Saint-Laurent, Quebec, Que.

Secretary - Treasurer—J. A. Mercier, Quebec, Que.

Mr. Tapp was also elected Chief Organizer.

Members of Executive.

S. B. McNeill, Sydney, N.S.; J. W. Patterson, Ottawa, Ont.; Delphis Verdon, Montreal, Que.

Vice-Presidents by Provinces.

Nova Scotia—Fergus Byrne.
Quebec—Gilbert Leclerc.
Ontario—J. Tampanel.

The nominations for the other provinces were left to the Executive.

Montreal, Que., was selected as the place of meeting in 1911.

PROVINCIAL WORKMEN'S ASSOCIATION OF NOVA SCOTIA—THIRTY-SECOND ANNUAL MEETING OF GRAND COUNCIL.

THE Grand Council of the Provincial Workmen's Association held a session of several days, early in September in the Board of Trade rooms, Halifax. The various lodges were well represented, and some important business was discussed and passed.

A brief statement of business transacted at the meeting is as follows:—

Twenty-two lodges were represented

by upwards of sixty delegates, showing a membership of close on five thousand, with ten Grand Officers formed the Grand Council. The suggestions made by the several lodges were as follows:—

Roberts' Lodge, Mechanics, Sydney Mines.—Nine-hour day for shop mechanics and no reduction in the day-rate.

Patriot Lodge, Miners, New Waterford.—First Aid to the Injured, better conveyance of injured men out of the mine and ambulance.

Unity Lodge.—Voters on Checkweighman's Election to have time-service qualification.

Progress Lodge.—

1. That the Council discuss the present high cost of living, and that the Legislative Committee bring the matter to the attention of the Government.

2. That the Local Government be requested to increase its annual contribution to the Relief Fund.

Pretoria Lodge.—

1. That Travelling Roads be not less than six by six, and kept in good condition.

2. That Riding Raikes be brought more generally into use.

The Grand Council recommended as follows:—

1. That each Colliery district have a station where men can be trained to the use of Rescue Apparatus and Fire-fighting Appliances.

2. That all explosives used in a coal mine be tested at Ottawa, and at Halifax.

Discussion on the nine-hour day for shop mechanics led to a motion asking the Local Government, through the Provincial Workmen's Association Legislative Committee, to inaugurate a nine-hour day, and instructing the different lodges to take the matter up with their mine managers before interviewing the Government. The delegates of Patriot Lodge were informed that the colliery physicians were ready during the winter seasons to conduct classes where miners are taught, how to give "First Aid to the Injured." Hand ambulances are provided at each colliery, and a horse ambulance for conveyance to the hospital will be given to the New Waterford district, when they apply for it.

After considerable discussion on the voters' list for checkweighman, it was agreed that the mining law thoroughly covered checkweighman's election, and it was better not to attempt to amend a law that was now very good.

High Cost of Living.

The Grand Council learning that Professor Shortt was in the City of Halifax, invited him to address the members and other citizens of Halifax who cared to attend, on "The High Cost of Living." Professor Shortt addressed the Council on the "Cost of Living," and pointed out many of the influences that tend to increase and decrease the cost of living. The Council tendered Professor Shortt a vote of thanks for his ready response to their invitation.

Relief Funds.

The Legislative Committee was instructed to wait upon the Local Government and urge upon it the necessity of increasing its contributions to the Relief Fund. A large portion of the miners of Cape Breton, had doubled their contribution during the year, the Dominion Coal Company had done likewise and the Local Government being the third contributor ought also to increase the amount given to the fund, so that higher benefits might be given to disabled workmen.

Travelling Roads and Riding Raikes.

A Committee was appointed by the Council who interviewed the Honourable Commissioner of Mines, and the Deputy Commissioner of Mines, upon the matter of travelling roads and riding raikes. Messers Chisholm & Donkin stated that they would instruct the Deputy Inspectors of the different colliery districts, to take the matter up with the employer and employés of each colliery, and have them discussed at an early date. If necessary, legislation will be framed to meet the conditions.

The Committee also discussed the providing of training stations for workingmen. These stations were to be equipped with rescue apparatus in case of serious mine accidents, and with other appliances necessary for fire-fighting in a coal mine. The Honourable Commissioner and the Deputy Commissioner agreed to have such stations in each colliery district, and to ask the co-operation of the workingmen of the different districts in their efforts to have trained men for serious mine accidents.

Resolutions.

The following resolution was passed by the Grand Council:—

Resolved, that the present Commission now investigating the matter of explosives ask the Federal Government to establish a Testing Station at Ottawa, having control of all classes of explosives, which had been manufactured in the country, or that some practical plan of testing explosives be followed in Canada as has been so successfully followed in Great Britain.

If such a department is established at Ottawa, it seems only fair, that a portion of the work of analysing and testing explosives such as are used in the coal mines and other mines and works of Nova Scotia and New Brunswick, be done by the Technical College of Halifax, and that this class of work done by the Technical College of Halifax, have the same force and effect as if done at Ottawa.

Notes.

The Association is reported in good financial condition, and looks forward to a gain in membership during the coming year.

An invitation having been previously extended to the members of Grand Council to hear the Bishop of London speak on "The problems of the working man" was accepted, a large number of delegates attended St. Paul's Church and listened with much interest to an able, interesting and instructive address by the Bishop of London.

The Grand Council sent five delegates in addition to nine others appointed by the different lodges, to the Convention of the Canadian Federation of Labour, which began its work in Montreal on September 13th.

Officers.

Officers were elected as follows:—
Grand Master—S. B. McNeil.
Grand Association Master—A. B. McIsaac.
Grand Secretary—John Moffatt.
Grand Treasurer—Ronald Nicholson.
Grand Chaplain—Arthur Davis.
Grand Guardian—John Cameron.
Inside Watch—Vincent Hall.
Outside Watch—Joseph Cubby.
Past Grand Master—Mark Connors.
Sub-Secretary—Thos. Hale.

Halifax was selected as the next place of meeting.

ROYAL COMMISSION ON INDUSTRIAL TRAINING AND TECHNICAL EDUCATION—STATEMENT OF PROCEEDINGS DURING SEPTEMBER.

ON account of the large number of towns and small cities to be visited in Ontario, the Royal Commission on Industrial Training and Technical Education, divided into two sections during a portion of the month of September, the western section, comprising Rev. Dr. Bryce and Mr. Simpson, covering the following places:

St. Catharines	Aug. 30
Paris	Aug. 31
Collingwood	Sept. 6
Woodstock	Sept. 12
Goderich	Sept. 13
Listowel	Sept. 14
Owen Sound	Sept. 15

The eastern section, comprising the Hon. J. N. Armstrong and Mr. Forsyth, visited the following towns:—

Barrie	Sept. 9
Orillia	Sept. 10
Lindsay	Sept. 12
Oshawa	Sept. 13
Cobourg	Sept. 14
Cornwall	Sept. 15
Smith's Falls	Sept. 16

The Commission then united and covered the following cities:

Montreal	Sept. 19–21
Macdonald College, Ste. Anne de Bellevue	Sept. 20
Quebec	Sept. 22–23

The Commission then proceeded to Ottawa for September 26 to 27; to Brockville for the 28th, and to Kingston, 29 to 30.

In the smaller towns in Ontario the interest was thoroughly sustained, and much valuable evidence was obtained from local educationists, manufacturers and workmen. The men who have built up these industrial centres were called, and gave interesting accounts of the origin and development of industries, whose names are now "familiar in our mouths as household words."

In the larger Ontario cities the Commission was received very heartily, and the larger problems of labour—the lack of skilled workmen and the need of industrial training and technical education, were presented and emphasized.

The entry of the Commission into Quebec Province was signalized by a series of functions which betokened a decided recognition by leading men and organizations of the importance of the work of the Commission. In Montreal, the City Council Chamber was placed at the disposal of the Commission, and representatives of McGill and Laval Universities, the Board of Trade, the Chambre du Commerce, the Architects' Association, the Builders' Exchange, the Local Council of Women and other interests were represented, and offered cordial co-operation on the return visit of the Commission in January or February, after the Western tour. The Chambre du Commerce entertained the Commission at luncheon, when the chairman and Rev. Dr. Bryce spoke.

In the City of Quebec the reception of the Commission was, if possible, more cordial than at any other point, Sir Lomer Gouin entertaining the Commission at a private dinner, attended by five of his Cabinet Ministers, His Worship Mayor Drouin, and Mr. Picard, President of the Technical School now being established in Quebec City by the Provincial Government. A public session of the Commission was held in the City Hall, and a large amount of testimony was taken from leading educationalists and manufacturers. His Excellency Earl Grey honoured the Commission with his presence at this session, and on leaving the hall expressed his hearty appreciation of the important work being done by the Commission.

During the month of October the following cities in Ontario are being visited:

Belleville	Oct. 1
Peterborough	Oct. 3
Toronto	Oct. 4–5
Hamilton	Oct. 6–7
Niagara Falls	Oct. 8
Brantford	Oct. 10
Galt	Oct. 11
Guelph	Oct. 12–13
Berlin	Oct. 14
Stratford	Oct. 15
London	Oct. 17–18
St. Thomas	Oct. 19
Chatham	Oct. 20
Windsor and Walkerville	Oct. 21–22

From Windsor the Commission will proceed to the Western Provinces, and at the conclusion of the Western tour will return to Ottawa, Montreal, Quebec City and Quebec Province in order to receive testimony at greater length than was permissible on the first visit. Meantime, local committees are arranging lists of witnesses representing educational institutions, the various industries and workers, who will be called by the Commission.

Itinerary for Western Provinces.

The following itinerary has been arranged for Western Canada:—

Port Arthur	Nov.	1
Fort William	Nov.	2
Winnipeg	Nov.	3
Winnipeg	Nov.	4
Winnipeg	Nov.	5
Winnipeg	Nov.	7
Portage la Prairie	Nov.	8
Brandon	Nov.	9
Moose Jaw	Nov.	10
Regina	Nov.	11
Saskatoon	Nov.	14
Prince Albert	Nov.	15
Edmonton and Strathcona	Nov.	17–18
Calgary	Nov.	19–21

At this point the Commission will part into two sections to be distributed as follows:—

Section A:		
Lethbridge	Nov.	22
Medicine Hat	Nov.	23
Vancouver and New Westminster	Nov.	26–29
Section B:		
Nelson	Nov.	22
Fernie	Nov.	23
Vernon	Nov.	27

The Commission writes again at this point, proceeding as follows:—

Vancouver	Nov.	29
Nanaimo	Dec.	1
Victoria	Dec.	2–4

The Commission will then proceed to western points in the United States.

ROYAL COMMISSION ON TECHNICAL EDUCATION APPOINTED BY MANITOBA GOVERNMENT.

UNDER date of September 17, 1910, announcement was made of the appointment by the Government of Manitoba, of a Royal Commission to investigate and report on the advisability of the establishment by the Government of a system of technical education:

The Commissioners named are as follows:—

To Hon. G. R. Coldwell, B.A., K.C.; Daniel McIntyre, M.A.; G. A. Lister; W. J. Black, B.S.A.; F. C. Chambers; J. Yuill; R. S. Ward, R. A. Rigg; Rev. J. S. Woodsworth, B.A.; W. J. Bartlett; Isaac F. Hafenbrak; W. W. Miller; George Seal; H. J. Irwin; E. Fulcher; W. H. Mead; Henry Sampson; R. J. Buchanan; R. Fletcher, B.A.; Mrs. A. W. Puttee; Miss A. B. Juniper; Melbourne Christie.

The scope of the investigation is defined as follows:—

(*a*) The needs of the people of the Province engaged in industrial callings other than agriculture, by way of vocational or industrial training;

(*b*) The industries of the Province with a view to finding the needs of each in so far as these needs can be served by technical or vocational training;

(*c*) The extent to which educational agencies already in existence serve as a preparation for the industrial and commercial activities of the country;

(*d*) The modifications in existing agencies that may be necessary to make them serve more completely the purpose of vocational training;

(*e*) The extent to which it may be necessary to organize new educational agencies aiming only at vocational training;

(*f*) How far it may be found advisable to provide technical education for young people still in the schools, and how far similar provision should be made in the way of evening technical schools for people engaged in industrial pursuits during the day;

(*g*) Such other matters and things incident to, connected with or arising out of all and singular the premises that in the opinion of the Commissioners it may be deemed desirable to investigate and inquire into;

(*h*) To recommend to the Government of the Province a system or plan for establishing such technical or industrial schools or colleges as the circumstances of the Province will admit.

THE CANADIAN MANUFACTURERS ASSOCIATION—THIRTY-NINTH ANNUAL CONVENTION.

THE thirty-ninth annual convention of the Canadian Manufacturers' Association was held at Vancouver, B.C., September 20-23. Over 300 delegates were present from different sections of Canada and a full discussion of several subjects of importance to industry and labour was held.

Presidential Address.

The address of the retiring President, Mr. John Hendry, of Vancouver, B.C. was delivered during the opening day of the Convention. Mr. Hendry in commencing his address noted that the present was the first occasion in its thirty-nine years of existence that the Association had met west of Winnipeg. Some interesting statistics with reference to industrial developments in British Columbia were given in this connection. A strong endorsement of the British Preferential Tariff followed, and a warning was thrown out against the effects which a reciprocity treaty with the United States might produce. The President then described some of the activities and recommendations of the various committees of the Association. Special reference was made to the subject of the transportation needs of the country, the advance in cost of living, the conservation problem and the general activities of the Association.

Financial Statement.

The Treasurer's report showed receipts from all quarters amounting to $53,687, including surplus assets handed over from last year amounting to $16,000. The amount received in membership fees was $32,131, compared with $30,447 last year. The balance on hand is $21,690.

Membership.

Contrary to expectations an increase in the membership of nearly 100 more than was reported in 1909 took palce during the past year. It will be remembered that an increase of 171 members was reported in 1909, as against the comparatively small increase of eighty-five and twenty-three in 1907 and 1908 respectively. The net gain for the year ended July 31, 1910 was 252. The increase in membership and resulting revenue is shown as follows:—

202 on the $10 basis	$2,020
33 on the $15 basis	495
17 on the $25 basis	475
	$2,940

The following table affords a comparison of the membership by Provinces on August 1, 1909, and August 1, 1910:—

	1909				1910			
	$10	$15	$25	Tl.	$10	$15	$25	Tl.
Ontario	1057	162	225	1444	1180	185	237	1602
Quebec	370	56	121	547	446	62	127	635
Nova Scotia	68	4	14	86	70	4	14	88
Br. Columbia	80	10	21	11	80	12	21	113
New Brunswick	34	5	9	48	35	6	9	50
Manitoba	86	4	8	98	89	5	8	102
Alberta & Sask.	16		3	19	14		2	16
P. E. Island	3			3	2			2
	1714	241	401	2356	1916	274	418	2608

A similar comparison of the membership on August 1, 1909, and August 1, 1910, by branches instead of by Provinces is presented in the next table.

	1909				1910			
	$10	$15	$25	Tl.	$10	$15	$25	Tl.
Toronto	450	56	93	599	494	72	95	661
Montreal	281	39	95	415	361	41	98	500
Quebec City	47	5	11	63	49	5	12	66
Nova Scotia	68	4	14	86	70	4	14	88
Manitoba	86	4	8	98	89	5	8	102
Br. Columbia	80	10	21	111	80	12	21	113
Niagara	36	2	6	44	43	5	7	55
General	666	121	153	940	730	130	163	1023
	1714	241	401	2356	1916	274	418	2608

It will be observed from the foregoing that the most extensive gains were in the $10 class, in the Toronto, Montreal and Niagara district branches. Practically all of the membership applications are the result of personal solicitation by some member of the staff. A new branch, namely, at Hamilton, and three new trade sections, namely, the Process Engravers' Section, the Sheet Metal Building Material Section and the Automobile Section, were successfully inaugurated during the year. The Manufacturing Grocers' Section changed its name to the "Food Products Section."

The tendency of firms in the same line of trade to consolidate offered a serious problem to the Association. For example, one consolidation comprising thirteen firms converted a total revenue of $325 to a revenue of $35. An increase in the scale of fees is being discussed.

Reports of Standing Committees.

The following is a brief résumé of the reports of the various standing committees of the Association as considered and adopted at the annual meeting:—

The "Industrial Canada" Committee.—The Association's paper has developed both in size and circulation during the past year. The tenth volume contains a total of 1,240 pages, as compared with 1,154 pages in the preceding volume, in spite of the fact that the previous volume contained the Canadian Trade Index which accounted for 300 pages. The average regular issue during the past year has contained 100, against eighty-four pages last year, and seventy-two in 1909-08. Meanwhile circulation increased to 3,400, being 400 more than a year ago. Earnings were $19,404, and cost of publishing $14,427, the profits being over $1,000 greater than in the previous year.

The Committee entrusted with the management of *Industrial Canada* also took up the subject of a trade directory, including all the manufacturers in Canada. The volume, which contains 550 pages, has recently made its appearance, and, notwithstanding the expenses of publication, is expected to bring a good profit to the Association.

The Railway and Transportation Committee.—Among the matters of importance dealt with by this Committee were the following: General freight rates; international rates; ocean rates; lumber rates; freight classifications; car-load minimums; express rates; express classification; water carriage of goods; the carriage of inflammable articles; telegraph rates; bill of lading; siding agreements; the Canada Australia steamship service; interswitching; parcel post; etc. The Committee made many suggestions in connection with the above and other topics, some of which would involve new regulations or new legislation. In addition to these general matters the Committee advised throughout the year in many matters of an individual character. Several articles of an educational nature were published by the department in *Industrial Canada.*

The Tariff Committee.—The Honourable the Minister of Finance having announced that it was not the intention of the Government to propose any alterations in the tariff, the work of this Committee during the past year related largely to the administration of the present Act, the following being the principal matters under consideration:—the operation of the British Preferential Traiff; the Franco-Canadian Convention of 1909; the agreements with Germany, Belgium, the Netherlands and Italy; and trade relations with the United States. The appointment by the Honourable the Minister of Customs of a special customs officer to investigate the fraudulent entry of foreign goods under the British Preferential Tariff was favourably noted by the Committee.

The Parliamentary Committee.—The most important development of the year, carried out under the auspices of this Committee, was the organization of a legal department, as suggested at the Hamilton convention last year. The department has worked out its plan under the direction of the Parliamentary Committee, confining itself for the time being to supplying information to members as to actual legislation and systems of assessment, corporation law, liens, contracts, insolvent estates, etc. In April last, Mr. F. W. Wegenast, a member of the Ontario Bar, was appointed secretary to the department. The work of the Committee and of the department during the past year was set forth under the following headings:—Company Incorporation and Company Licensing; Bulk Sales Acts; Workmen's Compensation; Supply of Labour; Dominion Legislation during the year; The Eight-Hour Day Bill; Nova Scotia Labour Commission; Immigration Regulations; Quebec Legislation; The Ontario Assessment Act and Stationary Engineers' Bill.

The Insurance Committee.—In no previous year was the volume of business transacted by this Committee equal to that of the past year. A considerable addition to the strength of the expert and clerical staff was made. The fixed allowance of $1,000 per annum was increased by $500 and it is recommended that the increase be continued for another year. The work of the Mutual Insurance Companies, organized under the ausipces of the Association, was outlined. Other subjects dealt with in the Committee's report were the adjustment of fire losses

the Dominion Insurance Act of 1910, the All-Canada Insurance Federation, the British Columbia Fire Insurance Commission and the continued development in the introduction of automatic sprinklers. Following the disaster which occurred in June at the *Herald* building the Committee had a circular letter addressed to all members urging the close inspection of water tanks, especially those which had been erected for some time on the roof of old buildings. Members requiring such inspection were offered the services of the Consulting Structural Engineer of the department, Mr. W. Fry Scott, at a reasonable cost. As a result of his investigations in this connection Mr. Scott reached the following conclusions:—

"First. The precedents established in the building of water tank towers are bad.

"Second. The cause is due in part to insufficient inspection,because in no case has any of the towers conformed to the specifications laid down by the National Board of Underwriters, the Canadian Fire Underwriters' Association, or other recognized insurance bodies.

"Third. The cause is also due to an evident lack of knowledge of correct practise in the new methods of construction that have developed from the introduction of steel.

"Fourth. From these two causes numerous bad details have resulted. any one of which may be a cause for failure."

Fourteen tanks and towers are now undergoing partial reconstruction, under plans laid down by Mr. Scott, but your Committee is convinced that many members of the Association have ignored consideration of the subject.

The Commercial Intelligence Committee. This Committee reported that as a result of its recommendation a Trade Commissionership for New Zealand was created by the Honourable the Minister of Trade and Commerce and the appointment of a Commissioner made. Consideration by the Government of the creation of a Commissionership for South America was urged. The Committee expressed satisfaction at the improvements made during the past year with the weekly Bulletin issued by the Department of Trade and Commerce, the following statement being made:—

In a general way it might be stated that the weekly report is better printed, more logically arranged and in every respect more attractive than it was a few years ago. It has steadily increased in size according as the service itself has grown. Its news items are much more up-to-date than formerly, and business men have learned to place more reliance upon them. Wherever it circulates to-day it is welcomed as a valuable adjunct to business, and it is to be hoped that the Department will continue to develop it along the lines so ably marked out by the Deputy Minister, Mr. O'Hara."

The Association's Commercial Information Department has been more than ordinarily useful to members in the past year. Foreign trade inquiries to the number of 863 were published in *Industrial Canada* and about 1,000 advice notes sent to the members, arising out of these inquiries. The Translation Bureau has also been more generally patronized than last year, eighty-nine firms having made use of it. Credit reports on foreign firms to the number of fifty-two were supplied to twenty-one members. The recommendations of the Committee of the West Indian Trade Commission are outlined. A uniform civic holiday throughout Canada is urged. Other topics dealt with by the Committee were the organization of a permanent exhibition of Canadian products in London, England, the census of 1911, the working of immigration agencies in Great Britian, the *Made in Canada* campaign and Canadian patent regulations.

Report of Technical Education Committee.—This Committee recorded its satisfaction with the successful issue of its "six years of careful planning, persistent effort and constant agitation" directed towards having the Dominion Government inaugurate a national movement for a standard system of technical education in Canada. The report contained a summary of the memorial presented to the Government in March, 1906. The action of the Honourable the Minister of Labour was commended in appointing the Commission now engaged in the work of inquiring "into the needs and present equipment of our Dominion of Canada respecting industrial training and technical education and into the systems and methods of technical instruction obtaining in other countries."

The Committee is preparing a general statement on behalf of the manufacturers

of Canada for presentation to the Commission and every member of the Association is urged to facilitate the inquiry to the best of his ability. It was pointed out that the Committee had made no recommendation as to the personnel of the Commission, and pleasure was expressed that in the appointment of the Secretary of the Association consideration was given solely to his qualifications for the work and a recognition of the valuable services of the Association in educating public opinion to the importance of this great question. Pending the inquiry of the Commission, no further action, along the lines of the different proposals discussed last year, will be taken.

Other Resolutions.

In addition to the endorsation of the above recommendations resolutions were adopted at the closing session of the Convention in the following matters:—

Insurance.

Resolved, that having regard to the important decisions affecting insurance matters, which it is expected will be handed down by the Courts during the coming year, and having regard also to the growing importance of the question of the legality of the various insurance associations, that this be an instruction to the Parliamentary and Insurance Committees to take such steps and secure such information as will enable either or both of these committees to report to the Executive Council as to the desirability and feasibility of bringing the important question of the legality of the insurance associations to a final decision.

Trade with Australia.

Whereas it is probable that changes may be made before long in the tariff of Australia.

Resolved, that in the interests of this Association, a special effort should be made by our Government to arrange for an interchange of commodities between Canada and Australia on a preferentail basis of customs duties.

The Tariff.

That the matter of carrying on an educational campaign with regard to the tariff be left to the discretion of the Tariff Committee.

The Colonial Conference.

Resolved, that the representatives of the Dominion of Canada at the forthcoming conference be requested to urge the desirability of taking immediate steps to bring about reciprocal preferential trade within the Empire, believing that thereby the bonds of union will be strengthened and the British Empire largely freed from dependence on foreign countries for food and other supplies.

The Companies' Act.

Whereas, there happens to be uncertainty as to whether charters for manufacturing companies should be issued by the Federal Government at Ottawa or the Provincial Governments of the various Provinces:

And whereas, uncertainty exists as to the extent of the powers granted by the Provinces and the Dominion respectively to such companies;

And whereas, various vexatious restrictions and conditions are at present imposed upon the exercise of the powers of companies under charters, both Dominion and Provincial;

Therefore, be it resolved, that the attention of the Federal and the Provincial Governments be drawn to the unsatisfactory state of the present law, and that a recommendation be made that steps should be taken to place the administration of the law governing the incorporation and control of companies throughout the whole Dominion upon a more uniform and reasonable basis;

And be it further resolved: that copies of this resolution be forwarded to the Premier, the Secretary of State and the Minister of Justice of Canada, and the Premiers, Provincial Secretaries and Attorneys-General of the different Provinces.

Officers.

Officers were elected as follows:—

President, W. H. Rowley, Hull, Que.
Vice-President, Nathaniel Curry, Montreal.

Provincial Vice-Presidents, T. B. Rogers British Columbia; S. N. Dougal, Quebec; J. P. Edwards, Nova Scotia; T. R. Deacon, Manitoba; T. S. Sims, New Brunswick; Hon. S. L. Haszard, Prince Edward Island; W. H. Clarke, Alberta and Saskatchewan.

Treasurer, George Booth.

Chairmen of standing committees; Parliamentary, Atwell Fleming, Toronto; commercial intelligence, S. L. Chapman, Toronto, reception and membership, J. A. McMahon, Hamilton; technical education, Geo. A. Howell, Toronto; *Industrial Canada*, R. J. Young, Montreal; tariff, T. A. Russell, Toronto; railway transportation, Harry Bertram, Dundas; representative Eastern and Central Canada Manufacturers' Mutual Insurance Company, G. A. Murray, Toronto; auditor, Wilton G. Eddie. Chairman of insurance committee to be appointed.

Notes.

Following the close of the Convention a visit was paid to Victoria, B.C. The return of the eastern delegates was made by special excursion and an opportunity taken to visit leading industrial centres en route, including Edmonton, Alta., Saskatoon, Sask., Winnipeg, Man., etc., at each of which formal receptions were tendered the delegates.

At the annual banquet of the Association held on the closing day of the Convention addresses were delivered by the President-elect, Mr. Rowley, by the Honourable the Premier of British Columbia, by Mr. R. J. Young and others.

PROFIT SHARING AND LAND INVESTMENT ARRANGEMENT FOR EMPLOYÉS OF THE WATTSBURG LUMBER COMPANY OF WATTSBURG, B.C.

AS a means of establishing a feeling of mutual interest and co-operation between itself and its employés, as well as of securing a permanent supply of white labour and in this way offering a solution of the "yellow labour" problem, the Wattsburg Lumber Company, which has its head office at Wattsburg, B.C., has recently announced a noteworthy arrangement with its employés. The arrangement contemplates the distribution of a certain number of shares of its capital stock among its employés, amounting virtually to a system of profit-sharing, and a plan of land distribution whereby an employé will be able to become the owner of his own home, including an area of productive real estate. The latter plan is described by Mr. A. E. Watts, president of the Company, in a statement which he has kindly furnished to the Department, in the following terms:

Land Purchase Arrangement.

"The Wattsburg Lumber Company, Limited, of Wattsburg, B.C., is irrigating several sections of land at Wattsburg and dividing it into small farms for employés who desire to make permanent homes. Lumber and materials for building houses, barns, &c., will be supplied at wholesale prices on time. Any employé can in this way become a land owner without capital, as easy terms will be given for payment within reasonable length of time, from one to twenty years, on conditions that eight per cent. interest, per annum, is paid and a deposit of five per cent. made on the purchase price of land and buildings.

"It has already been proved by years of experiments that from $500 to $1,000 worth of produce can be grown on land under irrigation. With a small piece of land under cultivation a man can raise with very little labour, enough to support a family. With a free range for cattle on the adjoining hills it is possible for one, by keeping a cow, a few pigs, poultry, &c., to become practically independent in a few years, if he will pay attention to mixed farming, which, with the aid of irrigation, ensures a crop that will pay.

"Small fruits can be grown in abundance, for which there is a good market. Vegetables for pickle making also make a profitable crop and the Company will undertake to purchase all surplus produce that can be grown in that line at the highest market price, and will provide canning, preserving and pickling works for that purpose, so that no grower need lose any part of his crop."

Profit Sharing with Employés.

As a further encouragement to white labour, so that the Company can dispense with colored labour, shares will be given to employés upon the face value of which there has been paid up three-fourths of the amount, leaving one-fourth to be paid by the holder. Profits will be divided on the same basis as if the shares were fully paid up, and part of the profits can thus go to pay for balance of the shares. Thus an employé can become the possessor of shares and a partner in the business without investing capital. It is not intended to allow any person other than those employed in the business to become shareholders, and as a safe-guard against the shares being offered for sale to the public, they will only be transferable from one shareholder to another. Any steady, industrious, white employé will be given share certificates upon application in writing; the value and amount to be determined by his character and conduct for the six months prior to his application.

The impression prevails that the milling business is a temporary or tansitory occupation. In this case, however, the Company controls sufficient timber to keep its mills in operation fifty years, and its other industries, such as sash and door works, wood pipe works, &c., may be carried on continuously.

Whether trade be good or bad, the Company undertakes that every effort will be made to provide those who desire to make permanent homes with steady employment. The shares mentioned will be worth more than their face value as there will be no watered stock. The value of the Company's property exceeds three-quarters of a million dollars and shares will only be issued for $500,000.

VOLUNTARY CONCILIATION AND ARBITRATION IN GREAT BRITAIN.*

GREAT success in the prevention of strikes and lockouts has been achieved in Great Britain through methods of voluntary conciliation. A Report has recently been issued by the Labour Department of the British Board of Trade describing these methods. A similar report was published three years ago, but the extensive developments which have since taken place have rendered necessary a second edition. There are at the present time 262 permanent Boards and Joint Committees known to be in existence, as well as a number of arrangements providing for conciliatory means in dealing with industrial disputes. It is estimated that nearly two million workpeople are covered by all these agencies for conciliation. There are also fourteen District Boards not confined to any particular trade, and two Boards restricted to questions affecting employés of co-operative societies.

In 1908, a system of conciliation and arbitration was established on all the principal railways of the United Kingdom, in accordance with an arrangement which had been effected at the Board of Trade. The principles of this system have since been adopted by the London County Council and its tramway workers. In the shipbuilding industry the machinery of conciliation was placed on a national basis, having been only of a local character before 1909. Additional Boards were formed under the national schemes of conciliation in the building trades, covering bricklayers, masons, joiners, plasterers, and, subject to certain conditions, builders' labourers. Conciliation Boards were also established in the printing and

*Second Report on Rules of Voluntary Conciliation and Arbitration Boards and Joint Committees. London, Wyman & Sons, 1910.

pottery trades, the fishing industry at Hull, the brass trades at Birmingham, and for iron founders on the North-east Coast and in Lancashire.

The value of Conciliation Boards lies in their ability to prevent stoppages of work, rather than in their power to settle strikes or lockouts. In this connection, it is stated that of the 7,508 cases settled by them in the ten years 1900–1909, only 104, or about one per cent. were preceded by a stoppage of work.

Ample provision to prevent a deadlock, where the parties are equally divided, has been adopted by 153 Boards and Committees, by reference either to (1) an arbitrator appointed by the Board of Trade; or (2) a permanent neutral chairman, arbitrator or umpire; or (3) an arbitrator or umpire appointed *ad hoc*; or (4) three arbitrators with decision by majority. In eighty-one other cases full machinery for the settlement of disputes is provided, but can only be put into operation by the mutual consent of the parties. In twenty-eight cases, including eleven boards and joint committees for which no formal rules have been drawn up, no provision has been made for preventing a deadlock.

The functions of the conciliation boards vary considerably in the different industries. In coal mining their principal function is the regulation of the general level of wages, effected for the most part by percentage additions to or deductions from the rates prevailing in some special year, taken as the 'standard.' Practically every coalfield in Great Britain is stated to have some conciliatory agency, the first one having been established in Durham County, in 1872. In the iron and steel trades the wages for the most part are regulated by sliding scales, under which the rate per ton paid to the workmen rises or falls with the advances or reductions in the actual selling price of the article manufactured. In this industry, the work of the conciliation boards has had to do with amendments in the sliding scale, the fixing of rates for special classes of work, and alterations in the methods of working. In recent years, however, the cases before the boards have diminished, owing to the establishment, by previous decisions, of general principles governing particular cases, and to the withdrawal of untenable cases by representatives of the operatives on the boards.

In the engineering trades, grievances which cannot be adjusted by the employers and workpeople immediately concerned, are referred to a local conference of Employers' and Workpeoples' Association, and from such conference appeal may be made to a central conference between the executive board of the Employers' Federation and the central authority of the trade unions signatory to the agreement of 1898. In the shipbuilding trades, up to 1909, the work of the permanent boards and committees was purely local, and was confined almost entirely to questions of the demarcation of work between the various trades. Since March 9, 1909, a national agreement has been in force, providing for the settlement of questions of wages and other matters by conferences, as in the engineering trades.

In the spinning branch of the cotton industry, disputes are dealt with in accordance with the terms of the Brooklands Agreement, signed in 1893, by which local disputes are first considered by the secretaries of the local employers' and operatives' organizations, or by a joint committee of these organizations appointed *ad hoc*. Failing settlement, the disputes are then referred to a joint committee of the Employers' Federation and the Operatives' Amalgamations, and no stoppage of work is allowed until this procedure has been carried out. It is further provided that no general change in wages shall be sought by either side until at least two years after the previous change, that a month's notice shall be given of any proposed change, and that all changes shall be of five per cent. upon the current standard wages. During 1909, 251 cases were settled locally by this agreement, and twenty-one by the Joint Committee in Manchester.

In the cotton weaving branch, disputes are considered in their first stages by a Joint Committee for North and North-east Lancashire, but the results of the discussions of the Committee must be reported by each side to their constitu-

ents. A new agreement was effected in December, 1909, similar to the one in the spinning industry, but an important provision that in cases of stoppage of work, meetings of the representatives of the signatories shall be held at intervals of four weeks in Manchester until the dispute has been settled.

The building trades were among the earliest to adopt permanent machinery for conciliation and arbitration, a Board having been formed at Wolverhampton, in 1864, which served as a model for other permanent boards, and laid down principles subsequently embodied in many local working agreements. In 1897, the Plumbers' National Conciliation Board was formed, and in 1905 a national scheme for conciliation was put into operation by the National Federation of Building Trades Employers and representatives of the trade unions of bricklayers, stonemasons, carpenters and joiners. A dispute is, in the first instance, referred to a local standing committee. Failing settlement, it comes before the local conciliation board for the district, on which the employers and the local branches of all the trade unions party to the scheme are represented. From there it may be sent up to one of the four Centre Boards, formed in each centre district of the Employers, Federation. A final appeal may be made to the National Board of Conciliation, consisting of representatives of the Employers' Federation and the Trade unions party to the scheme. At any stage matters may be referred to arbitration by mutual consent.

The scheme established for railways in 1908 provides that if desired changes in conditions of labour cannot be secured through the usual official channels, appeal may be made to a sectional board composed of representatives of the railway company and of the workmen, grouped for this purpose into sections according to the various classes of work. From there the disputed points may be brought before the Central Board, and equally referred to an arbitrator mutually agreed upon or failing a choice, one named by the Speaker of the House of Commons and the master of the Rolls.

ONTARIO LEGISLATION AFFECTING LABOUR, 1910.

THE most noteworthy feature, from the standpoint of labour, of the legislation passed by the Ontario Legislature during its session of the present year, is the extensive revision and consolidation which has been made in the labour laws of the Province. The 1910 volume of the Statutes thus becomes of exceptional value for purposes of reference on important phases of the laws enacted in Ontario with special relation to the condition of labour. Among the Acts which have in this way been recast and, with previous enactments of the same character, incorporated into one whole, are the following: The Master and Servant Act and its amendments of the past twelve years are consolidated and some improvements in form made. Similarly, the Wages Act, the Mechanics and Wage Earners' Lien Act and the Woodmen's Lien for Wages Act, are recast, while the Public and other Works Wages Act, with its amendments, are consolidated and thrown into clearer form. The Trade Disputes Act has undergone similar treatment, several verbal improvements being introduced. In consolidations of the Assignments' Act and Division Courts Act, the clauses for the protection of wages and the regulation of proceedings in garnishment are restated in improved form. In like manner a new "Bureau of Labour Act," and the clause of the Department of Agriculture Act relating to the Bureau of Industries, restate the provisions of the law governing the collection and publication of industrial labour statistics.

Protection of Workmen from Seizure of Wearing Apparel by Boarding House Keepers.

By an amendment to the Innkeepers' Act any keeper of a tavern or boarding

house retaining the wearing apparel of any employé or labourer in pledge for a greater sum than $6, on the payment of that sum or any less sum which is due, the wearing apparel must be immediately given up whatever the amount due by the labourer may be. This, however, is not to apply to other property of the servant or labourer.[1]

The Bread Sales Act.

A measure which intimately affects conditions among bakers throughout Ontario is the Bread Sales Act which fixes the weight of small loaves at 24 or 48 ounces averdupois, except in the case of small bread, which may be sold in any weight not exceeding 12 ounces. Scales and weights are to be kept in every bakeshop, and bread offered for sale must be weighed at the request of any purchaser. Violation of the above is punishable with a maximum fine of $5. The use of deleterious material is forbidden, under a penalty of $25, and the keeping of such material in any place where bread is made for sale is regarded as *prima facie* evidence of improper intentions. The council of every city, town and village is required to appoint an inspector to enforce the Act, whose duties are to see that the Act is carried out. The penalty for interfering with an inspector is $10. The Act came into force on July 1, 1910.[2]

The Steam Boiler Act.

The Governor-in-Council is now empowered to make rules, regulations and specifications respecting the constructing of steam boilers, including the materials to be used, the methods of construction, the tests to be applied, its inspection, and generally such other matters as may secure a uniform standard of strength, safety and efficiency. A steam boiler in this significance does not apply to boilers for heating water for domestic purposes, or railway or steamboat boilers, but includes other boilers used for generating steam for heating and power purposes.[3]

Notes.

An Act confirming the rights of aliens to hold real estate in Ontario was passed.[4]

The provisions of the Municipal Act with regard to the regulation and licensing of milk vendors are made more stringent.[5]

By an amendment to the Liquor License Act the sale of liquor on Christmas Day is prohibited.[6]

The jurisdiction of the Railway and Municipal Board over railways and street railways is enlarged, and some additional powers given, in the general interest of the public.[7]

The Act which was passed in 1909 regulating the manufacture of dairy products is amended in the section relating to the qualification of chief makers in creameries and cheese factories. The amendment is in the way of further ensuring competency.[8]

The Act respecting riots near public works is consolidated and considerably amended. A new definition of the term "weapon" is added, and the prohibition placed on employés having "weapons" in their possession is made more stringent.[9]

Certain changes in the method of taxing natural gas when found in the same well as oil are made. The Government may set aside localities in which oil and natural gas exist, and prescribe regulations as to methods of drilling, for the prevention of waste.[10]

The right of the Hydro-Electric Commission to enter upon lands for the purpose of constructing its transmission lines is confirmed and made clearer. The City of Hamilton and the Town of Tilsonburg are added as parties to the agreement for the suply of power, while certain changes in the terms of agreement are made.[11]

CHANGES IN RATES OF WAGES AND HOURS OF LABOUR DURING THE FIRST EIGHT MONTHS OF 1910.

THE first eight months of the year 1910 saw an upward tendency in wages in most industries throughout Canada. Active operations in agriculture, lumbering, mining and the different trades made this increase possible. The breaking up of the winter season somewhat earlier than usual occasioned an active demand for men on farms, and affected labour generally. The lumbering and fishing industries were given a set-back in some cases by the mildness of the weather at the close of the winter season, but the extensive operations connected with railway construction in the west caused a great demand for men, and wages were very high. In the building trades increased rates were numerous. Many important changes also took place in the printing trades.

A detailed statement with regard to these and other changes of the period is as follows:—

Changes by Industries and Groups of Trades.

Agriculture.—Wages in this industry remained about the same as in 1909. The demand for men was great, application for more than 8,800 being filed with the Dominion Commissioner of Immigration, at Winnipeg. High wages were offered, the scale ranging from $25 to $40 per month for experienced men, and from $10 to $20 for inexperienced help. The season was earlier by about three weeks than that of 1909.

Lumbering.—The first part of 1910 saw great activity in the camps and mills connected with this industry. The early disappearance of snow brought operations in the woods to a close sooner than usual, and the return of large numbers of men from the winter camps affected the unskilled labour supply in several localities. Experienced men were in great demand in certain sections of British Columbia. In New Brunswick, stream drivers were paid from $2.25 to 2.75 per day, exceptionally good men earning as much as $3 per day.

Mining.—Active operations prevailed in connection with this industry throughout the whole of Canada. The wages paid were much the same as in 1909, but a general increase was made in the case of the miners employed by the Nova Scotia Steel & Coal Company. On a representation of a joint committee and the Grand Officers of the Provincial Workmen's Association, the Company increased the rate of wages at all their collieries 5 per cent. The change, which went into effect on the first of June, raised the minimum wages from $1.45 to $1.52 per day. In the metalliferous camps rates of wages remained much as before.

Railway construction.—Wages in this branch remained very firm, the demand for labour being particularly acute in the west, where large undertakings are being projected.

Building trades.—A number of changes took effect in the rates of wages of the building trades, and the active conditions prevailing accounted for general increases, among the more important being the following: Bricklayers in Berlin received a substantial increase. Stone masons in Montreal, to the number of about 500, are working for wages that are 12½ per cent. higher than those of last year, the increase dating from June 8. Workers in the same class in Vancouver were granted an increase of 5 per cent. in May, with an agreement for a similar increase after July. Carpenters in Halifax (125) had their wages increased from 27 to 30 cents per hour, while workers in this trade at St. Catharines were given a raise of 2 cents per hour, bringing their wages up to 35 cents per hour. From two to three thousand carpenters in Toronto were given an increase of about 6 per cent. In Western Canada the wages in two districts (Saskatoon and Lethbridge) were advanced 5 cents per hour for carpenters, those in the latter district having their working hours reduced from fifty-four to forty-eight a week, thereby earning 30 cents per week less than under the pre-existing schedule.

Lathers (120) in Toronto went on strike

for five days and obtained an advance of about 12 per cent., the minimum rate being raised on June 6 from $3.10 to $3.50 per day. Tile layers in the same city, to the number of sixty, received increases, journeymen, from 35 to 40 cents per hour, and improvers, from 25 to 30 cents per hour. Painters and decorators (1,000) in Toronto received an increase of 5 cents per hour, on May 28, a similar increase being granted of Lethbridge, with a reduction of working hours from fifty-four to forty-eight weekly. In Halifax, plumbers (38) were given an increase of 5 cents per hour, the previous rate being 25 cents per hour. In Ottawa, the same class (150) had their wages increased by 3 cents per hour, the change bringing the wages up to 39 cents per hour, while an eight-hour day replaced that of nine-hours for half the year. Lethbridge plumbers (25) were given an increase of $1.20 per week, the same class in New Westminster (14) and Vancouver (135) having their wages increased 12½ cents per hour. Victoria plumbers received an increase of 50 cents per day. Builders' labourers (1,500) in Toronto obtained an increase from 25 to 28 cents per hour.

Metal, engineering and shipbuilding trades.—Iron moulders (30) in Ottawa received an increase of 25 cents per day; in Peterborough (39) an increase of $2.36¼ (minimum) to $2.75 per day; in Waterloo (17) an increase of 1 cent per hour. Iron workers (400–500) in Toronto were granted a general increase of 5 per cent. in wages. Metal polishers (96) in the same city received 25 cents per ton more than formerly. Electric wirers at Brantford had their wages increased from 22½ cents to 25 cents per hour. Blacksmiths in Waterloo were given an increase of 1 cent per hour by the Waterloo Manufacturing Company, and the same class on the St. Thomas Electric Railway had their number of working hours reduced. Boilermakers (8) in Waterloo had their wages increased rather more than 1 cent per hour. In Ottawa, the same class, to the number of sixty-three, were given an increase of 3 cents per hour, in July, with an agreement for an increase of 5 cents per hour to date from January, 1911. Sheet metal workers (350 to 400) in Toronto were given an increase of 1½ cents per hour, raising the minimum to 33 cents per hour; in Hamilton the same class (100) got an increase from 25 to 32½ cents per hour.

Woodworking trades.—A change in the wages of upholsterers (600–700) in Toronto amounted practically to a 10 per cent. increase, bringing the full wage up to 35 cents per hour. Pattern makers in Port Hope (7) and Peterborough (25) received an increase of 25 cents per day, the previous wage being $2.75 per day.

Printing and allied trades.—Important changes took effect at St. John, Quebec, Peterborough and London. In St. John, thirty men received an increase of $2 per week. In Quebec the printers (140) demanded a 25 per cent. increase, but a compromise was effected with 12½ per cent. In Peterborough, workers in the same class received increases ranging from 50 cents to $1.50 per week, while in London seventy men were affected by changes which gave an increase of $1 per week to all employés and an additional increase of $1 to floor-men and job-men, the change coming into effect on July 1, 1911. Job-men's hours were reduced from fifty-one to forty-eight per week. In Chatham, printers' hours were changed from nine to eight per day. In Vancouver and Victoria, changes were made affecting 112 and eighty-three men respectively, those printers in the former place receiving an increase of $1.50 per week, and those in the latter an increase of $3 per week. Pressmen in St. John were given a substantial increase on November 22, also in Quebec, where the hours of the press-feeders were reduced from fifty-four to forty-eight per week. Important changes were made also in Ottawa, where the pressmen received an average increase of $4 weekly, while the wages among the feeders were raised as much as 58 per cent., an agreement having been made for five years.

Clothing trades.—Journeymen tailors (40) in St. Catharines received a weekly increase of $1, while coat makers (125) in Hamilton and London (35) received increases ranging from $1.50 to $3 per week.

Food and tobacco preparation.—Cigar makers (254) in London had their wages

increased from $10.50 to $11 per 1,000 cigars, the weekly increase being about $1.50.

Leather trades.—Tanners (450) in Huntsville and Bracebridge were given an increase of from 10 to 15 per cent. by the Anglo-Canadian Leather Company. Leather workers (40) in Vancouver had their working hours reduced from nine to eight per day.

Transportation. — Some important changes took place on the Grand Trunk Railway system. Railroad telegraphers (about 700) had their wages advanced about 6 per cent. Trackmen on the same system received an increase of 10 cents per day, and freight handlers (25) an increase from 14 to 16 cents per hour. The Canadian Pacific Railway freight handlers (about 200) in Toronto had an increase granted them of 1 cent per hour. Street railway employés (300) in Ottawa were given increases based on their length of service, and in St. Thomas the working hours of the same class were reduced from sixty to fifty-four hours per week, with a wage increase of 1 cent per hour. In London 150 street railway employés had the number of their working hours reduced from sixty to fifty-seven, and were also given increases based on their length of service. In Vancouver, 510 workers in the same class were given an increase of 5 cents per hour.

Civic employés.—In London a number of increases were granted, to take effect on March 1. Nine employés in constant employment, whose salaries ranged from $450 to $700 were given increases ranging from $25 to $100. At St. Catharines and Stratford the firemen had their salaries raised, nine in the former place receiving an average increase of $1.39 per week, and five in the latter city receiving an average increase of $145. weekly. In the case of the library assistants of Toronto, while the salaries were not in effect increased, the number of years in which the maximum could be attained was reduced from thirteen to eight. Corporation labourers received increases in Ottawa, St. Catharines, Guelph and Paris, all increases being at the rate of about 25 cents per day. The City Council of Ottawa, on requests from the carters and teamsters employed by the City Corporation, decided to give the former workers an increase of 25 cents per day, and the latter an increase of 18 cents per day, both changes coming into effect on April 20.

FAIR WAGES SCHEDULE IN GOVERNMENT CONTRACTS AWARDED DURING THE MONTH OF SEPTEMBER.

The following is a list of contracts awarded by the Department of Public Works, the Department of Railways and Canals, which have received the signatures of both parties, together with the fair wages schedule inserted in each contract, setting forth the minimum rate of wages to be paid to the labourers engaged upon the works. A statement of orders for supplies given by the Post Office Department is added.

Department of Public Works.

BREAKWATER, MATANE RIVER, QUE.

BREAKWATER, east side of mouth of Matane river, Matane, Que.; name of contractor, Napoleon Trudel, St. Irénée, Que.; date of contract, August 29, 1910; amount of contract, $55,020.

Trade or Class of Labour.	Rate of Wages, Not less than:
Foreman carpenter	$ 2.25 per day of 10 hours.
Engineman for pile-driver	2.00 " 10 "

RECENT INDUSTRIAL AGREEMENT.

ON September 8 a basis of agreement was signed by representatives of the Builders' Exchange of Montreal and the local associations of bricklayers and masons, the members of which had gone out on strike some time previously.[1] The terms of the agreement are as follows:—

Agreement between the Builders' Exchange of Montreal, Que., and the Local Bricklayers' and Masons' Union.

1. The strike against the Builders' Exchange shall be officially called off.

2. All present proceedings taken by the Builders' Exchange against the men brought over from England shall be dropped.

3. The Bricklayers' & Masons' International Union shall drop the demand that the foreman shall be members of the Union. The appointment of a foreman shall be absolutely at the discretion of the Master Builders. In case of a strike or any other trouble it is distinctly understood that the foremen are to be allowed to remain at their work, and are not to be interfered with by the Union.

4. The Bircklayers' and Masons' International Union shall not discriminate in any way against any employés as members of the Canadian Federation of Labour, or vice versa, and the members of the Builders' Exchange shall not discriminate against members of the Bricklayers' and Masons' International Union.

5. Protection of men who are now working shall be guaranteed by this agreement. Men who are now members of the Canadian Federation of Labour shall not be molested or subjected to fines by the Bricklayers' and Masons' International Union or vice versa.

6. The demand for "Open Shop" shall be dropped by the Builders' Exchange, and all employés shall be members of either one or the other of the aforesaid Unions.

7. All claims of damages, if any, against the Bricklayers' and Masons' International Union of Montreal, the Builders' Exchange or J. H. Lauer, shall be waived.

8. A joint Arbitration Committee consisting of two representatives from either side shall be permanent during the term of this agreement. This Committee is to inquire into all matters or disputes that may arise in the future, and work shall not be interrupted pending the decision of this Committee. An Umpire shall be chosen by the Committee at their annual meeting, as the first item of business after organization. This Umpire must be neither a workman nor an employer of workman. He shall not serve unless his presence is made necessary by failure of the Committee to agree. In such case he shall act as presiding officer at all meetings, and have the casting vote, and the decision of the Arbitration Committee shall be binding on other parties. No member who is not engaged in the Bricklayers' or Masons' trade shall be eligible to act as representative on the Board of Arbitration.

9. The International Bricklayers' Union No. 1 and the Stone Masons' Union No. 2 (Quebec) shall obtain at once a charter under the laws of this Province giving them civil existence.

10. This agreement shall be in force from September 6, 1910, up to and including June 30, 1912.

11. Three months' notice shall be given in writing by either party to this agreement as to any alterations before the expiration of same.

12. The rates of wages during the term of this agreement shall be fifty cents (50c) per hour for bricklayers, sewer and conduit work, sixty cents (60c) per hour; and forty-five cents (45c) per hour for stonemasons. No member of the Bricklayers' and Stone Masons' Union shall work for any person, firm or corporation not a bona-fide builder or contractor, for less than ten cents (10c) per hour more than the current rate of wage.

13. The Bricklayers' and Masons' International Unions shall not order any strike against any firm or company, parties of this agreement, or shall any number of members of either Unions leave the work of any firm, person or company, parties of this agreement, before the matter in dispute has been reported to the joint Arbitration Board.

14. Nine (9) hours shall constitute a day's work.

[1] For a statement with regard to the origin of the dispute see the *Labour Gazette* for August 1910, page 284.

15. Except in cases of extreme necessity, no work shall be done before the hours of 7 a.m., or after 5 p.m., each working day, or after 5 p.m. on Saturday, till 7 a.m. Monday.

16. All overtime after 5 p.m. shall be paid for at the rate of time and a half.

17. Holidays shall consist of Sundays, Christmas Day, New Year's Day and Labour Day, and shall be paid for at the rate of double time.

18. The Bricklayers' and Masons' International Union shall be paid their wages on or before 5 p.m. on the regular pay day, which shall not exceed two weeks and not more than two days pay shall be held back from any men working within a radius of 20 miles from Montreal General Post Office.

19. All members on being discharged shall be paid their wages in full at the office or on the job.

20. Any member laid off through lack of material or any other cause, shall upon demand, be paid his wages within four hours of such demand being made at the office or on the job, or waiting-time at the regular rate of wages must be paid for such time as the wages are withheld.

21. The business agent or President of the Bricklayers' and Masons' International Union shall be allowed to visit all jobs during working hours, to interview the Steward of the job and possibly other members of this Union. Nothing in this rule shall be construed as giving such agent authority to issue orders controlling the work of workmen, or to interfere with the conduct of the work. He shall report all grievances or alleged violations to the Arbitration Committee for immediate action.

22. Should any trouble arise on the job between the other trades and the employer, the bricklayers and masons shall not be withdrawn from the works.

23. The contractors shall provide on their respective jobs a shed with waterproof roof for the use of the men employed, as a tool-shed, and as a shelter during wet and rough weather.

24. The following work shall be done by bricklayers: All kinds of brickwork, cutting and setting of terra-cotta, fireproofing, cutting and setting of cement blocks, including all cement blocks that are used for backing up external walls; also the building of brick partition walls. The contractor shall have the right, however, to employ masons or bricklayers at his option to back up masonry, and for the setting of external terra-cotta.

25. No member or members of Union No. 1 shall be allowed to lay any brick for any person, contractor or company, who employ non-Union stonemasons, and no member or members of Union No. 2 shall be allowed to cut or lay any stone for any person, contractor or company who employ non-Union bricklayers. Further, on future works, bricklayers shall not under any circumstances lay bricks on stone foundations laid by non-Union masons.

26. The Union agrees that none of its members shall be allowed to take any contract, or sub-contract any work. Should any member engage in any work of this kind he shall retain his membership for mortuary benefits only. And further, no members of the Builders' Exchange shall sub-let any brick or stone work except to a bona-fide contractor.

27. The said Unions are to recognize the Builders' Exchange as direct parties to this agreement, and they agree that after June 30, 1912, their members shall work only for the members of the Builders' Exchange, within the limits of the Island of Montreal.

INDUSTRIAL ACCIDENTS DURING THE MONTH OF SEPTEMBER, 1910.

Under this heading, account is taken of such accidents only as were sustained by workmen in the course of their employment, and resulted in loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the Department through the press of the country to correspondents of the *Labour Gazette*. The Department is also indebted to the Bureau of Mines of Ontario, and British Columbia, to the office of the factories' inspector of the Province of Ontario, the Ontario Railway and Municipal Board, and to the Department of Railways and Canals, for their assistance in furnishing the Department with the statement of returns of accidents reported to them.

INDUSTRIAL accidents occurring to 272 individual workpeople in Canada during the month of September, 1910, were reported to the Department of Labour, Of these, ninety-one were fatal and 181 resulted in serious injuries. In addition, two fatal accidents were reported as having taken place prior to the beginning of the month, information not having been received by the Department before September, 1910.

In the preceding month there were eighty-two fatal and 140 non-fatal accidents reported, a total of 222, and in September, 1909, there were ninety-one fatal and 225 non-fatal accidents, a total of 316. The number of fatal accidents reported in September, 1910, was, therefore, nine more than in the preceding month, and the same as in September, 1909. The number of non-fatal accidents reported in September, 1910, was forty-one more than in the preceding month, and forty-four less than in September, 1909. Altogether, there were fifty more industrial accidents reported in September, 1910, than in the preceding month, and forty-four less than in the same month of the preceding year.

Of 141 returns received during the month, giving the ages of the victims of industrial accidents, twenty-three referred to persons under twenty-one years of age, forty-six to persons between twenty-one and forty-five, and eleven to persons over forty-five. Sixty-one persons were over twenty-one years of age, but their exact ages were not specified.

The following is a record of the accidents of the month by industries and trades:—

STATEMENT OF ACCIDENTS DURING SEPTEMBER 1910, BY INDUSTRIES AND TRADES.

Civic employés	5	9	14
Miscellaneous	2	6	8
Unskilled labour	9	7	16
Total	91	181	272

Nature of Fatalities and Accidents.

The chief disasters of the month, causing the death of more than one workman, were: the drowning of two farmers in the St. Lawrence river opposite Montmorency Falls, Que.; the asphyxiation of two farmers in a well at Kamsack, Sask.; the killing of two railway trackmen at Lyn, Ont., by being run over; and the death of two railway construction hands near Calgary, Alta., by an explosion of dynamite.

Drowning of Two Farmers in St.Lawrence River, Que.

On September 14, while three farmers were returning with supplies from a schooner lying at Isle aux Coudres, their boat upset in the St. Lawrence river, opposite Montmorency Falls, Que., and two of the three were drowned.

Death of Two Trackmen at Lyn, Ont.

On September 16, while two men were working in a heavy fog on the track of the Grand Trunk Railway on the Lyn, Ont. section, they were struck and instantly killed by a train, the approach of which they had not perceived.

Dynamite Explosion at Calgary, Alta.

On September 15, two workmen at Breckenridge's Canadian Northern Railway construction camp, five miles northeast of Calgary, Alta., drilled into an unfired charge of dynamite, and both were instantly killed by the ensuing explosion.

Record by Industries and Trades.

Agriculture.—There were twenty-two fatal, and thirty-five non-fatal accidents reported in this industry, during September, 1910, compared with fourteen killed and nineteen injured in the preceding month, and eighteen killed and fifty-two injured in September, 1909. Six of the fatalities were due to the victims being run over, four each to machinery, and to falls, three to runaways, two each to drowning and to asphyxiation, and one to falling material. Of the injuries, eleven were due to machinery, seven to falls, six each to live stock and to runaways, three to being run over, and one each to falling material and to flying material.

Fishing and hunting.—During September, 1910, a fisherman was killed by falling on a gasoline engine. There were no accidents in the previous month, nor in the corresponding month of 1909.

Lumbering.—There were seven fatal and seven non fatal accidents, as against seven killed and eight injured in August, 1910, and ten killed and nine injured in September of last year. Falling material and machinery caused two each of the fatalities, and drowning, machinery and a gunshot wound one each. Machinery caused three of the injuries, and falling material and falls two each.

Mining.—In September, 1910, eleven of these workers met death by accident, while fifteen others were injured, compared with nine killed and eleven injured in August last, and eleven killed and thirteen injured in September, 1909. Four each of the fatalities were due to being run over by cars and by falling material, two to falls, and one to machinery. Six of the injuries were due to falling material, three each to cars and to dynamite explosions, two to machinery and one to a tool.

Building trades.—In these, six workers were killed and thirty seriously injured, as against five killed and sixteen injured the month before, and four killed and twenty-four injured in September, 1909. Five of the fatalities were caused by falls and one by drowning. Twenty-eight workmen were injured by falls and two by falling material.

Metal, engineering and shipbuilding trades.—In this group, five workers were killed and thirty injured during September, 1910, compared with nine killed and seventeen injured in the previous month, and six killed and thirty-three injured in September of last year. Three of the deaths were due to falling material, and one each to being run over and to an explosion. Fourteen injuries were due to machinery, seven to falling material, five to falls, three to molten metal and one to flying material.

Woodworking trades.—One woodworker was killed by falling material, and six others were injured by machinery, in September, 1910, as against two injured in August last, and ten injured in September, 1909.

Printing trades.—Machinery and a fall each caused injury to one worker. In the month before the record was one injured, and in September, 1909, two injured.

Clothing trades.—One worker was injured by machinery in September, 1910. There were no injuries in the previous month, and one worker was injured in September, 1909.

Food and tobacco preparation.—The record for September just passed in this group was two killed and two injured, compared with two killed and two injured in August, 1910, and four killed and eight injured in September a year ago. One each of the fatalities was due to a fall and to an elevator. Of the injuries, one was due to falling material and one to an elevator.

Leather trades.—A leather worker was killed by being run over in September, 1910. One worker was injured in August last, and three in September, 1909.

Railway service.—There were fifteen railway employés killed by accident in September, 1910, and thirteen injured, as

DEPARTMENT OF LABOUR, CANADA,
STATISTICAL TABLE, SERIES F, No. 83.

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF SEPTEMBER, 1910.

Trade or Industry.	Locality.	Date.	No.	Cause of Fatality.
Agriculture—				
Farmer	Caldwell, Ont.	Sept. 7	1	In a runaway.
"	Napanee, Ont.	" 10	1	Run over by plough.
"	Creelman, Sask.	" 10	1	Fell in a well.
"	Randon Tp., Ont.	" 12	1	In a runaway.
"	Waterloo, Que.	" 13	1	In a runaway.
"	Montmorency Falls, Ont.	" 14	2	Drowned, boat upset.
"	Kamsack, Sask.	" 16	2	Asphyxiated by gas in well.
"	Aylmer, Ont.	" 16	1	By fall in barn.
"	St. Jacques de Mineur.	" 16	1	Run over by plough.
"	Harrow, Ont.	" 6	1	Fell from vehicle.
"	South Woodslen, Ont.	" 6	1	Run over by train.
"	Dixville, Que.	" 21	1	Thrown off vehicle.
"	Hagersville, Ont.	" 22	1	By sand cave-in.
"	Windthorst, Sask.	" 18	1	Run over by load.
"	Levis, Que.	" 26	1	Run over by train.
"	Glen Sutton, Que.	" 27	1	Run over by train.
"	Debec Jct., N.B.	" 30	1	Run over by train.
Market gardener	Ottawa, Ont.	" 28	1	Collision with train at crossing.
Thresher	Neepawa, Man.	" 27	1	Caught by separator.
Farm hand	Wallaceburg, Ont.	" 30	1	Entangled in traction engine.
Fishing and hunting—				
Fisherman	Wilson's Beach, N.B.	" 24	1	Fell on gasoline engine.
Lumbering—				
Logger	Near Cobalt, Ont.	" 2	1	Drowned, canoe upset.
"	Bute Inlet, B.C.	" 13	1	Tree fell on him.
"	Webbwood, Ont.	" 30	1	Tree fell on him.
Saw mill hand	Victoria, B.C.	" 3	1	In shafting.
"	Toronto, Ont.	" 19	1	Smothered, fell down shavings chute.
Trapper	Lepreaux, N.B.	" 22	1	Accidentally shot, bled to death.
Pulp mill hand	Chatham, N.B.	" 21	1	Fell 70 feet.
Mining—				
Miner	Fernie, B.C.	" 1	1	Between cars.
"	Cobalt, Ont.	" 9	1	Fell 25 feet in mine.
"	Verona, Ont.	" 9	1	By fall of rock.
"	Fernie, B.C.	" 14	1	Run over by car.
"	Cobalt, Ont.	" 23	1	Fell 75 feet in shaft.
"	Merritt, B.C.	" 22	1	By fall of roof.
"	North Sydney, N.S.	" 28	1	Run over by mine train.
"	Extension, B.C.	" 9	1	Run over by mine train.
"	Cumberland, B.C.	" 15	1	Fall of roof.
"	Middleboro, B.C.	" 17	1	Fall of roof.
Quarryman	Montreal, Que.	" 20	1	Struck by lever of a scale.
Building trades—				
Carpenter	Montreal, Que.	" 12	1	Fell from roof of house.
"	Parry Harbour, Ont.	" 12	1	Fell 95 feet.
"	Montreal, Que.	" 9	1	By a fall.
Builders' labourer	Port Colborne, Ont.	" 15	1	Fell 60 feet.
"	Westville, N.S.	" 15	1	Drowned, while on sand boat.
Painter	Montreal, Que.	" 29	1	Fell from third storey.
Metal trades—				
Iron and steel worker	Sydney, N.S.	" 1	1	Ore train ran over him.
Electrical worker	Toronto, Ont.	" 10	1	Crushed between street car and platform.
"	Montreal, Que.	" 22	1	By falling material.
Shipbuilder	Welland, Ont.	" 20	1	Iron plate fell on him.
Stationary engineer	Berlin, Ont.	" 9	1	By gasoline explosion.
Woodworking trades—				
Carriage maker	Fort Erie, Ont.	" 7	1	By falling merchandise.

Driver	Lake Megantic, Que.	" 8	1	Kicked by a horse.
"	Hamilton, Ont.	" 12	1	Run over by a coal cart.
"	Bassano, Alta.	" 29	1	In a runaway.
Public employés—				
Detective	Off Brockville, Ont.	" 6	1	Drowned, motor boat upset.
Special constable	Salmon River, B.C.	" 19	1	Shot dead by a trapper.
Corporation employé	Renfrew, Ont.	" 9	1	By falling earth.
Postman	Toronto, Ont.	" 12	1	Run over by a street car.
Provincial constable	Vancouver, B.C.	" 26	1	Accidentally shot while cleaning revolver.
Miscellaneous trades—				
Brickmaker	Edmonton, Alta.	" 1	1	By shafting.
Newsboy	Ottawa, Ont.	" 17	1	Run over by street car.
Unskilled labour—				
Labourer	Cobourg, Ont.	" 8	1	Run over by train.
"	Fredericton, N.B.	" 14	1	Run over by train.
"	St. John, N.B.	" 10	1	Run over by street cars.
"	Red Hill, Ont.	" 12	1	Run over by cars.
"	Levis, Que.	" 24	1	Run over by street cars.
"	Maisonneuve, Que.	" 21	1	Box of iron fell on him.
"	Nanaimo, B.C.	" 26	1	By falling timbers.
"	Weyburn, Sask.	" 27	1	By cave in.
"	St. Catharines, Ont.	" 29	1	By falling material.

FATAL ACCIDENTS HAPPENING IN THE PREVIOUS MONTH, BUT ONLY REPORTED TO THE DEPARTMENT IN SEPTEMBER, 1910.

Saw mill hand	Folger, Ont.	Aug. 18	1	By lath bolting saw.
Miner	Coal Creek, B.C.	Aug. 31	1	Run over by cars.

against eighteen killed and twenty-one injured in the preceding month, and sixteen killed and eleven injured in September of last year. Eight of the fatalities were caused by being run over, two by dynamite explosions, and one each by a derailment, by an explosion of an engine, by being caught between cars, by falling material and by a gunshot wound. Three each of the injuries were caused by falling material, by being run over, by being caught between cars, by derailments, and one by a fall.

Navigation.—The record for September 1910, was one killed by falling material, and five injured, two each by machinery and by falls, and one by falling material. In the preceding month there were nine killed and four injured, and in September, 1909, eleven killed and two injured.

General transport.—During September, 1910, three of these workers were killed and thirteen injured, as against eleven injured in August last, and five killed and seventeen injured in September, 1909. One each of the deaths was due to live stock, to being run over, and to a runaway. Seven of the injuries were due to falls, and two each to runaways, to collisions and to live stock.

Public employés.—Five of these employés were killed and nine injured during September last, compared with seven injured in the month before, and three injured in September of last year. Two of the fatalities were caused by gunshot wounds, and one each by drowning, by falling material and by being run over. Three each of the injuries were caused by falls and by falling material, two by explosions and one by being run over.

Miscellaneous.—Two deaths, one by machinery and one by being run over, came by accident, while six others were injured, two each by machinery and by falls, and one each by electric shock and by falling material. In the month before the record was five killed and ten injured, and in September, 1909, two killed and twenty-three injured.

Unskilled labour.—During September, 1910, nine labourers were killed by accident and seven injured, compared with six killed and nine injured in August last, and four killed and twelve injured in September, 1909. Five of the deaths were due to being run over, and four to falling material. Three each of the injuries were due to falls, and to falling material, and one to machinery.

TRADE DISPUTES DURING THE MONTH OF SEPTEMBER, 1910.

THE month of September was comparatively free from industrial disputes, the only serious interruption to industry being caused by a general strike of plumbers at Montreal. Mining operations at Springhill, N.S., were still restricted through a strike which had been going on for over a year.

Analysis of Trade Disputes during the Month.

Number and magnitude.—The total number of trade disputes reported to have been in existence in Canada during September was fourteen, compared with sixteen[1] in August and nine in September, 1909. About 327 firms and 3,137 employés were involved in these disputes. About 273 firms and 1,269 employés being involved in new disputes.

Loss of time in working days.—The loss of time to employés through trade disputes during September was approximately 39,280 working days, compared with 54,800 days in August, and 96,000 in September, 1909.

Trades affected by new disputes.—There were four new disputes reported to the Department in September, of which three occurred in the building trades and one in an industry classified among the miscellaneous trades.

Localities affected by new disputes.—Two of the new disputes took place in the Province of Quebec, and two in the Province of Ontario.

Causes of disputes.—Three of the new

[1] This includes two disputes which were not reported to the Department until September.

disputes arose from demands for higher wages, and the fourth from the introduction of a new system of work.

Methods of settlement.—Of the fourteen disputes in existence during September, seven were terminated in the course of the month, leaving seven still unsettled at the close. Two of the disputes were terminated through arbitration, and four through negotiations between the parties concerned. The remaining dispute was settled by the resumption of work by the strikers without negotiations.

Results of disputes.—Of the seven disputes that were terminated during the month, three resulted in favour of the employers, one in favour of the employés, and in three cases compromises were effected.

Disputes which Commenced Prior to the Beginning of the Month.

The trade disputes of previous months which were still in continuance during September, involved coal miners at Springhill, N.S., bricklayers and masons at Montreal, Que., Winnipeg, Man., and Regina, Sask., iron moulders at Carleton Place, Ont., and Montreal, Que., railway carmen of the Canadian Northern Railway from Winnipeg to Edmonton, machinists and engineers of Vancouver and New Westminster, B.C., and sheet metal workers of Edmonton, Alta.

Strike of Coal Miners at Springhill, N. S.

No change in the situation was reported in the case of a strike of coal miners at Springhill, N.S., who had stopped work on August 11, 1909, on the refusal of the Company to recognize the United Mine Workers of America, to grant an increase in wages and to make certain changes in the conditions of employment. About seventeen hundred men were originally affected by this dispute, but nearly half the number secured employment elsewhere, leaving about 900 men still out. The mines were in partial operation.

Settlement of Strike of Bricklayers and Masons at Montreal, Que.

On September 8, an agreement was signed by the representatives of the Montreal Builders' Exchange and of the two unions of bricklayers and masons at Montreal, in which the strike against the Builders' Exchange was officially declared off, and a settlement of all differences for the next two years was affected. The dispute had begun early in June with a demand by the Stonemasons' Union for a general rate of wages of 45 cents an hour. The refusal of their demand led to a strike of thirty masons on June 6. A strike of about forty-five bricklayers followed on June 20, on account of dissatisfaction with a foreman, and on July 4, a general strike of bricklayers and masons took place, the alleged object being for recognition of the union and 'closed shops.' During July, industrial conditions ceased to be greatly affected by the general strike, most of the strikers having obtained work on the terms demanded, but the dispute which began on June 20, continued until the final settlement was reached.

By the terms of the agreement, the principle of the 'closed shop' was recognized, as all bricklayers and masons employed by members of the Builders' Exchange were to be members of either the International or National Union, no distinction between the two being made. The International Union withdrew its demand that foremen should be members of the Union, and recognized the right of the contractors to appoint them entirely at their own discretion. The wages were fixed at 50 cents an hour for bricklayers, 60 cents an hour for the construction of water-mains, and 45 cents an hour for masons.[1]

Disputes of Bricklayers and Masons at Winnipeg, Man., and Regina, Sask.

Arising out of the strike of bricklayers of the firm of Peter Lyall & Sons, of Montreal referred to above, a strike of twelve employés of the Lyall-Mitchell Company took place on August 15 at Winnipeg, Man., followed on August 17 by a general lockout of bricklayers and masons by the Winnipeg Builders' Exchange. It had already been decided by a Board of arbitration that the two

[1]The full text of this agreement is given on another page, under the heading 'Recent Industrial Agreement.'

TABLE OF TRADE DISPUTES DURING THE MONTH OF SEPTEMBER.

Occupation.	Locality.	Alleged Cause or Object.	No. of Firms or Establishments affected.		Approximate No. of Employés affected.				Date of commencement.	Date of termination.	Result.
					Directly.		Indirectly.				
			Directly.	Indirectly.	Males.	Females.	Males.	Females.			
DISPUTES WHICH COMMENCED PRIOR TO THE BEGINNING OF THE MONTH.											
Mining—											
Coal miners	Springhill, N.S.	For recognition of union and increase in wages and against conditions of employment	1	.....	950	.....	.....	.....	Aug. 11	'9	No settlement reported, but places of many strikers were filled.
Building trades—											
Bricklayers and masons	Montreal, Que.	Against employment of a foreman	1	.....	45	.....	175	.....	June 20	Sept. 8	A general agreement signed with Builders' Exchange.
Bricklayers and masons	Winnipeg, Man.	In sympathy with striking bricklayers at Montreal, Que.	1	12	12	.....	.....	.....	Aug. 15	Sept. 9	Settled by arbitration.
Bricklayers and masons	Winnipeg, Man.	Lockout on account of strike of bricklayers	28	.....	288	.....	.....	.....	Aug. 17	Sept. 9	Lockout terminated on settlement of strike.
Bricklayers and masons	Regina, Sask.	In sympathy with striking bricklayers at Montreal	1	.....	24	.....	.....	.....	July 25	Sept. 8	Dispute ceased on termination of strike at Montreal.

Metal trades—												
Iron moulders.	Carleton Place, Ont.	Strikers alleged employers refused to meet their committee or to restore the old rate of piece prices in force before Nov. 17, 1909.	1		31		75		May	10		No settlement reported at end of month.
Iron moulders.	Montreal, Que.	For recognition of union and 'closed shop.'	1		25				June	30		No settlement reported at end of month.
Machinists and engineers	Vancouver and New Westminster, B.C.	For increase in wages from 40 to 45 cents an hour.	13		145				July	5		No settlement reported at end of month.
Sheet metal workers	Edmonton, Alta.	For minimum wage of 45 cents an hour.	6		26				Aug.	23	Sept. 4	Agreement signed, minimum wage of 42½ cents an hour granted.
Railway service—												
Railway carmen.	Canadian Northern Railway system from Winnipeg to Edmonton.	For increase in wages.	1		400				July	1	Sept. 27	Work resumed on terms of the award of the Conciliation Board.

DISPUTES WHICH BEGAN DURING THE MONTH.

Building trades—												
Plumbers.	Montreal, Que.	For increase in wages.	100		325				Sept.	17		No settlement reported at end of month.
Plumbers.	Ottawa, Ont.	For increase in wages.	2		31				Sept.	19		No settlement reported at end of month.
Tin roofers.	Montreal, Que.	For increase in wages of five cents an hour.	75	95	275		320		Sept.	7	Sept. 11	Increase in wages granted.
Miscellaneous trades												
Telegraph messenger boys.	Toronto, Ont.	Boys objected to a new system adopted by Company.	1		60				Sept.	26		No settlement reported at end of month.

*Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where after the declaration of a strike, some of the original strikers have returned to work or had their places filled with new hands, or where establishmens affected have found that for either of these reasons, or both, or for the other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table therefore, includes mention only of such disputes, as during the month or at its termination affected, to an appreciable degree, the carrying on of the industrial or business operations of the firm or establishments concerned. Mention moreover, is not made of disputes involving less than six employés, or of less duration than 24 hours.

firms were not identical, as alleged by the Union, but the men did not consider that this charge was disproved. A new board of arbitration was appointed, and fresh evidence being produced, it was again declared on September 1, that the two firms were distinct. This decision was finally accepted by the Union, and on September 9, the strike was formally declared off, a week's delay having been occasioned through some difficulty in getting into touch with the head officials of the Union.

On July 25 a strike of twenty-four bricklayers and masons took place at Regina, Sask., in sympathy with the striking bricklayers of the firm of Peter Lyall & Sons, at Montreal. This dispute ceased with the settlement of the Montreal strike on September 8.

Strike of Iron Moulders at Carleton Place Ont.

On May 10, a strike of iron moulders took place at Carleton, Ont., which was reported to be still in existence at the end of September. In a report received from the Iron Moulders' Union, it was stated that on November 17, 1909, the Company posted a notice of a reduction in moulding piece-work prices amounting to ten per cent., that is, from twenty-five per cent. to fifteen per cent. on board prices. The moulders accepted this reduction, but reminded the firm that they would ask for a restoration of the old rate in the spring. It was alleged that on May 10, the employers refused to meet a committee of the moulders or to restore the old rate. The moulders and apprentices then went out, about thirty-one men being directly involved and seventy-five indirectly. On May 11, the moulders presented the following agreement to the employers, which they refused to sign.

1. Recognition of the shop committee.

2. All work made by the piece to be priced within a reasonable time after being put in the sand, say two weeks.

3. The piece price to be twenty-five per cent. above flat board prices.

4. The agreement to be for one year, to expire June 1, 1911. Thirty days' notice to be given by either party to the agreement, if either desired a change. Otherwise argeement would run on from year to year.

Strike of Carmen of the Canadian Northern Railway.

A strike of carmen of the Canadian Northern Railway Company extending from Winnipeg, Man., to Edmonton, Alta., which began on July 7, was called off on September 27, the strikers accepting the award of the Conciliation Board appointed under the Industrial Disputes Investigation Act, 1907, which was presented on June 24.[1] About 400 men were involved in this dispute, which took place on account of their dissatisfaction with the award.

Strike of Machinists and Engineers at Vancouver and New Westminster, B.C.

No settlement was reported in a strike of machinists and engineers at Vancouver and New Westminster, B.C., which began on July 5, on account of the refusal of the employers to grant a demand for an increase in wages from 40 to 45 cents an hour. About thirteen firms and 145 men were involved in this dispute.

Strike of Sheet Metal Workers at Edmonton, Alta.

On August 23, a strike of sheet metal workers took place at Edmonton, Alta., in which six firms and twenty-six employés were involved. The dispute arose from a demand for a minimum wage of 45 cents an hour. The strike was terminated on September 4, when an agreement was signed providing for a minimum wage of 42½ cents an hour, to be in force until May 1, 1911.

New Disputes.

The new disputes of the month comprised strikes of plumbers at Montreal, Que., and Ottawa, Ont., tin roofers at Montreal, Que., and telegraph messenger boys at Toronto, Ont.

Strikes of Plumbers at Montreal, Que. and at Ottawa, Ont.

On September 17, à general strike of plumbers took place at Montreal, Que.,

[1] For the report of the Conciliation Board see the July issue of the *Labour Gazette*, page 92.

in which about 100 firms and 375 employés were involved. On September 19, the strike spread to Ottawa, Ont., where thirty-one men employed by two Montreal firms went out. Work was only stopped on one building in Ottawa, however, the plumbing in the other being practically completed. The cause of the dispute was the refusal of the employers to sign an agreement providing for an eight-hour day and wages of 40 cents per hour for the first year, 42½ cents per hour for the second year, and 45 cents an hour for the third year. No settlement of the dispute took place during the month, and building operations were impeded by it.

Strike of Tin Roofers at Montreal, Que,

On September 7, a strike of tin roofers took place in Montreal, Que., with the object of securing a change in an agreement, to provide for an increase in wages of five cents an hour. It was reported that about seventy-five firms and 275 men were directly affected by the dispute, and ninety-five firms, 320 men were indirectly affected. The strike was terminated on September 11, the demand of the strikers being granted. It was stated that the majority of the tin roofers were already in receipt of the wages demanded prior to the strike.

Strike of Telegraph Messenger Boys at Toronto.

It was reported in the press that a strike of about forty telegraph messenger boys of the Canadian Pacific Railway Company took place at Toronto, Ont. The cause of the strike was the enforcement of a new system for the delivering of 'dead-head' telegrams. No settlement of the dispute was reported during the month.

The table which is published herewith is a compilation of the trade disputes of the Dominion of Canada, which began or were in continuance during the month of September, and which have been reported to the Department.

REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of Departments and Bureaus were received at the Department of Labour, Ottawa, during July and August, 1910.

BRITISH REPORTS.

Changes in wages and hours.

Report on Changes in rates of Wages and Hours of Labour in the United Kingdom, in 1909, with comparative statistics for 1900-1908. London: Wyman & Sons, 1910. Pages, 136. Price, 6½d.

IN the report of the Board of Trade in changes in rates of wages and hours of labour, it is stated that the decline in rates of wages which commenced in the early months of 1908, continued through that year and the greater part of 1909. During the last three months of 1909, however, wages remained nearly stationary, and the preliminary figures for the first half of 1910 show an upward tendency, January being the only month in which the net result was a decrease in wages. In 1909, the number of workpeople reported to have been affected by changes in rates of wages was 1,154,800. Of these, 18,400 received increases amounting to £1,000 per week, and 1,131,500 sustained decreases amounting to £69,900 per week, while the remaining 4,900 workpeople had upward and downward changes, which left their wages the same at the end as at the beginning of the year. The net result was a decrease of £68,900 per week, while in 1908, 963,000 workpeople sustained a net decrease of £59,200 per week.

Changes in hours of labour affected 562,891 workpeople, of whom 3,212 had their aggregate working time increased by 6,399 hours per week, and 559,679 had reductions amounting to 2,398,721 hours. The number of workpeople whose hours of labour were changed was considerably in excess of the number in previous years, owing to the operation of the Coal Mines' Regulation Act, 1908, by which about 500,000 workpeople had their hours reduced.

Strikes and Lockouts in Great Britain.

Report on strikes and lockouts and on Conciliation and Arbitration Boards in the United Kingdom in 1909, with comparative statistics for 1900–1908. London: Wyman & Sons, 1910. Pages, 136. Price, 6½d.

The report on strikes and lockouts in Great Britain during 1909, states that the number of trade disputes recorded in that year was 436, involving directly and indirectly 300,819 workpeople, and having an aggregate duration of 2,773,986 working days. As compared with the average of the nine previous years, there was a decrease in the number of disputes, but there was a great increase in the number of workpeople involved. This increase is attributed to the stoppage of work in some of the principal coal fields, upon failure to adjust conditions of working when the Coal Mines' Regulation Act, 1907, was put into operation. Only 2.9 per cent. of the total number of workpeople engaged in industrial occupations were involved in trade disputes, as compared with the same percentage in 1908, and 1.4 per cent. in 1907. It is estimated that the aggregate duration of all disputes was less than one-thousandth of the aggregate number of working days available for the whole industrial population.

Of the 436 disputes which began in 1909, sixty-two were brought to a close by conciliation or by reference to arbitration. Including the disputes which began prior to 1909, and excluding those which were not ended until 1910, there were sixty-three disputes settled by conciliation or arbitration in 1909, a much higher number than in any previous year, and over twice as many as in 1900. The work of preventing strikes and lockouts through means of conciliation and arbitration also showed an advance, 1,997 cases having been considered by 124 boards, compared with 1,842 cases considered by 114 boards in 1908.

Agricultural Credit Societies.

Return of Agricultural Credit Societies registered as Specially authorized Societies under the Friendly Societies Act of 1896, with the date of registry, number of members and total assets; also of Irish Credit Societies, and a statement showing the varieties of land banks and societies registered to deal with small holdings and with loans for agricultural purposes. London: Wyman & Sons, 1900. Pages, 9. Price. 1½d.

A return issued from the office of the Registrar of Friendly Societies gives an account of the societies registered to deal with small holdings and with loans for agricultural purposes. While no group of societies is specially engaged in making loans to individuals occupied in the cultivation of land owned by themselves, there are a number of societies which carry on business of this nature in addition to other work. The principal development of societies along these lines has been in Ireland, where there exist about 500 registered agricultural societies chiefly, directed to the establishment of co-operative creameries, and to the supplying of artificial manures and seeds to their members. In addition there are 308 credit societies registered under the Friendly Societies' Act, a large proportion of which have been promoted by the Irish Agricultural Organization Society, Limited.

In England and Wales there are thirty-two agricultural credit societies, most of which were promoted by the Agricultural Organization Society Limited as auxiliaries to small Holdings and Allotment Societies. Nineteen of these were registered since the beginning of 1908. Specially authorized loan societies number 488 in England and Wales, and the Friends of Labour Loan Societies number about 250, but the operations of these two groups have no special reference to agricultural loans. In the whole of the United Kingdom, 137 land societies with a membership of 17,807, furnished returns for 1908. Land purchased during the year was valued at £27,581. Advances on mortgage security amounted to £159,835, and mortgage re-payments to £127,071. The land thus acquired is used principally for the erection of dwelling houses. There are about 160 agricultural co-operative societies in England and Wales.

Railway Accidents.

Returns of accidents and casualities as reported to the Board of Trade by the several railway companies in the United Kingdom, during the entire year ending 31st December, 1909. London, Wyman and Sons, 1910. Pages, 39. Price, 4d.

The returns of accidents and casualities on railways in the United Kingdom, show that in 1909 there were 971 persons killed and 7,592 persons injured, a decrease of 72 killed and 392 injured compared with the previous year. There were also 65 persons killed and 20,792 injured on the premises of railway companies, in which the movement of vehicles was not concerned, and three killed and twenty-nine injured on railway lines belonging to dock companies and harbour authorities. Only one passenger and sixteen employés were killed by accidents to trains, rolling stock, &c., while 390 passengers and 129 employés were injured through these causes. There were sixty-three fatal and thirty-six non-fatal accidents at level crossings during the year 1909.

The Housing Problem.

Report on back-to-back houses by Dr. L. W. Darra Mair, with an introduction by the Medical Officer of the Board. A report on relative mortality in Through and Back-to-Back houses in certain towns in the West Riding of Yorkshire. London, Wyman & Sons, 1910. Pages, 48. Price, 3d.

In the crowded centres of population in England, landowners have frequently sought to provide additional dwellings by building houses back to back with only a party-wall between them. The future erection of houses of this kind has been prohibited by the housing, town planning, &c., Act, 1909. An inquiry made on behalf of the Local Government Board by Dr. L. W. Darra Mair, shows the wisdom of this prohibition. According to the statistics which he has gathered, even relatively good types of back-to-back houses when built in rows, in healthy localities, have a death rate which is from fifteen to twenty per cent. in excess of the death-rate in through houses, having windows in front and in rear. This excess is due to lack of ventilation, and is not so apparent in back-to-back houses built in blocks of four. There is, however, excessive mortality from certain groups of diseases, such as diseases of the chest and those associated with defective growth and development of the young child, in both classes of back-to-back houses. The chief sufferers from residence in these houses are infants and children up to fifteen years, and old people from sixty-five years of age and over.

Cost of Living.

Minority report of the Select Committee on wages and prices of commodities. Part 2. Washington: Government Printing Office, 1910. Pages 56.

The minority of the Select Committee of the United States Senate on Wages and Prices of Commodities, object in their report to the following causes advanced by the majority to account for the increase in prices: (1) Increased cost of production of farm products by reason of higher land values and higher wages. It is claimed that the high price of land is not a cause but an effect of the high price of farm products. (2) Increased demand for farm products. It is shown that the increased production of crops and farm animals has more than kept pace with the increase in population. (3) Shifting of population from food-producing to food-consuming occupation and localities. (4) Immigration to food-producing localities. The opinion is expressed that the shifting of population from the farms to consuming localities has increased the production of crops and brought into cultivation over 40,000,000 acres of land in nine years. (5) Reduced fertility of land resulting in lower average production, or in increased expenditures for fertilization. It is shown that there is actually a greater average yield per acre, in 1910, compared with the year 1900. (6) Increased banking facilities, enabling the farmer to hold his crops and market to best advantage. This is considered by the minority as a good feature, as it enables the producer rather than the speculator to enjoy profits.

With regard to other causes set forth by the majority, it is denied that there has been a notable increase in cost of distribution since 1900. It is claimed that no evidence was produced to show that advertising was a factor of the slightest importance. In conclusion, the minority find that the three substantial causes for the advance in prices are: (1) The tariff. (2) Trusts, combines and monopolies. (3) Increase money supply.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopses of recent cases affecting labour are based upon the latest reports of legal proceedings and other legal records of the different Provinces of Canada.

ONTARIO CASES.

Damages for Flooding Lands.

FOUR actions, which were tried together, were brought to recover damages for alleged flooding of the plaintiff's lands by the defendant mill owners, owning and occupying mill privileges on Crow river, and for an injunction restraining further flooding. Crow river flows out of Crow lake, which is a body of water embracing about 2,000 acres. Into Crow river flow the waters of Beaver creek, and into Crow lake, a short distance from the head of Crow river, flows Cain's creek. The lands of the several plaintiffs abut either on Crow lake, Crow river, Beaver creek or Cain's creek, and the plaintiffs claimed that the defendants, by the maintenance of their dam in Crow river, caused damage to plaintiff's lands by unlawfully penning back the waters of Crow river, thereby flooding the lands. The defendant mill owners, having mill privileges on Crow river, built a new dam across the river. Plaintiffs claimed that the new dam was considerably higher than the old one, and that this caused the flooding. Evidence was received as to the height of both dams, and it was very conflicting. Mr. Justice Teetzel, who tried the actions, found in favour of defendants on the evidence that the new dam was in fact no higher than the old dam, but that the old dam was in a very leaky condition, therefore the new dam raised the level of the water on the neighbours' lands. He ordered a reference to an officer of the court to ascertain the damages sustained by plaintiffs. Having regard to the great delay of which all the plaintiffs

were guilty, and to their failure to establish the defendants raised the height of their dam, the injunction asked for was refused, the injuries sustained being capable of compensation and not irreparable. The costs were reserved until after the report of the referee.

(Cain and others v. Pearce Co., Ltd., 16 Ont. W.R. 846.)

Costs of Quelling a Riot During a Strike.

The Crown and others brought action against the municipal corporation of Sault Ste. Marie to recover the costs, charges and expenses incurred by calling out troops to quell a riot during a strike of the employés of the Lake Superior Corporation, at the town of Sault Ste. Marie, in September and October, 1903.

Plaintiffs claimed $7,293.28. Defendants disputed the regularity of the requisition for troops, and the necessity of calling out any other than the local regiment, whose claims were paid by the defendants. The action was tried by Chief Justice Falconbridge, who held that the requisition complied with the requirements of the Militia Act, R.S.C. 1906, c. 41, s. 34. He gave judgement for the plaintiffs with costs.

Referring to the defence the Chief Justice said: "It does not commend itself to me as a matter of morals. When the requisition was signed there were 1,200 to 1,500 riotous men at the works of the allied companies, with the prospect of their members being largely increased as men were coming in from the outside works. Frantic telegrams were despatched by the Mayor, the Commanding officer of the local regiment of militia, the members of the House of Commons and the Legislative Assembly to the Minister of Militia, to his Deputy, and to the D.O.C. at Toronto. The few men of the 97th (the local) regiment, who could be mustered, were on duty at various points for thrity-six hours when relieved by the R.C.R. The Mayor had stated in one of his telegrams that the local militia were not able to cope with the situation, and that 200 more troops were needed. Under all the circumstances I have not the slightest doubt but that the prompt action of the D.O.C. at Toronto (the late General, then Colonel, Buchan) in taking the whole of the available permanent force and ordering out seventy men from each of the three city regiments, saved the situation and prevented incalculable injury to property and probably personal injury and loss of life. There is another matter pleaded in the amended statement of defence. It is in effect that large public works, e.g., the ship canal, the swing bridge, and the electrical plant are in the immediate vicinity of the scene of the rioting, and that the expense connected with protecting these works (which are said to have cost several millions of dollars) should be paid by His Majesty, out of the public moneys of the Dominion of Canada, and not by the town. This I hold to be no defence in law. And it does not appeal to me on any ground, for it is interesting to consider what would have been the plight of the town and its citizens if the locks, the bridge, the electrical plant and the works of the allied companies had been destroyed by one cataclysm. Plaintiffs are entitled to judgment."

(Rex v. Sault Ste. Marie, 16 Ont., W.R. 871.)

Damages for Filling Up a Cattle Pass.

Plaintiffs sued the defendant railway Company to recover damages for filling up a cattle pass, under defendants' line of railway, and substituting for it an embankment with a pipe through it to carry off the water, and asked for an order of the Court requiring defendants to restore the pass to its former condition.

Plaintiff claims under a clause of a deed of conveyance to defendants' predecessors in title, which provided that the parties of the second part would not interfere with the flow of the waters of a certain drain upon the said lot. Plaintiff also claimed the use and enjoyment of the cattle pass by length of time, and sought to invoke section 257 of the Railway Act to show that the railway had no authority to do what they had done without leave of the Board of Railway Commissioners.

Chief Justice Meredith, who tried the action, held that the above section of the railway act had no application; that

there was no evidence of any agreement that plaintiff or his predecessors should have any right to use the culvert as a cattle pass; that the decision in Canadian *Pacific Railway v. Guthrie*, 31 S.C.R. 155, was decisive against the claim for use and enjoyment of the pass as claimed; and that defendants had the right to substitute any other means of drainage which was sufficient to enable the water to flow through the drain mentioned in the conveyance. Plaintiff's action was dismissed without costs.

(Oatman v. Grand Trunk Railway Company, 16 Ont., W.R. 905.)

MANITOBA CASES.

Workmen's Compensation Act.--Injury to Employé.

A carpenter in the service of the defendants was told by a foreman to do certain work, and, in doing the work, found it necessary to move a plank fixed above the floor of the workshop. Standing on the floor he could not quite reach the plank, and he therefore took a ladder which was in the shop and stood upon the lowest step, which gave way, and he fell upon machinery and was injured. It was held (1) in an action under the Workmen's Compensation Act, that, there being some evidence that the ladder was the property of the defendants, it was to be inferred that it was there designedly, and with the object of being used for those purposes for which a ladder might advantageously and ordinarily be used, and that it was part of the plant, buildings, or premises, in connection with the work to be done, and that the plaintiff did nothing more in using it as he did than would commend itself to the judgement of ordinary men as being a prompt and practical method of carrying out the foreman's instructions, and that there was evidence that the ladder was applied to a use impliedly authorized by the foreman. It was also held, (2) that from the evidence the conclusion might fairly be drawn, that the foreman who gave the order was the one entrusted with the duty of seeing that the ways, works and plant were in proper condition; (3) that the jury's finding that the ladder was defective was amply sustained by the evidence; and, therefore, (4) that there was evidence of negligence to be submitted to the jury—Mr. Justice Perdue dissenting. It was also held, (5) that a finding of the jury to the effect that the plaintiff was guilty of negligence in that he might have used some other and safer method of reaching up to and shifting the plank, was not relevant to the issues, and should not stand in the way of a judgement for the plaintiff. It was also held, (6) that the amount of damages assessed by the jury, $1,500, was not excessive, and that the Court should not interfere on the ground that the plaintiff's injury might have been less serious if he had followed the advice of a specialist.

This is a summary of the judgements in the Court of Appeal to which the case had been taken. One of the judges, Mr. Justice Perdue, who dissented, stated in his judgement, that the plaintiff himself adopted the method he took of shifting the plank, without the direction from the foreman; that he negligently adopted a dangerous method when a safer one was open to him; and, therefore, there should be a non-suit.

(Higley v. City of Winnipeg, 14 Western L.R. 549.)

Trade Combination.--Maintaining Prices and Preventing Competition.

In an action to recover damages claimed under an agreement, it appeared that the agreement between plaintiff and defendant, both dealers in junk, was to prevent competition and to maintain fixed prices to be paid for junk, the tendency of which was to lower the prices of junk sold to the consumer, with a further provision for a division of profits.

The agreement was not held void at common law as being in restraint of trade following *Collins v. Lock*, 4 English Appeal cases, 674. The agreement was also held not a violation of section 496 (*b*) of the Criminal Code, following *Rex v. Gage*, 18 Man. L. R 175. But it was held, that the agreement being between two dealers who practically monopolized the junk trade of Western Canada was an agreement unduly to prevent o

lessen competition, and was void as being in contravention of section 498 (*d*) of the Code—according to the following decisions: *Rex v. Clarke*, 9 Western L. R. 243; 1 Alberta L.R. 619; and *Rex v. Elliott*, 9 O.L. R. 648.

The action, so far as the plaintiff sought an accounting under the agreement, was dismissed with costs.

(Shragge v. Weidman, 14 Western L.R. 561.)

Building Contract and Sub-contract.--Extras--Changes in Work.

The defendants were the contractors for a building, and the plaintiffs sub-contractors for the stone and masonry work. The plaintiffs claimed payment of $66 for extra plastering, not originally provided for,—it was held, (1) on the evidence, that, although the plaintiffs did plastering not provided for, more plastering was omitted by the change, and as to this item the plaintiffs failed.

The defendants alleged that $1,480 should be deducted from the plaintiff's contract price because alterations were made in the plans, reducing the height of the wall in stone, and the contract provided that, in case of alterations in the work shown or described by the drawings and specifications, the value of the work added or omitted should be added to or deducted from the contract price. The plaintiffs contended that the $1,480 was counterbalanced by additional work caused by such alterations. The plaintiffs were to act under the direction and to the satisfaction of the architects, whose decision was to be final, and all payments were to be made only under the written certificate of the architects. It was also held (2) that the certificates of the clerk of the works, relied on by the plaintiffs, were not certificates of the architects and had no effect; that there had been no adjustment of accounts between the parties at Montreal, as alleged by the plaintiffs; and that the plaintiffs had not made out a case of counter-balancing the $1,480 by additional work; and a non-suit was granted.

(Winnipeg Stone Co. v. Senecal, 14 Western L.R. 570.)

Master and Servant.--Action for Wrongful Dismissal.

In an action to recover for damages for the wrongful dismissal of the plaintiff from the services of the defendants, it is not necessary for the plaintiff to aver that he was ready and willing to continue to serve the defendants.

The defendants, an incorporated company, hired the plaintiff as foreman. The contract of hiring was in writing, purporting to be signed by the Company, by their president, but without the corporate seal. The hiring was for more than a year. It was held (1) that the president had authority to make the contract; it being in general accordance with his powers, and it was, therefore, binding on the Company. Manitoba Joint Stock Companies Act, section 64. It was also held (2) as to damages, that the plaintiff, considering the time of year when he was dismissed, and the improbability of securing work, was justified in not seeking employment immediately after his dismissal. It was also held (3) that the dismissal was not justified by the fact that, in making some moulded caps, he had made a mistake which rendered the caps useless to his employers; but that a counterclaim for this should be allowed, and the plaintiff's damages reduced the amount thereof.

(Beaugage v. Winnipeg Stone Co., 14 Western L.R. 575.)

BRITISH COLUMBIA CASES.

Workmen's Compensation Act.--Injury to Workman.

The plaintiff, a workman employed by the defendant mining company, was injured in November, 1907. In October, 1908, he obtained an award in his favour for compensation under the Workmen's Compensation Act, 1902. At the date of the award the Mining Company were insolvent and in course of winding up. The plaintiff alleged that the defendants, the casualty company, were liable to indemnify the mining company against losses or liability under the

award, and an order was asked for directing payment, by the casualty company, of the amount of the award into a chartered bank, pursuant to section 6 of the Act. A judge of the Supreme Court granted the order, but it was set aside by the full Court: 14 B.C.R. 256. A subsequent application by the plaintiff for an issue, to determine the liability of the casualty company to indemnify the mining company, was dismissed: 11 Western L.R. 251, 14 G.C.R. 275. Thereupon the plaintiff brought this action for a declaration that he had a first charge upon the moneys which the mining company were entitled to receive from the casualty company, and for an order for payment pursuant to section 6. The defendants admitted that they had issued a policy which was valid and subsisting at the date of the plaintiff's injuries, by which they agreed to indemnify the mining company against loss for damages on account of bodily injuries suffered within the period of the policy by any employé. The trial Judge dismissed the action, on the ground that there was no privity of contract between the plaintiff and the casualty company, or, as he expressed it, that the plaintiff had no status. It was held by the Court of Appeal, that the judgement should be affirmed.

Chief Justice Macdonald said that, unless section 6 gave the plaintiff a status to maintain the action, he had none; and it was not open to the plaintiff to ascertain the liability of the insurers to the mining company in an action such as this. The creation of the charge alone, without reference to that part of the section which gives a remedy for enforcing it, does not effect the subrogation mentioned in *Northern Employers Mutual Indemnity Company v. Kniveton*, 18 Times L. R. 504; (1902) 1 K. B. 880; and *Morris v. Northern Employers Mutual Indemnity Company*, 18 times L.R. 635; (1902) 2 K.B. 165. Were it not for the decision of the full Court in 14 B.C.R. 256, section 6 might be construed as intended not only to give the workman a charge on the insurance moneys, but also to provide the means of enforcing it, whether the insurers disputed their liability or not.

Mr. Justice Irving said, that the liability of the casualty company under section 6 could be determined only in an action by the liquidator of the mining company.

Mr. Justice Martin said that section 6 affords a novel measure of relief to the workman, which can be obtained or enforced only in the way specified in the section, which at the same time creates a first charge upon the amount due from the insurer to the employer, and directs how the workman shall assert his rights in the premises, viz., by means of an application to a Judge of the Supreme Court. An action in the Supreme Court cannot be deemed to be an application to a Judge of the Supreme Court, because the Judge is the person particularly designated: In *re Vancouver Incorporation Act and Rogers*, 9 B.C.R. 373. And apparently the Judge would be a competent tribunal to make a finding that the employer was entitled to a sum from the insurers, notwithstanding the absence of Rules.

(Disourdi v. Sullivan Group Mining Co. and Maryland Casualty Company, 14 Western L.R. 577.)

Action to Enforce Mechanic's Lien.

In an action in a County Court to enforce a mechanic's lien, the plaintiff's statement of the work done not complying with section 12 of the Mechanic's Lien Act of 1900, an amendment of the plaintiff was allowed, it being held that section 13 gave power so to amend.

The plaintiff's contract was to lay bricks by the thousand, but he sought to affix to it an alleged usage of bricklayers, that, in a contract to lay bricks by the thousand, unless kiln count is specified, the method of ascertaining the number of thousands is by measuring the wall. There was no evidence that this alleged usage was known to the defendant, and he stated that it was not known to him:—It was held (1) that the alleged usage was an unreasonable one, and not binding on the defendant; and the plaintiff was entitled to recover for laying only the actual number of bricks in the wall, that is, on the basis of kiln count.

The bricks were put into the wall in a wet condition, and it was shown that, in order to make good work, the bricks should be dry. The wall fell down, and the plaintiff rebuilt part of it, but it cost the defendant $590 in labour to do the rest of the work. It was also held, (2) that the defendant was entitled to a set-off of $250 as claimed by him.

(Allen v. Deane, 14 Western L.R. 622.)

SASKATCHEWAN CASES.

Right of Domestic Animals to Run at Large.

The plaintiff's and defendant's farms, both unfenced, were separated by a highway. The plaintiff's mare strayed on to the defendant's land, ate some posioned wheat designed for vermin, and died. It was held by the full Court of the Province, that the defendant was not liable for the loss of the mare, which had no right to be on the defendant's land. The Court specially referred to *Ponting v. Noakes* (1894) 2 Q.B. 281. The common law, the Court declared, has not been so modified in Saskatchewan by custom and legislation that it can be said to be lawful for cattle and horses to range at large in unfenced property.

(Kruse v. Romanowski, 14 Western L.R. 696.)

UNITED STATES CASE.

Decision of Justice Goff Declaring Strikes Against the "Open Shop" Illegal,

A strike which demands the "closed shop," according to a decision rendered August 27 by Mr. Justice Goff, of the Supreme Court, is a conspiracy in restraint of trade and therefore illegal. The ruling came in the form of an opinion granting an injunction asked by certain cloak makers against 69,600 strikers. The case was that of Max Swartz, treasurer of the Cloak, Suit and Skirt Manufacturers' Protective Association, against the International Ladies' Garment Workers' Union and others.

In all their demands to the employers the strikers had insisted that the shops should be unionized. The employers refused.

Justice Goff said in part:

"In 1908 New York, the decision of the Appellate Division in McCord against Thompson-Starlett Company, the Court of Appeals has declared that it is against the public policy of the state for employers who control practically the whole trade in a community to combine for the purpose of compelling workmen to join a particular union as a condition of employment.

"If the rule laid down in the McCord case be the law, and it must be accepted as such, being the latest expression of the Court of Appeals, it must be applicable to workmen as well as to employers. It would be repugnant to reason to hold that it applies to one and not to the other. What the employers may not do the workmen may not do. If a combination of one to refuse employment, except on condition of joining a union, be against public policy, a combination of the others to cause refusal of employment, except on condition of joining a union, is alike against public policy.

"This refusal was sought to be caused by the demand of the defendant unions made upon all the employers in the trade that the non-union men already employés should be discharged in two weeks unless they joined the union. This charge under such circumstances would be a refusal to employ."

Further on the Court said:

"The primary purpose of this strike is not to better the conditions of the workman, but it is to deprive other men of the opportunity to exercise their right to work and to drive them from an industry in which by labour they may have acquired skill and which they have a right to pursue to gain a livelihood without being subjected to the doings of things which may be disagreeable or repugnant. That this is the motive which animates the combination of defendants is clear from the correspondence the negotiations, the conferences, and the actions disclosed in papers before the Court."

The Court then states in the most positive terms that the purpose of the strikers is unlawful:

"Some ten days after negotiations had been discontinued, counsel for the unions made a proposition to one of the manufacturers looking towards a settlement of the whole controversy, as follows: 'The Association is to obligate each of its members to employ union men as long as the union will be able to furnish union men who can do the work properly. Within two weeks the non-union men shall join the union. I am certain an agreement will be reached on all other matters.' In insisting upon the closed shop it was doubtless the intention of the union to get the whip hand of the manufacturers by perfecting a powerful organization. That agency would thereafter insure respect for their demands for a continuance of the wages and hours which the manufacturers are now ready to concede, but, here, as in the McCord care, the ulterior purpose of the union is immaterial, if the immediate purpose is unlawful. That it is unlawful has been shown."

Then follows an account of the threats, attacks and assaults of which the strikers were said to be guilty:

"In aid of their purpose, defendants have employed illegal means. From the inception of the strike until the present day, members of the unions who were formely employés of members of plaintiff's association have interfered with the business of the manufacturers by forcible entry of the shops and destruction of property therein, assaults and batteries of a serious nature upon employés who refused to stop work, threats to employés who were not unionists to beat or kill them, similar threats to wives and members of the families of such employés, use of opprobrious epithets and picketing the streets with unruly throngs.

"At large expense the manufacturers have been obliged to hire guards to conduct their employés to and from their homes or to provide sleeping accommodations for them in their shops. These facts are fully attested by over fifty affidavits of employés and manufacturers who have been threatened or whose places of business have been forcibly entered and by the record of testimony in police courts.

"If the unions have not formally directed a systematic course of aggression by criminal acts, the members of the unions, acting in concert, have connived at, condoned, and morally supported such acts on the part of many of their members, in pursuance of a common object."

THE

LABOUR GAZETTE

NOVEMBER, 1910.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF OCTOBER, 1910.

I.—GENERAL SUMMARY.

THE usual pressure of work in anticipation of the close of the season of outdoor employment was noted throughout October, the prevailing mild and clear weather and the general buoyancy of trade and industry accentuating this activity during the past month. Exceptionally good progress was made with ploughing and the marketing of the grain crop and the root crop has been gathered under favourable conditions. In the lumbering and mining industries, the general activity of the past few months has been well maintained, with the outlook for the approaching winter favourable. Railway construction, building and civic improvement operations were prosecuted with the utmost vigour, the supply of available labour being completely absorbed in nearly all sections and a scarcity reported at several points, especially in Western Canada. Manufacturing establishments continued very busy, expansion being noted in many localities and branches. General trade has been active, with money plentiful for the moving of the crops. In the latter connection shipments have been lighter than last year, as a result in part of the diminution in western yields. The immigration movement has been heavy.

With regard to the approaching winter season, the outlook is regarded as exceptionally favourable for labour. The large amount of construction work in hand will involve a corresponding increase in the amount of indoor work to be completed, while the steady employment and high wages of the past summer has left workmen, who are primarily dependant upon outdoor employment, favourably situated to meet a period of intermittent activity.

Changes in Wages and Hours of Labour.

The following is a statement by industries and groups of trades of the more important changes in wages and hours of labour, information concerning which was received at the Department of Labour during October, 1910.

Building trades.—Plasterers, (12) at Brantford, Ont., had their wages increased from 30 to 35 cents per hour.

Woodworking trades.—Pattern makers' wages at Brantford, Ont., were increased five per cent.

Civic employés. — Eight hundred trench diggers employed by the City Council of Calgary, Alta., were advanced from $15 to $16.35 per week. Poilcemen (75) at Ottawa, Ont., were granted one day of rest in seven without reduction in wages, twelve additional policemen being engaged to make the arrangement practicable.

Railway employés. — Increases to trackmen and yardmen on the Temiscaming and Northern Ontario Railway, estimated to aggregate $15,000 per annum, were granted from October 1, by the Commission operating the railway after extended negotiations. A small increase

The LABOUR GAZETTE, in its accounts of proceedings, abstracts of reports, legal decisions, quotations or other records of matters of concern to labour, is not to be regarded as necessarily endorsing any of the views or opinions which may be expressed therein.—Ed.

in wages was granted to Grand Trunk Railway telegraphers under the award of a committee of arbitration.

Street railway employés.—Street railway employés at Fort William and Port Arthur, Ont., received a slight advance.

Interruptions to Industries.

Among industrial establishments, &c., destroyed by fire or through other causes, during October, 1910, as reported in the press of the Dominion, the following may be mentioned:—

Nova Scotia.—Business block at Amherst, loss, $30,000, livery stable, two stores and residences at Florence, loss, $60,000; stores at North Sydeny, loss, $30,000; carriage factory at Athol, loss, $35,000; saw-mill at Salmon River, loss, $1,000; woodworking factory at Stellarton, loss, $5,000; granary and contents at Wolfville, loss, $4,000.

New Brunswick.—Grocery store at Moncton, loss, $2,000; the schooner *Neal Dow* was wrecked near Richibucto; furniture store at Sackville, loss, $1,500.

Quebec.—Outbuildings at Aylmer, loss, $1,500; business block at Asbestos; clubhouse at Grand Mère, loss, $9,000; bakery, livery stable and grocery at Garthby, loss, $4,000; granary and contents at Millington, loss, $2,500; mattress factory at Moe's River, factory and grist mill at Marieville, loss, $4,000; summer residence at Napierville, loss, $1,700; dry-dock (partial) at Levis. At Montreal, church, loss, $3,000; stables and five horses, loss, $1,000; tenement house, loss, $2,500; storehouses, loss, $5,000; paint shop; railway shed; business block, loss. $50,000; two stone barges, loss, $7,000; St. Mary's College (partial) apartment house, loss, $40,000; garage and six cars, loss, $30,000; tailor shop; gasoline launch *Cygne*. Convent (partial) at Richmond; monastry at Roberval; granary and contents at St. Paul l'Ermite, loss, $5,000; woodworking factory at Ste. Cecile de Wendover, loss, $12,000; store at Quebec, loss, $5,000; tenement house at Sillery Cove; schooner *Rosedale*, total loss, at Strawberry Cove, Anticosti; town hall at Three Rivers, loss, $20,000.

Barns at Bury, Piopelis and West Bolton.

Ontario.—Fire tank at Blenheim; flour mills at Brampton, loss, $15,000; granary and crop at Cornwall, loss, $8,000; outbuildings at Crewson's Corners, loss, $2,500; outbuildings and residence at Galt, loss, $5,000; organ factory at Goderich, loss, $50,000; livery stables and thirteen horses at London, loss, $30,000; planing factory at Merrickville, loss, $10,000; apple evaporator factory at Mullgrove; confectionery store and residence at Morristown; outbuildings and residence at Norwich, loss, $1,000; outbuildings at Owen Sound, loss, $1,000; cheese factory at Peterborough, loss, $3,000; barge *Lycoming* at Roddeau; outbuildings and Boy's Home at Shawbridge, loss, $3,000; machine shop at Smith's Falls; dry house and contents at Sparta, loss, $1,000; drug store (partial) at Toronto, loss, $1,000; hotel at Uxbridge, loss, $3,000; granary and crop at Villa Nova, loss, $6,000; hotel at Waterford, loss, $4,000.

Barns at Collins' Bay, Charleston, Cobourg, Haldimand and Trevelyan.

Manitoba.—Stables and four horses at Brandon; outbuildings and contents at Selkirk, loss, $2,500; Isolation hospital and grocery warehouse, loss, $260,000, at Winnipeg.

Saskatchewan.—Granary and contents at Indian Head, oss, $10,000.

Alberta.—Skating rink at Lacombe, loss, $2,000.

British Columbia.—Salteries at Nanaimo, loss, $15,000; storage warehouse at Vancouver, loss, $100,000, retail business section of Victoria, loss, $1,000,000.

In the last week of October destructive storms prevailed on the Northern coast of British Columbia during which the Grand Trunk Pacific Railway bridge at Kyax was blown down and the track washed out for two miles.

Conditions in the Industries and Trades.

Conditions of employment during October, in the several industries and groups of trades throughout Canada, as indicated by reports of correspondents of *The Labour Gazette*, and by information received at the Department of Labour from other sources, may be briefly summarized as follows:—

Agriculture.

Weather conditions were favourable for agriculturists during October and good progress was made with fall ploughing, threshing, the marketing of the grain crop and the harvesting of the root crop, the last mentioned turning out well. Pastures were in good condition and the flow of milk abundant. Prices have been firm for dairy produce, but easier in the case of hog products, beef, wheat and flour. The movement of western grain has been fairly heavy; it is estimated also that a considerably larger number of cattle has been shipped from the ranches than last year, with the result that feeders and stockers are scarce at certain points in Alberta.

Earlier reports as to the falling-off in the apple crop have been confirmed; the scarcity is particularly noticeable in Nova Scotia where the output is estimated at less than 200,000 barrels in lieu of 700, 000 barrels last year.

With the approach of winter the demand for farm hands has fallen off, though additional men were required in certain districts of Western Canada, where wages range from $25 to $40 per month with board.

The Census and Statistics Monthly for October shows lower averages of conditions for the whole of Canada than those of a year ago, though the reduction applies chiefly to the Northwest Provinces. Trial shipments of Niagara peaches to the

British market, under the auspices of the Department of Agriculture, Canada, have been highly successful and are regarded as marking the beginning of a new phase in the development of the Canadian tender fruit trade.

A cablegram received October 22, from the International Agricultural Institute, Rome, gives the yield of wheat crop, estimated October 1st, as follows:–

France. — 263,923,000 bushels compared with 359,178,000 last year and a ten year average of 335,388,000.

Italy.—153,339,000 bushels, 193,853,000 last year, 165,347,000 reported last month.

Roumania.—110,863,000 bushels, 58,873,000 last year and 108,853,000 last month.

Great Britain and Ireland.—56,075,000 bushels, against 54,250,000 last year, and ten years' average of 55,355,000.

Fishing.

Though sardine fishermen made some good catches off the New Brunswick coast, the month in the Maritime Province on the whole has been a poor one. Mackerel and herring were scarce, and rough weather interfered with operations. The same cause kept down the catch of oysters, which was the chief branch of the industry prosecuted during the month on Prince Edward Island. Hand line fishermen have had a poor season. Dog fish were abundant and caused considerable damage.

On the Great Lakes and in British Columbia conditions were normal. In the latter Province extensive developments in the halibut fishery are promised; it is also stated that five additional whaling steamers will be employed off Vancouver Island next year. Three new fish hatcheries have been completed on the Island by the Dominion Government. Recent reports from the salmon fisheries of Northern British Columbia are to the effect that the salmon pack of the present year is the largest ever put up in that district, the run on the Skeena River having been unusually heavy.

New regulations with reference to the oyster and lobster fisheries, based on the recommendations of the Committee of the House of Commons of the past Session, were promulgated during October.

The Fisheries' Commission appointed by the Dominion Government to investigate conditions in the fishing industry in Saskatchewan and Alberta took evidence at Medicine Hat and other localities during October.

Lumbering.

Several of the mills in Eastern Canada have closed down for the season, but the great majority were still running and will continue in operation until the severe weather. The outlook with regard to the coming winter season in the woods has not changed materially since last month, but a small cut in New Brunswick is regarded as not improbable. Though at Ottawa and other points, there was some increase in the supply of labour offering, skilled workmen were on the whole scarce, and wages were firm to upwards as compared with last year. In British Columbia the activity of the past few months was still maintained, and though there was some falling off in the log scaling returns, the general tone of trade was satisfactory. It was stated that arrangements had been entered into between the Retail Lumber Dealers' Association of the Northwest Provinces and the associations representing the coast and mountain lumber millmen of British Columbia, whereby a preference will be given to lumber sawn in British Columbia as compared with product manufactured in the United States. Some curtailment of mill production will be made as the demand from the Prairie Provinces declines with the approach of winter.

A movement has been begun among the employés of lumber camps in British Columbia to bring to the attention of the Government the necessity for providing improved sanitary arrangements in the camps. It is pointed out that the Provincial Health Act is not enforced in certain lumber camps in the Province.

Mining.

The coal trade in Nova Scotia was very active and the outlook is for a busy winter. The Dominion Coal Company has banked 300,000 tons at the collieries

TABLE SHOWING STATE OF EMPLOYMENT IN

This table is based largely on the reports of the correspondents of *The Gazette* as published in the present issue several trades and industries throughout the Dominion. The table has reference only to the amount of employment headings in *The Gazette*. In tabulating the information in question, the terms employed are divided into two groups, the very active, (2) quiet and very quiet.

and 200,000 at Sydney, N.S. Shipments from the Pictou district were slightly smaller during the past month than during the corresponding month of 1909. The Maritime Coal Company closed down its mine at Chignecto and strike conditions still prevailed at Springhill; apart from these features the month was favourable. In Alberta, coal miners were in active demand, but the mines of the Crow's Nest Pass Company were working short time on account of a scarcity of railway cars. The Vancouver Island collieries had a good month.

Metalliferous mining was on the whole active. The asbestos properties of Quebec were producing steadily. In the Cobalt and other Ontario camps conditions were reported very active. The metalliferous fields of British Columbia were showing a steady output.

The leading mines in Cobalt are shipping more silver than in 1909, as the following results for the seven months ending with July show:—

Month.	1909	1910
January	2,409.05	2,025.06
February	2,137.53	2,248.99
March	2,516.79	2,594.78
April	2,499.79	2,814.08
May	2,491.78	2,243.17
June	3,287.78	2,917.00
July	2,325.10	*3,113.70

*Unofficial.

The rate of production indicates that the silver mines will ship at least 31,000 tons in 1910, as compared with 29,942 tons in 1909; moreover, more concentrates are represented in current shipments.

The annual report of the Consolidated Mining & Smelting Company of Canada, Limited, showed that the tonnage of ore handled at the smelter was 487,125 tons, compared with 347,417 tons in 1909. The property and plant accounts, after paying for two new properties and several additions, and after writing off for depreciation $175,502, show an increase of $244,202.

At the annual meeting of the Granby Consolidated Mining, Smelting & Power Company, held at New York, October 4, it was stated that the Company was free from debt and had over $100,000 in cash and copper in transit. Two additional furnaces will be blown in at Grand Forks, B.C., immediately.

According to the annual report of the Deputy Minister of the Ontario Bureau of Mines, the total mineral output of the Province for 1909 had a value of $32,981,375, an increase of twenty-eight per cent over 1908, the year of the previous highest record. The total output of silver was 25,903,985 ounces, valued to the mining companies at $12,464,722.

The Annual Report of the Coal Mines' Branch of Alberta shows that the output of coal in 1909 was 2,174,329 tons, an increase of 17.85 per cent. over 1908. This increase would have been still larger had not three-quarters of the production been shut off for three months owing to strikes.

The Mines Branch of the Department of Mines, Canada, is installing an experimental testing plant in Ottawa for the concentration of magnetic ores.

Manufacturing.

Manufacturing establishments had an active month, the volume of production being well maintained. Factories of all kinds were for the most part running full time with full staffs. Considerable expansion in buildings and equipment was in progress. Iron and steel plants were very active.

A criterion of the activity of flour milling in Canada during the past year is afforded by the reports of the three largest Manitoba flour milling companies of the country, which were issued during October. Aggregate profits of the Lake of the Woods' Milling Company, the Western Canada Flour Mills Company and the Ogilvy Flour Mills Company, Limited, show a decline from $1,832,095 in 1909 to $1,233,496.

The Quebec Boot & Shoe Manufacturers' Association held its general meeting recently. The Conciliation Committee, composed of nine manufacturers and nine workmen held twelve meetings during the year, by means of which a considerable number of difficulties were settled. Mr. Luc Routier was elected president, and Mr. L. Rouillard, secretary.

Railway Construction.

The month was a very busy one with labour in active demand, especially in Western Canada.

An application was made to the Government of British Columbia to permit the employment of Asiatic labour on the construction of the Grand Trunk Pacific line through that Province. The application pointed out that contractors had declined to take on additional work from the British Columbia end owing to the scarcity of labour. The application was refused.

Increasing activity in railway development is evidenced by the large number of applications to Parliament for legislation appearing in the *Canada Gazette*. Among others, the Canadian Pacific Railway Company is asking authority to construct five new branch lines in the Northwest.

Construction will be immediately commenced from Crofton, B.C., of the Cowichan branch of the Esquimault and Nanaimo Railway.

The annual report of the Department of Railways and Canals shows that the capital expenditure during the past fiscal year on the National Transcontinental Railway construction was $19,968,126, bringing the total expenditure on March 31st last up to $71,918,843, representing 1,106 miles of the line graded, 813 miles of track laid, and a little over sixty per cent. of the whole work from Winnipeg to Moncton completed. The grand total of Federal expenditure on the railways and canals of Canada on March 31st last was $556,326,737, of which $126,328,956 was spent on canals. The total canal traffic amounted to 33,720,748 tons, an increase of 16,217,928, or nearly one hundred per cent., as compared with 1908.

During the present year the Province of New Brunswick will have had 256 miles added to its railway mileage. The addition will be the Grand Trunk Pacific line, from Moncton across the Province to the border of Quebec. In addition to its value as part of a transcontinental line this road will open up valuable new territory, rich in hard woods, coal area and regions of granite and some desirable farming sections. The new Intercolonial road from the Maine border to Campbellton making connections with Gaspé is nearly completed.

General Transport.

Railway and street railway employés had a busy month, but the movement of western grain has fallen off compared with last year and navigation companies were affected accordingly, shipments of grain from the head of the Great Lakes being estimated to show a thirty per cent. decrease.

At the twenty-ninth annual meeting of the shareholders of the Canadian Pacific Railway Company it was announced that the Company's steamship service on both oceans would be improved, involving an extensive building programme.

The revenue of the Intercolonial increased by $741,165, during the past fiscal year, working expenses were reduced by $682,951, the net profit was $623,164, and there was a net betterment of not less than $1,424,116, as compared with the previous year.

An increase of £155,168 in gross receipts is shown in the Grand Trunk report for the half-year ended June, passenger traffic yielding £95,000, freight and live stock £324,000 more than for the previous half-year. The number of passengers carried increased 173,245. The freight and live stock increased 1,325,526 tons. The working expenses advanced £372,676, of which £139,586 was for maintenance of equipment, including £121,000 on locomotives, repairs and renewals, and £93,000 on the maintenance-of-way. Four hundred and sixty-eight thousand, nine hundred and thirty-seven additional train miles were run. Regarding the Grand Trunk Pacific, the directors report satisfactory progress on the Winnipeg, Lake Superior and prairie sections, but point out the great scarcity of labour in the mountain sections.

The Grand Trunk Railway Company has recently placed in commission on its northern division two telephone train despatching circuits. One circuit is between North Parkdale Junction an

Burlington Junction, via Allandale, a distance of 145 miles, and the other between Allandale and Nipissing Junction, a distance of 165 miles. Train despatchers on each of these circuits are located at Allandale.

A summary of the traffic on the Sault Ste. Marie canals, for the month of September, 1910, is as follows:—

	U.S. Canal.	Can. Canal.	Total.
Vessel Passages No...	2,008	989	2,997
Reg'st'rd Tonnage Net	4,059,291	3,034,284	7,093,575
Freight—			
East Bound, Net tons	2,514,421	4,335,301	6,849,722
West Bound, Net tons	1,322,226	816,426	1,940,652
Total Freight, Net tons	3,836,647	4,953,727	8,790,372

The Trades.

Building.—Pronounced activity prevailed in nearly all the large centres in the effort to complete as much as possible of the outside work in hand before the advent of cold weather. The amount of building under way during the past few months has been considerably in excess of that in progress during the corresponding period of 1909. The number of building permits issued in October also compares favourably with previous years and gives promise of an active resumption of work in the spring of 1911. Work on interior finishing promises to be active throughout the winter.

Metal and woodworking.—These trades had a good month, factory employés of all classes being well employed.

Printing and allied.—Favourable conditions prevailed for workmen in these crafts.

Clothing.—Journeymen tailors were active from seasonal causes, and garment workers were busy. Boot and shoe workers were somewhat dull. Trade in rubber goods continued with little change.

Textile.—Cotton and woollen mills reported active conditions.

Leather.—The hide market has been quiet with prices receding. The leather trade has been active, and tanners, curriers, &c, were well employed. Trunk and bag makers had a good month.

Food and tobacco preparation.—Bakers have had a good month and confectioners a very busy one. Cigar and tobacco workers have been well employed.

Miscellaneous.—Barbers, laundry workers, retail clerks, &c, had a fair month.

Unskilled labour.—There was a general demand for labour of this class, the supply in some localities being exceeded, owing to rush of work in connection with the finishing of contracts for civic improvements, buildings, railway construction work, &c. Unskilled labourers have had a good season, with the prospect of active employment until the cold weather sets in.

Canadian Trade and Revenue.

Foreign trade.—During September, 1910, the total value of imports entered for consumption in the Dominion of Canada, was $38,861,256, compared with $30,446,439 in September, 1909. For the first six months of the present fiscal year ending September 30, 1910, the total value of imports entered for consumption was $223,464,221, compared with $173,200,432 in the corresponding period of the last fiscal year. The total value of domestic exports during September, 1910, was $24,110,936, compared with $23,548,330 in September, 1909. The total value of domestic exports during the six months ending September 30, 1910, was $127,525,432, as against $120,484,255 in the correspondent months of last year. During September, 1910, there were increases in exports of the mine, animals and their produce, agriculture and manufactures, and decreases in exports of the fisheries and the forest. The grand total of Canadian trade for September, 1910, was $64,457,069 compared with $56,601,753 in September, 1909, and for the six months ending September 30, 1910, $360,274,650, as against $304,390,068 in the corresponding months of 1909.

According to reports of Canadian Trade Commissioner received at the Department of Trade and Commerce, Canada, a marked increase in Canadian imports into Cuba took place in the year 1909. Co-operation on the part of Cana-

dian exporters to this island, the appointment of a permanent representative of wholesale firms and the erection of a produce warehouse operated by a Canadian company at Havana are strongly urged.

Imperial trade.—In Great Britain and the different Dominions of the Empire, openings for Canadian products are reported as follows:—The experiment of shipping peaches in cold storage (Crawfords and Fitzgeralds) to Glasgow, Liverpool, London, Bristol, Cardiff and Birmingham, inaugurated by the Department of Agriculture, Canada, brought surprisingly good results, the fruit arriving in very fair condition and being easily disposed of at remunerative prices. The experiment, it is expected, will create a large new trade in this staple. Canadian butter continues to give satisfaction in the markets of the United Kingdom, the only complaint being that the supply is not equal to the demand. A hardening of the market for Canadian canned salmon was reported in Australia. Canada's trade with Newfoundland is constantly increasing. In 1903–4, its value was $1,792,248, and it has been increasing each year until 1909 when it amounted to $2,180,867. During this period imports from the United States have remained practically stationary. The largest of Canadian imports is flour, which last year amounted to $1,445,342. Complaints are made of packages containing Canadian foodstuffs, especially cheese boxes. Gravenstein apples from Nova Scotia this year are favourably commented upon. The establishment of a Canadian Trade Commissioner for New Zealand has been favourably regarded by all classes of the community. The necessity of Canadian wholesale houses sending out authorized representatives is urged. A lighter make of Canadian machinery is recommended and the market for the same, it is said, will rapidly expand. A good opportunity for Canadians to control the printing paper industry is mentioned, but manufacturers must keep in close touch with the consumers. The advantage of ten per cent. in the tariff on several articles should secure to Canada a good proportion of the trade therein.

Some striking remarks upon Canada were made by Lord Brassey, G.C.B., in his presidential address at the opening of the Autumnal Conference of the Associated Chambers of Commerce, on September 21.

Domestic trade.—A good volume of business was reported moving, with nothing in sight to interfere with a continuance of favourable conditions. Autumn trade at retail has been generally satisfactory and wholesalers report good orders for winter lines of seasonable goods. Sales of dry-goods, especially of knitted goods, have been heavy, notwithstanding the mild weather. In groceries there was an easing in sugar prices, and a pronounced advance in the price of canned tomatoes; hardware trade was seasonably active with no decline as yet in the demand for builders' materials. Country trade was steady. Money was plentiful for crop handling.

The bank statement for September showed a continuation of the strengthening process. Paid-up capital and reserve fund showing an increase.

The annual statement of the Molsons' Bank shows an increase in new capital from $3,500,000 to $4,000,000 and in reserve fund from $3,500,000 to $4,000,000, discounts and deposits have also increased. An increase in the dividend from ten to eleven per cent. is foreshadowed.

The number of branches of Canadian chartered banks on July 30, 1910, was as follows:—

Ontario	995
Quebec	366
Nova Scotia	112
New Brunswick	71
Prince Edward Island	16
Manitoba	187
Alberta	182
Saskatchewan	247
British Columbia	151
Yukon	3
Newfoundland	6
Elsewhere	44
Total	2,380

Five years ago Canada had eleven clearing house points, of which three were west of the Great Lakes; of these, that of

Winnipeg was the only one between the Great Lakes and the Rocky mountains. There are now seventeen clearing houses in Canada, of which nine are west of the lakes, and of which seven are in the Prairie Provinces. During the year 1909, Regina established a clearing house, and in the present year Brandon, Lethbridge and Saskatoon have been added. The new points are daily clearing amounts which compare favourably in volume with some of the older clearing points, and the steady progress being made indicates a rapid rate of general business expansion.

Canadian revenue.—Canadian revenue for the month of September, 1910, amounted to $10,317,823.18, compared with $8,853,659.41 in September, 1909. The total revenue to September 30, 1910, amounted to $56,148,193.33, compared with $47,353,819.83 to September 30, 1909. The total expenditure on capital account during September, 1910, was $3,263,685.36, as against $3,967,321.48 in September, 1909. The total expenditure to September 30, 1910 was $12,430,136.31, compared with $13,213,063.60 to September 30, 1909. The leading items of expenditure during September, 1910, were : Public Works, Railways and Canals, $3,145,225.36, and bounties, $123,685.36.

Notes.

The twelfth annual convention of the Canadian Wholesale Hardware Association was held at Montreal, Que.

The fifth annual convention of the Union of New Brunswick municipalities was held at Woodstock, N.B., on October 19.

The annual convention of the Canadian Passenger Agents' Association was held at Quebec, Que., 150 delegates being in attendance.

The Elevator Commission appointed by the Government of Saskatchewan has adopted a unanimous report, which has been presented to the Premier of the Province.

Mr. George Howell has been appointed correspondent to the *Labour Gazette* for Calgary, Alta. and district, in the place of Mr. Edwin Howell who has resigned.

Several seizures of contraband opium were recently made by Canadian Customs' officials. Opium dens were raided at Vancouver, B.C., Winnipeg, Man., and other points. At the former a Chinese was fined for having opium in his possession unlawfully.

Enrollment in the various technical schools, night school classes, &c., which opened in several of the Canadian cities in October, has been unusually heavy, especially in the cities of Sydney, Halifax, N.S., Montreal, Que., and Toronto, Ont.

A delegation representing the National Association of Builders' Exchanges visited Western Canada during October to extend the organization of builders' exchanges in the leading cities of Western Canada and to affiliate them with the national federation. The associations in Regina, Sask., Calgary, Alta., and Edmonton, Alta., have signified their intention of joining the federation.

The inauguration of hydro-electric power at Berlin, Ont., was made the occasion of an interesting public ceremony on October 12. The Honourable the Premier of Ontario officiated at the button which turned on the power in the presence of prominent visitors from Toronto, Hamilton, and many other municipalities in Ontario, and of several thousand spectators.

The Fishermen's Union of Nova Scotia held its annual meeting at Halifax, N.S., on October 1. Many important matters were discussed. New legislation will be asked for, to provide better protection against beam and other trawlers, against the taking of lobsters by foreign fishermen in smacks during the close season, and against requiring fishermen operating motor boats to have engineers' certificates. Officers were elected as follows: President, Angus R. McDonald, Port Hood; Vice-president, Angus Harris, Long Beach, Digby; Secretary-treasurer, Bernard Cumming, Port Joli, Queen's County; Executive Committee, Charles H. Thomas, Herring Cove; James Meagher, Canso; A. D.

McEachern, Craigmore; Everett Harding, Little Harbour, Shelbourne.

An amendment to the By-law, regulating the height of buildings, was passed at Vancouver, B.C., during October. The amendment reads as follows:—

"No such building shall be more than fourteen storeys in height or more than 160 feet in height, provided, however, that where the base of any such building is 7,000 square feet or more in area and having a frontage of sixty-six feet, the main portion of the building may be ten storeys in height and may be 125 feet in height, but shall not exceed ten storeys in height or exceed 125 feet in height, and such main portion may be surmounted directly from the foundation footings and which shall not exceed 200 feet in height reckoned from the sidewalk or curbing to the roof of such superstructure and which shall not exceed eight storeys in height above such main portion of the building."

A statement just issued shows that the penny banks of the schools of Ontario are doing a very large business. London, with about 7,000 children in the public schools, has in banks $6,746.19, or nearly $1 per pupil. The following list shows the amounts to the credit of the public schools in different places:—

Oakville	$ 317.62
Port Hope	1,417.90
Orangeville	146.55
Galt	4,026.80
Guelph	2,248.13
Bowmanville	353.27
Ottawa	5,853.90
Hampton	738.90
West Toronto	3,506.89
Toronto	89,508.93
London	6,746.19
Preston	403.07
Collingwood	115.89
	$115,564.04
Accrued interest	209.35
Total	$142,680.84

II. REPORTS OF LOCAL CORRESPONDENTS.

SYDNEY, N.S., AND DISTRICT.

Mr. John Moffatt, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

THE conditions of the labour market during the month were very active. All the larger industries were fully employed, while the lesser works shared in the general prosperity. The steel and coal trades were active, as were also the foundries, factories, woodworkers, and the building trades. The Sydney cement plant during the whole season has been running day and night, the demand for cement being decidedly greater than last year.

The Sydney Steel Works continued very busy during the whole month, and increased outputs were obtained. A large supply of limestone and dolomite and iron ore, were placed in the stock bins for winter use, as the outputs this winter are expected to be much larger than last one. Much of the construction work is still unfinished, but a great deal has been accomplished during the year in the way of additions and improvements to the plant.

The Sydney mines steel plant had a good month, and all departments were actively employed. The prospects of the steel trade in this district are bright; there is considerable discussion as to the effect of the discontinuation of bonuses, hitherto paid to help to establish the steel industry of Nova Scotia.

The coal trade continued active, and prospects are now much brighter for a busy winter. The Domnion Coal Company had large outputs during October which will be kept up throughout most of the winter. Upwards of three hundred thousand tons will be banked at the collieries, and about two hundred thousand tons at the Sydney steel plant.

The Nova Scotia Steel and Coal Company had a very busy month, the coal outputs being much larger than in the month of September. Much development work will be carried on at the collieries during the winter season.

A large delegation of coal operators waited on the Nova Scotia Government, at Halifax, for the purpose of discussing reciprocity as it effects the coal trade. The general opinion throughout the largest part of the mining districts is against any reduction in the coal duty.

The Sydney Pressed Brick Company, which commenced operations at the end of last year, have found business very brisk. Pressed bricks are manufactured from granulated blast furnace slag. The Sydney plant is capable of turning out twenty thousand bricks in ten hours. The product has found great favour with tradesmen and others interested. Large quantities are being used in the erection of buildings in the Dominion Iron and Steel Company's plant, notably in the work being done by the American Coke and Gas Company. The Sydney academy is being built of these bricks. They have been used in the construction of several fine dwelling houses.

This industry while affording regular employment is utilizing what would otherwise be waste and cumbersome material.

The Dominion Iron and Steel Company has been using Sydney cement in the very important construction work which is going on this season, such as the new blast furnace, steam turbine plant, etc.

The technical schools opened during the month, and the attendance promises to be much larger than last year.

The building trades were busy and there are some large jobs still unfinished, but these are being rushed so that they may be completed before winter sets in.

Shipping was heavy, and near the end of the month produce from Prince Edward Island and other parts began to come in.

The wholesale and retail trades had a good month.

Labour both skilled and unskilled was fairly well employed, and the supply was equal to the demand.

The first county fair held in Sydney, opened during the second week of the month. The exhibits were of superior quality. The attendance was large, and interest in the fair seemed to increase until it was over. This is the second county fair held in Cape Breton, the last one being in North Sydney.

WESTVILLE, N.S., AND DISTRICT.

Mr. T. Hale, correspondent, reported as follows—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour throughout this district was very brisk in all departments, some of the collieries being shorthanded for loaders, which occupation the young men of the locality do not as formerly seek, preferring work in other branches. Shipments from the collieries during the month were some 9,000 tons less than in the corresponding period last year. For the nine months ending September 30, 1910, shipments from this district were about 250,000 tons, being a decrease of some 5,000 tons during the corresponding months of 1909. The buildings, houses for the miners and other residences, being erected by the Acadian Coal Company were nearing completion. It was reported that many Belgian miners would be employed in this Company's mines.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Since harvesting has been completed, farmers have been busy in fall ploughing, and marketing. Farm produce sells readily at good prices.

Fishing.—Salmon fishing by night was the chief occupation.

Lumbering.—Preparations were under way for what promises to be an active season.

Manufacturing.—Activity prevailed.

Mining.—In general, brisk conditions were reported, chiefly in the inland trade. The regular steamer carrying coal between the Drummond Colliery and the Quebec and Montreal markets has ceased operations for the season.

CONDITION OF PARTICULAR TRADES.

The building and metal trades were active, as were the printing, clothing

and transport trades. Butchers had a good month, and cigarmakers and tobacco workers had brisk conditions. The supply of unskilled labour was not equal to the demand.

HALIFAX, N.S., AND DISTRICT.

Mr. A. J. Smith, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during the past month has been dull. This state of affairs will continue to a greater or less degree (particularly among the building trades) until next spring. The chief features of the month were the completion and occupying of the addition to the Royal Bank of Canada, the opening of the new Chebucto road School, which cost $95,000 and has accommodation for 700 pupils, and the formal laying of the corner stone of the new Young Men's Christian Association building, which took place, with the usual ceremonies, on October 6. The work in this structure has made much progress, small night forces (no addition to the day staff) being employed. Prospects for future look much better for the building trade, as it is understood several sites have been sought, with the view of the erection of substantial structures, among the contemplated buildings being a new passenger agency for the Canadian Pacific Railway Company, as well as extensions of premises by certain local concerns.

Along the waterfront, matters have been quieter than usual, owing, among other things, to the falling off in the exportation of apples; but a big immigration year is expected, which, with increasing trade, should bring returns fully up to the average.

By the unanimous consent of the shareholders, at a meeting held on the twenty-fourth October, the Selliper Car Works were transferred to a new Company, to be known as the Nova Scotia Car Works. The new company, of which F. B. McCurdy is the head, purchased the entire plant, which will be increased to sufficient extent to turn out four times as much as the late Company. There will be built some 2,000 cars per annum, and 1,000 hands will be employed.

The Technical College established by the Provincial Government opened its winter courses on the twenty-fourth October. Mayor Chisholm, Superintendent of Education Mackay and Prof. Sexton (Superintendent of the College) were among those making addresses.

The branches taught will embrace: Business English, Practical Arithmetic, Algebra, Geometry, Bookkeeping, Mechanics, Drawing, Machine Design, Agricultural and Building Construction Drawing, Elements of Electricity, Dynamo Electric Machinery, Alternating Current Machinery, Element of Chemistry, Chemical Analysis, Pharmacy, Garment Making. There were 380 students enrolled the first night, and it is expected this will be increased to 500. Prof Sexton has intimated that as soon as circumstances will permit classes in mechanical pursuits will be started on a line suggested by the evidence given before the Royal Commission of the Dominion Government, which visited Halifax during the past summer.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The early predictions regarding the fruit crop, particularly apples, are being verified. The annual crop, which averages in the vicinity of 700,000 barrels, will hardly reach 165,000, which is probably the smallest in our recent history. Early frosts in June are the cause. But despite the smallness of the crop, there has already been some shipments to the English market, one consisting of 19,000 barrels.

Some late October wholesale prices:—

Butter, creamery, prints, 28c., per lb.
Butter, creamery, boxes, 26–27c.
Butter, creamery, 30 lb. tubs, 27c.
Butter, dairy, tubs, 23–24c.
Butter, dairy, ordinary, 20–21c.
Butter, dairy, prints, 24–25c.
Cheese, large, 12½–13c., per lb.
Cheese, twins, 13–13½c., per lb.
Eggs, fresh, 26c., per doz.
Beef, forequarter, 8–9½c.
Beef, hindquarter, 10–12c.
Lamb, 10c., per lb.
Mutton, 7–8 c., per lb.
Veal, 7–8½c., per lb.
Pork, 10–11c.
Bacon, 20c., per lb.
Hams, fresh, 16c., per lb.
Hams, smoked, 18 c., per lb.

The indications point to the number of applications for the full course term at the Agricultural College, Truro, being the largest on record. Last year the full number was forty-three, and this year the number expected is sixty. The short courses, which begin in January, also promise to have a large number. There are over 100 from Prince Edward Island alone; New Brunswick will send a good quota, which, together with the usual number from this Province, should insure a most successful year.

Fishing.—Local fishermen fared poorly. There being much disappointment at the smallness of the mackerel catch. Early in the month there were some half-dozen stops, when the mackerel taken varied from sixty to 400, but the total is small. Along the NovaScotia coast notably Liverpool, there has been fair mackerel stops, but nothing near the average. On the twentieth October some 15,000 were secured near Liverpool, but fully fifty per cent. were lost owing to the springing up of a gale. Much dry fish has been passed through the customs during the month, being mainly from St. Pierre, Michigan and Newfoundland.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, joiners, painters and decorators were quiet. Plumbers, lathers and plasterers had a fair month. Gas and steamfitters were more active than last month. Stonecutters and builders' labourers were dull. Electrical workers had a fair month. Boiler makers fairly well employed. Sheet iron workers on stove pipes and fittings were busy. Printers, pressmen, bookbinders were busy. Tailors and garment workers were more active than in September, but colder weather will be necessary to create normal activity. Bakers and confectioners were fairly active. Butchers and meat cutters were busy. Barbers were not as busy as in September. Transportation employés, railroad men generally, freight handlers by rail and water, etc., were better employed than last month. Unskilled labour was quiet.

AMHERST, N.S., AND DISTRICT.

Mr. A. D. Ross, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Conditions of employment during the month of October were smilar to those of September. The weather was on the whose favourable to building operations.

The Amherst Boot and Shoe factory had a large force of men busily engaged in building a large annex to its already extensive plant.

The Malleable Iron Company also made good progress in the enlargement of its plant. Building operations were also fairly brisk.

Our largest indutsry in town, the Canadian Car and Foundry Company, has received orders during the month that assure steady work until next June, and more are in view.

Taking conditions generally the month of October, has, on the whole, been very much better than the corresponding months of the past three years. There is somewhat of a depression in mining operations. The strike at Springhill still continues. J. R. Cowans, who has held the position of general manager for the past twenty years, has retired and will go to the head office of the Company at Montreal. His place is being taken by J. R. Sharp, who has been given the title of operating manager.

The Maritime Coal Railway and Power Company have closed down their mine at Chignecto owing to a shortage in orders but are operating to their full capacity at Joggins. Their output in the latter mine is steadily increasing and they are employing more and more hands.

The Eastern Coal Company, which has been endeavoring to locate a coal seam at Maccan Station for the past three years, ceased boring operations last week. This company has spent in the vicinity of $300,000 in bank head buildings, equipment and sinking operations, but, unfortunately were never able to locate the main seam.

Merchants report business steadily

improving during the month. Cash is more abundant and a more optimistic feeling prevails in Amherst at present than at any time for the past three or four years.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The season's crops are now about gathered and taken on the whole the farmers are well satisfied. The fruit crop, which does not play an important part in the section was a failure. The hay, grain and root crops were all above the average. Prices continued good.

Fishing.—This is an off season with fishermen, some oysters have been raked but the beds in the section have been sadly depleted.

Lumbering.—The lumber market has been rather dull, but the large operators have been preparing for the usual winter's cut.

Manufacturing. — Manufacturing industries have been very busy during the month. All are working full time.

Mining.—As noted elsewhere mining conditions have not been favourable, with the exception of the colliery at the Joggin Mines, operated by the Maritime Coal, Railway and Power Company, which is doing a thriving business, the other centers are working part time and are idle through different causes.

Quarrying.—The Maritime Gypsum Company has been actively at work all during the month, employing about eighty men and shipping their output of plaster to the New York market.

CONDITION OF PARTICULAR TRADES.

The building trades have been well employed during the month. There was a steady demand for bricklayers, masons, and carpenters. Iron moulders have had a busy month with steady work throughout. Machinists and engineers have been kept fairly busy. Electrical workers have been well employed. Wood workers report steady work, but upholsterers complain of dull times. Car builders were better employed than for years. Carriage and wagon makers were busy. Printers have been working steadily, but no great demand for extra hands occurred. The tailors all report a good month working with extra hands. Boot and shoemen were exceptionally busy. Trunk and bag makers were also well employed with some demand for extra help. Some demand for clerks and stenographers. Unskilled labour has been well employed and the prospects for steady work are excellent.

CHARLOTTETOWN, P.E.I., AND DISTRICT.

Mr. F. J. Nash, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market for October was somewhat similar to that in September, except that in the latter month the supply was somewhat greater than the demand. The weather on the whole was unfavourable for outisde operations. In the city the building of tanks, and the laying of pipe lines for the Standard Oil Company and work at the new Hearzt Memorial Hall were among the principal operations in the building line. In the early part of the month a new factory for the manufacture of glucose, dextrine and laundry starch from potato starch, was opened at Bridgetown. This season potato starch will be the only product made, but next season other lines will be taken up. The end of the month found practically all the crops gathered in and shipping under way. A steamer direct for Great Britain made two callings here, taking considerable quantity of hay, of which there was an exceptionally good crop this year. Bankers and wholesale merchants report business good. One new dry-goods firm opened up.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The autumn is closing off one of the best agricultural years in the history of the Province. Crops are abundant and prices high. The plant of the Cold Storage Company Limited began to handle hogs in the early part

of the month, the regulations respecting inspection are being more thoroughly carried out. The supply of farm labour is not quite equal to the demand. Several families arrived from England with a view to settling and taking up land here.

Fishing.—Oystering was practically the only branch of this industry carried on during the month, stormy weather keeping down the catch which was somewhat below the average.

Railway construction and employment.—The building of the Elmira branch railroad was the only work of importance in progress.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters and joiners, lathers, plasterers, painters, decorators, and paper hangers were active. Plumbers, gas and steamfitters were busy. Stone cutters and builders' labourers and other skilled trades were active, with unskilled labour well employed.

MONCTON, N.B., AND DISTRICT.

Mr. J. C. Graves, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

With supply and demand fairly well balanced, no unemployed, and steady activity in all the various fields of local labour, the month of October has been up to the average for this season of the year and on a par with September. Weather conditions have been favourable for outdoor work and building artisans have been active and in demand to complete contracts before the cold weather. The Paul Lea woodworking factory has been especially active and running overtime to meet the heavy orders for joiners' work and finishings. Work upon the Massey-Harris warehouse is well advanced, also upon the public wharf, both of which employ a considerable force. The Intercolonial Railway Company's gas planthouse is being doubled in size to forty by eighty feet, the old one not having sufficient producing capacity, and a large number of men are at work upon it. The City Corporation has also had a busy month, employing a fairly large body of men to complete sewer and water extensions, macadamizing and sidewalk work before winter. The Record Foundry, the cotton factory, and all other local factories and machine shops report steady activity and unchanged conditions. Custom's house returns for September showed duty collected $5,750 as against $5,590 in September 1909, and imports at $48,017 as against $44,438 of the previous year. Wholesale trade has been satisfactory and retail trade up to the average. Real estate has been quiet with quotations firm. Rents were unchanged but there is a wider range of choice than last season. No material change in hours of labour or rates of wages was reported. Relations between employers and employés were satisfactory.

Agriculture.—Farmers have been very active, potato digging, fall ploughing and ordinary autumn work taking their attention. The potato crop is of good quality but not up to the average in yield. Other root crops are fair. Hay is dull at $6-8 per ton loose. Most cheese factories closed October 31. The output for the season has been large. The wholesale price is 11 to 12 cents. Pork is plentiful at 10 cents per pound per carcass.

Fishing.—Shore fishermen report catches small.

Lumbering.—The outlook for winter operations is not as favourable as usual. Men are reported scarce, the wages demanded rate about $2 per month higher than last season.

Mining.—The Maritime Oil Fields Company Limited, is still developing the oil and gas areas at Lower Coverdale, and results are pronounced satisfactory. Fifteen wells have been sunk and capped at a capacity estimated at $10,000,000 cubic feet. The gypsum quarries at Hillsboro have been actively operated this season and about 125,000 barrels have been shipped.

Railway construction and employment.—The estimate of the National Transcontinental in New Brunswick, for September

totalled $280,795. The Toronto Construction Company on contracts 3 and 4 have now about 700 men employed, ballasting, and upon the sidings and yard at Napadogan, the divisional point. At Campbellton the Intercolonial Railway Company is constructing a twenty-eight stall locomotive round house, a power house and a heating fan building of concrete and brick. About 150 men employed and work well advanced.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were quiet, carpenters, plasterers and painters active, plumbers busy and builder's labourers in fair demand. The metal, engineering and shipbuilding trades may be reported active. In the woodworking and furnishing trades active conditions prevailed. Printers, pressmen and bookbinders reported active conditions. Journeymen tailors and garment workers were in good demand. Bakers and butchers were active. Tanners and curriers were quiet, but leather workers were busy. Barbers were active, clerks and stenographers were fairly active with demand limited. Hotel, restaurant and theatre employés were busy and laundry workers active. Passenger and freight traffic heavy and operating crews were active and in good demand. Trackmen were busy, also freight handlers, carters and expressmen were active. The demand for unskilled labour still continues good, no unemployed being noticed. The local supply barely sufficient to meet the demand. Labour bureaus still find difficulty in furnishing men for operating in other parts of the Province.

ST. JOHN, N.B., AND DISTRICT

Mr. W. H. Coates, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market continues buoyant, with all trades well employed.

The new school on Wentworth street s well advanced, and is hoped to have t closed in before the snow flies. The St. John Street Railway Company is making excavations preparatory to the erection of the new car sheds on Wentworth Street. The new shed will be of concrete, steel and brick.

Sayre's mill closed down for the season on October 10. Hilyard's mill was closed down for a few days for repairs. It started again on the seventeenth of October with only the rotary working.

The shipments of wood goods from St. John for the nine months ending September 30, 1910, shows an increase of upwards of 9,000,000 superficial feet. There were in 1909, 3,193 tons of birch, of which 2,930 went to Liverpool. In 1910 there were only 852 tons, of which 485 went to Liverpool.

The shipments for the month of September show the increase was largely during that month.

Bank clearings for the five weeks ending October 28 were $7,573,029, and for the corresponding period last year $7,424,625, being $148,404 greater in 1910 than in 1909, and $1,818,213 in excess of the four weeks ending September 22 of the current year.

The city cashier paid out $11,490.20 to the city labourers for the four weeks ending October 28. The market for Thanksgiving was well stocked. Turkeys are scarce, retailing at 28 cents per lb.; ducks and geese, $1.25 to $1.50 each; chickens, 18 to 20 cents per lb; fowl are plentiful, and retail at 16 cents per lb.; roast pork, 14 cents per lb.; lamb, (hind quarters), 14 cents per lb.; lamb (fore quarters), 11 cents per lb.; veal roasts, 11 to 14 cents per lb. Moose steak, 20 cents per lb.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—The sardine fishermen down the bay have been reported to have had a good catch. There was shipped from Lepreau $7,074 worth of sardine herring in five days.

Railway construction and employment.—The estimates of the National Transcontinental Railway in New Brunswick for the month of September are as follows:—

No.	Amount.	Contractors.
1	$ 50,807 35	G. T. Pacific.
2	30,332 02	J. W. McManus.
3	9,628.50	G. T. Pacific.
4	105,578.79	G. T. Pacific.
5	40,134.14	Willard Kitchen.
6	44,314.38	Lyons V. White.
Total...	$280,795.18	

No. 1 section should be ready for acceptance at the end of October; No. 2 section is now ready for operation, but details will not be completed until the end of the season; contract No. 3 is ready to be taken over any time; No. 4 will be ready this fall; No. 5 will not be ready for sometime; No. 6 is well advanced.

CONDITION OF PARTICULAR TRADES.

The building, metal and woodworking trades were active. Printers were somewhat quiet but other skilled and unskilled workers had a good month.

DISTRICT NOTES.

Burton.—The McLellan-Smith Lumber Company's mill was destroyed by fire on October 16. The mill was valued at $7,000, blacksmith shop and contents at $500, and the destroyed lumber at $500. Insurance $4,000.

Fredericton.—The Alexander Gibson Railway and Manufacturing Company's properties are to be sold at auction here on the 22nd of February, 1911, as the result of an equity suit brought for foreclosure of mortgages amounting to about half a million of dollars. An importation of over one hundred pure bred sheep arrived here for the New Brunswick Department of Agriculture from leading Ontario breeders. Fifty-three of these animals were sold at auction on October 25, and they brought a total of $1,012,50, an average of almost $20 each, the prices ranging from about $15 up as high as $35.50. The balance of this lot was sent to Newcastle and Moncton.

Minto.—A fire destroyed the roundhouse of the Central Railway on October 20, as well as two locomotives and one flat bar which were in the building at the time. The heating apparatus was also lost. The Paul Lea Company, Limited, of Moncton, has been awarded the contract for building the roundhouse for the New Brunswick Coal and Railway Company for $2,750.

St. Stephen.—Work has been commenced on the enlargement of the premises of the Maritime Edge Tool Company. The new building will be 35 feet by 80. The dam will be raised 4 feet to give an increased head of water, a new penstock built, and a larger wheel placed.

NEWCASTLE, N.B., AND DISTRICT.

Mr. James Falconer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market up to the last part of the month was fairly active, but the closing down of nearly all lumber mills for the season threw a number out of employment. However, a large proportion of these go to the woods, the wages offered being from $24 to $30 per month. The rate paid for teams was high. With the exception of hay, prices were unusually high, especially beef and pork. The labour market generally was quiet; a strike is unknown in this locality.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The season has been a very favourable one and farmers have housed their crops for the season. The hay crop was an extra good one, as was also the oat crop; both being above the average. The potato yield, however, was below expectations, August and September having been too dry. The want of rainfall also adversely affected the turnip crop and fall ploughing.

Lumbering.—Conditions were brisk, all those wanting work being able to obtain it at good wages. The cut is likely to be as good, if not better than usual, as very few old logs remain uncollected.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons are fairly well advanced with their work and will

soon finish for the season. Carpenters and joiners were busy and will continue so for another month. The Baptist Church and the Clark and Ferguson residences were finished.

QUEBEC, QUE., AND DISTRICT.

Messrs. E. Little and *P. J. Jobin, correspondents,* reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of October has been a good one for labour in general in this district and compared favourably with the month previous. Work has been begun on the new wing of the Departmental buildings here. This wing is to serve for the Library and for the Department of Education. Work on the terminals for the Transcontinental Railway should begin in November, as the municipal property required for this purpose will then be handed over. The demolishing of the buildings on this property will no doubt be carried on during the winter. The Provincial Government free night school will be opened on November 10 for the winter months.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Harvesting was about finished. The hay, grain and root crops have been above the average. Except in the case of hay, prices rule high.

Lumbering.—Some of the large mills have finished their season's cut, but by far the greater number are still working, and will continue doing so until prevented by cold weather. Some of the lumber companies engaged in cutting pulpwood will not operate next winter. These, however, are firms cutting on Crown timber limits for shipment to the States. Notwithstanding this, wages for bushmen are in excess of last year, being generally $30 per month, although some firms are offering $33, $35 and $40, which would be about $5 per month higher than last year.

Railway construction.—A railway siding a couple of miles in length has been built to Jonquière, Lake St. John district, in order to serve a new pulp and paper mill to be erected at that place to cost about $3,000,000.

CONDITION OF PARTICULAR TRADES.

Painters have been quiet but the other building trades have been busy, as were also the metal trades. Busy to active conditions prevailed in the printing trades. Boot and shoe workers were dull; the other clothing trades were active. Cigar makers were quiet and ice cutters and drivers dull. The leather trades were also dull. Railway employés, teamsters, expressmen and longshoremen were active; the other transport trades were either quiet or dull. The supply of unskilled labour was in excess of the demand.

DISTRICT NOTES.

Shawinigan Falls.—A new cotton factory has started operations.

Beauport.—Messrs J. A. Guérard & Company, contractors, have received the contract for the construction of a new silk and cotton factory. The building will be 150 feet long by 50 feet wide, four storeys in height and the contract price is $29,000.

Levis.—The first of the new winter ferry steamers, the *Plessis,* was launched from the shipyard of Messrs. Geo. T. Davis & Sons, at St. Joseph, Levis, on October 20. This vessel is built of steel, is 120 feet in length and 38 eight feet moulded breadth. She is fitted with powerful triple-expansion engines capable of forcing her through the heavy ice she will encounter in the ferry service.

SHERBROOKE, QUE., AND DISTRICT.

Mr. H. Logie, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour has been exceptionally well employed during October. This applies to industrial concerns. Also to unskilled labour. In connection with the latter,

the Bishop Construction Company which have the contract for the new dam and power house for the Sherbrooke Power and Railway Company, had a large force of men at work, and labourers were paid as high as 20 cents an hour. Many men are also employed in the construction work in connection with the extension of the street railway and the replacing of the rails throughout the entire system. In addition to the above, the city has a large force at work on the new reservoir. As a matter of fact if anyone was out of employment it was because he did not want to work. The various other industries were fully employed, running full time. The Jenckes Machine Company has a large contract getting in the flumes and water wheels for the new power company. The carpet company has changed hands, and it has been taken over by the Guelph Carpet Company. This latter company will install more machinery and greatly increase the output. This means more employment to carpet workers.

Wholesale and retail trade was active during the month.

The valuation roll has just been nomologated, and shows a total valuation of close on to six million and a half dollars. The census taken by the valuators show that there has been a steady increase in the population, and while the latter figures have not yet been completed it is estimated that the population will be close to 17,000. There has been a regular compaign started by the merchants and others to boom Sherbrooke as an industrial centre. The membership of the Board of Trade has been largely augmented, and it has been decided to appoint an industrial Commissioner to endeavour to locate industries here. It is understood that one if not two industries that will employ many hands have practically decided to come. They have been induced to come here by the fact that they can get cheap power.

There has been no unrest in the labour market during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are about finished with fall work. They report a good yield of grain.

Lumbering.—Lumbermen are getting their camps in order for winter work in the wood, but they find a difficulty in getting a sufficiency of men, owing to so much other work going on in the city.

Manufacturing.—All branches of manufacture are running full time, and there are plenty or orders ahead.

Mining.—The various mining centers are busy, and in some sections work is handicapped by the shortage of help.

CONDITION OF PARTICULAR TRADES.

All branches of the building trade were fully employed during the month. The metal and engineering trades were busy and all sections were running to full capacity. The woodworking trade was busy. Printers and book binders were busy. In some offices overtime was engaged in to keep up with the orders on hand. Tailors and garment workers reported trade good. Bakers, cigar makers and butchers were busy. Miscellaneous trades had a good month. Railway men were fully employed, although the street railway employés were laid off owing to the cars being shut down on account of work at the new dam. It was only temporary. Unskilled labour was very busy.

DISTRICT NOTES.

Scotstown.—The Guelph Cash Company hired twenty more men to work in the woods. The new Lingwick branch of the Canadian Telephone Company is completed and is now in operation.

Richmond.—The brick work on the new Grand Trunk Railway shops which are being erected has begun, and the work is being rushed to completion.

Bromptonville.—Mr. A. Sharpe, of Montreal, has been appointed manager of the Pearl Manufacturing Company. There are now thirty girls at work and twenty more will be added soon. This industry will be of great benefit to this place.

THREE RIVERS, QUE., AND DISTRICT.

Mr. Joseph J. Ryan, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions were very active during October and compared favourably with the preceding year, supply and demand being about even. The sawing season ended in the lumber mills, but all factories were running full time, those concerned in the building trade being very busy. Trade was good in general, although showing a decrease with preceding months. There was no change in rates of wages or hours of labour. The best of understanding prevailed between employers and employés.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were very busy and farm labourers in demand. Threshing was in progress on rainy days and farmers were ploughing during the fine weather.

Fishing was rather dull.

Lumbering was very active for a portion of the month only.

Manufacturing. — All factories were active.

Railway construction and employment was rather quiet.

CONDITION OF PARTICULAR TRADES.

All in the building trades were active. Iron moulders, iron workers and helpers, coremakers, machinists and engineers, steam engineers, electrical workers, linemen, metal polishers, platers, stove mounters, blacksmiths, bicycle workers, horseshoers and jewellers were fairly active. Wood workers, upholsterers, varnishers and polishers, wood carvers, carriage and wagon makers and pattern makers were well employed. Printers, pressmen, electrotypers and book binders were busy. Journeymen tailors, garment workers, glove makers and boot and shoe workers were very active. Bakers and confectioners, butchers and meat cutters, cigar makers and tobacco workers, tanners and curriers, and all employed in the leather trades, except the boot and shoe workers, were not very active. Barbers, clerks, stenographers, delivery employés, furriers, hotel, restaurant and theatre employés, laundry workers were fairly active. All employed for the transportation companies were fairly active. There was a good demand for unskilled labour, but the supply was equal.

DISTRICT NOTES.

The Gris Falls Construction Company is rushing the construction of the new pulp mill at the Cape de la Madeleine in this vicinity. Another mill will be built on the Ile de la Poterie.

ST. HYACINTHE, QUE., AND DISTRICT.

Mr. Victor Phaneuf, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market during October was active; the building trades had a better month than in the corresponding period of last year. Sash and door factories and all the woodworking establishments were active. The leather industry had a fair month, and more activity is expected in the coming months. The biscuit, musical instrument and boot and shoe factories were very busy. The Ames, Holden Company, Limited, is building a four-storey addition, 140 by 40 feet, to its plant, which will be ready for occupation about December 15. Business, wholesale and retail, has been fairly active. Banks reported a good month, with collections easy. There has been no change in the rates of wages or hours of labour. Relations between employers and employés have been cordial.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Harvesting being over, farmers are busy threshing. Fall wheat

was a good crop. Potatoes and other root crops were generally good. The crop of ensilage corn was a large one and there will be plenty of feed for cattle next winter. Apples were a failure in certain localities. The ground was favourable for fall ploughing, which was done on a large scale this year, indicating a larger area for cultivation next year. Dairy products sold well at very high prices.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters and joiners, lathers and plasterers, painters, plumbers and steam and gas fitters, as well as builders' labourers, had a good month. Iron moulders, iron workers and helpers, machinists, engineers, electrical workers, blacksmiths, boilermakers and horseshoers were active. Wood workers, upholsterers, varnishers, wood carvers, wagon makers, pattern makers were well employed throughout the month. Printers, pressmen and book binders were well employed. Journeymen tailors and garment workers were quiet, while boot and shoe workers had an active month. Bakers and confectioners, butchers and ice handlers were well employed. Tanners and curriers and all leather workers had a good month. Barbers, clerks, delivery employés, hotel and restaurant employés and laundry workers had an active month. Railroad employés were very busy. Teamsters and expressmen were busy. Unskilled labour was generally well employed.

ST. JOHNS AND IBERVILLE, QUE., AND DISTRICT.

Mr. A. D. Pepin, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market continued about the same. The building of cement sidewalks and crossings having been completed, the men employed by the Corporation found work elsewhere. The repair and extension work on the Trenton Potteries plant is being rushed. On October 3, the taxpayers unanimously approved the request for a bonus made by the Cluett & Peabody Company, of Troy, N. Y. The Company will build a factory costing about $100,000, and will employ at the start about 400 people. Another company also wants to settle here, and its demands have been taken into consideration by the City Council. The contract for the piers of the new free bridge between St. Johns and Iberville has been given out and the work will be started without delay.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are marketing their products, for which they find a ready sale at high prices. Prices of dairy products are steadily going up. An American firm has opened an office here, buying hay and straw on a large scale, to be shipped to the Eastern States.

Railway construction.—The pier work on the new Canadian Pacific Railway bridge is almost completed and the laying of the steel superstructure has been commenced, giving employment to a large number of men.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters and joiners, lathers, plasterers, painters and decorators, plumbers and steamfitters all reported a busy month. Stonecutters and builders' labourers had an active month. Iron moulders, iron workers and helpers, coremakers, machinists and engineers were well employed. Electrical workers, and linemen had a fair month. Shipbuilders, shipwrights and calkers were rather quiet. Tinsmiths, tool sharpeners, horseshoers and jewellers were fairly active. Wood workers, upholsterers, varnishers and polishers, wood carvers, carriage and wagon makers, pattern makers and gilders were well employed. Printers, pressmen, electrotypers and book binders were very active. Journeymen tailors, garment workers and hat and glove makers were very

active. Bakers and confectioners, butchers and meat cutters, ice cutters and handlers and tobacco workers were all well employed. Tanners and curriers, leather workers and saddlers were well employed. Barbers, clerks, stenographers, delivery employés, furriers, hotel, restaurant and theatre employés and laundry workers were busy. Railway conductors, engineers, firemen, telegraph operators, trainmen, switchmen, maintenance-of-the-road men, freight handlers, steamboat men, longshoremen, cab drivers and draymen were very active. Unskilled labour was active.

SOREL, QUE., AND DISTRICT.

Mr. J. A. Chênevert, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market continued active throughout the month for all classes of labour. Several buildings which were commenced last summer were completed during the month but the workmen employed on that work immediately found employment elsewhere.

There is plenty of work in the Government shipyards and machine shops, and men in all branches readily find permanent employment. The deepening of the channel to thirty-five feet will necessitate new dredges, tugs, lighters, etc., all of which will be built in Sorel. A number of machinists are now working nights.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have gathered their crops in good condition and the returns are as good as last year, there being more hay but potatoes being somewhat of a failure. The fruit crop is smaller, and the vegetable crop is fair, with the exception of tomatoes. Pastures were good throughout last summer and there was plenty of milk. The following is a list of local market prices:

Fresh eggs, 28–30c., per doz.
Butter, 25–26c., per lb.
Beets, 60c., per bushel.
Onions, 7–10c., per bunch.
Honey, cakes, 12–13c., per lb.
Honey, liquid, 8–9c., per lb.
Beef, hindquarter, 9–10c., per lb.
Beef, forequarter, 8–9c., per lb.
Beef, 12–14c., per lb.
Homemade cheese, 15c., per lb.
Pork, quarters, 12–12½c., per lb.
Pork, 11–13c., per lb
Poultry, 80–90c., per pair.
Turkeys, $1.25–$1.50.
Geese, 90–95c.
Salted skins, 11–12c., per lb.
Green skins, 8–10c., per lb.
Veal skins, 12–13c., per lb.
Sheepskins, 40–45c.
Black pudding, 10c., per lb.
Pork sausages, 15c., per lb.
Veal, 13–14 c., per lb.
Ham, 18–20c., per lb.
Bacon, 20–22c., per lb.
Mutton, $1.00–$1.25, per quarter.
Maple sugar, 10c., per lb.
Apples, $1.00–$1.20, per bushel.
Tallow, 7–10c., per lb.
Cabbage, 4–5c., a piece.
Beans, 10c., per quart.
Carrots, 2c., per bunch of five.
Turnips, 40c., per bushel.
Onions, 90c., per bushel.
Potatoes, 40–45c., per bushel.
Maple syrup, $1.10–$1.20, per gallon.
Ducks, 85c., per pair.

Manufacturing.—The activity of the last few months generally continued in manufacturing establishments. Orders were plentiful in most branches. Foundries and machine shops have work for more men than they can find.

Railway construction.—The Quebec, Montreal and Southern Railway Company will soon build a station in Sorel, the locality being an important point for the Company's traffic.

Navigation.—River navigation will stop in about a month and nearly two hundred vessels of all kinds will come into their winter quarters here, which means considerable work for our workingmen and manufacturers on repairs, etc.

CONDITION OF PARTICULAR TRADES.

Painters and plumbers were very busy, as well as journeymen tailors and bakers. Electrical workmen also had plenty of work. Carters and unskilled labour were very busy.

MAISONNEUVE, QUE., AND DISTRICT.

Mr. J. F. Girard, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

October compared favourably with the preceding month, and was much

more active than the corresponding month a year ago. Permits representing $2,157,900 in value, were taken out during the month, the principal buildings erected or under way being the Maisonneuve schoolhouse, the Post Office, the Bell Telephone Building, the City Hall and the shop of the United Shoe Machinery, which creates activity among the building trades. The same may be said of the other trades, which are very busy. There is no labour trouble at the present time and no indications of any. Business, both wholesale and retail, is very active.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—Factories in the Maisonneuve district are all very busy, several having increased their staffs.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, lathers and plasterers are in demand, as are plumbers and builders' labourers. The metal trades are active, and electrical workers and tin roofers are in great demand. Woodworkers are active. Printers and bookbinders are active, with pressmen in demand. All branches of the clothing trades are well employed. Bakers, butchers and cigar makers are in demand. The leather trades had a good month. Barbers are in demand; the other miscellaneous trades were active. Transportation employés were well employed in all branches. Unskilled labour is in great demand.

MONTREAL, QUE., AND DISTRICT.

Mr. G. A. Audette, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The revenue of the harbour of Montreal for September was much higher than for the corresponding month a year ago. The increase in local traffic is especially noticeable. The figures, which only amounted to $6,817 last year, show a total of $12,914. Duties paid on imports were $37,000 as against $28,000 in 1909. For the whole season up to the end of September there was a total increase of $45,949 in revenue. The number of ships entering the harbour was 571, being an increase of fifty-eight on 1909. Exports show a slight decrease, being $12,000 as against $12,500 in 1909.

The building returns for September show a large increase both in the number and value of the permits, being 506 and $993,386, as against 227 and $716,-840, respectively, in 1909. The total value of building permits taken out from January 1 to September 30 was $11,205,381, as against $5,650,412 last year, or an increase of more than $3,000,-000.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The month was favourable for the sale of products.

Manufacturing.—Factories were all very active.

Railway construction.—Railway construction was less active than during the month of September.

CONDITION OF PARTICULAR TRADES.

The building, metal, woodworking, printing, clothing, food and tobacco preparation, leather, miscellaneous and transportation trades were active. Shipwrights and calkers and steamboat employés alone were quiet. Unskilled labour was active.

HULL, QUE., AND DISTRICT.

Mr. E. E. Cinq-Mars, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Conditions in the labour market were active during October. Although activity in the building trades slackened through seasonal causes, employment is satisfactory. However, there is no great improvement over the same month last year. There is the same scarcity of hands for the bush next winter. Employment agents have to go out

of this district to get their full list of shanty men. The saw mills will soon shut and at Aylmer and Buckingham. In some of the mills, the amount of production has already been reduced, to allow the employés going early in the bush. The number of mill hands going to work at the construction of the Transcontinental Railway is smaller than last year, owing to a slight advance and additional comforts given the shantymen during the winter. Common labourers are scarce. All factories are working full time, except the saw mills. There is no work for corporations and no prospect from the municipality of work this coming winter. The Watters Axe factory, which has doubled its staff since last year is running full time, as is the Matthews ham and bacon establishment. The advance in mica is not having the expected effect for labour, all mine owners and mica manufacturers having a large stock on hand. However, hundreds of boys and girls are sure of employment in this industry during the winter months. Navigation will soon close. Work is now very active hauling pulpwood to the mills. The season has been very active. Building is dull.

OTTAWA, ONT., AND DISTRICT.

Mr. W. Gilchrist, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of October witnessed considerable change in opportunities for employment in the Ottawa district. The influx of farmers' sons and hired help from agricultural sections to the city, met satisfactorily the demand for shanty hands. Experienced lumber jacks are still scarce, but ordinary labour for the woods is now reported about adequate. Wages are from $28 to $32 per month with prospects pointing to a drop of $2 per month. McLachlin Bros. closed their two saw mills at Arnprior on October 24 and the Pembroke Lumber Company at Pembroke closed a short time before. Both concerns curtailed the season a little owing to shortage of logs. Many of the men released went to the woods. The staff of civic corporation men was reduced to 800 at the end of the month compared with 1,200 during the busiest period of the summer. A few contracts are under way on the streets which give employment to a large number of men. The city proposes to retain as large a staff as usual during the winter and will construct many sewers. The minimum wages will be $1.80 per day. The factories are all busy. The Ottawa Car Company is building a $10,000 addition to its factory. Building operations are very brisk. September permits amounted to $161,000 as compared with $172,000 last year. The bank clearings reported for September were $16,616.850, an increase of sixteen per cent. over the corresponding month of 1909. The four weeks of October showed each increases ranging from $300,000 to $500,000. Merchants found business slightly impaired by the mildness of the month but there was no evidence of a scarcity of money.

The assessment Commissioner reported an increase in the valuation of real property amounting to $8,510,980, the greatest on record. Business assessment was raised $981,229. Every property of the 40,450 assessed was increased and there are only 130 appeals lodged. The total assessment of the city is now $63,347,970. The population advanced from 83,360 to 86,106.

The plumbers who went out on strike at the Grand Trunk Hotel in September are still out. Some of the strikers' places have been filled. The delay in plumbing has not yet affected the progress of the rest of construction in which several hundred men are engaged.

The Ottawa Police Commissioners decided to grant every man on the police force one day's rest in seven and the staff of seventy-five men will be increaesd by twelve new constables to make this possible. Up to the present time there has been no definite compensation to the men for Sunday work.

The minimum salary of first class male teachers in the Ottawa public schools was raised from $950 to $1,100 in order to secure better teachers for

some vacancies that have to be filled. The lady teachers, whose maximum salaries run from $450 to $850 have applied for increases.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are busy marketing. Pork is firm at $11 and $12 wholesale; lamb, $5 per cwt., live weight; eggs (new laid) 40 cents per dozen; butter, 25 to 28 cents. The demand for meat has reduced the number of live animals to a minimum.

Lumbering.—Four of the Ottawa valley lumber mills have ceased operations for the season. The total cut in the mills is expected to be lower than last year. Good pine continues to be very much in demand and wholesale prices are $10 per M. higher than a year ago. There will be considerable box lumber and mill culls carried over the winter.

Manufacturing.—Manufacturing of paper is brisk. The mills are favoured with normal water power conditions for this time of year. The clothing factories are busy.

Railway construction.—The Ottawa Electric Railway is building eighteen new pay-as-you-enter cars.

CONDITION OF PARTICULAR TRADES.

Builders of all kinds are in demand. Stovemounters and electrical workers are busy. There is activity in horseshoeing and other branches of blacksmithing and a movement to increase rates charged the public. Carriage makers and wood workers are actively occupied. The Ottawa Car Company which employs all the woodworking trades, has orders for cars from Ottawa, Vancouver, Montreal and Quebec. Printers are very busy. The clothing trades are crowded with autumn orders and many are overdue. Butchers are very busy. Leather trade is quiet. Furriers are very busy, also delivery employés. Steamboat employés on the Rideau Canal were hindered by low water, but business is brisk on the Ottawa river. Freight handlers are busy. Unskilled labour is more plentiful than a month ago.

KINGSTON, ONT., AND DISTRICT.

Mr. William Kelly, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market continued active in Kingston during October. The Canadian Locomotive Works Company laid off a few men, but have since secured several large contracts. The management declares that they are short of hands, both skilled and unskilled. Manufacturing in other lines continued active. The building trade also continued actively. The corner stone of a Jewish synagogue to cost $12,000 was laid, and other important work was rushed along. The cost of new construction work amounted to $17,576. For the nine months of the year the total was $172,315. It is not likely that the total value for the year will exceed $200,000. Grain men had a busy month, and are expecting a brisk movement until the close of the season.

During the quarter ending September 30, the exports from Kingston to the United States were the largest on record, being $91,927.14, as compared with about $75,000, during the September quarter a year ago. The increases were chiefly in hay, feldspar, plumbago and fish.

Several sessions of the Royal Commission on Technical and Industrial Training were held here and created a lively interest. Representatives of capital and labour appeared before the Commission and gave important evidence.

Six of the public school teachers are petitioning the Board of Education for salary advances, as follows:—(1) The minimum salary to be $400; (2) That in 1911, the yearly increase be given on that minimum. A petition has also been sent to the Minister of Justice, Ottawa, by guards and instructors at the Dominion penitentiary asking that their salaries be increased.

There were no strkies, lockouts, changes in the rates of wages or hours of labour reported during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are busy and report crops generally up to the average. The apple crop will fall below the average, particularly in the winter varieties. Potatoes are also below the average. Oats are a good crop. Farmers are actively engaged ploughing, as recent rains facilitated the work.

Fishing was quiet.

Lumbering, manufacturing and mining were active.

CONDITION OF PARTICULAR TRADES.

All branches of the building trades continued active. Metal, engineering, shipbuilding and woodworkers were also active. Printers, tailors, bakers, butchers, leather workers, barbers, hotel, restaurant, laundry, theatre employés, and nearly all branches of transportation workers, as well as unskilled labour reported an active month.

DISTRICT NOTES.

Merrickville.—A $10,000 fire occurred in the Percival Plow and Stove Works here in the early part of the month.

Gananoque.—On the fourth of the month an elbow in a big steam pipe at the Gananoque Spring and Axle Works blew out and caused much trouble. Although the accident occurred during working hours no one was hurt.

PETERBOROUGH, ONT., AND DISTRICT.

Mr. J. Arthur Sharpe, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The steady improvement in industrial conditions, noticeable for several months, still continues, and the outlook for the winter months is very good. There is considerable outdoor work in progress and the industrial establishments are all working full time. The Mann Lumber Company has taken out a permit for an addition, the new part will be 50 by 114 feet. The cheese box factory which was destroyed by fire will be rebuilt. The Canadian Chicle Company will erect a factory thirty-five feet by seventy feet, four storeys high. The Peterborough Mattress Company will make extensions. "Barrie's Limited," recently organized here with a capital of $100,000 will manufacture fur and fur-lined garments. At the last meeting of the City Council a by-law was passed to provide for the borrowing of $12,500 to pay for the cost of the erection and equipping of the Isolation Hospital. The Exhibition this year was a great success, showing a surplus of $2,000. The population of the city as indicated in the assessor's returns is 16,923, and the assessment, $11,439,930.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are busy with the marketing of produce, fall ploughing and threshing. Root crops were injured by the drought. Potatoes were damaged by rot.

Lumbering.—The lumber mills of the city and vicinity have been running to full capacity as a consequence of the activity in the building trades.

CONDITION OF PARTICULAR TRADES.

The building trades generally were actively employed. Iron moulders, iron workers and helpers, core makers, machinists were active and electric workers and linemen were busy. Blacksmiths, boilermakers and horseshoers were active

Woodworkers, upholsterers, varnishers and polishers were active and pattern makers were busy. The printing and allied trades were well employed during the month. Journeymen tailors and garment workers were quiet during the first half of the month but busy the latter part. Leather workers were active. Railroad men were active, freight handlers were busy. Teamsters, cab drivers and expressmen report business good. Unskilled labour was well employed.

DISTRICT NOTES.

Port Hope.—The International Tool Steel Company will locate here, expecting

to start building next month. The corner stone for the new Canadian Northern Railway station has been laid, to be finished this fall. The town will build a hospital to be started this fall; $3,000 is subscribed to start work.

TORONTO, ONT., AND DISTRICT.

Mr. Phillips Thompson, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Both skilled and unskilled labour were actively employed during October. The weather during the month was unusually fine and warm for the season, so that outdoor work was continued almost without interruption. The building trade showed no apparent slackening, a large number of new contracts being undertaken, and the advance as compared with previous seasons was well maintained. The number of building permits issued during September was 626, representing an approximate value of $1,332,535, as compared with 522 permits, representing $1,046,065, for September, 1909. The number of permits issued for the nine months ending September 30 was 4,744, representnig an approximate value of $14,819,508, as aganist 3,767 permits, representing a value of $13,064,877, for the corresponding nine months of 1909.

The Board of Trustees of the Toronto General Hospital have let contracts for the new buildings to the amount of $1,014,700, including the surgical wing to be erected by J. C. Eaton at a cost of $276,000; the Cawthra Mulock building and Emergency hospital, $154,000; the medical wing, $260,000; and the administration building comprising the semi-public, the eye and ear, the nose and throat and the gynæcological wards, $324,700. The work of construction is now going forward.

The Board of Education has let contracts for the Annette St. school, in Ward No. 7, at $57,693, and for McMurrich school on Ossington Avenue at $51,900.

The Bank of Toronto has awarded a contract for its new buildnig on the corner of King and Bay streets, to cost about $1,000,000 to Norcross & Company, Worcester, Mass., as local firms were not able to handle the large amount of marble which will enter into its construction. The marble will be brought from Knoxville, Tenn., and cut in Toronto by local labour.

The Toronto Electric Light Company will build a five-storey brick storehouse on the Esplanade to cost $140,000.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were actively engaged in fall ploughing and seeding, harvesting root crops, and making preparations for winter. The weather was very favourable for farm work. Fall wheat has sprouted luxuriantly and looked well. Pasturage was generally good and the supply of feed for winter abundant. Many of the farmers have built new barns of modern type this fall. The Farmers' Dairy Company, of Toronto, was represented at the fourth annual meeting of the National Dairy Show of Chicago, where its exhibit was awarded the gold medal for certified cream and the diploma for certified milk.

Manufacturing.—Nearly all manufacturing establishments were busy with plenty of orders. The demand for machinery and electrical equipments was very good, as the opening of the provincial hydro-electric transmission system has given an impetus to manufacturing industry in Western Ontario, and many new enterprises are being undertaken. The development of the mining districts of northern Ontario during the summer has resulted in an increased demand for mining machinery and a number of plants are being ordered which will be forwarded as soon as the winter roads are in good condition. An increased proportion of the mining machinery ordered for the Cobalt, Gowganda and Porcupine fields is now manufactured in Canada. The Canadian Fairbanks Company, Limited, has received extensive orders this season for Nissen stamp mills, manufactured by the Fairbanks-Morse Canadian Manufacturing Company. The Canada Metal Company is erecting a two-storey brick

factory on Fraser Avenue, to cost $35,000.

Railway construction.—Owing to the depression of the Grand Trunk Railway tracks west of Bathurst street a new station for the West end will be necessary, which will be erected at the Exhibition grounds, immediately west of Dufferin street. Vice-president D. D. Mann of the Canadian Northern states that the section of the new Canadian Northern Ontario road from Toronto east of Trenton will not be open for passenger traffic before June 14 next, though the Company may be able to handle freight before that date.

CONDITION OF PARTICULAR TRADES.

All the building trades were actively employed. Boiler makers, blacksmiths, moulders, machinists, structural steel workers, sheet metal workers and electricians had a long month. Brass workers, jewellers and silversmiths were active. The woodworking trades, including piano workers, were well employed. Printers, bookbinders, pressmen and stereotypers had plenty of work. Custom tailors were active, specially towards the close of the month. Garment workers, hat and cap workers, whitewear operatives and furriers were all well employed. The trades engaged in food and tobacco preparation had steady work. The bread drivers have organized a union. Leather workers were active. Hotel and restaurant employés, barbers and laundry workers were fairly well employed, but not so busy as during the summer and early fall. Clerks and salesmen were fairly active. Railway employés were busy. Street railway men, teamsters and expressmen had an active month. Sailors and longshoremen had been mostly laid off for the season. Unskilled labour was generally well employed but recent arrivals find little demand at this season.

NIAGARA FALLS, ONT., AND DISTRICT.

Mr. Hewlett Green, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

With the possible exception of some hotel and restaurant employés and a few builders' labourers, there were no unemployed working people in this city and district in October.

New works contracted for and commenced included the armoury for the 44th Regiment and a fire station at the south end of the city. The latter is to be finished by February.

The building trades continued to be very active and farmers reported a difficulty in getting apple-pickers. General business was good.

Power service by the Ontario Hydro-Electric Commission was inaugurated in Berlin.

The Queen Victoria Niagara Falls Park Commission received tenders for building two more sections of the Niagara boulevard, also for extensive works at Queenston Heights Park.

The city will supply electric power to the Hawes-Von Gal Hat Company during daylight hours at $8 per horsepower per annum, and water at 6 cents per thousand gallons.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Weather conditions have favoured farm work. Though the apple crop is light, a scarcity of pickers was reported. Grape cutting was finished. Corn and some root crops remain to be handled. Threshing was about finished.

Manufacturing.—It may fairly be said that all factories were busy in October. Concerns reporting this condition included the Ramapo iron works, Niagara Falls Machine & Foundry Company, Cyanamid Fertilizer Works, Shredded Wheat Company and Spirella Corset Company. Among those reported very busy were the McGlashan-Clarke and International Silver Company (cutlery), the Niagara Paper Box Company, Niagara Neckwear Company, Niagara Falls Can Company and Dominion Suspender Company. There was a demand for female factory hands. Planing mills were very busy.

Other industries.—The Ontario Power Company continued to employ a large number of labourers and a considerable force of skilled mechanics in the extension of its power-house.

CONDITION OF PARTICULAR TRADES.

The building trades were all active. A number of new buildings were started and the outlook for this class of labour was good. Winter weather will cause some cessation of out-of-door work. Stonecutters were, as has been the case for some time, very quiet. Builders' labourers were not very busy.

In the metal-working and allied trades conditions continued most favourable. Electrical workers were active. Printers were generally active. Journeymen tailors were active. In canning factories the rush season was over. A considerable number of foreigners, largely women, employed in fruit handling and canning during the busy season returned to Buffalo and other places where they live. Barbers, office and salespeople were fairly active, hotel and restaurant employés quiet, laundry workers in demand. Railway employment on steam lines was good,—on electric lines quieter. Trackmen were active. Steamboats on the lakes and Niagara river engaged in the passenger and fruit carrying had practically closed their season. Teamsters were very busy. Unskilled labour was well employed.

DISTRICT NOTES.

Chippawa.—The Norton Emery Wheel factory will be enlarged.

Niagara-on-the-Lake.—A by-law for waterworks improvements was carried.

Port Colborne.—The roof was on the new Hedley-Shaw mill and machinery was being installed. Marine drills and dredges were lying-up for the winter. Grain traffic down the Welland canal was heavy and the elevator was very busy.

Welland.—The townships of Crowland and Humberstone carried seven by-laws to provide fixed assessments, railway privileges and permanent roads for industrial concerns about to locate on the outskirts of Welland. The Billings-Spencer works was running night and day and will be enlarged. The United Motors Company will manufacture airships. Tenders were invited for waterworks extensions.

Fort Erie.—The season was closed at Crystal Beach and other resorts on Lake Erie. The large number of persons employed in hotels, restaurants and places of amusement have left, and steamboat services have been discontinued.

ST. CATHARINES, ONT., AND DISTRICT.

Mr. Jas. A. Wiley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

October proved another good month for labour. The market was active to busy, with supply and demand well balanced. The building trades continued active with sufficient on hand till the closing in of severe weather. Civic improvement work continued to be a feature of the month's employment. Including street pavements, sidewalks, curbing and sewer work, fifteen miles have been constructed during the season to date. Contracts were awarded during the month for the pavement of several streets which will be done next season, as work in hand will give sufficient employment till the close of the present season.

Canning factories are running full time and some overtime, with a demand for more labour.

The Monarch Knitting factory, less than a year located in the city, are employing about 150 hands and are seeking more labour. They will build a branch factory elsewhere in the Province to secure the additional help which cannot be had here.

Business, wholesale and retail, was good.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The fruit growers were still busy with the late fruits, shipments of which were heavy.

Manufacturing.—All mills and factories were running full time, in a few cases there was a demand for labour.

CONDITION OF PARTICULAR TRADES.

The allied building trades were active to busy, with sufficient work in hand for

the season. The metal and engineering trades were all active. Woodworkers, upholsterers, varnishers and polishers, carriage and wagon makers, and coopers were active. The printing and allied trades had a good month's employment. Journeymen tailors, boot and shoe workers were busy. Bakers and confectioners, butchers and meat cutters were busy. Ice cutters and drivers, cigar makers and tobacco workers were active. Tanners and curriers, leather workers, saddlers, trunk and bag makers were active. Barbers, clerks, stenographers, delivery employés, furriers, hotel and restaurant employés and laundry workers were active. All branches of transportation were active to busy, with trade good. Unskilled labour was well employed.

DISTRICT NOTES.

Thorold.—Labour generally was well employed for the month. The Colonial Wood-Product Company, a new concern, is erecting an additional building, 45 x 75 feet, in which new machinery will shortly be installed.

Merritton.—All mills and factories were running full time, and all branches of labour were well employed. The wiring installation for the multiple variable speed electric drive for the paper-making machine in the new Lybster Mill, owned by the Lincoln Paper Company, Merritton, has just been completed, and is one of the finest pieces of electrical work in Canada. This is the third mill in the world with the electric drive, the other two being at Lyons Falls, N.Y.

Port Dalhousie.—Favourable conditions prevailed in the labour market.

HAMILTON, ONT., AND DISTRICT.

Mr. P. Obermeyer, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Industrial establishments have all been running steadily and have employed all the available labour. There were practically no skilled workers unemployed, and places could have been found for more men in several factories. The building trades had a good month; in fact, the supply of labour was not sufficient to meet demands. Contractors for the buildings of the Oliver Chilled Plow Works were not able to get the structures ready for occupation for this season, and orders for 400 carloads of plows for the Argentine Republic had to be transferred to the Company's works at South Bend, Indiana. Extensions to factories and buildings for new industries continued to be a feature of the building situation, and these will provide work for builders for many more months.

The total value of building permits for the month of October, 1910, was $317,330, compared with $247,350 for October, 1909, an increase of $69,980 over October, 1909. Bank clearings for the month were $9,285,377, compared with $8,016,968 in October, 1909. The total assessment for 1911 is $47,712,961; last assessment, $42,280,923. The population, as returned by assessors, is 73,538, an increase of 3,230.

There were no labour disturbances during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—There is a scarcity of good apples and potatoes. Cauliflower and cabbage were plentiful and cheap. Wholesale quotations for dressed hogs declined about $1.50 per cwt., during the month, but the retail price remained the same.

Railway construction. — Among the applications for railway extensions that will be made to the Parliament at Ottawa during the coming session is one of the Southern Ontario Pacific, a subsidiary company of the Canadian Pacific Railway Company, for authority to construct a line from Guelph Junction to Hamilton, and the belief is that work will be begun on this line either during the coming winter or early in the spring.

Manufacturing.—Among the new industries locating in Hamilton is the Acme Motor, Carriage and Machinery Company. This is a merger of the Baynes Carriage Company, of this city, the American Road Machinery Company,

of Goderich, and a group of automobile makers of Detroit, Mich. Automobiles will be built in this city, and the Goderich works will turn out carriages. About 150 men will be employed here. The Diamond Glass Company will build a $100,000 plant in the east end. Bottles, fruit jars and canners packages will be manufactured by automatic machinery. The Belleville Cider and Vinegar Works is looking for a site for a factory. The Canada Steel Company has started work on its plant, with a $10,000 building. The works, when completed, will cost $400,000. The International Harvester Company is building an addition to its woodworking department, 100 x 100 feet and is also adding another warehouse at a cost of $60,000. The Garlock Packing Company has purchased the factory formerly occupied by the Ontario Tack Company. The Hamilton Mirror Plate Company is enlarging its factory. Wagstaffe, Limited, fruit preservers, is adding a $30,000 structure to its works. The Standard Sanitary Manufacturing Company, of Toronto, has purchased a $15,000 site in this city, on which it will erect a handsome building. Burrow, Stewart & Milne, iron founders, have purchased a site in Winnipeg, on which a warehouse will be erected. The Company intends opening a branch in Winnipeg instead of doing its business through agents, as formerly. The land cost $17,500, and the building to be erected will cost about $25,000. The Gurney Scale Works is also adding a new building to its equipment.

CONDITION OF PARTICULAR TRADES.

The workers in all lines of industry were kept busy during the whole of the month. Skilled workers in wood, iron and steel were in demand by some of the new industries whose plants are nearing completion, and carpenters, plasterers and labourers were also being advertised for. Garment workers were particularly busy. Ten foreign workers in the clothing trade, who came to the city under conditions contrary to the immigration laws, have been deported, and the sub-contractor responsible for their appearance, was fined $600. Further prosecutions against others alleged to be implicated in the matter have been commenced. Teachers in the Collegiate Institute have asked the Board of Education for increases in salary, but the Board so far has declined to accede to any change. The maximum salary paid to Collegiate teachers in Toronto is $400 more than is paid in Hamilton, and in face of this it is almost impossible to hold local teachers when they get an offer to go to that city. The maximum salary in this city is $1,600, and the minimum, $1,200.

BRANTFORD, ONT., AND DISTRICT.

Mr. J. C. Watt, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour in all branches was well employed during the month, which compared favourably with September, and was better than the corresponding month of last year. The building trades were very busy, factory extensions, stores and private residences have taxed the number engaged in these trades to the utmost; in some cases, there has been a demand for more men. The iron trades were also very busy, the fall trade being exceptionally good. A company which will manufacture brass beds is erecting a large factory on Elgin street. The main building will be 310 x 73 feet, two storeys high, and another building 60 feet square; between 75 and 100 men will be employed. Local plasterers were granted an increase in wages on the seventeenth, of 5 cents per hour. The rate per hour is now 40 cents. About twelve men were affected. The Royal Commission on Technical Education visited Brantford on the eleventh. At the evening session considerable evidence was submitted.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were very busy, and weather exceptionally favourable. The root crop, particularly potatoes, is very heavy.

Manufacturing.—All lines were busy.

Railway construction.—The street rail-

way Company is extending its tracks to the factory district of Holmedale, which will be used for carrying freight, as well as passengers.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, joiners lathers, plasterers, painters and decorators, plumbers, gas and steam fitters were very busy. Iron moulders, coremakers, machinists and engineers, electrical workers, linemen, metal polishers, buffers and platers, stove mounters, blacksmiths, boilermakers and sheet metal workers were very busy. Horse shoers were active. Woodworkers, carriage and wagon makers, pattern makers and coopers were very busy. The printing and allied trades, tailors and tailoresses and shoe workers, bakers and confectioners were busy. Cigar makers and tobacco workers, leather workers and saddlers were active. Barbers, clerks, delivery employés, hotel and restaurant workers were steadily employed. Laundry workers were busy. Railway trackmen were active. Freight handlers were busy. Street railway employés were fully employed. Teamsters and draymen were busy. Cab men and carters were active. Unskilled labour was in demand.

DISTRICT NOTES.

Paris.—There was no lack of work. The factories and mills were busy.

GUELPH, ONT., AND DISTRICT.

Mr. Wm. Drever, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during October was active in all lines. All engaged in the building trades had a good month, with good prospects ahead as long as weather permits. The Canadian Pacific Railway Company has let tenders for the new passenger station, and work has been commenced thereon. The Grand Trunk Railway Company had a large gang of men employed on the new switch at the Diamond. The yarding has been extended about half a mile. This will greatly increase the facilities for freight traffic.

In manufacturing there were very few idle men, and prospects are good for a steady winter's work. The Guelph Textile and Weaving Company has moved into its new factory, and will employ some additional men. The Rowen, Ogg Shoe Company is putting in new machines, and expects to be running in a month's time. Tolton Brothers have built a large addition to their box factory, to be used as a storehouse. The space now used as a storehouse will be used to meet their increasing trade. Wholesale and retail merchants report a fair month. The Brussels carpet weavers strike is still unsettled.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have had a very busy month; fall ploughing, threshing and harvesting root crops. They report root crops exceptionally good.

CONDITION OF PARTICULAR TRADES.

Bricklayers, carpenters, lathers and plasterers had a good month; also painters, plumbers, steam fitters and builders' labourers. Machinists, coremakers, iron moulders and iron tube-mill workers were actively employed. Electrical workers and linemen were very active. Stove mounters, horse shoers and blacksmiths were busy. Piano makers, carriage makers and pattern makers had a fair month. Printers and allied trades were busy. Journeymen tailors fairly active. Garment workers were busy, and textile workers were well employed. Carters, teamsters and expressmen had a good month. Unskilled labour was well employed, with supply and demand about equal.

BERLIN, ONT., AND DISTRICT.

Mr. R. F. Gofton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of October was an exceedingly busy one, all classes of labour being

fully employed, with an increased demand for skilled and unskilled help. Good progress was made on new buildings, especially on industrial establishments and public buildings. The Batz Brothers factory, which was destroyed by fire, will be rebuilt in Berlin, and excavations for the new establishment have commenced. Commercial activity and bank clearings were reported favourable. Business, both wholesale and retail, was satisfactory. There were no changes in rates of wages or hours of labour, beyond overtime. According to the assessment return, the population of Berlin is now 14,600, an increase of 936 inhabitants. The assessed value of real estate is $6,764,551.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy during the month harvesting the root crop, which is very good, delivering sugar beets to the factories, fall ploughing and apple picking. This last crop is a light one, and the prices per barrel, high, from $2.75 to $3 per barrel for winter varieties. Market prices of commodities were:—

Butter, 25–26c., per lb.
Eggs, 27–30c., per dozen.
Chickens, 30–55c., each.
Ducks, 60–70c., each.
Geese, $1.25 –$1.35, each.
Potatoes, 70c., per bag.
Apples, $2.00–$3.00, per bbl.
Pears, 40c., per basket.
Farmers' cheese, 15c., per lb.
Limburger cheese, 20c., per lb.
Apple butter with crock, 30c., per lb.
Small vegetables, 5c., per bunch.
Honey, 12½c., per lb.
Grapes, 20c., per basket.
Sheet cream, 10c., per qt.
Fish (herrings) 10 c., per lb.

Lumbering.—Activity prevailed.

Manufacturing.—On the whole, very busy conditions were reported, some of the factories working overtime.

Railway construction.—Work was progressing rapidly on the Peoples' Railway, the abutments for the bridge over the Grand river are being built.

CONDITION OF PARTICULAR TRADES.

The building, metal and woodworking trades were active, as were also the printing trades. The clothing trades reported a busy month. Active conditions prevailed in the food and tobacco preparation, leather, miscellaneous and transport trades. Unskilled labour was very busy.

WOODSTOCK, ONT., AND DISTRICT.

Mr. J. Markey, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There has been very little change in industrial and labour conditions here since last report. The favourable conditions continue, and the outlook was never brighter. Practically all the factories are working full time, many of them overtime. The report from the Canada Furniture Manufacturers is that they were never so busy before. They have been working overtime with a full staff, something very unusual. The Karn-Morris Piano & Organ Company reports a business increase of $35,000 for the first three months of the financial year beginning in June, as compared with the same period a year ago. The Thomas Organ Company also reports conditions to be very satisfactory. The two wagon factories are very busy, and the same applies to practically all the factories in town. Indeed, it is many a year since there was so much encouragement and so little complaint.

There is still some demand for extra labour, both skilled and unskilled. At the Stewart Stove Works there is room for a few skilled men—pattern makers, nickel-platers and polishers—as well as for some unskilled labour. The Karn-Morris Company would give employment to a few cabinet makers, and there is a demand for unskilled labour at the wagon factories.

CONDITION OF PARTICULAR TRADES.

The building trades are steadily occupied. Painters, paper-hangers and decorators are busy. Iron moulders are busy. Woodworkers are busy, both in the building trade and in factory work. Upholsterers, wood-carvers, carriage and wagon makers are all busy. Printers a e

fairly busy; but there is no demand for men. The clothing trades continue good, and employment is steady. The food and tobacco industries are steady. Tanners and leather workers report business good. There is some slight demand for extra unskilled labour.

STRATFORD, ONT., AND DISTRICT.

Mr. Joseph T. Carlin, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market has been very active during October, showing considerable advance over the corresponding month of last year. Outside work of all kinds, especially in the building trades, was brisk. Large gangs of men are engaged in erecting posts and stringing wires preparing for Niagara power. The city Assessor finds an increase this year in the value of real estate of $330,450. The population of the city is estimated at 14,848, an increase of sixty-nine persons over last year.

Wholesale and retail business houses did a good trade. No change in rates of wages or hours of labour, and no trouble in the labour market, were reported.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are busy ploughing. The markets have been well attended during the month, and good prices prevail. Potatoes are a very good crop.

Manufacturing establishments were very busy, with plenty of orders ahead.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, lathers and plasterers were busy. Painters, paper-hangers, plumbers and builders' labourers were active. Iron moulders, workers, machinists and linemen were busy. Blacksmiths, boilermakers and jewellers did a good trade. Woodworkers, upholsterers and carriage and wagon makers were active. Coopers and stave factory workers are doing a good business. Printers were busy. Bookbinders did a good trade. Journeymen tailors and garment workers were very busy, and boot and shoe repairers were active. Bakers, confectioners and butchers were active. Cigar makers were steadily employed. Harness makers were busy. Barbers, clerks, and delivery employés, hotel, restaurant and laundry workers were busy. Railway conductors, engineers, firemen, trainmen, switchmen and freight handlers were active. Cab drivers, draymen and teamsters were busy. Unskilled labour was equal to the demand.

DISTRICT NOTES.

St. Mary's.—The Horse Shoe Quarry has received an order from New York for 90,000 tons of stone, to be supplied next spring.

Goderich.—Good progress is being made in the erection of the two new cement elevators at the harbour. They will be ready for work this month. Each of the new elevators will have a capacity of half a million bushels, which will double the grain storing capacity of this port.

LONDON, ONT., AND DISTRICT.

Mr. A. Woonton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

This month was similar to the previous one as regards labour conditions, and workers were generally all engaged. On the railways business was very brisk; and in the factories and foundries conditions were exceptionally active. In a number of cases, overtime is being worked, as in McClary's tin department, Perrin's biscuit and candy factory, McCormick's biscuit and candy factory, Somerville's paper-box factory, and others. The outdoor trades alone do not show up well, and prospects are poor. Wholesale and retail trade shows a general improvement.

A fire which destroyed a livery stable, with the loss of one employé and a number of horses, was also the cause of an adjoining cigar factory being flooded with water, destroying the stock, and occasioning the loss of about two week's work for sixty employés.

The Technical Commission appointed by the Dominion Government, sat in this city on October 17 and 18, and a number of business men and representatives of the Trades and Labour Council and Board of Trade gave evidence before them, on the need for such education for boys of from fourteen to sixteen years of age.

In the business section of the city the Insulated Wire Company, of New York, is laying conduits with electric wires to connect with stores, and for street lighting by Niagara power, which is expected here about December 1. The street railway Company is also relaying rails, and in the spring the streets are to be recoated with asphalt.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The potato crop in this district is exceptionally heavy, and prices much lower than last year, single bags selling for 60 cents, while by the load they can be bought for 50 cents. Winter apples are very scarce, and householders will be unable to get a supply.

CONDITION OF PARTICULAR TRADES.

In the building trades there is very little work. Moulders and iron workers are very busy. Machinists are busy. Electrical workers are exceptionally busy. Metal polishers, brass workers, stove mounters, boilermakers and sheet metal workers are busy, as are carriage and wagon workers. Car builders are only working five days a week, but coopers are very active. In the printing and allied trades all branches report trade very good. Journeymen tailors are very busy. Garment workers and boot and shoe workers are busy. The two large biscuit and candy factories are working overtime. Cigar makers are busy, and tanners and curriers are exceptionally busy. Paper-box makers are working overtime three nights a week. Railway train crews state that this has been an extra busy month. Unskilled labour has had a fair month, but prospects are not over favourable.

ST. THOMAS, ONT., AND DISTRICT.

Mr. J. A. Killingsworth, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During the month of October there was a decided revival of activity in the building trades. A considerable number of building permits were issued and many exchanges made in property. The weather conditions made possible general activity in all branches, and with continuance of favourable weather, outside work will be continued until the winter months.

St. Thomas ratepayers will be asked in the near future to vote on a by-law permitting the city to lend $30,000 to the Monarch Knitting Company for a period of five years. This Company has branches in St. Catharines, Dunnville and New York. Employment will be given to at least 200 hands at the opening of the factory, and the Company demands a guarantee that that number will be procurable when business is commenced, this number to be increased as business develops. The highest wages will be paid. Women workers will be in special demand, and steady employment will be given.

The Nursery Shoe Company is fast getting the factory in first-class condition and already the city population has shown an increase as a result of the location of the factory in this city.

The various industries, including the railway shops, have been busy during the month, and the prospects for an active winter are bright. The recent increase in railroaders' salaries has increased the spending power of that class of citizens, and the result is shared by all business concerns.

The Trades and Labour Council, the Industrial Committee and the City Councillors are working together in advertising St. Thomas to outsiders, and are in touch with a number of prospective industries who are desirous of locating in a live, up-to-date city.

Unskilled labour is well employed. There is a steady demand for skilled

mechanics, especially machinists familiar with railway shop work. There is no friction in the labour market between employer and employé.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—Local industries have been very busy during the month of October. Railway shopmen were well employed, with the demand for skilled labour greater than the supply.

Agriculture.—Root crops in this district were very satisfactory. Farmers are at present engaged in threshing crops, and in doing such work as the open weather will permit. Markets have been well attended by buyers and sellers.

CONDITION OF PARTICULAR TRADES.

The open weather and the absence of cold have been favourable to bricklayers, masons, plasterers and mechanics doing outside work or inside open work. As a result, mechanics engaged in this capacity have been fairly well employed. Railway-shop machinists, blacksmiths and boilermakers report an active month. Other shop employés were well employed. Printers were well employed. Journeymen tailors were busy. Conditions on the railways entering the city have been very favourable to those employed in the traffic service. The demand for and supply of unskilled labour has been about equal.

CHATHAM, ONT., AND DISTRICT.

Mr. Alex. Gregory, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour during October has been in greater demand than in the preceding month. The building trade has been brisk with a constant demand for skilled mechanics, particularly for factory hands and machinists. Planing mills were working overtime the latter part of the month, and carriage and wagon factories were crowded with orders. The Merritt Bent-Goods mill has had a very successful month and was enabled to employ a large number of hands at high wages.

The Swift Motor Car Company reported the month fully better than the preceding one. The city still has a large amount of paving on hand and will furnish employment for a large number of men of the unskilled class late into the fall. No strikes or lockouts were reported.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have been very busy, owing to the continued fine weather and have succeeded in harvesting their corn crop and are now harvesting their sugar beets. They have experienced considerable difficulty in securing labourers to go to the country.

Railway construction.—The C. W. & L.E. Electric R. R. has its branch line to Pain Court completed and is running cars over the road.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons reported very little new work. Carpenters and joiners, lathers and plasterers were busy. Painting and paperhanging were active. Pluming was very active and builders' labourers were well employed. Machinists and engineers, electrical workers, line men were busy. Metal polishers, buffers, platers and brass workers were very busy. Blacksmiths, boiler makers and sheet metal workers had a good month. Wood workers, upholsterers, carriage and wagon makers were crowded with orders. Printers, pressmen and bookbinders were exceedingly busy. Journeymen tailors, garment workers and boot and shoe workers had a splendid month's work. Bakers and confectioners, butchers and meat cutters were busy. Cigar makers and tobacco workers were fairly well employed. Barbers, clerks, hotel, restaurant and theatre employés were active and laundry workers busy. Carters and draymen, teamsters and expressmen were busy. Unskilled labour was well employed.

WINDSOR, ONT., AND DISTRICT.

Mr. D. Mitchell, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Activity prevailed during the month, especially in the building trades. Thirty permits for residences were issued in September, being the greatest number in that month in the history of the city. Notwithstanding the fact that buildings have been rapidly erected, a house famine exists in Windsor, and vacant houses were not to be found. Real estate has increased from ten to twenty-five per cent. during the past three months. The Windsor Laundry and Overall Company has started operations on its large new plant and gives employment to 100 hands. The Postum Cereal Food Company's plant has been completed and employs 100 hands. The Penberthy Injector Company is building a $20,000 addition to its works. The Michigan Central Railway now uses the tunnel both for passenger and freight traffic and has tied up its transfer boats, which it is offering for sale. Wholesale and retail merchants reported trade brisk.

CONDITION OF PARTICULAR TRADES.

The building trades were active, there being a demand for men in nearly all branches. The metal trades were also active and reported good prospects. Woodworkers were busy, as were also the printing trades and journeymen tailors. Garment workers were in demand. Food and tobacco preparation employés were fully employed. The leather trades had a good month. Barbers had a fair month while clerks, delivery employés, hotel and laundry workers were in demand. The transport trades were fully employed as also was unskilled labour.

DISTRICT NOTES.

Sandwich.—A slight labour disturbance occurred at the salt works, regarding the nature of a part of the work and forty workers quit work, but after the Company had explained matters they returned to their employment, having been out for only one hour.

SAULT STE. MARIE, ONT., AND DISTRICT.

Mr. F. A. Denman, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

October was a good month in nearly all branches of labour, there being a shortage in the building trades. Plans were nearly completed for the reopening of the Sault Ste. Marie Pulp and Paper Company's sulphide mill, which has been closed for some years. Ship canal employés have received an increase in salary. The Algoma Steel Company's blast furnaces had the largest output since it began operations. Work on the Government dock extension has ceased for the season.

CONDITION OF LOCAL INDUSTRIES.

Normal conditions were reported in agriculture, fishing and mining. Lumbering was brisk.

Manufacturing.—The Algoma Steel Company's new rolling mill for structural shapes and merchant bar is nearly ready for operation. Work on the various new plants for the Lake Superior Corporation is progressing as rapidly as possible.

CONDITION OF PARTICULAR TRADES.

The building trades were very busy and the other skilled trades active.

PORT ARTHUR AND FORT WILLIAM AND DISTRICT.

Mr. F. Urry, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There has been work for all in every branch of trade and general labourers have been in greater demand that could be always supplied.

The building trades and city improvement work has continued, many of the buildings being pushed ahead as fast as possible to roof them in before winter.

Commercial activity has been greater than last month, but the docks have not been very busy.

The wholesale and retail trade report steady business for the month.

There has been no changes in wages or hours of labour, except in the wages of street car employés, who, for months have been asking for better conditions and have met the Joint Commission Board of the two cities. A slight raise in wages was granted at the meeting of the Commission on Wednesday, October 26th.

The men on strike in connection with the Canadian Northern Railway carmen resumed work this month.

The teamsters of Port Arthur waited on the City Council on October 17, asking to make a fair wage clause of 60 cents an hour for man, team, and wagon, instead of 50 cents as at present. The petition was referred to the Board of Control.

CONDITION OF LOCAL INDUSTRIES.

Lumbering.—Men are assembling for the lumber camps. Lumbermen are reporting a dearth of men on account of so many going West on railway construction work, wages offered by lumbermen for lumber and tie camps are $35 to $40 per month.

Railway construction.—Railway construction gangs have been largely recruited from these cities and the demand for men is still brisk.

Other industries.—City improvement work, the work on construction of the dry docks, Port Arthur, construction work of Grand Trunk Pacific Railway Company at Fort William has called for numbers of labourers.

Street improvements in Port Arthur and Fort William this year have employed thousands of workmen, sheet asphalt and asphalt blocks have been largely used as street pavements and the main street of both cities now present a clean and business-like appearance.

The street railway system, which is owned jointly by the municipalities and governed by a joint Board of Commissioners has been extended in both cities, and this has given work to numbers of men.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, stonecutters and carpenters, lathers and plasterers have all been fully occupied during the month, as also have the plumbers, painters and general labourers. In fact, every trade in connection with building has been working full time. Electrical workers, linemen and sheet metal workers have all been busy. Local blacksmiths have had a full month's work. The printing and allied trades have been busy during October; the clothing trade has been steady, but there is not much work for journeymen tailors and garment workers. Bakers, confectioners, butchers and meat dealers have had a steady month, also clerks, stenographers, delivery employés, teamsters and expressmen. The freight handlers had not been busy, as freight traffic has not been heavy. The work at the coal docks has been brisk and heavy shipping orders have been sent west during the latter part of the month. There has been a heavy shipment of grain from the elevations to eastern ports, and all elevators report a busy month, especially the last two weeks.

WINNIPEG, MAN., AND DISTRICT.

Mr. John Appleton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

As compared with September there has been no material change in labour conditions. The weather has remained open and favourable for outdoor occupations. Business generally has been satisfactory and in volume greater than in the previous year.

Bank clearings for the month show a gain of 6.6 per cent. over those a year ago; for the ten months of the present calendar year the gain is 29.8 per cent. The actual clearings for October amounted to $104,341,220 and the total for the year to date to $725,554,893.

Bankers report that payments are being well met here and that a large amount of money is in circulation. Some of the banks are taking advantage of the provisions in the Bank Act to issue emergency circulation. The cause of this is not the requirements of grain moving wholly but the heavy movement in cattle which has continued steady throughout the present month.

At the beginning of the month a strike of the employés of the Winnipeg Electric Street Railway Company was threatened and would have occurred if orders from the international office of the street car men's organization had not arrived forbidding the strike. The cause of the trouble was the dismissal of certain men for breaking rules. The men charge discrimination on the part of the management and impute to the Company a desire to remove from their employment certain officials of the men's union. The matter is being submitted to arbitration in accordance with the conditions of the Industrial Disputes Investigation Act.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The crop is coming to market more actively at the end of October than at any prevoius period of the present crop moving period. Up to the present time the amount of wheat that has passed inspection is approximately 30,000,000 bushels or about 5,000,000 bushels less than last year at the end of October. So far the season has been excellent for fall ploughing, although in the clay districts more rain would have been of assistance.

Railway construction.—The only difficulty the contractors have had to contend with is the scarcity of suitable men. The weather has been excellent and rapid progress has been made on the lines under construction.

Lumbering.—There is already a keen lookout for good men for the lumber camps this winter. At Prince Albert there is employment in prospect for fully 3,000 men, according to a report made by the Secretary of the Board of Trade at that point.

CONDITION OF PARTICULAR TRADES.

October is the first month in the present year that the building permits have fallen behind the record of last year. The statistics compiled at the building inspectors' office show the following:—

	Permits.	Bldgs.	Cost.
October, 1909	215	255	$ 531,850.00
October, 1910	270	310	530,150.00
Ten months, 1909	2,327	2,742	8,901,600.00
Ten months, 1910	3,069	3,653	13,662,950.00

All classes of workmen have been in request and the demand for these at outside points has also made itself felt in Winnipeg.

DISTRICT NOTES.

A plan for the assisting of British workmen to bring to Canada their wives and families has been put into operation in Winnipeg. A fund has been raised upon the guarantee of business men; out of this, men who have proved themselves worthy in the employ of citizens will be given advances with which to bring their families here. A large number of workmen were found in the city who had been able to reach Canada, but, in order to get enough money to bring out their wives and possibly in many cases four or five of a family involved an amount that would take some years to save. As it would be an advantage to the workmen and also to the country generally there was a very ready response to the proposal on the part of citizens. A very considerable sum has been guaranteed. The first family brought out under its auspices arrived on Thanksgiving day.

Navigation on the Red river closed on October 31; 181 commercial vessels were passed through the locks at St. Andrews and 391 pleasure crafts. This is the first season the locks have been in operation.

BRANDON, MAN., AND DISTRICT.

Mr. E. Fulcher, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally, has been well employed during October. This is particularly true of the building trades; every available man being pressed into service. The exteriors of many of the large buildings have been completed, but work on the interiors will be continued for a long time. The concrete work of the basement for the new Canadian Northern Railway hotel and station is almost completed; it is expected to have the station part finished this year. A central heating plant has been installed and it is now possible to have houses and business blocks heated from mains running under the principal streets. The plant has already been tested by the few cold days and has proved a success.

The Hanbury Manufacturing Company has just closed its saw mill for the season. Some 5,000,000 feet of lumber have been cut this season, making a record for the firm.

The labour market was free from unrest.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Threshing is practically over, and the majority of the farmers have found the crops better than anticipated.

CONDITION OF PARTICULAR TRADES.

Bricklayers were busy and carpenters and joiners, lathers and plasterers very busy. Painters, plumbers, steamfitters and builders' labourers had a good month. Iron workers and machinists were busy.

SASKATOON, SASK., AND DISTRICT.

Mr. A. B. Jones, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The conditions of the labour market was exceedingly active, especially among the building trades. October as a rule is the busiest month in the year, every effort being put forward by builders to push exterior work to completion before the winter. The new Sand Lime Brick Company has completed its plant and is turning out brick in sufficient quantities to supply the demand. The Saskatoon Milling Company was busy installing the machinery in its new 300 barrel mill, and expects to commence grinding early in November. Exceptional activity has been shown in bricklaying, lathing, plastering, and the cigar making trades. Transportation by rail has been very brisk owing to the heavy shipments of wheat and large consignments of building material. Wholesale and retail trade was very brisk, as evidenced by the number of new wholesale houses being built and additions made to retail stores. Bricklayers, plasterers and building labourers have had a slight increase in wages. Work on the Saskatchewan university building is progressing very favourably. The only drawback being non-delivery of material, which is usual at this time of the year, owing to the congested state of traffic.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The weather having been ideal for the threshing, and preparing the land for next season's crop, great activity has been shown in the agricultural industry. In the immediate vicinity of Saskatoon the yield has been much better than was expected earlier in the season and has been less expensive to the farmers to harvest, owing to the short straw. The grade is extra good and prices fair. On the whole the farmers will experience a fairly favourable season, the principal drawback being a scarcity of hay.

CONDITION OF PARTICULAR TRADES.

The building trades have been fairly well employed during the month. Bricklayers, plasterers and builders' labourers have had an extra good month, while carpenters, painters, decorators and paper hangers, plumbers, gas and steamfitters and stone cutters have had a fairly good month. Linemen, blacksmiths and sheet

metal workers have been very busy; while engineers and electrical workers have been fairly well employed. Printers and pressmen have had a good month. Journeymen tailors have been very active. Bakers, butchers and cigar makers have also been very busy. Leather workers and saddlers had a good month. Barbers, clerks, delivery employés, hotel and restaurant employés and laundry workers have been active. All railway employés, carters, draymen and teamsters have been busy.

REGINA, SASK., AND DISTRICT.

Mr. W. B. McNeil, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour throughout the past month, in all branches was well employed; if there was anyone idle it was not on account of his being unable to procure employment.

The demand for labour was general, having slightly improved over the preceding month; and was considerably more favourable than during the corresponding period of last year.

The present conditions warrant fair opportunities for employment, especially in the painting and paperhanging trade where it is apparent, the supply is not equal to the demand.

The new freight sheds are now occupied.

The Regina Clearing House has finished its first year and from now on the returns will be watched with increased interest, for it will be possible to compare the figures each week with those for the corresponding week of last year. When the question of a clearing house was first discussed by the local bankers, it was felt by some of them that the volume of business was not large enough to warrant the establishment of such an institution, but the results have proved that it was a wise move.

The year's clearings were as follows:—

Total clearings for year ending Sept. 1910	$47,700,672
Average monthly clearings	3,975,056
Average weekly clearings	917,321
Average daily clearings	157,428

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Threshing has been in progress and in a few weeks more, operations will have ceased.

Manufacturing.—The automobile business is on the increase, as evidenced by a new company having been formed and the contract let for building a garage of large dimensions.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were rather active, occasionally the demand being greater than the supply. The same applying to carpenters, joiners and plasterers. Painters and paperhangers had a very good month and from present indications, conditions will remain for a considerable time to come, the supply being unequal to the demand. Plumbers and steamfitters were busy, also stone cutters and builders' labourers, the latter being in demand. Electrical workers were busy. Bicycle workers were quiet. Printers and the associated trades were very active. Journeymen tailors were busy, as were garment workers. Confectioners had a good month. Bakers were in demand. Butchers were active but cigar makers were quiet. Barbers were active and in demand. The supply for clerks, stenographers and delivery employés meeting all demands. Hotel employés were active, as also were the laundry workers; freight handlers were busy and in demand. Teamsters had a good month. There is a continued demand for unskilled labour.

MOOSE JAW, SASK., AND DISTRICT.

Mr. T. Backus, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during the month has been very active—better comparatively, than the corresponding period of last year. All branches of the building trades were working at high pressure, and labour in every department was in good demand. So far the weather

has been favourable for building operation, and judging by the very large number of residential foundations being erected in all sections of the city, contractors are preparing for considerable winter work.

On the whole, it may be stated that the early promises of great activity in the building trade this year have been amply fulfilled, and when the complete figures are available, 1910 should prove to be the most active building year in the history of this city. Business generally has been excellent during the past month, both wholesale and retail houses reporting brisk trade. Money seems to be plentiful as evidenced by the great activity in real estate. On every hand are gratifying evidences of prosperity.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have been busy with fall ploughing, for which the weather has been favourable. On every hand threshing reports indicate better crops in this district than were expected, and the district as a whole comes out with a very good average. While here and there, especially in the newer settlements, one hears of poor crops, on the other hand many cases are reported of very high yields, the latter, of course, being on the heavier and well cultivated land. In this respect the results of the last season may have taught many careless farmers a beneficial lesson.

CONDITION OF PARTICULAR TRADES.

Bricklayers, carpenters, plasterers, lathers, painters and decorators have all been very active, also electrician linemen, and unskilled labour. Transportation employés, such as railroad conductors, engineers, firemen, trainmen, switchmen, trackmen, freight handlers, etc., have all been well employed. Printers, pressmen and allied workers were busy; also blacksmiths, boilermakers, moulders and iron workers. Barbers, laundry workers, clerks, stenographers, hotel, restaurant employés, draymen, teamsters were all active and there were comparatively few unemployed in the city.

CALGARY, ALTA., AND DISTRICT.

Mr. George Howell, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions in and around Calgary for the past month have been exceptionally active, and from present prospects will continue so for some time. All classes of workmen in the building trades are in good demand, the supply not being equal. An eight or ten storey fireproof office and store building is being figured on. T. J. S. Skinner also intends to erect a seven-storey structure on Eighth Avenue.

Thos. Underwood will erect a business block 100 by 100 feet on First street West, to cots $90,000.

The Canadian Pacific RailwayCompany has announced its intention to erect a large hotel in the city. The Merchant's Bank has purchased the Royal Hotel site for $200,000 and it is the intention of the management to erect a large building thereon.

Building permits for the month of October totalled $568,490, as against $403,050 in October 1909.

Customs returns show for October 1910, $65,000, as against $58,388.98 for October 1909.

Immigrants were seventy-nine as against seventy-two for October, 1909.

During the month there has been 485 quarter sections of land taken up.

Bank clearings were $12,796,081 as against $9,581,694 for October, 1909.

It is reported that the Hudson Bay Company has purchased a site on Eighth Ave. in order to erect an eight-storey building thereon.

The City School Board has voted $500,000 for new schools.

The City Council has signified its intention to manufacture cement blocks during the coming winter.

The Ottawa Furnace Manufacturing Company has decided to erect a factory in this city.

Wholesalers and retailers report an increase in trade as compared with the

previous month, and a considerable increase over the corresponding period of last year.

The City Council has raised the trench diggers' wages from 25 cents to 27½ cents per hour, owing to the difficulty in obtaining men, to date from October 1, 1910; 800 men are benifited. They are also proposing to raise street railway employés' wages.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, joiners, lathers, plasterers, painters and decorators, plumbers, gas and steam fitters, stone cutters and building labourers had a very busy month. Iron moulders, iron workers and helpers, coremakers, electrical workers and linemen, and metal workers were very active. Blacksmiths, boiler makers and horseshoers had a fair month Jewellers were fully employed. Woodworkers, upholsterers, carriage and wagon makers, and coopers had a good month. Printers, pressmen, electrotypers, bookbinders were well employed. Tailors and garment workers had a fair month. Bakers and confectioners, butchers, meat cutters, and cigarmakers were active. Leather workers, saddlers, trunk and bag makers, were well employed. Railway employés and street railway employés, teamsters and expressmen were busy. Unskilled labour was in good demand.

EDMONTON, ALTA., AND DISTRICT.

Mr. P. C. Foley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Supply and demand in the labour market were well balanced during the month, showing an improvement over the previous month, and the corresponding month last year.

The volume of business continues to increase steadily, as shown by the following comparative figures:—

	1909	1910	Increase 1910 over 1909
Customs' Returns ..	$205,297	$ 254,010	24%
Building Permits....	1,973,672	1,808,205	
Bank Clearings.....	36,104,958	48,396,882	34%
Post Office (Stamps only).....	52,883	58,309	10%
Street Railway:			
Passengers carried	1,439,886	2,612,599	82%
Revenue.....	59,886	112,368	81%

While the aggregate value of building permits issued to date is slightly less than a year ago, the conditions in the building trades are very favourable. The apparent shrinkage in permits as compared with last year is accounted for by the fact that in September, 1909, permits were issued for several large buildings, construction of which is still in progress. The number of permits issued in September 1910 was 138, as against ninety-eight for September, 1909. These were almost all for residences rendered necessary to accommodate the increased population necessitated by the steady expansion in business.

Bank clearings which show the most substantial increase have gone up nearly $12,000,000 over the corresponding period last year. Street railway earnings have increased nearly a hundred per cent., over a 1,000,000 more passengers having been carried in the first nine months of this year than in the same period of 1909. Wholesalers and manufacturers report a gratifying increase in buisness.

One hundred men who shipped from Winnipeg about October 1 to work for Foley, Welch and Stewart, contractors on the Grand Trunk Pacific grade, west of Wolf creek refused to go to work after they arrived in Edison, and the majority walked back to this city.

Ten of these men were arrested at Entwistle by the Royal North-west Mounted Police, and brought to this city at the instigation of the contractors who claimed the men had broken their contract. The men were tried before Inspector Worseley who dismissed the case, the costs to be paid by the prosecutor. Out of 139 men who shipped from Winnipeg October 5, a large number deserted before Edison was reached, fourteen were arrested for breaking their contract, they were found guilty by Inspector

Sweetapple and sentenced to fourteen days in the Royal Northwest Mounted Police barracks at Fort Saskatchewan.

CONDITION OF PARTICULAR TRADES.

The Trades and Labour Council is endeavouring to have conditions improved in the railway construction camps, west of the city. Among the improvements asked is that restrictions be placed on employment agencies binding them to give more explicit information as to existing conditions to those seeking employment.

On the eighteenth instant, the plasterers went out on strike to enforce a demand for an agreement with the builders' exchange at a minimum rate of 70 cents per hour. Carpenters were thrown out of work on several jobs and unless the strike is settled in the near future a large number of finishers will be laid off.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have not yet completed threshing operations, but from reports received the crop in this district will average high. Grains and grasses from this district formed a large part of the Alberta exhibit which won the Grand State trophy at the Dry Farming Congress held at Spokane, Wash. The trophy is a $250 cup, given by the Governor of the State of Washington, for the best exhibit on the grounds. There were 410 homestead entries during the month as compared with 307 for September, 1909.

Mining.—As coal is delivered direct from the mines to the consumer in this district, operators have great difficulty in procuring the necessary teams required to work the mines to full capacity, they also report a shortage of miners. The usual number of farmers depended upon to haul coal are employed with the different railroad contractors throughout the district.

Railway construction and employment.—Great activity prevails in railway construction. Work on the Canadian Northern Branch to Athabasca Landing has been rushed this season and the grade is now within twenty miles of the landing. Contractors say the road will be in operation by the middle of next summer. Excavations for the piers of the Canadian Pacific Railway Company's high level bridge at Ninth street are almost completed and cement work will be started at once. At a depth of about twenty feet a vein of coal eight feet thick was encountered, and about 200 tons of coal of good quality was removed. It is being used by the contractor as fuel in the hoisting engines.

All classes of labour were well employed and the demand has never been greater at any time in the history of the city.

DISTRICT NOTES.

Fort Saskatchewan.—The Hydro-Electric project undertaken by the municipality of Fort Saskatchewan is assuming definite shape. A dam 400 feet long is being erected on the Sturgeon river and a power house will be built this fall. The capacity of the river at this point is estimated at 1,000 horse power.

Peace River Crossing.—The Government telegraph line has been completed to Peace River Crossing, 400 miles northwest of this city.

LETHBRIDGE, ALTA., AND DISTRICT.

Mr. J. M. Ritchie, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There has been during October a steady increase in opportunities for work. The supply may be greater than the demand but there are more men at work than during September.

There are two new joiner shops being fitted up with up-to-date machinery, and in this line Lethbridge is going to supply its own demands.

Retail trade is exceptionally busy. The weather has kept fine. Wholesale trade is good. The supplying of the surrounding district is keepnig up the activity. There has been no change in wages during the month. The labour

market has been free from strikes, lockouts, etc. The only complaint heard is from retail clerks in dry-good stores. There is an early closing by-law in Lethbridge, but some small stores disregard it.

CONDITION OF LABOUR INDUSTRIES.

Agriculture.—Farmers have been busy during the month. There has been a great deal of work done, the weather being fine.

Mining.—Operations are being pushed on an extensive scale, but mostly in a preparatory sense. Mines that can put out coal are all busy, and the trade increasing.

CONDITION OF PARTICULAR TRADES.

Bricklayers have been very busy. Carpenters have been rather unsteady in outdoor work but were improving towards the end of the month. Joiners have had a good month. Lathers and plasterers have been kept busy, several large jobs being in hand. Painters are fairly busy, and plumbers, steam fitters and stone cutters have been busy. Electrical workers were busy and linemen very busy. The demand for men is not being supplied. Blacksmiths were fairly busy. Sheet metal workers were busy.

NELSON, B.C., AND DISTRICT.

Mr. A. B. Docksteader, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market throughout Kootenay district has been active, except in the coal mines of the Crow's Nest Pass territory, where employment was on only a little more than half-time, the chief reason advanced being a shortage in the supply of railway cars to transport the coal, while the lumber companies are somewhat short of experienced men for their logging camps for the coming winter.

There were no changes in rates of wages or the hours of labour. Harmony prevails between employers and employés.

Italian capitalists are erecting a substantial macaroni factory at Fernie, B.C., the buildings being of concrete; this is said to be the first plant of its kind in Canada.
